10. Cotton, cotton linters, and cottonseed meal: Some cotton is now used in Chicago in local manufacturing processes. Considerable cotton is consumed in Canadian mills in the vicinity of Montreal. This Canadian export cotton now moves from southern points by rail. Cotton-forwarding companies have already been active in inquiring about arrangements available for the transfer of cotton on the Chicago River from river barges to lake boats, and

for transport for local delivery. The Department of Commerce estimate of these items totals approximately 140,000 tons. To be conservative, this has been scaled down to 100,000 tons. The savings are large. As cotton is now being shipped in the South by means of truck and barge transportation, it is believed that this movement might take place without the use of rail transportation, and that the estimate of savings per ton used in the table is conservative.

11. Clay and clay products: Fire clay and manufactured products of clay are produced in quantity in St. Louis, Ottawa, and in northern Illinois at Goose Lake. The rate on bulk fire clay from Coal City to Chicago is $1.45 per ton, plus the 10 percent emergency. Fire clay and clay products are consumed in Chicago in considerable quantities. The Department of Commerce estimates of tonnage and savings on clay are used.

12. Salt: Chicago is a large consumer of salt. It now moves to Chicago both from Louisiana and Michigan, the two products being of different quality. The Department of Commerce estimates are used. Salt is now received on the Chicago River by water. As no rail haul is involved in the downstream movement, the estimates of savings per ton are believed conservative.

13. Coal: The Department of Commerce estimated a movement of southern Illinois coal to Chicago of 4,000,000 tons. The consumption of coal in Chicago is in the neighborhood of 28,000,000 tons per year. Many Chicago River industries are consumers of coal. Domestic coal could also be delivered on the river at points where it could be distributed by truck, with considerable savings. The estimates of savings on coal are based upon the cost of transportation rather than joint rail and water rates. Southern Illinois coal is a high-quality fuel and already has a considerable Chicago market The movement at a rate below the existing rail rate would be predicated upon a favorable rail rate from mine to waterside, dependable 9-foot depths in the Mississippi River, and a back-haul for the boat line handling coal, which would be over 15 percent of the coal movement. The Department of Commerce estimate was based upon an assumption of an improved Calumet-Sag connection and ability to market coal in the Calumet area. It is not believed that the markets reached through the Chicago River would be so extensive or favorable as those in the Calumet area. The cargo available for back-haul would also be less with the Chicago River as the sole connection with Lake Michigan. It is therefore believed that the estimate of tonnage of southern Illinois coal should be reduced from 4,000,000 to 2,000,000 tons per year, with $400,000 savings.

14. Northern Illinois coal to Chicago: This coal comes from open-pit mines located in the vicinity of Coal City, Ill., about 6 miles from either the Illinois River or the navigable section of the Kankakee River. Coal could be hauled from Coal City to the waterside by either the Santa Fe, Chicago & Alton, or Elgin, Joliet & Eastern railroads. Estimates have been prepared of the cost of moving a considerable volume of coal by water, based upon costs of equipment in 1930, which carry 50 percent more equipment than needed for the average rate of movement, to take care of peak loads. These rates for long hauls run from 2 to 2½ mills per ton-mile. Therefore, the following rates, which are used in these coal estimates, are believed to be conservative:

Rail haul to waterside	$0.15
Loading	.10
Water haul, 53 miles at 5 mills per ton-mile (short haul)	.27
Total	.52

15. In the event that satisfactory arrangements could not be made with the railroads to haul the coal from mine to waterside, it should be possible to truck it there for 26 cents per ton. This would increase the total to 63 cents. The rail rate on this coal is $1.10. The savings would then be 58 cents by rail and water, or 47 cents by truck and barge. Savings of 47 cents per ton have been used in the summary.

16. Central Illinois coal to Chicago: This is a rail-and-water movement:

Existing rail rate to waterside near Pekin	$0.88
Loading	.10
174 miles water haul at 3 mills per ton-mile	.52
Total	1.50
Rail rate	1.65
Savings	.15

This figure is used in the present estimate.

17. Coal, northern Illinois to La Salle: A cement company near La Salle now uses over 250,000 tons a year of northern Illinois coal from the Coal City mines. This quantity has been used in the present estimate. The rail rate is $1. Using the same costs as for shipments to Chicago, $0.63 per ton, would show a saving of $0.37 per ton, or total savings of $92,500 for 250,000 tons of coal.

18. Grain: Much Illinois corn is consumed or sold in Chicago. The rate from Ottawa to Chicago is $1.90 per ton. The usual means of shipping corn is by farmer's truck or wagon to a country elevator at the railroad; thence by rail. Barge-line operators and farmers' organizations are cooperating in the construction of elevators and grain-loading facilities at a number of points, where they are collecting grain from a radius of about 25 miles, whence it is being shipped by water to Chicago from points north of Peoria, and to St. Louis, Memphis, and New Orleans from Peoria and points south. The savings to the farmers have been estimated at over 3 cents per bushel, or $1 per ton. The estimate of 100,000 tons northbound to Chicago comes from those who are ready to handle that amount. The estimate of 250,000 tons from Peoria and points south is a reduction from a figure of 650,000 tons in House Committee Document No. 4, Sixty-ninth Congress, first session. Slight changes in advantage of markets may cause a flow of grain movement either north or south from Illinois River points.

19. Iron and steel: Chicago is the cheapest producer of iron and steel in the country. There is already a considerable consumption of these items in Joliet, Peoria, St. Louis, and lower Mississippi River ports. The Department of Commerce estimate contains items of almost one and one half million tons of this commodity moving south from Chicago. The barges loaded with iron and steel will have to be specially constructed for navigation through the Chicago River; thence, by open lake to the steel district, which will result in added expense for the movement unless they are able to squeeze through the existing Sag Channel, which will also involve additional expense, but of a different amount. Because of the added expense, it is believed that an estimate of 500,000 tons is reasonable. Based upon joint rail-and-water rates, the savings given by the Department of Commerce average $1.23 per ton.

20. Lumber: The estimate of 230,000 tons of lumber from southern ports to Chicago is taken from the Department of Commerce report. The savings are estimated at $300,000, and are taken from the same source. They are based upon joint rail-and-water rates.

21. Silica sand: Silica sand is produced adjacent to Ottawa, Ill., and is used in the manufacture of glass, and for molding in the cast-iron and cast-steel industry. It is consumed in large quantities in Chicago, Detroit, and Pittsburgh, and in smaller quantities in St. Louis, Peoria, Joliet, St. Joseph, Mich., and many other points where iron and steel castings are made. The estimate of tonnage is derived from estimates of the Ottawa Chamber of Commerce. The haul from Ottawa to Chicago could be combined with a movement of steel from Chicago south, and the commodity would move as a return cargo. No rail haul may be involved.

22. General merchandise: The item for general cargo to and from Chicago would include a large number of miscellaneous items, which would move largely on joint rail-and-water rates. As the terminal facilities on the Chicago River would not be so satisfactory, and terminal costs would not be so low as if the terminal were located in the Calumet area, the figure has been suitably reduced from the Department of Commerce estimate, as have been the savings per ton. As these items should move at high rates, the savings per ton given are believed to be conservative. The item of general cargo to and from Peoria is the estimated tonnage which will remain in that port after the obstructive bridges have been remodeled along the route to Chicago. The tonnage now moving to and through Peoria is considerably in excess of this quantity.

23. Summary of prospective commerce and estimated savings:

Commodity	Origin and destination	Tonnage	Savings
Cement	La Salle to Chicago	200,000	$160,000
Do	La Salle to Milwaukee	50,000	45,000
Do	La Salle to St. Louis and points south.	75,000	112,500
Sand and gravel	Joliet to Chicago	1,400,000	420,000
Do	Joliet to Peoria	100,000	40,000
Oil and gas	Southern points to Chicago	100,000	100,000
Paper, etc	Chicago to southern ports	250,000	300,000
Canned goods	Pacific ports to Chicago	70,000	182,000
Do	Chicago to southern ports	30,000	78,000
Sugar	New Orleans to Chicago	100,000	217,000
Cotton, linters and meal.	South to Chicago	100,000	238,000
Clay and clay products.	St. Louis, Ottawa, and northern Illinois to Chicago.	135,000	68,800
Salt	Louisiana to Chicago and Michigan to Louisiana.	130,000	130,000
Coal	Northern Illinois to Chicago	500,000	235,000
Do	Central Illinois via Pekin or Havana to Chicago.	1,000,000	150,000
Do	Northern Illinois to La Salle	250,000	92,500
Do	Southern Illinois to Chicago	2,000,000	400,000
Grain	Local ports north of Peoria to Chicago.	100,000	100,000
Do	Peoria and local ports to southern ports.	250,000	250,000
Iron and steel	Chicago to southern points	500,000	615,000
Lumber	Southern ports to Chicago	230,000	300,000
Silica sand	Ottawa to southern points	30,000	30,000
Do	Ottawa to Chicago and lake ports	100,000	50,000
General cargo	To and from Chicago	600,000	816,000
Do	To and from Peoria	30,000	40,800
Total		8,330,000	5,260,600

APPENDIX C

ESTIMATES OF COST

1. Illinois waterway, Lockport to Starved Rock:

Name of pool	Rock excavation, including overdepth	Common excavation, including overdepth	Unit cost	Cost
	Cubic yards	*Cubic yards*		
Brandon Road	636,700		$2.00	$1,273,400
Do		217,000	.40	86,800
Dresden Island	85,000		2.35	199,800
Do		765,000	.40	306,000
Marseilles	105,000		2.35	246,750
Do		1,450,000	.30	435,000
Starved Rock	[1] 175,000		2.25	393,750
Do		[1] 265,000	.40	106,000
Total	1,001,700	2,697,000		3,047,500

[1] Includes widening of Marseilles Canal.

Additional items for Brandon Road Pool:
7,600 cubic yards concrete, at $8 ..... $60,800
Channeling and miscellaneous 14,700
Right-of-way 25,000
$100,500

Total 3,148,000
Contingencies, 12 percent 378,000

Grand total 3,526,000

2. Starved Rock to Grafton, with diversion of 1,500 cubic feet per second, with three locks and dams:

Excavation:
Grafton to La Grange Landing, earth, 5,004,000 cubic yards, at $0.25 ..... $1,251,000
La Grange Landing to Lancaster Landing, earth, 6,828,000 cubic yards, at $0.25 1,707,000
Lancaster Landing to Hennepin, earth, 1,320,000 cubic yards, at $0.25 330,000
Hennepin to Starved Rock, earth, 388,000 cubic yards, at $0.25 97,000
Hennepin to Starved Rock, rock, 120,000 cubic yards, at $3 360,000
3,745,000

Flowage:
Grafton to La Grange Landing $720,000
Lancaster Landing to Starved Rock 648,000
1,368,000

La Grange Landing Lock and Dam 2,000,000
Lancaster Landing Lock and Dam 1,900,000
Hennepin Lock and Dam 1,900,000
Removal of old La Grange and Kampsville Dams 100,000

Total 11,013,000
Contingencies, 12 percent 1,322,000

Grand total 12,335,000

3. Starved Rock to Grafton, with diversion of 1,500 cubic feet per second, with two locks and dams:

Excavation:
Grafton to La Grange Landing, earth, 5,004,000 cubic yards, at $0.25 ..... $1,251,000
La Grange Landing to Peoria, earth, 11,332,000 cubic yards, at $0.25 2,833,000
Peoria to Starved Rock, earth, 1,484,000 cubic yards, at $0.25 371,000
Peoria to Starved Rock, rock, 221,000 cubic yards, at $3 663,000
5,118,000

Flowage:
Grafton to La Grange Landing $720,000
Peoria to Starved Rock 830,000
1,550,000

La Grange Landing Lock and Dam 2,000,000
Peoria Lock and Dam 1,950,000
Removal of old La Grange and Kampsville Dams 100,000

Total 10,718,000
Contingencies, 12 percent 1,286,000

Grand total 12,004,000

4. Starved Rock to Grafton, with diversion of 2,500 cubic feet per second, with three locks and dams:

Excavation:
Grafton to La Grande Landing, earth, 4,648,000 yards, at $0.25 ..... $1,162,000
La Grange Landing, to Lancaster Landing, earth, 6,176,000 cubic yards, at $0.25 1,544,000
Excavation—Continued
Lancaster Landing to Hennepin, earth, 1,208,000 cubic yards, at $0.25 ..... $302,000
Hennepin to Starved Rock, earth, 376,000 cubic yards, at $0.25 94,000
Hennepin to Starved Rock, rock, 116,000 cubic yards, at $3 348,000
3,450,000

Flowage:
Grafton to La Grange Landing $720,000
Lancaster Landing to Starved Rock 648,000
1,368,000

La Grange Landing Lock and Dam 2,000,000
Lancaster Landing Lock and Dam 1,900,000
Hennepin Lock and Dam 1,900,000
Removal of old La Grange and Kampsville Dams 100,000

Total 10,718,000
Contingencies, 12 percent 1,286,000

Grand total 12,004,000

5. Starved Rock to Grafton, with diversion of 2,500 cubic feet per second, with two locks and dams:

Excavation:
Grafton to La Grange Landing, earth, 4,648,000 cubic yards, at $0.25 ..... $1,162,000
La Grange Landing to Peoria, earth, 10,032,000 cubic yards, at $0.25 2,508,000
Peoria to Starved Rock, earth, 1,304,000 cubic yards at $0.25 326,000
Peoria to Starved Rock, rock, 205,000 cubic yards, at $3 615,000
4,611,000

Flowage:
Grafton to La Grange Landing $720,000
Peoria to Starved Rock 830,000
Peoria to Starved Rock 830,000
1,550,000

La Grange Landing Lock and Dam 2,000,000
Peoria Lock and Dam 1,950,000
Removal of old La Grange and Kampsville Dams 100,000

Total 10,211,000
Contingencies, 12 percent 1,225,000

Grand total 11,436,000

6. Starved Rock to Grafton, with diversion of 3,500 cubic feet per second, with three locks and dams:

Excavation:
Grafton to La Grange Landing, earth, 4,228,000 cubic yards, at $0.25 ..... $1,057,000
La Grange Landing to Lancaster Landing, earth, 5,260,000 cubic yards, at $0.25 1,315,000
Lancaster Landing to Hennepin, earth, 1,108,000 cubic yards, at $0.25 277,000
Hennepin to Starved Rock, earth, 376,000 cubic yards, at $0.25 94,000
Hennepin to Starved Rock, rock, 110,000 cubic yards, at $3 330,000
3,073,000

Flowage:
Grafton to La Grange Landing $720,000
Hennepin to Starved Rock 648,000
1,368,000

La Grange Landing Lock and Dam 2,000,000
Lancaster Landing Lock and Dam 1,900,000
Hennepin Lock and Dam 1,900,000
Removal of old La Grange and Kampsville Dams 100,000

Total 10,341,000
Contingencies, 12 percent 1,241,000

Grand total 11,582,000

7. Starved Rock to Grafton, with diversion of 3,500 cubic feet per second, with two locks and dams:

Excavation:
Grafton to La Grange Landing, earth, 4,228,000 cubic yards, at $0.25 ..... $1,057,000
La Grange Landing to Peoria, earth, 8,328,000 cubic yards, at $0.25 2,082,000
Peoria to Starved Rock, earth, 1,148,000 cubic yards, at $0.25 287,000
Peoria to Starved Rock, rock, 188,000 cubic yards, at $3 564,000
3,990,000

Flowage:
Grafton to La Grange Landing $720,000
Peoria to Starved Rock 830,000
1,550,000

La Grange Landing Lock and Dam	$2,000,000
Peoria Lock and Dam	1,950,000
Removal of old La Grange and Kampsville Dams	100,000
Total	9,590,000
Contingencies, 12 percent	1,151,000
Grand total	10,741,000

8. Starved Rock to Grafton, with diversion of 5,000 cubic feet per second, with two locks and dams:

Excavation:		
Grafton to La Grange Landing, earth, 2,956,000 cubic yards, at $0.25		$739,000
La Grange Landing to Peoria, earth, 5,116,000 cubic yards, at $0.25		1,279,000
Peoria to Starved Rock, earth, 788,000 cubic yards, at $0.25		197,000
Peoria to Starved Rock, rock, 132,000 cubic yards, at $3		396,000
		2,611,000
Flowage:		
Grafton to La Grange Landing	$720,000	
Peoria to Starved Rock	830,000	
		1,550,000
La Grange Landing Lock and Dam		2,000,000
Peoria Lock and Dam		1,950,000
Removal of old La Grange and Kampsville Dams		100,000
Total		8,211,000
Contingencies, 12 percent		985,000
Grand total		9,196,000

9. Starved Rock to Grafton, with diversion of 5,000 cubic feet per second, with one lock and dam:

Excavation:	
Grafton to La Grange Landing, earth, 2,956,000 cubic yards, at $0.25	$739,000
La Grange Landing to Peoria, earth, 5,116,000 cubic yards, at $0.25	1,279,000
Peoria to Starved Rock, earth, 11,252,000 cubic yards, at $0.25	2,813,000
Peoria to Starved Rock, rock, 312,000 cubic yards, at $3	936,000
Total	5,767,000
Flowage, Grafton to La Grange Landing	720,000
La Grange Landing Lock and Dam	2,000,000
Removal of old La Grange and Kampsville Dams	100,000
Total	8,587,000
Contingencies, 12 percent	1,030,000
Grand total	9,617,000

10. Starved Rock to Grafton, with diversion of 5,000 cubic feet per second, with open-river improvement:

Excavation:	
Grafton to La Grange Landing, earth, 2,956,000 cubic yards, at $0.25	$739,000
La Grange Landing to Peoria, earth, 22,752,000 cubic yards, at $0.25	5,688,000
Peoria to Starved Rock, earth, 15,968,000 cubic yards, at $0.25	3,992,000
Peoria to Starved Rock, rock, 361,000 cubic yards, at $3	1,083,000
Total	11,502,000
Flowage: Grafton to La Grange Landing	720,000
Removal of old La Grange and Kampsville Dams	100,000
Total	12,322,000
Contingencies, 12 percent	1,479,000
Grand total	13,801,000

11. Starved Rock to Grafton, with diversion of 7,000 cubic feet per second, with open-river improvement:

Excavation:	
Grafton to La Grange Landing, earth, 1,164,000 cubic yards, at $0.25	$291,000
La Grange Landing to Peoria, earth, 10,460,000 cubic yards, at $0.25	2,615,000
Peoria to Starved Rock, earth, 4,280,000 cubic yards, at $0.25	1,070,000
Peoria to Starved Rock, rock, 164,000 cubic yards, at $3	492,000
Total	4,468,000
Flowage: Grafton to La Grange Landing	720,000
Removal of old La Grange and Kampsville Dams	100,000
Total	5,288,000
Contingencies, 12 percent	635,000
Grand total	5,923,000

12. Starved Rock to Grafton, with diversion of 9,000 cubic feet per second, with open-river improvement:

Excavation:	
Grafton to La Grange Landing, earth, 800,000 cubic yards, at $0.25	$200,000
La Grange Landing to Peoria, earth, 3,696,000 cubic yards, at $0.25	924,000
Peoria to Starved Rock, earth, 612,000 cubic yards, at $0.25	153,000
Peoria to Starved Rock, rock, 70,000 cubic yards, at $3	210,000
Total	1,487,000
Flowage, Grafton to La Grange Landing	720,000
Removal of old La Grange and Kampsville Dams	100,000
Total	2,307,000
Contingencies, 12 percent	277,000
Grand total	2,584,000

13. Mississippi River, Grafton to Alton:

Alton Lock and Dam	$6,253,000
Flowage and clearing, Alton to head of pool	900,000
Total	7,153,000
Contingencies, 12 percent	858,000
Grand total	8,011,000

APPENDIX D

SANITARY DISTRICT DIVERSION—DIGEST OF EXPERT ENGINEERING AND LEGAL OPINION

Part I.—Extracts from report of Special Master C. E. Hughes on rereference in Sanitary District Diversion Case, October term, 1929

Identification

Langdon Pearse: Sanitary engineer for the Sanitary District of Chicago since 1909.

Harrison P. Eddy, of Boston: Consulting engineer on sanitary work for 75 municipalities. Member of engineering board of review, employed by the sanitary district in 1924 to make a comprehensive examination and report.

Prof. John H. Gregory, of Baltimore: Sanitary expert witness for the Sanitary District of Chicago and member of engineering board of review. Wide experience in construction and design of water works and sewage works.

L. R. Howson, of Chicago: Leading sanitary expert for complainants. Member of firm of Alvord, Burdick & Howson, retained by the War Department to make a thorough study and report on the disposal of sewage of the Sanitary District of Chicago.

Charles E. Hughes: Special master, to whom the sanitary district case was referred. Now Chief Justice of the United States Supreme Court.

Maj. Gen. Edgar Jadwin: Chief of Engineers, United States Army.

George B. Gascoigne, of Cleveland, Ohio: Sanitary expert for the complainants. Has served 25 municipalities upon major sewage projects.

Darwin W. Townsend, of Milwaukee, Wis.: Sanitary expert for the complainants. Fourteen years' experience with the activated sludge process. Assistant chief engineer, Milwaukee sewage-treatment works.

Dr. F. W. Mohlman: For 10 years director of laboratories for the Sanitary District of Chicago.

Mr. Pearse: Acknowledged "that the activated sludge process accomplishes from 85 percent to 95-percent reduction of the biochemical oxygen demand, 90-percent to 95-percent reduction of suspended solids, and from 92-percent to 98-percent reduction in bacteria. He said that he was talking of ranges on a large program. He felt that we can do better than 85 percent. We may be able to average 90 percent."

Mr. Eddy: "Taking all of the plants into consideration, a general average of 85 percent of purification is a reasonable assumption."

Professor Gregory: It was his opinion that "by and large an annual average in the neighborhood of 85 percent can be accomplished."

Mr. Howson: "A properly operated modern activated sludge plant will remove from 90 percent to 95 percent of the suspended solids, approximately 95 percent of the bacteria, and 95 percent of the biochemical oxygen demand."

Mr. Hughes: "The evidence justifies the conclusion that an average of 85 percent purification is the minimum that can reasonably be expected and that there is a strong probability that the average efficiency of the sewage-treatment plants will be as high as 90 percent and it may be still higher."

Mr. Pearse: Noted from statement before Committee on Rivers and Harbors of the House of Representatives in 1924. "The biological processes, such as sprinkling filters, or activated sludge, when properly operated, produce a high-grade effluent, requiring no dilution, in which fish can live. The effluent, further, will create no nuisance, and can be turned into a water course, even though dry, without fear of consequences."

Mr. Pearse: Before the special master. "Reaffirmed that the statement was correct in that fish were living in the effluent of the sanitary district trickling filters right at the filters. Young

carp were living in the effluent, some shiners from Lake Michigan, and some others."

Mr. Howson: "The organic matter remaining in the effluent from activated-sludge plant would be finely divided, practically invisible to the eye, would be in an environment of an effluent which contains an excess of oxygen in the form of dissolved oxygen or as nitrate, in excess of the demand of the organic matter, so that the organic matter remaining in the effluent would not subsequently putrefy. The available oxygen in the effluent of a well-operated activated-sludge plant is equal to or greater than the oxygen demand so as to preserve the stability of the effluent."

Mr. Gascoigne: "The effluent from sewage-treatment works providing 90 percent treatment, especially if it be of the activated-sludge type, will be clear, sparkling, and odorless, and have remaining in it of the above five substances only a very small or minor part of the putrescible matter and bacteria."

Mr. Townsend: "In the case of the organic matter in the effluent, the effluent is rich in oxygen both in the form of dissolved oxygen and nitrates. This oxygen supply, being more than adequate to meet the oxygen demand, results in stability."

General Jadwin: "The introduction of deposits of sewage into the Chicago River would, without dilution, render it so foul and putrid as to materially impair its navigable condition and capacity through its deterrent effect on the navigators and on those engaged in loading and unloading the vessels. This statement is based on the effect on navigation and with the intention of keeping this effect separate from the effect on the important question of sanitation of Chicago. The sanitary conditions essential for working conditions for those engaged in navigation should be substantially the same as for the residents on shore. * * * Even with the attainment of the maximum practical treatment of all sewage, some circulation of water will be necessary to keep the condition of the waters tolerable for navigation. The effluent from sewage-treatment plants is not pure water, and the added refuse from ships and streets, together with unavoidable accumulations of oil, requires more water for flushing than is available from the natural run-off, which the urban development has in large part intercepted and turned into sewers. When the ultimate practicable treatment of sewage is accomplished, it is believed that the needs of navigation in the Chicago and Calumet Rivers proper may be found not to exceed a flow of clear water from the lake averaging 1,500 cubic feet per second, augmented by the natural run-off of the Chicago and Calumet Rivers watersheds and the effluent from the treatment plants. This would give an average annual flow of about 3,200 cubic feet per second at Lockport. This diversion would create a current on the principal river channels of from one quarter to one third foot per second, and would be sufficient to renew the average water content of the main portions of the Chicago River in about 2 days. Unless the total diversion be considerably greater than 3,200 cubic feet per second, the progressive putrefaction of the polluted water would become offensive to a degree detrimental to navigation, because of the longer time required for its passage through the drainage canal to the navigable waters of the Des Plaines River and the upper reaches of the Illinois River. * * * Besides providing water necessary for adequate depths and widths of channels, another requisite for navigation of the Illinois River is that the water should not be unreasonably offensive. * * * It seems certain that with too little water the water will be so foul as to be a menace to the health of the workers upon vessels and at terminals. * * * People on board boats need substantially the same protection; that is, their protection is the same as that for the people in the city."

Mr. Hughes: "It is not regarded as open to serious question that the city of Chicago, under authority of the State, has the riparian right to take water from Lake Michigan for the ordinary uses of its inhabitants. That would not be, per se, an unreasonable use. And if it were sought to prevent an abuse of that right through the taking of an unreasonable amount, it would be necessary to present that issue in an appropriate manner. If the city of Chicago is entitled to take its water supply from Lake Michigan for the ordinary and reasonable uses of its inhabitants, it cannot be said that the State or the city is subject to any established rule of law which requires it to turn into the lake what is no longer water but sewage or the effluent of sewage-treatment plants. If there were a way of destroying the sewage or sewage effluent altogether, or evaporating it, it does not appear that the State or the city would violate any right of the complainants in doing so.

"That pouultion caused by the introduction of sewage has relation to the interests of navigation was recognized by this Court in the case of *New York* v. *New Jersey*."

Mr. Howson testified "that assuming the completion of the program outlined by him [1] and summarized in complainants' exhibit and with no flow at Lockport, a situation would result which would be satisfactory from the viewpoints both of public health and navigation in the Chicago River as part of the Great Lakes-St. Lawrence system; that there would not be any visible suspended particles recognizable as of sewage origin in the Chicago River, coming from the sewage-treatment plants; that conditions in the river would then be greatly superior in that respect to those now obtaining; that there would not be any odors arising from the waters of the river due to the putrefaction of the organic matter contained in the sewage effluent; that there would not be any grease, oil, or sewage material on the surface of the river due to the flow from the sewage-treatment plants, which would also be a material improvement over present conditions; that the water of the river would not be offensive or injurious to the health of passengers or persons employed on vessels or docks."

Mr. Eddy: "The discharge of the effluent of the completed sewage-treatment plants into the lake would be detrimental to navigation. The effluent would be devoid of oxygen, black, and offensive much of the time. It would tend to discolor light-colored paint on boats. It would be offensive to people riding on boats and having to work on the vessels and along the wharves."

Dr. Mohlman: "The complicated factor that makes it impossible for me to judge what the conditions will be in the future, with complete treatment, is that we do not know what the effect of storm-water discharge, carrying sewage, will have on these streams. My opinion of the effect of such storm-water deposits is that they will form septic deposits in the river; that the oxygen will disappear, except for a short distance below the activated sludge effluents, and that the condition of the channels will be objectionable. There will be deposits of septic sludge and conditions of pollution that will be highly offensive. That is in the absence of any diluting water from the lake. There would be a small amount of dissolved oxygen immediately below the discharge of the treatment-plant effluents, but in the absence of diluting water, the water would be devoid of oxygen, and there would be objectionable conditions, without any flushing or diluting water." Dr. Mohlman testified that he had observed the effluent from various activated sludge plants and that it was not "clear, sparkling, and odorless." He said it was not stable under all tests.

General Jadwin: "The effluent from sewage-treatment plants is not pure water, and added refuse from ships and streets, together with unavoidable accumulations of oil, requires more water for flushing than is available from the natural run-off, which the urban development has in large part intercepted and turned into sewers."

Mr. Hughes: "The difficulties of prediction inhere in the attempt to estimate results on such a vast and wholly unprecedented scale of sewage treatment as that involved in the disposal of the sewage of a population now estimated at over 3,500,000, with an additional population equivalent of industrial wastes of 1,500,000, and an estimated total of human population and population equivalent of industrial wastes of 6,800,000 in 1945. The experience of very much smaller communities affords little aid in determining the effect of this enormous volume of effluent from the sewage-treatment works, and the storm-water run-off containing untreated sewage, flowing into the channels of the drainage canal and the Chicago River. If the flow at Lockport were entirely stopped, the result would be, as Colonel Townsend, testifying for the complainants, said, 'that the only water from the lake would be that which comes in as the lake rises and falls.' In that case, with the water held at Lockport, there would be 'absolutely no slope in the river and its connections.' The large sewage-treatment works—the west side and the southwest side plants—adjoining the drainage canal will pour their effluents into the canal, and if there is no flow at Lockport, these effluents will pass directly into the Chicago River. It is found that 100-percent purification of the sewage taken to the treatment works is not practicable with present knowledge. The expected degree of purification is found to be a minimum of 85 percent, and it is probable that it will be 90 percent or more. This means that an amount not exactly determinable, which may be less than 10 percent, or possibly as high as 15 percent, of the sewage will not have been purified and will be represented in the effluent. While the residual organic matter in the effluent may be very different from an equal percentage of the raw sewage as a potential source of nuisance, it is far from demonstrated, in my judgment, that with all flow stopped at Lockport, the concentration of such a vast volume of effluent as will flow from the proposed sewage plants, together with the untreated sewage and wastes carried with the storm flow into the limited channels of the drainage canal and Chicago River will not create conditions in these channels seriously detrimental to navigation.

"The complainants ask that the decree provide that on and after the date fixed for the completion of the sewage-treatment program the State of Illinois, the sanitary district, and all persons acting under the authority of either, be ordered to refrain from so polluting the Chicago River, and the auxiliary navigable channels of the sanitary district, by the discharge of sewage or otherwise as to create an obstruction to or interference with navigation or navigable capacity. It seems to me that the best way, and the reasonably sure way, of accomplishing this result is to permit an outflow from the drainage canal at Lockport. The suggestion that outfall sewers or tunnels might be built to take the effluents directly to Lake Michigan has been made in a general way, but the evidence is by no means convincing that it would be a reasonable requirement to compel the sanitary district or the city to build such sewers or tunnels to take the effluents from the sewage-treatment plants across the city to the lake. The problem of the storm flow would still remain and would be especially serious in view of the volume which may be expected in the run-off of this large area with its great and growing population. The pumping of circulating water into the drainage canal and the Chicago and Calumet Rivers would, as pointed out in the testimony, carry whatever filth there would be in these rivers to the lake more rapidly. It is not clear that this course would be compatible with the interest of

[1] Refers to a program of construction of sewage-treatment works and water-filtration plants recommended by Alvord, Burdick & Howson in report to Chief of Engineers, 1925.

navigation in the Chicago Harbor, and that there would be a serious danger of contaminating the water supply and of creating offensive conditions at the bathing beaches of the city is quite evident. As to the water supply, it is urged that water-filtration plants should be constructed. The fact remains that the effluents from the sewage-treatment plants and the storm water must go somewhere, and if they are taken away from the lake and discharged through the canal at Lockport, both the danger to the water supply will be removed and conditions suitable to navigation can be maintained.

"But if the effluent from the sewage-treatment plants and the storm water are to be discharged through the drainage canal at Lockport, it is well established that some flow from the lake will be required. This it appears should not be less than a mean annual diversion of 1,000 cubic feet per second, in addition to pumpage; and it does not at present appear that it is necessary that the diversion should exceed a mean annual amount of 1,500 cubic feet per second, in addition to pumpage.

"My conclusion is that, so far as the question can be determined at this time, the interests of navigation in the Chicago River as a part of the port of Chicago, when the above-described sewage-treatment program has been carried out, will require that the flow of the drainage canal be discharged at Lockport, and that for this purpose there will be necessary a diversion of water from Lake Michigan of an annual average of not less than 1,000 cubic feet per second, and that it would be safer to allow a mean annual diversion of 1,500 cubic feet per second, in addition to pumpage. Provision should be made for further examination, after the sewage-treatment plants have been completed, and the effect of the effluent therefrom with the storm-water flow on the navigable channels has been observed, to the end that the question of any further or other relief may have appropriate consideration in the light of actual conditions.

* * * * * * *

"It was determined that the full effect of a mean annual diversion of 8,500 cubic feet per second of water from Lake Michigan at Chicago, through the drainage canal of the sanitary district, was to lower the levels of Lakes Michigan and Huron approximately 6 inches at mean lake levels; the levels of Lakes Erie and Ontario approximately 5 inches at mean lake levels; and the levels of the connecting rivers, bays, and harbors, so far as they have the same mean levels as the above-mentioned lakes, to the same extent, respectively. On a similar calculation, the entire effect of a mean annual diversion * * * of 1,500 cubic feet per second would be a lowering of Lakes Michigan and Huron approximately 1 inch at mean lake levels. It can hardly be maintained that a diversion not exceeding an annual average of 1,500 cubic feet per second would produce such a substantial injury to the complainants, when the fluctuations of lake levels due to other causes than diversions are considered, as to preclude attention to the serious consequences which may result from a failure to maintain suitable conditions in the interest of navigation in case all flow at Lockport should be terminated."

Part II. Report of Alvord, Burdick & Howson, consulting engineers, to the district engineer, Chicago, on disposal of the sewage of the Sanitary District of Chicago, dated April 16, 1925

A standard of pollution for water not detrimental to navigation:

Shall be practically free from settleable solids deposited in 2 hours.

Shall contain dissolved oxygen equal to or exceeding the biochemical oxygen demand of said liquid for 5 days when incubated at 20° C.

Shall contain not less than three parts per million of dissolved oxygen.

* * * * * * *

We have made no allowance for the fact that more or less sewage from the Indiana-Calumet region now containing 180,000 people, now reaches the Sag Canal in a more or less unpurified state.

* * * * * * *

An important condition governing the bacterial destruction of sewage is that of oxygen supply, and, in general, it may be said that in the presence of an ample supply of oxygen the process of destruction will proceed to completion in an inoffensive manner, and that in the absence of an ample supply of oxygen the process of destruction will result in the production of offensive odors. In other words, aerobic conditions favor inoffensive destruction, whereas anaerobic conditions favor offensive destruction.

* * * * * * *

The sand filter, when properly designed, constructed, and operated, produces an effluent which is clear and sparkling, practically free of suspended matter, very low in bacterial content, highly nitrified, and with an oxygen demand which is so low as to obviate any dilution requirement in a stream. The final effluents on the activated-sludge process of treatment have resembled sand-filter effluents with the exception that they have ordinarily not been so completely nitrified. The production of an effluent which will not need dilution falls within the scope of the possibilities of this method of treatment.

* * * * * * *

Recorded results indicate an improvement from the activated-sludge method of treatment as follows: Removal of suspended solids, 94 percent; reduction in oxygen consumed, 91 percent; reduction in oxygen demand, 92 percent. We conclude that it will be practicable to secure the following net efficiency in the proposed santitary-district plant in the warmer or critical season of the year expressed in the percentage of the biochemical oxygen demand removed from the sewage compared to sewage as delivered before treatment: Activated sludge on domestic sewage, 92 percent; activated sludge on stockyard waste, 95 percent.

Part III.—New York v. New Jersey (256 U.S. 296)

There is one point upon which all the experts called for the opposing parties agree, viz, that in the present state of learning upon the subject the amount of dissolved oxygen in water is the best index or measure of the degree to which it is polluted by organic substances, it seemingly being accepted by them all that upon the oxygen content in water depends its capacity for digesting sewage—that is for converting organic matter into inorganic and harmless substances by direct oxidation and by sustaining bacteria which assist in such conversion.

* * * * * * *

The witnesses agree that so long as there is sufficient dissolved oxygen in the water the process of digestion of the sewage will go forward without producing offensive odors and that when it sinks below a required percentage of saturation, such odors will appear, but, unfortunately, there is a wide divergence of opinion among them as to what the required lower percentage is. The opinions of seemingly well-qualified experts vary in giving from 25 percent to 50 percent of saturation as the amount of oxygen necessary to prevent the appearance of such offensive odors from decomposition of organic matter.

* * * * * * *

We cannot withhold the suggestion, inspired by the consideration of this case, that the grave problem of sewage disposal presented by the large and growing populations living on the shores of New York Bay is one more likely to be wisely solved by cooperative study and by conference and mutual concession on the part of the representatives of the States so vitally interested in it than by proceedings in any court however constituted.

Part IV

THE SANITARY DISTRICT OF CHICAGO,
September 19, 1933.

Col. DAN I. SULTAN,
District Engineer, First Chicago District,
Chicago, Ill.

DEAR SIR: In accordance with your request of September 15, I am handing you herewith a memorandum from the sanitary standpoint on the flow requirements in the upper Illinois waterway. I would also refer to some notes taken from the testimony in the case of *Wisconsin et al. v. Illinois et al.* in the hearings before the special master, Hon. Charles E. Hughes. (See pp. 14–17, Pearse, American Society of Civil Engineers' paper.) These illustrate the various standards that have been proposed by students of the sanitary condition of the Des Plaines-Illinois Rivers.

The table appended shows the results of calculations made primarily for a preliminary study of the waterway situation from a sanitary-engineering standpoint. Such calculations are a first approximation, and, as such, omit several factors which will affect the situation adversely, such as sludge deposits, storm-water overflows, etc. Consequently at present I view them as low rather than high.

For a general statement of the Illinois River problem, I refer you to the September issue of Civil Engineering (pp. 485–489). As this was somewhat abridged by the editor, a blueprint copy of the manuscript is enclosed, in which you will find the following topics of interest, so I do not repeat them in the memorandum:

Standards, pages 14–17.

Flow, pages 15–16.

My statement has been prepared in a rather short time for the thorough analysis which a complete answer to your question demands. However, I hope you will glance over the American Society of Civil Engineers' paper and the notes, as I feel certain that one point is clear—that an average annual diversion of 1,500 cubic feet per second is inadequate.

Yours very truly,

LANGDON PEARSE, *Sanitary Engineer.*

FLOW REQUIREMENTS FOR ILLINOIS WATERWAY FROM THE SANITARY STANDPOINT

The flow requirements for the Illinois waterway from a sanitary standpoint will depend on several factors:

1. The degree of treatment the works of the sanitary district of Chicago can continuously maintain: (a) Reduction of biochemical oxygen demand; (b) removal of suspended matter.

2. The amount and conditions of storm overflow from the various sewer outlets (some 314) within the sanitary district of Chicago.

3. The flow required for flushing subsequent to heavy precipitation.

4. The standards which are set up for the waterway: (1) Cleanliness; (2) freedom from odor; (3) fish life.

5. The development of water power.

6. The flow of the tributaries entering the upper river.

7. The prevalence of an ice sheet under winter conditions.

Degree of treatment: The degree of treatment was set up in the litigation as 85 percent for complete treatment as an annual average on the whole scheme. Based on sewage treated at our north-side works, somewhat higher results have been obtained, monthly average reductions in the biochemical oxygen demand having run up to 90 percent and occasionally to 95 percent. Nor-

mal average operations, however, cannot be expected to exceed 90 percent.

The removal of suspended matter is important to prevent formation of sludge banks. However, not all the suspended solids are removed. Approximately 10 percent escape with the effluent. The oxygen demand of the effluent includes the demand of these solids, but they may contribute to local conditions of deoxygenation by stranding and creating an excessive demand for oxygen.

Storm overflows: Storm overflows are important, because nearly the entire sanitary district is sewered on the combined plan. Thus at times of storm (and on an average there may be 55 a year) the interceptors will fill up and municipal sewers overflow, discharging raw sewage, mixed with storm water, to the river or channel.

Flushing requirements: To clean up the waterways in the port of Chicago after a storm, flushing will be necessary. At time of overflow, various amounts of raw sewage may pass to the stream. Figures prepared by Mr. H. P. Ramey and Professor Woodward for the Wisconsin case indicate that an annual average around 2,500 to 2,700 cubic feet per second may be required for flushing purposes in the branches of the Chicago River and the Calumet River, the North Shore, Calumet-Sag, and Main Channel after overflow storms. Such flows may be used in a relatively short period at much higher actual rates.

Standards: Standards for the stream conditions were discussed in the litigation. (See Pearse, Illinois River paper, pp. 14–17.) For references, see:

The Disposal of the Sewage of the Sanitary District of Chicago, a report to the district engineer, United States engineer office, Chicago, Alvord, Burdick, & Howson (1925).

Report to Chief of Engineers, Sixty-ninth Congress, first session, document 4, dated March 3, 1926, Maj. R. W. Putnam.

Report of Engineering Board of Review, part III, appendix I (1925), H. P. Eddy et al.

Testimony of H. P. Eddy; testimony of General Jadwin.

As a general basis, any tentative standard would seem to require maintaining at least 3 parts per million dissolved oxygen in the Des Plaines and Illinois Rivers. The maintenance of freedom from odor in the absence of sludge banks requires the presence of some dissolved oxygen. The margin of safety between complete deoxygenation and the presence of appreciable dissolved oxygen cannot be estimated so closely as to make it possible to adjust the dilution so that one or two parts per million of dissolved oxygen will always be present. To maintain a factor of safety in preventing a nuisance, a minimum of three parts per million seems fair. This will also serve to maintain fish life, although many authorities recommend somewhat higher figures, because of the fact that such a figure presents practically no factor of safety for fish life.

Water power: The development of water power will practically stop all reaeration at dams, which is now of value in the self-purification of the river. I have assumed that by 1939 water power will have been utilized at Brandon Road, Dresden Island, Marseilles, and Starved Rock.

Flow of tributaries: The flow of the tributaries is important, as you will see from the additional table I offer, besides the two in the American Society of Civil Engineers' paper. However, the flow is usually low when most needed, in the dry weather of the summer months.

Winter conditions: Another factor which may upset any budgeting of water on an annual basis is the ice sheet. This will depend on variations in winter conditions. Computations of the Eddy committee indicate that in severe winters 50 percent more flow may be required than in the normal summer, because of the effect of an extended ice sheet in shutting off re-aeration.

Oxygen balance: The Engineering Board of Review set forth concisely the problem of oxygen balance (p. 244). (Eddy et al.)

"The sources of demand on the dissolved oxygen of the water in the canal system and Des Plaines-Illinois Rivers may be enumerated as follows:

"Untreated sewage: Nonsettleable or liquid portion; flowing solids prior to deposition; sludge deposits, including gas-lifted solids."

Effluents: The oxygen demand of the sludge deposits in the past has been very important, being estimated at practically as much as the original demand of the raw sewage.

"The sources of oxygen supply in the canal system and Des Plaines-Illinois Rivers may be enumerated as follows:

"Dissolved oxygen in water drawn from Lake Michigan; dissolved oxygen in effluents from complete treatment; available oxygen in form of nitrates and nitrites in effluents from complete treatment; oxygen absorbed from the air by re-aeration; dissolved oxygen from tributary streams; oxygen given off by chlorophyll bearing micro-organisms."

The available oxygen in the form of nitrates and nitrites in the effluents from complete treatment is not drawn upon until the dissolved oxygen of the water of the stream becomes substantially exhausted. Hence, for the conditions proposed, the nitrates and nitrites are not available as a direct source of oxygen.

Estimated oxygen conditions in the sanitary district of Chicago, end of 1938

[Effect with 85- and 90-percent reduction of biochemical oxygen demand; summer conditions; dissolved oxygen in parts per million lake water]

Locality	800 cubic feet per second		1,000 cubic feet per second		1,500 cubic feet per second		2,500 cubic feet per second		3,500 cubic feet per second

Chillicothe	7.20	7.76	7.34	7.80	6.98	7.48	7.50	7.84	6.58

Computations have been made, as of 1939, as a first approximation, based on diversions from Lake Michigan of 800, 1,000, 1,500, 2,500, and 3,500 cubic feet per second. These are based only on an oxygen balance between the oxygen demand of the sewage-works effluents versus the dissolved oxygen present in the effluents, plus the oxygen from diluting water, whether from the lake or tributaries plus the oxygen absorbed from the air. The computations take no account of the presence of sludge deposits, the presence of plant growths or other elements which would increase the demand for oxygen and reduce thereby the content of dissolved oxygen. No account is taken of re-aeration over dams, on the assumption that the water power will be developed. No account is taken of pollution from the municipalities and industries in Lake County, Ind. The effect of the local pollution from urban and rural population as well as industries on the Des Plaines and Illinois Rivers is also omitted.

These figures indicate that a diversion of 800, 1,000, or 1,500 is too low, with 85-percent reduction of the biochemical oxygen demand, to provide reasonable conditions in the Des Plaines and Illinois Rivers system from Lockport to Starved Rock. With 90-percent reduction and 1,500 cubic feet per second diversion, there is still a zone of low dissolved oxygen from Lockport to Marseilles, and unreasonable conditions might develop.

Consequently, the conclusion is inevitable that an average annual diversion of 1,500 cubic feet per second is inadequate, even though all the sewage and industrial wastes be completely treated, coming from the cities in the sanitary district and on the upper Des Plaines and Illinois Rivers and in Lake County, Ind.

The significance of these figures comes about from the fact that with an annual average diversion, say, of 1,500 cubic feet per second, the necessary budgeting of the flow brings about a flow of around 800 cubic feet per second for 6 months of the year. Any specified amount of diversion on an annual basis will be subject to substantial reduction during dry weather, due to the necessity of budgeting the flow and using higher diversions during and following periods of storms.

Estimates based on a 3,500 cubic feet per second diversion and 85-percent reduction of biochemical oxygen demand indicate a minimum dissolved oxygen content around 4 parts per million. This is a much safer figure. If 90-percent treatment is attained, some factor of safety accrues.

POPULATION

If the diversion is to take care of the deficit in dissolved oxygen, it must be related to the population tributary in the sanitary district, both actual and equivalent from industries. Looking ahead, the following figures may be informative. The populations for the sanitary district for the years 1900 to 1930 are computed from the respective United States census. For the years 1940 to 1980, the populations are estimated. The industrial waste equivalents are the same as estimated for the engineering board of review in 1924.

Domestic and equivalent population in the sanitary district

Year	Domestic	Industrial equivalent	Toatl equivalent
1900	1,638,656		
1910	2,308,276		
1920	2,986,000		
1930	3,901,569	1,700,000	5,601,569
FORECAST			
1940	4,815,000	1,900,000	6,715,000
1950	5,660,000	2,100,000	7,760,000
1960	6,430,000	2,300,000	8,730,000
1970	7,100,000	2,500,000	9,600,000
1980	7,600,000		

A fixed diversion over a term of years will prove unsatisfactory because of the growth of population and industry, with a consequent increase in residual pollution. The fallacy of fixing a diversion as of 1938 and expecting it to be adequate in 1970 is clearly revealed by the estimates of population and equivalent, which show approximately 40-percent increase between 1940 and 1970.

PLANT GROWTHS

With the diversions in mind, such as 1,500 cubic feet per second, there would be a large proportion of sewage effluent in the total flow. With such a mixture "the nitrate and carbon dioxide content would be relatively high, and this would stimulate plant growth in the stream, which might of itself cause objectionable conditions, as has been the case elsewhere. Conditions will be particularly favorable for such growths on account of the low natural dry-weather flow of the stream as compared with the flow of effluent and on account of the pools created by the navigation dams." (H. P. Eddy et al., Engineering Board of Review, p. 248.)

EDDY COMMITTEE CONCLUSION

After studying all the factors involved, the Eddy committee reports:

"* * * It would seem unwise to estimate less than 1 cubic foot per second of diluting water per 1,000 total population (including industrial wastes equivalent population) tributary to the treatment plants."

Applied to the estimated 1940 population this would be 6,700 cubic feet per second.

CONFIRMATION BY OTHERS

Alvord, Burdick & Howson, in their report to the district engineer, after describing what they regard as a reasonable standard for maximum pollution (p. 3), state (p. 8): "Activated sludge treatment is required to meet the 1945 conditions with but 4,167 cubic feet per second flow available." (This was estimated to mean 2,517 cubic feet per second net diversion as of 1940.)

And then, "Required works with 2,000 cubic feet per second flow: With a flow as small as 2,000 cubic feet per second, there is no practicable way of meeting the pollution standard herein suggested." (This was estimated to mean 350 cubic feet per second net diversion as of 1940.) The flows mentioned by Alvord, Burdick & Howson are total flows at Lockport (p. 79).

CONCLUSIONS

Assuming complete treatment (85–90 percent) as of the year 1939:

1. An average annual diversion of 1,500 cubic feet per second from Lake Michigan is insufficient to provide reasonable conditions in the Illinois Waterway and would not provide a waterway with free, easy, and unobstructed conditions for navigation.

2. A minimum diversion of 1,500 cubic feet per second is likewise insufficient.

3. A minimum diversion of approximately 3,000 cubic feet per second may prove sufficient for waterway purposes.

4. On an average annual diversion basis, 3,500 cubic feet per second seems a minimum figure to set for waterway purposes.

5. A maximum diverison requirement would be based on 1 cubic foot per second per 1,000 population equivalent (including industrial wastes).

6. A reasonable average annual diversion for the period around 1940 would seem to be 4,500 cubic feet per second for waterway purposes.

7. Provision should be made for latitude in diversion to care for flushing after storms, secondary nuisances from plant growth, and conditions developed by extended ice sheet in the winter months.

8. Provision should be made for extension or adjustment every 5 or 10 years to take account of changes in population and industry, as well as to take advantage of operating experience.

The above statements are set forth without reference to the diversion required to control reversals of the Chicago and Calumet Rivers.

LANGDON PEARSE,
Sanitary Engineer.

REGULATION OF COMMUNICATIONS AGENCIES

Mr. DILL. Mr. President, since the Senate seems to be engaged in the discussion on subjects other than that of the pending bill, I desire to take this opportunity to discuss for a few minutes another matter that I have intended to discuss for several days.

When the President sent his message asking for a communications bill to Congress the Senator from Minnesota [Mr. SCHALL] issued a statement in which he said it was an attempt to bring about censorship of the newspapers and the press of the country. The bill had not then been introduced. I did not think the statement was worth answering for the reason that I thought the Senator was simply under a misapprehension.

I find that since then former Senator Reed, of Missouri, has given expression to a similar criticism. I find that the newspapers have taken up Senator SCHALL's statement and former Senator Reed's statement, and the impression seems to be going abroad that by the establishing of the communications commission which is provided for in the bill that was introduced in compliance with the message of the President, it is proposed to have some kind of censorship or some kind of licensing, or some kind of governmental control of the newspapers, or of the dissemination of news in this country.

I simply desire to say that there is no foundation in theory or in fact for such an idea. There is nothing in any law on the statute books today that gives the Government any power whatsoever over the dissemination of news, or as to what messages shall go over the telegraph or the telephone wires.

The radio law expressly prohibits any kind of censorship by the managers of radio stations. Radio stations are licensed to use certain frequencies in order to prevent interference. There is necessarily a limit to the number of radio stations that can operate. There is no limit to the number of newspapers that can be printed nor has it ever been suggested there should be such a limit.

The bill which has been introduced by Representative RAYBURN, Chairman of the House Committe on Interstate

Commerce, and by myself, as Chairman of the Senate Committee on Interstate Commerce, simply writes into law the existing provisions relating to the control of the telephone and telegraph business now contained in the Interstate Commerce Act, and the provisions of the radio law as they relate to radio regulation now being enforced by the Federal Radio Commission. There are some few changes. There are new provisions as to holding companies, subsidiaries, and affiliated companies, as they relate to telephone and telegraph, and there are some few new additions regarding certain details of radio regulation, but they all go to the matter of regulating the business.

I am sure it was never even in the thought of the President that anything should be done by the proposed communications commission, either now or in the future, that would in any way hamper or hinder anyone from sending anything he wants to send over the wires, or over the radio in the radio common-carrier service, and I should be as strongly opposed to any such proposal as any man outside of this body, in the newspaper business or otherwise.

The purpose of the proposed legislation is to make effective the power now written into the Interstate Commerce Act of control of telephone and telegraph business in this country. The Interstate Commerce Commission have been so busy regulating the railroads that they have not had time to give real consideration to the problems in connection with rate regulation of telephones and telegraph, and it is only in recent years that the communications business has been big enough to demand the attention of those who use it from the standpoint of getting rate regulation.

So I want to make it clear that there is not only nothing in the proposed bill but there is no idea of putting anything in the proposed law that would ever, in any way, interfere with the freedom of the press or the freedom of anybody to send news anywhere, any time, by any means of communication.

I would not make these statements, Mr. President, if it were not for the fact that because of the statements of the Senator from Minnesota [Mr. SCHALL] and of former Senator Reed, of Missouri, there seems to be an impression that by this proposed communications bill it is proposed to reach out and take over the control of the dissemination of news or the dissemination of information by the people of this country through their communications service and I desire to correct that mistaken idea. In fact we are reenacting the prohibition of censorship in the radio law, and there is no reason or suggestion from any source that I know about even to consider any proposal that would in any way hinder the free communication of the people of this country.

What we desire to do is to have a body of men charged with authority who can study the situation and make it possible for the people who have the 20,000,000 of telephones in this country over which go 27,000,000,000 conversations every year have some chance of getting the rates lowered. They have no such chance now. Ninety-eight percent of the telephone business of this country is within the States. The State commissions cannot regulate it. Because of the holding company that reaches down and controls the telephone business in every community, because of the interrelated contracts between the parent company and these subsidiary companies all over America, the State commissions find themselves helpless, the State courts cannot reach the interstate companies, and the Interstate Commerce Commission has never had the power to handle the holding companies. So this is a proposal to make rate regulation effective in the telephone and the telegraph business, which it has never been, and also to set up rate regulation and control of the common-carrier radio business of this country.

AIR-MAIL CASUALTIES

Mr. FESS. Mr. President, the morning press announces two more deaths along the air-mail flyers. I read the headlines:

Four Army flyers die in three plane crashes; mail toll now 10.

Ship for Salt Lake City hits power line, burns at Cheyenne, killing two young lieutenants.

Florida and Ohio mishaps fatal to two.

Victim on Newark-Cleveland route had flown only 24 hours before being drafted to service.

That brings the fatalities in the Army flying to 10 in that many days. I think the time has come when we ought to take some action to take these boys out of the air. Before the day is over I shall offer a resolution to that effect, requesting the President to do so, and I hope the Senate will give it favorable consideration.

As tending to indicate that the country would be glad to have such action taken, I ask unanimous consent to insert in the RECORD several editorials upon the subject.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Newark Sunday Ledger, Feb. 11, 1934]

WHY KILL COW ON MERE SUSPICION MILKMAN STOLE THE CREAM?

By L. T. Russell

No act of a more disturbing nature has come out of Washington during the short life of the present administration than the arbitrary cancelation of some 40 air-mail contracts and a substitution of Government planes to perform that service.

The public and, we trust, Congress will see in this just another step for the Government to fasten its tentacles deeper into the vitals of private business and industry.

Nobody has been tried, much less found guilty. That there has been fraud appears obvious. But it is not in keeping with the established process of this Government to take such a snap judgment on so vital a problem without an orderly and legal hearing for anybody, without any judicial proceedings whatever, without a record made of evidence showing just what crime has been committed, by whom committed, and to what extent damage has been done.

The Federal Government air-mail annual appropriation up until last year was around $19,000,000, but the last Congress reduced it to 15 millions.

We have no record of how much this has been exceeded, but several times this sum is being deliberately wasted by the C.W.A. and half a dozen other alphabetical tripods every 24 hours in a frankly confused effort to give industry a little momentum, to give employment to the idle, with not the slightest pretense that there are any net material benefits to result from the billions being thrown into the countless communities throughout the land.

Furthermore, there is already indisputable evidence of political crookedness and graft in the C.W.A. in almost every community where it is operating throughout the Nation.

There would have been just as much wisdom in issuing a proclamation destroying the whole C.W.A. program and shutting off the entire expenditure as there is in this ex parte proceeding of killing the aviation cow because some milkman is suspected of having stolen some cream.

We repeat that there appears no escaping the fact that this unfortunate situation has been seized upon in furtherance of a program of the Government dominating all business and industry and in building up a still bigger army of Government employees and bureaus.

To us it appears the most inexcusable piece of industrial destruction that has ever come to our notice at a moment when the Nation is bleeding itself white to put more life into all industry.

There is a way provided for the Government to recapture any losses it may have sustained through collusion and crookedness, if any, between certain air-mail companies and certain former public officials.

There is a way provided in our Constitution and our law to punish the guilty in both instances. This should be done with speed and effectiveness.

But to strike down at one blow so vital an infant industry as aviation, let us repeat, is the most destructive act of the present administration.

From its very inception it has been the policy and practice of this Government to subsidize, either directly or indirectly, every worthy infant industry.

On that policy and through that practice we have grown from nothing to the greatest industrial nation on earth.

On many occasions we have seen a milk-fed kitten grow into a catamount that clawed its wet nurse, but so far it has not been found necessary to strike down at one blow the industry itself in order to punish the guilty.

Aviation is our newest and, at the same time, in view of international problems, the most vital of all the new undertakings in our industrial life, in time of peace and in time of war.

If this wholesale and indiscriminate edict of slaughter is carried out, it will mean thousands of pilots, copilots, hostesses, and airport employees with special training will join the army of unemployed; that many small air transport companies will be destroyed, resulting in a further swelling of the monopoly favorites; and that hundreds of towns and small cities that have made terrific sacrifices to build and maintain airports will see their investments and their pride swept away.

Is it possible the Washington politicians know no way of getting rid of the wart on the neck except to behead the patient?

We do not believe the Roosevelt administration can afford to follow out this destructive program to its discreditable and disastrous finality.

[Editorial from the Pittsburgh Post-Gazette, Monday, Feb. 12, 1934]

THE AIR-MAIL CONTRACTS

Postmaster General Farley's abrogation of all domestic air-mail contracts and the President's order to the Army to take over the work within a week came with such suddenness that the public's reaction is somewhat uncertain and confused at the moment.

Where there has been collusion and fraud, the companies implicated should lose their contracts; and if there is evidence to warrant criminal prosecution of individuals, that should also be pushed by the Justice Department. On the other hand, it would seem that the companies and their officers should at least have a chance to be heard before final action is taken.

The Senate investigation has proceeded far enough to warrant the most searching and thorough scrutiny of the whole system of awarding these contracts, but not to the point that would warrant blanket condemnation of every company that is now carrying mail. The only reasonable assumption is that more complete and damaging facts are in the hands of the President and Postmaster General than have yet been brought out—and if this is so, the information should be made available to the public.

Despite repeated requests from operators of the leading companies to testify, Chairman BLACK of the Senate committee has not yet seen fit to call them. If the investigation is to avoid the charge of bias or partiality, it should certainly demonstrate its willingness to get both sides of the story.

It is very doubtful whether the Army will be able to take over the mail routes and furnish adequate service on such short notice. It will need new equipment and additional trained personnel, and the initial cost to the Government is likely to be very heavy. It was reported from Washington Sunday that if arrangements cannot be completed for the entire existing network of service, it will be inaugurated between the 12 Federal Reserve bank cities. Certainly Pittsburgh, which has had the advantage of first-class service on both East-West and North-South lines, will not take kindly to a program that would even temporarily cut that off.

R. W. Robbins, a Pittsburgher and now head of T.W.A., is taking a leading part in the fight for a hearing before the Postmaster General's order takes effect. He declares that there was never any collusion on the part of his company, states that no correspondence with the Post Office Department has been lost or destroyed, recalls that his company's contract was awarded after competitive bidding, points out that it has been seeking a chance to be heard, and that over the 3-year period it has been carrying mail it has not only not made money but has lost a million and a quarter. He further points out that the Postmaster General is empowered to reduce contract rates at will whenever they appear too high, and that his company has offered to carry mail for the postage paid by the public.

Certainly the Government should want to look further into these contentions. In striking at those who may be guilty of the charges made it should make every effort not to injure others if they can demonstrate their innocence. The effect of the order is so drastic that it is quite likely some ground will be found for reconsideration in part at least until the hearings requested can be held.

[Will Rogers' article in Kansas City Star, Feb. 12, 1934]

WILL IS STUNNED BY THE AIR-MAIL CLEAN-UP ORDER

SANTA MONICA, CALIF., *February 11.*

To the Star:

What's all the hundreds of plane pilots and the thousands of people who make an honest living in the airplane business going to do? It's like finding a crooked railroad president, then stopping all the trains.

You are going to lose some fine boys in these Army flyers, who are marvelously trained in their line but not in night cross-country flying in rain and snow.

I trust an air line, for I know that that pilot has flown that course hundreds of times. He knows it in the dark. Neither could the mail pilots do the Army flyers' stunts and their close-formation flying.

I do wish they would prosecute the crook, but not make a great, growing industry—where 99 percent are hard working and honest—suffer.

I hope they don't stop every industry where they find crookedness at the top.

Yours,

WILL ROGERS.

[Editorial from the New York Sun, Monday, Feb. 12, 1934]

DAY IN COURT, PLEASE!

Nobody doubts that there have been irregularities and injustices in the conduct of the air-mail business. Almost every pioneer industry is plagued with these evils. Nobody doubts that the public is indignant over the attempt of some officeholders of the Hoover administration to hide details of the relations between the Government and the air-mail contractors.

But no amount of public indignation can justify the Roosevelt administration in junking all the contracts without proof that all are stained. Even if collusion in bidding were proved against 9 of 10 contractors, that would not excuse the wrecking of the innocent tenth company. The best that can be said for the drastic action that has been taken is that it is a gesture in the "punitive cleansing" expedition upon which the administration has set out. But would not the Republican offenders be as well shamed by the exposure of the guilty contractors as by the ruin of all the contractors, including the innocent?

Before President Roosevelt and Postmaster General Farley consummate the program which they have announced they should weigh the effect that it will have upon commercial flying in peace and in war. Largely because of the attraction of postal contracts this country has built up the best air-transport system in the world. Regardless of pecuniary scandals, the existing forces cannot be scrapped without abandoning what would be a powerful auxiliary in war. The Commander in Chief of the Army should remember that and remember also that if he goes through with what is threatened he is going to put 4,000 guiltless men in the ranks of the unemployed.

This "punitive cleansing" should proceed in order. It is not necessary to lynch a whole industry to get at the offenders in it. Nor does public indignation do away with the ancient necessity of giving the accused his day in court. As Colonel Lindbergh bluntly tells him, the President's action "does not discriminate between innocence and guilt and places no premium on honest business."

[Editorial from the New York Herald Tribune, Tuesday, Feb. 13, 1934]

THE RAW DEAL

The sudden act of the President in wiping out the Air Mail Service of the Nation with a stroke of Mr. Farley's pen is by no means the first sensational gesture which the present administration has made. But, it seems plainly, the longer the record is studied, the more high handed and the least defensible it becomes.

Intimations now arrive that no intention of destroying private aviation exists. But if the desire was simply to rewrite contracts and preserve the business intact, the sensational means pursued only become the more outrageous. The testimony thus far presented affects only a few companies out of the 30 and more in operation. The bulk of the companies have had no opportunity to be heard in their own defense. If this is really the "new deal", it should plainly be qualified by the addition of a few old-fashioned American principles of fair play and horse sense.

It now appears that the whole country is to suffer for the performance through a serious reduction in the Air Mail Service. The bright and confident notion that the Army could take over the whole job within a few days has been found to be just not so. An important service of communication and commerce is to be handicapped here and now, in the name of goodness knows what principles of recovery or reform.

The question of subsidy frankly involved in the old contracts is apparantly yet to be studied by the administration. There is talk of payment on a basis of mail actually carried. But such a system would unquestionably destroy a large part of the great service which is the brilliant achievement of American aviation today. Nothing could be clearer than that, to make a striking political gesture, the President has imperiled a striking American success, perhaps the Nation's outstanding achievement in the field of invention and organization in recent years.

Just when every effort is being made to speed up the wheels of trade, the administration threatens to curtail an important new industry, jeopardizing the jobs not only of pilots, but of hundreds of ground men at the fields, to say nothing of employees in the airplane factories and offices. When Colonel Lindbergh, with great restraint of language, raised his voice in protest, speaking of matters in which he was extraordinarily expert, the best the White House secretariat could think to reply was to attack the good faith of his utterance.

It is, in our judgment, not the airplane industry but the administration which has been placed on the defensive by this high-handed performance.

[Editorial from the New York Times, Tuesday, Feb. 13, 1934]

THE OTHER SIDE

Colonel Lindbergh's respectful protest to the President against condemning aviation companies without giving them a hearing evidently put nerves at the White House a little on edge. Here was a man who could not be held up to scorn as a mere tool of corrupt and privileged interests. It is one thing to dismiss a corporation man as necessarily selfish and prejudiced, but quite another to make light of a national hero. Consequently the only thing alleged against Colonel Lindbergh by one of the President's secretaries is that the conventions and proprieties had been violated. A telegram sent to the President should not be given to the press at the same time. Mr. Early of the White House secretarial staff is really grieved over the irregularity of making public a communication to the President of the United States before giving him an opportunity to deal with it in his customary way. The President's secretary is, in fact, oppressed with a fear that Colonel Lindbergh had a sneaking desire to do what he did "for publicity purposes."

Well, in the matter of publicity, or whatever you may call it, the colonel was only echoing what was said in the Senate of the United States on Saturday. The sole point of Colonel Lindbergh's telegram was that the President had condemned out of hand men and companies whose explanation or defense he had not first sought to obtain. Turn now to the CONGRESSIONAL RECORD of Saturday, February 10. For the most part the proceedings of the

Senate that day looked like the record of an examination in the police court. But before it was concluded, or at least before the Senate had adopted any resolution, Senator AUSTIN, of Vermont, made the following protest:

"I think it is a matter of note which should appear in the record that important witnesses who ought to be called to represent air-mail operators who have been publicly stigmatized as guilty of fraud have not been heard as yet; and the evidence necessary to enable the committee to ascertain correctly whether fraud has occurred or not is not all in. As one member of the committee, I desire to go on record as not ready to pass upon that question until the evidence is in and men charged with wrongdoing have an opportunity to be heard."

Senator BLACK, of Alabama, fussily objected that all this was irrelevant, although he admitted the right of any Senator to express himself as he pleased. Thereupon Senator AUSTIN resumed:

"Mr. President, if I may be permitted, I do not willingly subject myself to castigation by the chairman of the committee and remain silent under it. I assume that it is the duty of the Senate to present the case as it is, and fully, so that they may have an opportunity to make a complete answer if they see fit to do so. If it is going to appear here in this court that the evidence has been taken upon the subject of fraud—which, of course, is the basis, the real foundation, of this charge of contempt—I think they are entitled to know that we do not all consider that the evidence has been fully presented yet."

It will be noted that this is precisely the point, and almost the sole point, which Colonel Lindbergh pressed in his telegram to the President. If a Senator of the United States can do it without being rebuked, why not an expert in aviation like Colonel Lindbergh? Happily, there are signs that the administration at Washington is reconsidering its too hasty and too sweeping decision in the matter of the air-mail contracts. A plain intimation is given, not only in the Post Office Department but in Congress, that new air-mail contracts will be given to private companies untouched by scandal. Rates and conditions of pay and performance may be altered. But the Government will not persist in its first apparent determination to wipe out our whole system of commercial flying. The authorities now show an inclination to "hear the other side", which in an impulsive action they at first seemed determined not to do.

[Editorial appearing in the Pittsburgh Post-Gazette Feb. 14, 1934, and in all Paul Block newspapers]

THE LINDBERGH TELEGRAM

The only official comment on Colonel Lindbergh's protest against indiscriminate cancelation of air-mail contracts without granting the companies concerned a hearing was a statement from one of the President's secretaries to the effect that it was bad form to release the contents of the telegram to the public before its receipt at the White House.

Possibly this was a slight error in official etiquette, but it does not alter in the slightest the force of the colonel's argument. If the administration feels as strongly on the subject as indicated it should advise some of its own representatives—notably General Johnson—to adhere to the same rules. It is also only fair to point out that the abruptness of the Postmaster General's action left little time to observe the usual amenities, since quick action was essential if the disorganization of the industry feared by Colonel Lindbergh was to be avoided.

No adequate answer has yet been given to Colonel Lindbergh's statement that—"None can rightfully object to drastic action being taken provided the guilt implied is first established, but it is the right of any American individual or organization to receive a fair trial. Your present action does not discriminate between innocence and guilt and places no premium on honest business."

Contracts, of course, should be canceled if any fraud is connected with them, but is it unfair to ask that guilt should first be proven? If the postal administrators have information on the matter, why not let the public know about it.

PAUL BLOCK, *Publisher.*

[Editorial from the Sun, Thursday, Feb. 15, 1934]

MR. FARLEY'S CASE

Postmaster General Farley's letter defending his cancelation of the air-mail contracts contains few details not already familiar. The Sun's Washington correspondence yesterday gave a complete picture of the goings on in 1930, when Postmaster General Brown brought 15 of the aviation companies together for the purpose of agreeing on routes—if for nothing else. Mr. Farley insists that "every corporation whose contracts I annulled, or its predecessor or its subsidiary corporation", had representatives in the 1930 conferences. These meetings and the fruits they produced were, he says, contrary to law. He sees "conspiracy or collusion, with the possible exception of the National Parks Airways, which will be given further consideration." Even if there were only one innocent corporation, surely it should not suffer for the sins of others.

It may be that the evidence will result in the conviction of some of the parties to the alleged collusion. If corruption existed, the cancelation of a contract is not sufficient penalty. But the case so far presented does not justify the wholesale action of the Roosevelt administration in jolting an important industry, disarranging the air-mail system, and throwing thousands of men out of work. The law of 1872 gives the Postmaster General the right to cancel a contract tainted with collusion, but it does not instruct him to cancel before the collusion has been established beyond question. Incidentally, it must be a mocking thought to the accused that the thing they are said to have done clandestinely in 1930 against the law of 1872—that is, the agreement on routes—could have been openly in 1934, under the benign provisions of the National Industrial Recovery Act, a measure designed in part to stimulate business by eliminating needless competition.

[Editorial from the New York Herald Tribune, Friday, Feb. 16, 1934]

GOVERNMENT BY ROYAL DECREE

It was very gracious of Mr. Farley to explain why he had canceled all air-mail contracts on grounds which President Roosevelt described as "fraud and collusion." The disappointment is all the greater that he revealed nothing not familiar to all concerned and made public at the time of its happening, and that he saw fit to conceal essential parts of the law and the record.

Here is the great recent success of American industry. Thanks to enterprise, courage, and able organization, American aviation today leads the world. It is supreme in design, in speed, in service, alike for mail and for passengers. The commercial value of this swift achievement is very great. Even more vital is the contribution to national defense. The factories have been built and equipped, the fields have been developed, the pilots have been trained in the essentials of flying, whereby the preparedness of the Nation in the event of war has been enormously advanced.

How has this extraordinary success been achieved? By a wise and liberal interpretation of the authority granted by Congress to let air-mail contracts and organize routes. In a few cases advantage was undoubtedly taken of this swift upbuilding of a new industry by subsidy to make unjustified profits through stock promotion or otherwise. Such is the almost inevitable accompaniment of the use of subsidies. A constant watch and a frequent housecleaning are necessary wherever such public grants of aid are made. But the main achievement of the subsidy act has been as honest as it has been distinguished.

Thousands have contributed to this great American success. The pilots have come forward, the mechanics have been trained for field and factory, the office organizations have been assembled, the capital has been contributed by thousands of investors, large and small. In a time when new industry was urgently needed to give jobs, here was the outstanding creation of the last decade. The Government had done its part in the only fashion possible, through subsidy. Old-fashioned American initiative had responded, had once again recorded a signal triumph.

What has Mr. Farley to criticize in this? He is outraged, first, because a very few of the companies involved have profited too greatly and, second, because the organization of the service has been ably and wisely accomplished with a minimum of destructive competition, and to the end that a few strong companies, technically competent to furnish safe and efficient service, might be evolved instead of a group of weak, politically minded competitors. The legality of the efficient job accomplished can properly be left to the courts. In the meantime it is amusing to note that the sort of direct, able organization accomplished is exactly the sort of achievement which the N.R.A. was created to permit.

Wherever there has been corruption, there must be swift punishment. But, oddly enough, neither the President nor Mr. Farley brings forward a single item of corruption. What they allege and seek to destroy is efficiency and a shining American success. The administration is wrecking the finest air-mail service in the world. It is imperiling the finest passenger service in the world. To what end? It is hard to see, unless the answer is to demonstrate that the right of an innocent man to be held innocent until proved guilty no longer exists in America and that Government by royal decree has superseded the democracy of the Constitution.

[Editorial from the New York American, Wednesday, Feb. 14, 1934]

THE CANCELATION OF THE AIR-MAIL CONTRACTS

The Federal administration's abrupt and arbitrary cancelation of all domestic air-mail contracts has shocked the country.

The apparent attempt of some of the recipients of air-mail subsidies to convert public aid into private enrichment is well calculated to stir resentment, but such resentment should not take the form of sweeping and ill-considered action.

And that is just the form of action which the Government has taken.

It makes no distinction between innocence and guilt, and even as to guilt it passes judgment and imposes punishment without a hearing to the accused and without proof of the charges, or indeed, their formulation.

This is not the way in which Americans are accustomed to proceed, even in cases where the suggestion of guilt is strongly present, and it ill becomes a powerful republic to resort to such procedure in dealing with its citizens.

In view of the announcement that the Government's action is to be followed by an examination of all air-mail contracts with a view to their revision, it is difficult to see why such a factual survey should not have preceded its judgment and action rather than follow it.

There are other factors in the situation which the Government has overlooked or chosen to ignore, but they are very practical factors.

They deepen the mystery as to what has come over the administration that it should for a moment suppose that such a course as it has elected to pursue will be tolerated by American opinion.

One of these factors is the effect of the Government's action upon civil aviation in this country.

Coming from behind, American aviation has overtaken and surpassed, in both volume and efficiency, aviation in any country in the world. This has been largely due to the encouragement and aid of the mail contracts.

The Government by its summary procedure has not only fastened upon the entire business of air transportation a blanket presumption of guilt, but it has put out of business, out of use and practice, a great corps composed of the most efficient and dependable aviators that we have.

Without disparaging the Army aviators who are to replace them, it must be admitted that the carriers of air mail have at great hardship and risk of life acquired a mastery of the hazards of air travel, a knowledge of the routes, and a general efficiency which cannot be improvised by hastily assembled substitutes. The thousands of pilots, mechanics, and other employees in the service of commercial aviation constitute a great national asset.

To needlessly disrupt such a service, to arrest its expansion and development, to replace it with something which must be, for a long time at least, inferior to it is an act of very mistaken policy and impossible to justify.

The course of the Government in this matter is not something that can be condoned. It is not to be dismissed as merely hasty or unnecessarily emphatic or unduly severe.

It is fundamentally bad—fundamentally wrong—in conception, spirit, and effect.

It is not cast in the Democratic mold. It is essentially despotic!

It is essentially—not smally, not superficially, not potentially only—but essentially dangerous from a political viewpoint, from an economic viewpoint, and from a legal and social viewpoint.

It is un-American.

It practically plants the standard of despotism and substitutes the will of one man for the orderly procedure of the courts and the Congress and the recognized rights of the public.

It confirms every avowal which the administration has made of its regard for constitutional precedent and constitutional procedure, in the repeated appeals it has made to the people to accept its erratic violence in dealing with our form of government.

It calls for new appraisals of the administration's purposes and a new determination of the extent to which patriotic Americans can respond to its pleas for support.

[From the Kansas City Star, Feb. 16, 1934; also printed in New York Sun and other newspapers]

"MISSTEP" ON MAIL—DAVID LAWRENCE BELIEVES COMPANIES SHOULD NOT BE "CONVICTED" OF COLLUSION—A QUESTION OF JUSTICE—THE COURTS SHOULD BE PERMITTED TO DECIDE WHETHER CONTRACTS WERE LEGAL—A BLOW TO STOCKHOLDERS—A DIFFERENT PROCEDURE MIGHT HAVE SAVED MILLIONS OF DOLLARS TO INVESTORS

(By David Lawrence)

WASHINGTON, February 16.—The whole air-mail controversy boils down to one important fact: Did President Roosevelt have before him conclusive evidence of collusion and fraud in the original award of contracts by the Hoover regime or was there sufficient legal doubt as to justify giving all companies an opportunity to prove their innocence at a hearing before the contracts were canceled summarily?

Let the reader judge this question for himself. For the courts will be doing it soon, too. Here briefly is the information necessary to form a judgment.

Under an act of Congress passed in April 1930 the Postmaster General has the right to consolidate air routes and extend them geographically without competitive bidding. The question of when competitive bidding is required turns on whether the prolongation of a route is relatively small or whether it is big enough to be really considered as a new route.

UP TO COMPTROLLER GENERAL

If it is an unreasonable extension, then it does become subject to bidding. The Comptroller General passes on such questions and there are cases on record in which he refused to approve certain extensions on the ground that they were unreasonable and should have been subject to bidding.

Now, there was a conference June 4, 1930, at the office of Postmaster General Brown. It was attended by representatives of various air-mail companies. Mr. Farley now says attendance at that conference constituted collusion. If it did, then cancelation of all contracts awarded at that meeting is justified.

But was it collusion? Suppose a Government official invites a citizen to appear at his office to discuss Government business, does it make the citizen guilty of wrongdoing if the Government official himself steps beyond his powers under the law? Unquestionably, the former Postmaster General, Walter Brown, will contend that he was within the law. It is inconceivable that the law officers of the Post Office Department, who are experienced and trained in studying every technicality of the statutes, did not advise Mr. Brown that he was proceeding lawfully if he was.

[Editorial from the New York Times, Friday, Feb. 16, 1934]

AS THE CASE NOW STANDS

Postmaster General Farley's polite telegram to Colonel Lindbergh assured him that by the cancelation of the air-mail contracts no injustice had been or would be done. If he was speaking in a technical or legal sense, he was quite correct. The law which he cited empowering the Postmaster General to annul a mail contract held that none should be given to any person who has "entered or proposed to enter into any combination to prevent the making of any bids for carrying the mail." That, however, was a provision in the act of June 8, 1872. At that time no Member of Congress, unless he were a Tennyson in disguise, had even a prophetic view of mail being carried through the air.

Moreover, the "combination" of air-mail contractors, which Mr. Farley severely condemns, was one made up on the invitation of the then Postmaster General, Mr. Brown. There was nothing secret about it. The press carried accounts of the meeting in the Post Office Department in 1930, when representatives of the various air lines met with the postal officials, in order to devise consolidations and extensions for the more efficient service of both the post office and the public. The contracts themselves, covering rates of pay, were authorized by Congress, as was the money spent by the Government in the development of commercial aviation. Mr. Brown has been bombarding the Senate Committee with requests to be allowed to go before it and explain or defend every transaction of the kind in which he as an agent of the Government may have been involved. It is now reported that he will have a hearing next week.

It is inevitable, therefore, that the whole inquiry must go on and be broadened. If any case of securing a contract by collusion or fraud can be proved, no one will object to having it canceled. It is probable, too, that Congress has passed air-mail legislation which needs to be revised. Very likely the method and basis of pay for carrying the air mail should be altered for the sake of simplicity and economy as well as honesty. Officials of the Post Office Department and the Democratic chairman of the House Committee having jurisdiction in the matter have intimated that such a course will be followed, and that private companies, perhaps after reorganization and submission of new bids, will before long, displace the Army and Navy planes temporarily assigned to the duty of carrying the mail.

After the explosion there will be time and opportunity to study the entire problem in a clearer and calmer air. There are appeals to the courts that must be decided. Later it ought to be easy for the administration to show by a new and reasonable policy that it never intended to do a gross injustice to commercial aviation in the United States.

[Editorial from the Los Angeles Times, Feb. 20, 1934]

TRIUMPH—AND A SWAN SONG

In a giant Douglas plane Capt. Edward Rickenbacker, America's greatest war ace, flew from Los Angeles to New York Sunday night and yesterday in the astonishing time of 13 hours 4 minutes and 20 seconds. This breaks all transcontinental records for passenger planes and marks a new and important chapter in commercial aviation.

It is a challenge from Los Angeles to the world. This record-breaking air liner was designed and manufactured in this city. It gives evidence to the whole world that southern California has earned the right to leadership in this newest, and, perhaps, ultimately the most efficient, method of transportation so far conceived and devised by man.

Indirectly, it must emphasize to the people of America the folly of the Government's course in breaking faith with the pioneers, whose courage, foresight, and money are building triumphs for this country in aviation.

This plane was built for carrying the mail as well as passengers. It represents years of patient research and expensive experiment. Its direct and immediate cost was over $350,000. It involved the expenditure of millions.

A political hue and cry has risen among the Democrats in Washington that the aviation industry has been subsidized by this Government, and that the moneys paid for carrying the mail have been in the nature of gifts and graft. There would be nothing improper in the fact, had the air lines been subsidized. Recognizing their value in war and their important function in peace, many European air lines operate wholly, or in part, upon Government subsidies. In fact, however, this is not true, either directly or inferentially, in America. The aviation lines have spent thousands of dollars in operation and experiment for every dollar they have ever received back from the Government. The money spent in developing flying ships by the manufacturers of this country runs into hundreds of millions. That the fighting branches of the Government—the Army and Navy—are equipped with efficient and effective war planes has been due almost entirely to the expensive and patient experiments of the civilian air lines.

The record-breaking flight of this Douglas plane to New York is very likely to be its first and last trip as a mail carrier. Its triumphant roar its swan song.

More than 7,000 fliers, who on small pay have shown a heroic and unselfish consecration to their duty, find themselves thrown out of employment and thousands of other nonflying employees of the companies are similarly jobless. The T.W.A., one of the largest of the companies, will lay off its whole personnel on the

28th. The stockholders of the various aviation corporations find their savings confiscated. Ruined without reason and without trial.

Assuming that the charges are true, they affected three companies. Thirty-four companies have paid the penalty. Even the ferocious Mexican bandit, Pancho Villa, was accustomed to shoot only every tenth man. The administration order massacres all the mail-carrying lines.

What must leave every American appalled was not only the monstrous injustice but the evident impetuosity and recklessness of the assault. The prosperity, the hopes, the very lives of the people of America have been placed in the trust of such governmental agencies as the N.R.A. and C.W.A. It does not add to the feeling of security. Will those agencies also fly at problems with the unthinking emotion of a little boy kicking a chair that has barked his shin?

Other conditions, much more serious than money loss, are involved in this hurricane ruling of Washington. Three Army flyers have already sacrificed their lives on air-mail duty. It will be a miracle if the toll is not greater with these young officers called into a service with which they are not familiar, without the necessary equipment, knowledge, ground cooperation, or familiarity with the routes. These useless, futile sacrifices while 7,000 experienced flyers sit around without jobs.

The authorities did the sensible thing in keeping the Army flyers on the ground last night because of unfavorable weather conditions, notwithstanding the flamboyant promises of Postmaster General Farley that the new system would start sharp at midnight and that the mails would go as usual. The public can better stand a little delay in the air mail than to have more Army lives sacrificed. Enough of them will be lost under favorable conditions. The incident does, however, supply a sharp contrast with the performance of the commercial companies' pilots, who, trained by long experience, were accustomed to fly under almost any conditions.

The hue and cry against the air lines is not a new note in mob psychology. When the Union Pacific Railroad was building—the first railroad to span the continent—thousands invested their savings in the enterprise. Difficulties were encountered. More money was necessary than was at first apparent. Hundreds of investors were compelled to drop out, losing their money. A few had the courage and vision to strain every resource and see the project through to the end. When the railroad was finished and these few began to reap the rewards of their courage and enterprise the applause turned to yells of rage. They were denounced and vilified. As soon as it became apparent that they would make a profit out of their hard-won project, they were attacked; and attempt was made to take away the subsidies that made the building of the road possible. They were pursued with litigation, both State and National.

In this instance, the attacks upon the air lines is even more uncleanly tinctured with politics. It will be surprising if, in the end, these wholesale confiscations of the air lines are not disclosed as the attempt of political buccaneers to transfer air contracts to deserving Democrats.

Any real abuses in connection with mail carrying should be punished, but there is no reason to beat a family of children into insensibility because one comes to the table with dirty hands.

One of the greatest industries of America has been its flying ships. Some of its proudest records have been made by its aviators. The greatest strength of this Nation in war is the great civilian flying fleet, which has flown more miles than the flying ships of all other nations in the world combined. And in the factories that have turned them out and have stood ready to turn out emergency orders in time of war necessity. With one unthinking, reckless, impetuous gesture all this outlay of strength and enterprise has been scrapped and thousands of investors robbed of their savings.

[Editorial from the Globe-Democrat, Wednesday, Feb. 21, 1934]

ST. LOUIS' AIR-MAIL ISOLATION

Under the order promulgated by the Postmaster General, by which all air-mail contracts held by private companies have been canceled and those routes remaining are being carried by Army flyers, St. Louis, which should be the hub of the Nation's air-mail distribution, becomes no more than a spoke, and a weak spoke at that. We have left one complete route—that to New York—and one incomplete route, that to Kansas City, which runs out in the middle of the continent, extending as it does by roundabout way through Wichita and Oklahoma City to Dallas.

Daily deliveries each way between St. Louis and New York are well timed to the needs of business, mail of the evening at either terminal being ready for early morning delivery at the other end of the route. But the Kansas City service offers nothing more than can be offered by railroads because mail to Kansas City is picked up before the business day begins and mail from Kansas City comes to hand after the business day has ended. In both cases yesterday's mail is the mail delivered today.

The greatest injustice to St. Louis business interests, and the interests of communities dealing with St. Louis, however, is to be found in the routes that have been discontinued under the order. The service into the Southwest for which we fought so long has been cut off entirely. The mail is not being flown to Tulsa, Oklahoma City, Amarillo, and Albuquerque to the west coast, or by the way of Tulsa to Dallas. The route to New Orleans has been scrapped. The route to Chicago, St. Louis' introduction to air-mail values, and once flown by Lindbergh at night without lights, is discontinued. We cannot even get to the last remaining transcontinental line by sending our mail to Omaha. For the Omaha-Kansas City line is no more. We are isolated save in our association with the East, while our trade opportunity lies in the other direction, toward the Southwest, which is bare of air-mail lines save the route of mention from Kansas City to Dallas, and another that meets it at Dallas from Nashville and Memphis through lower Arkansas. St. Louis mail for Chicago must now go by way of Terre Haute or Kansas City.

If St. Louis wants to communicate by air with New Orleans it must do so by roundabout path through Terre Haute, Chattanooga, and Atlanta. If we desire air connection with the west coast, we must get it through Chicago by way of Omaha, the two southern transcontinental routes having been torn apart in the air-mail upheaval. The air-mail system covered 27,000 miles last week; it covers only 12,000 this week.

[Editorial from the Los Angeles Post Record, Feb. 21, 1934]

THE BRIGHT SIDE OF AVIATION

Wherever and whenever Government money enters into business, abuses and irregularities seem to be the inevitable outcome. The air-mail subsidies no doubt produced the usual crop of crooked manipulations. But while Republicans are trying to prove that everything was regular about air-mail contracts and Democrats are trying to prove everything irregular, the rest of us not concerned with partisan politics might well keep some plain facts in mind.

American aviation today leads the world. It is doubtful if it can maintain its leadership without air-mail contracts.

Granting that American aviation companies have been a hotbed for stock juggling, the actual builders in the industry have gone right ahead building.

Aviation companies that drew a subsidy of $14,000,000 in 1930, for carrying mail 10,000,000 miles, would this year, for that same $14,000,000, have carried the mail 36,000,000 miles.

In other words, owing to the development of aviation in this country the companies this year would have delivered to the Government service nearly 300 percent greater than it was able to do for the same amount of money just 4 years ago.

Each year since air mail was launched cost to the Government has decreased. In 1929 the rate was $1.09 a mile; in 1930 the rate was 98 cents a mile; in 1931 the rate was 79 cents a mile; in 1932 the rate was 62 cents a mile; in 1933 the rate was 54 cents a mile; and for 1934 the cost was estimated to be 38 cents a mile.

These figures prove that everything has not been wrong in aviation. The real builders of aviation have made an enviable record.

[Editorial from the Indianapolis Star, Thursday, Feb. 22, 1934]

AIR-MAIL CHARGES

There are indications that the administration is beginning to regret the haste and bluster which marked its cancelation of air-mail contracts and the implication that graft and collusion marked the award of these subsidies. Many Washington observers felt from the beginning that Postmaster General Farley, head of the Federal spoils system, had been chiefly desirous of tossing a political bomb at his predecessor, Walter F. Brown, post-office head and political expert of the Hoover regime. This impression has been strengthened by later proposals which would permit existing companies to become bidders for air-mail contracts under revised specifications.

If some of the present companies were as black as Farley and a few Democratic investigating committees were trying to paint them, they should be permanently barred from participating in Federal business. The deluge of protests reaching the White House over the threat to America's aviation industry is said to be causing the President serious concern. It is further recognized that Army planes and crews will not continue to fly the mail routes. The present arrangement is merely a temporary expedient bridging the gap between the former program and an air mail new deal. A number of expert fliers have been deprived of jobs, and the blow dealt to aviation cannot be ignored.

It is true that large sums were allocated to air-mail concerns as subsidies. Grants of this kind always are expensive. The United States, however, was endeavoring to build up a struggling aviation industry. The process was costly, but the need for such expenditures was explained as a part of the national-defense program, in addition to the support for mail and passenger service, which could not have been sustained on direct earnings.

The Democrats so far have produced no evidence of fraud, nor have they revealed any facts not known when the contracts were awarded. The subsidies were thoroughly discussed on the floor of Congress. The former Postmaster General may have erred in favoring the big companies to the exclusion of the little. He was quite frank about preferring the larger concerns, and poor judgment, if proved, is a long way from collusion and fraud. Building up an infant industry through subsidies is always expensive, but the United States at the time was becoming decidedly air-minded. It took pride in the extension of air routes and in the aerial reserve corps available in an emergency for national defense. The time may be opportune to check these expenditures, but that scarcely justifies the recent broadside.

[From "Letters from Readers", New York Tribune, Saturday Feb. 24, 1934]

THE AIR "LYNCHING"—HAVE PECKSNIFF'S SUCCESSORS AT LAST BEEN FOUND?

To the NEW YORK HERALD-TRIBUNE:

Your editorials on the recent air transport tragedy—so clear, fair, and trenchant—have brought comfort to those of us who, groping in the darkness of rumor, have been waiting anxiously for the light. They expose what is now beginning to appear, not an investigation to ascertain facts for corrections and improvements but solely a conspiracy to besmirch Mr. Hoover's administration. Is our magnificent system, headed by the bold knights of the air who have brought glory to America, to be defeated and put to rout in another of those Government engagements against private industry?

Last Thursday morning a lawyer in a South Carolina city, a leader of the bar, was heard to say, "Those airplane fellows ought all to be lined up and shot." He had just read in his local paper the headlines over Mr. Farley's plea for public approval of the Washington "lynching." Sad to say, the lawyer's view is widespread. Facts do not reach the people. Truth now travels with leaden feet; falsehood, shouted forth, flies on wings of ether in a moment to the uttermost ends of the earth; for has not the radio been restricted to favorable propaganda?

These are surely days of portent. Strikes in plants where employees and employers have worked together in harmony and good will for more than a generation are called, and immediately, perhaps before the strike begins, harmonizers are there to settle it. Is there method in this madness?

Men whose only employees have been household servants now presume to dictate to our captains of industry, most of whom have come up from the ranks and know how to treat their employees. In the Tugwellian oligarchic utopia these leaders are to be outcasts.

Graduates from the Tammany school of business administration and beneficiaries of its political favor are today laying down moral precepts and ethical standards, with penalties for the guidance and punishment of our business men. Have successors to Mr. Pecksniff at last been found?

Can our country long endure half Bolshevist, half free? When the buds of bolshevism now being nutured burst into full bloom, perhaps it then may be "not too late to seek a newer world—to strive to seek to find and not to yield."

Canada or Mexico may give a hearty welcome and a refuge to our emigres.

ULYSSES.

CHARLESTON, S.C., *February 21, 1934.*

[Editorial from the Pittsburgh Post-Gazette, Saturday, Feb. 24, 1934]

HOW LONG WILL THIS CONTINUE?

Bravely and uncomplainingly, through ice, snow, and treacherous fog, the Army flies the mail. The American public is proud of the fine spirit which the military pilots have shown in taking over, with no opportunity for adequate preparation, the big job which has been assigned to them.

But was the emergency such as to justify the sacrifices which have been made? It is not a question of ability to fly planes even under difficult conditions. The Army aviators rank with the best. But their equipment was not adapted to this particular assignment. Radio and compass installations were not of the type best suited for the work. The men had virtually no chance to familiarize themselves with their routes.

A Pittsburgh officer appears to have lost his life in a tragic accident last night while on his way to report for mail duty on the Miami-Newark route. His two companions were picked up by a destroyer after their plane had plunged into the sea.

Two pilots were killed on Thursday, one near Toledo, Ohio, and the other in Texas. A third was critically hurt in a crash in Maryland. A plane on the Washington-Pittsburgh route crashed near Uniontown, but trees broke the force of the fall and fortunately the pilot was not seriously injured. Three other men were killed in falls in the West last week.

Yesterday a mail flier broke his leg when forced to bail out in a parachute over Fremont, Ohio. A lieutenant on the dangerous Cleveland run had a narrow escape when his motor burned out and caught fire near Clearfield. Another pilot, preparing to take over a route a few days ago, was saved by his parachute near Mansfield, Ohio. The first flight out of Atlanta, Ga., ended in a smash-up.

Repeatedly the equipment has failed. The lieutenant carrying the first mail into Pittsburgh Monday night reported: "The weather got mucky when I neared Pittsburgh. My radio failed to work, but that didn't bother me."

The first flier to reach Newark from the west finished his trip without the aid of radio. Something went wrong some miles from the airport. Similarly on one of the early flights from Richmond to Newark, the pilot said his radio broke down and that he "took the Pennsylvania railroad to Newark", flying low enough to see the tracks so that he would not lose his way.

Following his crackup Thursday morning near Uniontown, Lieutenant Hollstein said: "Just as I was coming into Pittsburgh, something went wrong with my radio. In attempting to repair it, I temporarily got off the course." Others reported similar difficulties.

It isn't fair to send these brave young men out in the weather conditions to be encountered at this season of the year without providing them with the best of everything. But there wasn't time to make the changes required. And some of the Army's ships are not adapted to this type of work. Before it took over the job, the officer in charge of this area particularly requested that certain types should not be used for night flying in foggy weather over the mountains.

The day after Postmaster General Farley canceled the mail contracts, Will Rogers prophesied the results better than he knew. He said then: "You are going to lose some fine boys, as these Army fliers are marvelously trained in their line, but not in night cross-country flying, in rain and snow."

And all this because of unreasonable, dictatorial orders from Washington. How long will this continue?

[Editorial from the New York American, Tuesday, Feb. 27, 1934] 1934]

AIR-MAIL MARTYRS

As the American people read with heavy hearts the awful toll which death and danger are taking of their heroic defenders who fly the colors, because they have been ordered to fly the mails before they could learn their routes and be supplied with suitable equipment, fathers and mothers the country over will repeat the tearful inquiry of the late Lieutenant Lowry's mother: "Why did the Government do it?"

Why was such a sacrifice required, why were all domestic air-mail contracts arbitrarily canceled, when the last Congress prescribed a fair and orderly method for protecting the Government against any proved fraud in past awards of domestic air-mail contracts?

Section 5 of the Independent Offices Appropriation Act, approved by President Roosevelt June 16, 1933, reads as follows:

"Whenever it shall appear to the President, in respect of any contract entered into by the United States prior to the date of enactment of this act for the transportation of persons and/or things, that the full performance of such contract is not required in the public interest, and that modification or cancelation of such contract will result in substantial savings to the United States, the President is hereby, upon giving 60 days' notice and opportunity for public hearing to the parties of such contract, authorized, in his discretion, on or before April 30, 1935, to modify or cancel such contract.

"Whenever the President shall modify or cancel any such contract he shall determine just compensation therefor; and if the amount thereof, so determined by the President, is unsatisfactory to the individual, firm, or corporation it shall be entitled to sue the United States to recover such further sum as, added to said portion so received, will make up such amount as will be just compensation therefor, in the manner provided for by paragraph 20 of section 41 and section 250 of title 28 of the United States Code; provided, that where any such contract makes provision for settlement in the event of modification or cancelation, the amount of just compensation as determined hereunder shall not exceed such amount as is authorized by said contract.

"Any appropriation out of which payments upon the said contract were authorized to be made is hereby made available for the payment of such just compensation."

If this plain mandate of the Seventy-third Congress was defied upon the recommendation of the Attorney General, Mr. Cummings, or the Postmaster General, Mr. Farley, or the Secretary of Commerce, Mr. Roper, the usefulness of the Cabinet officer responsible for such a recommendation would seem to be at an end.

[NOTE.—This is a copy of a letter submitted to Postmaster General James A. Farley on Mar. 8, 1934.]

MARCH 8, 1934.

Hon. JAMES A. FARLEY,

Postmaster General, Washington, D.C.

DEAR MR. FARLEY: Addressing you on behalf of the three organizations of postal workers hereunto subscribed, and speaking in advocacy of what we conceive to be the public interest, as well as postal welfare, we most respectfully direct your attention to a long series of adverse developments, culminating in service conditions so serious as to now sharply hamper postal efficiency and weigh heavily on postal employees. Dating from July 1, 1932, through the infliction of salary cuts, compulsory furloughs, the suspension of promotions, and the filling of vacancies, and other economic exactions, the wage income of postal workers have been sharply reduced. Meanwhile, during the past year, in response to your announced policy of placing the post office on a self-sustaining basis and "to so manage the mail business that the deficit will be wiped out or at least reduced to endurable proportions", a broad postal retrenchment program of unprecedented intensity has been consistently observed, with the avowed object of balancing the postal budget.

As a result thereof, during the fiscal year ended June 30, 1933, a saving of some $100,000,000 in postal expenditures, as compared with the preceding fiscal year, was reported, of which $80,000,000 came out of postal wages. In your recent annual report you forecast an approximate self-sustaining service at the close of the current fiscal year, a result to be achieved by a continuation without change of existing postal rates and wage standards and the rigid retrenchment of postal expenditures. It is quite plain that

the major portion of this further saving of some $70,000,000 must again come out of postal wages.

This, however, as we see it, is not the worst phase of the situation. According to press reports, and in addition to the foregoing, a further saving of some $9,000,000 must be effected during the current fiscal year. This is further confirmed by your order under date of March 2, 1934, printed in the Postal Bulletin of the succeeding day, wherein you direct the application of additional economies during the remaining 4 months of the current fiscal year. These savings include a 4-day furlough, with certain exceptions, of all postal officials and employees in the field service, the elimination of substitute employment save for emergency purposes, the reduction of city deliveries to as low as one a day in strictly residential territory, the discontinuance of vacations during this period except by absorption without cost, and other far-reaching service changes. In imposing these added pay cuts a further grievous burden, for which they are in no way responsible, is levied on faithful workers.

In the light of the foregoing summary in all its related phases, may we respectfully set forth the reasons that prompt our conviction that this same retrenchment program has already gone too far and that its continuance will militate against the public interest and postal usefulness. In doing so, we submit the following:

Postal-operating processes during the past 20 years and more have been the subject of constant refinements until the saturation point has been reached and passed. In the elimination of lost motion, duplication, and waste, our postal establishment, in its operating end is without a peer throughout all industry. From a postal-employment standpoint, further savings cannot be made save through lower wages, inferior service, or both.

Congress, in fixing postal rates and ordering the institution of new services, has made service the first and profit a secondary consideration. To attempt to balance the postal budget through rigid retrenchment and without regard to this phase of the situation, is an undertaking charged with high hazard to service dependability and efficiency, if not altogether impossible of attainment.

Public usefulness and not a balanced Budget is the sole test of postal success. Even more, the savings reported are more apparent than real. During the past 2 years the Post Office has presented a closed door to new entrants and service promotions, and its personnel in numbers, has been rapidly shrinking. Were this to be the continuing picture of all industry, remote indeed would be the prospects of national recovery. Savings effected through reduced wage payments in a publicly owned and operated establishment, as is the Post Office, during this subnormal production period, is but a relative term, because for every dollar thus saved, many additional dollars have and must be spent for unemployment relief and out of the same pocket. There is no escape from it. Reducing essential postal work on the one hand is and must be more than matched by made work on the other.

Mindful of the reduced mail volume, we also realize that the Post Office needs more business. The greater the volume, the lower the unit cost of operation. Slashing service in regularity and frequency, however, drives away business—some that may never come back. This means an added drop in postal revenues, thus compelling more retrenchment and creating a vicious downward spiral with no end in sight. More service, not less, backed by a campaign that will exalt our Postal Service as it should be exalted, is the answer to this situation.

The Post Office is the people's business. Its operations, Nation-wide, serve them daily and intimately. The effect of its example is profound. Postal wage cuts and suspended service, ordered at a time when sweeping efforts to revive industry are in full swing, has a most depressing effect, the depth of which no man can measure. Here is a serious social loss that calls for thoughtful consideration.

Sound and unanswerable as we esteem the representations here set forth to be, there is, we submit, a much more compelling reason why the Post Office Department should bring its administration into harmony with existing industrial and economic conditions and instead of a balanced postal budget, to make postal and public welfare its chief objective. Faced with an unprecedented business depression during the past 4 years, the American people have been centering their thoughts on its causes and means of correction. In doing so, the realization has come that the prompting cause of this economic upset has been and is the steady expansion of productive efficiency creating a potential capacity to deluge every normal demand and also creating a new economic environment to which society must adjust itself. In response to this high emergency, the National Recovery Act was instituted, whose moving purpose as we interpret it, is to forward prosperity's return by balanced production and consumption, through higher wages and shorter hours. This means enlarged purchasing power and the wider diffusion of jobs.

President Roosevelt on March 5, 1934, in an address before the N.R.A. conference in Washington, D.C., devoted to the purpose, progress, and program of national recovery, called for the active cooperation of all citizens and the coordinated effort of all industry to consolidate all gains so as to promote the greatest happiness and well-being of the American people. From this address of President Roosevelt, we quote in part as follows:

"Therefore, I give to industry today this challenge: It is the immediate task of industry to reemploy more people at purchasing wages and to do it now. Only thus can we continue recovery and restore the balance we seek.

"Every examination I make and all the information I received lead me to the inescapable conclusion that we must now consider immediate cooperation to secure increase in wages and shortening of hours."

In the foregoing quoted statement, the President charts the course that industry should take to master the depression and restore prosperity. "The Post Office Department", as you point out in your recent annual report, "is the largest single employer of labor in the country, if not in the world." Therefore, in this great national undertaking, the Post Office Department, instead of observing a policy out of harmony with the N.R.A. program, should, because of its magnitude and public character, be a leader in the vanguard of its accomplishment. The public interest calls for such adherence and if a bookkeeping postal deficit ensues, the people will gladly pay the bill.

We beg leave, therefore, to record our most earnest protest against the departmental order of March 2, hereinbefore referred to, and issued by you as Postmaster General. It inflicts harsh and unwarranted burdens on postal employees. It has no justification on the score of postal or public welfare. We strongly urge that you give consideration to its early and complete revocation.

Availing ourselves of this occasion and prompted by a desire to be helpful, we also urge that a thoughtful reexamination be made of postal administrative policy in its broad ramifications, to the end that our great postal establishment will present an example and an inspiration for the emulation of all industry in the stirring program of national recovery now so well under way.

With renewed assurance of our high esteem, we remain,

Yours sincerely,

NATIONAL ASSOCIATION OF LETTER CARRIERS,
EDW. J. GAINOR, *President*,
M. T. FINNAN, *Secretary*.
NATIONAL FEDERATION OF POST OFFICE CLERKS,
LEO E. GEORGE, *President*,
GILBERT E. HYATT, *Legislative Representative*.
RAILWAY MAIL ASSOCIATION,
W. M. COLLINS, *President*,
H. W. STRICKLAND, *Industrial Secretary*.

INCLUSION OF CATTLE AS A BASIC INDUSTRY

The Senate resumed the consideration of the bill (H.R. 7478) to amend the Agricultural Adjustment Act so as to include cattle as a basic agricultural commodity, and for other purposes.

Mr. NEELY. Mr. President, the obvious relevancy of the interesting and illuminating debate which has accompanied the cattle raisers relief bill on its tempestuous voyage through the troubled senatorial waters, and the unusual zeal and extraordinary impetuosity with which the measure is being speeded to a final vote encourage some of us to believe that this legislation will be enacted before the last cattle raiser in the country starves to death.

The difficulties of Hercules in performing his 12 great labors, the troubles of Aeneas while endeavoring to find an abiding place for the household gods of his fathers, and the tribulations of the hero of Pilgrim's Progress on his long and perilous journey from earth to heaven fade into microscopic insignificance in comparison with the distress of the American cattle raisers during the last 10 years.

Dickens' power to delineate the pathetic, Shakespeare's ability to dramatize the heartbreaking, and Dore's genius in vividly portraying upon the canvas the agonies of lost souls, all combined, could not exaggerate the disasters suffered by those who have, in recent years, followed the ancient and honorable vocation of raising cattle.

During the last decade the cattle raisers have blithely gone forth every spring to increase their herds and improve their quality in the comforting belief that their persistent endeavors would eventually be rewarded with better markets, better prices, and better days. But year after year disappointment has followed upon the heels of disappointment; misfortune has succeeded misfortune; and occasional poverty has irresistibly developed into Nation-wide bankruptcy for the raisers of cattle.

For example, 15 years ago a cow's hide could be sold for more than it is now possible to obtain for her carcass, hide, horns, tail, and tallow.

Only once before in the history of the world have the troubles of anyone engaged in any branch of agriculture approached those of the American cattle raisers in recent years. That was on the memorable occasion when the Sabeans stole farmer Job's oxen and asses; the Chaldeans carried away his camels and slew his servants with the edge of the sword; the fire of God came down from heaven and

burned up his sheep; and, last of all, the devil came and covered the poor, old afflicted patriarch with agonizing boils from the top of his head to the soles of his feet. Whereupon Job cursed his days and longed for death.

So far the American cattle raisers have sought no refuge either in submission to disaster or in the futility of longing for death. Hope, which springs eternal in the human breast, still impels them to believe that the Congress will provide ways and means to enable them to escape from their adversity and share the new and general prosperity of the Roosevelt administration. That they deserve relief, no one ventures to doubt and no one dares to deny.

Whether the pending bill is the most appropriate and efficacious that human ingenuity can devise to restore prosperity to the cattle-raising industry, it is unnecessary to decide. But it is important that we recognize the fact that the pending measure is the only available instrumentality by means of which the Members of the Senate can demonstrate their determination to relieve the distress of the cattle raisers and start them on the road from bankruptcy and despondency to solvency and happiness.

The cattle raisers, because of their extraordinary distress, should be exempted from the operation of the processing tax. But, unfortunately, it is manifest that the Senate would not adopt an amendment providing such exemption.

Therefore I shall vote for the enactment of this legislation in its present form, because it is based upon a principle which the experience of the last 6 months has proved to be sound; because it is desired and deserved by those engaged in the cattle-raising industry; and because its passage has been approved and recommended by the spokesmen of the American Farm Bureau Federation, the National Grange, the American Livestock Association, the National Livestock Marketing Association, and the National Milk Producers Federation. If, upon a fair trial, this law fails to produce the desired relief, I shall improve every future opportunity to support additional measures designed to solve the distressing problem with which the impoverished cattle raisers have so long and so heroically struggled in vain.

The VICE PRESIDENT. The question is on the amendment offered by the Senator from Wisconsin [Mr. LA FOLLETTE], on which the yeas and nays have been ordered. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. LOGAN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. DAVIS]. Not knowing how he would vote, I transfer that pair to the junior Senator from Alabama [Mr. BANKHEAD] and vote "nay."

Mr. PATTERSON (when his name was called). I have a general pair with the junior Senator from New York [Mr. WAGNER], who is unavoidably absent from the Chamber on official business. I am not informed as to how he would vote, if present, and I therefore withhold my vote.

Mr. STEPHENS (when his name was called). On this vote I am paired with the Senator from Indiana [Mr. ROBINSON] and therefore withhold my vote.

Mr. VANDENBERG (when his name was called). On this question I am paired with the junior Senator from New Hampshire [Mr. BROWN]. In his absence, not knowing how he would vote, if present, I withhold my vote.

The roll call was concluded.

Mr. REED (after having voted in the negative). I have a general pair with the senior Senator from Arkansas [Mr. ROBINSON]. I have been informed, however, that if the Senator from Arkansas were present he would vote as I have voted. Therefore I am justified in asking that my vote in the negative be permitted to stand.

Mr. FLETCHER. I have a general pair with the Senator from West Virginia [Mr. HATFIELD], who is absent. I am able, however, to transfer that pair to the Senator from Arkansas [Mr. ROBINSON], which I do, and vote "nay."

Mr. LEWIS. I rise to announce that the Senator from South Carolina [Mr. SMITH], who is unavoidably absent, is paired with the Senator from New Jersey [Mr. BARBOUR]. The Senator from Florida [Mr. FLETCHER] has just announced the transfer of his pair with the Senator from West Virginia to the Senator from Arkansas [Mr. ROBINSON].

I regret to announce that the Senator from Washington [Mr. BONE] is detained from the Senate by a severe cold.

I also desire to announce that the following Senators are necessarily detained from the Senate: The Senator from Alabama [Mr. BANKHEAD], the Senator from Arkansas [Mr. ROBINSON], the Senator from New Hampshire [Mr. BROWN], the Senator from Utah [Mr. KING], the Senator from New York [Mr. WAGNER], and the Senator from South Carolina [Mr. SMITH].

Mr. HEBERT. I wish to announce that the Senator from Delaware [Mr. HASTINGS] has a general pair with the Senator from Washington [Mr. BONE]. I am not informed as to how either of those Senators would vote if present.

The result was announced—yeas 41, nays 38, as follows:

YEAS—41

Adams	Duffy	McCarran	Shipstead
Ashurst	Erickson	Murphy	Steiwer
Borah	Frazier	Neely	Thomas, Utah
Bulow	Gibson	Norris	Thompson
Capper	Hayden	Nye	Townsend
Caraway	Johnson	O'Mahoney	Van Nuys
Carey	Kean	Pittman	Walcott
Clark	La Follette	Pope	Wheeler
Copeland	Lonergan	Reynolds	
Costigan	Long	Russell	
Cutting	McAdoo	Schall	

NAYS—38

Austin	Couzens	Hale	Overton
Bachman	Dickinson	Harrison	Reed
Bailey	Dieterich	Hatch	Sheppard
Barkley	Dill	Hebert	Thomas, Okla.
Black	Fess	Keyes	Trammell
Bulkley	Fletcher	Logan	Tydings
Byrd	George	McGill	Walsh
Byrnes	Glass	McKellar	White
Connally	Goldsborough	McNary	
Coolidge	Gore	Metcalf	

NOT VOTING—17

Bankhead	Hastings	Patterson	Vandenberg
Barbour	Hatfield	Robinson, Ark.	Wagner
Bone	King	Robinson, Ind.	
Brown	Lewis	Smith	
Davis	Norbeck	Stephens	

So Mr. LA FOLLETTE'S amendment was agreed to.

So Mr. LA FOLLETTE'S amendment was agreed to as follows:

On page 2, at the proper place in the bill, to insert the following new section:

"SEC. 6. (a) There is hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, the sum of $150,000,000, which shall be available for the following purposes:

"(1) Under rules and regulations to be promulgated by the Secretary of Agriculture, for the elimination of diseased dairy and beef cattle, including cattle suffering from tuberculosis or Bangs disease, and for payments to owners with respect thereto;

"(2) Under rules and regulations to be promulgated by the Secretary of Agriculture, in conjunction with the Federal Emergency Relief Administration, for the purchase and transfer of dairy cows to farms which do not have dairy stock, for supplying milk and milk products for noncommercial family use;

"(3) Not to exceed $50,000,000 for advances by the Secretary of Agriculture to the Federal Surplus Relief Corporation for the purchase of dairy and beef products for distribution for relief purposes.

"(b) No processing tax shall be levied under the Agricultural Adjustment Act, as amended, for the purpose of obtaining revenue for reimbursement of expenditures authorized by this section."

The VICE PRESIDENT. The question is, Shall the amendments be ordered to be engrossed and the bill to be read a third time?

Mr. MURPHY. Mr. President, in explanation of the affirmative vote I shall cast on the passage of the pending measure, I ask to have printed in the RECORD a letter from Secretary Wallace.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 7, 1934.

Hon. LOUIS MURPHY,
United States Senate.

DEAR SENATOR MURPHY: In response to your telephone request, I wish to state that if beef cattle were made a basic commodity

under the Agricultural Adjustment Act we would not plan to impose a processing tax on beef until a plan for controlling beef-cattle production and marketing through a system of contracts with producers had been developed and agreed upon by beef-cattle producers.

The act provides that whenever benefit payments to producers are to be made with respect to any basic agricultural commodity, a processing tax shall be in effect with respect to that commodity from the beginning of the following marketing year. It would be our policy to levy only a small tax at the beginning and to proclaim increases in the tax only as marketing conditions in the industry had improved to the extent that the increased tax would not react unfavorably on producers. We could proclaim a marketing year beginning either in the fall or spring.

Sincerely yours,

H. A. WALLACE, *Secretary.*

Mr. SHIPSTEAD. Mr. President, I send to the desk an amendment which I offer.

The VICE PRESIDENT. The amendment will be read.

The CHIEF CLERK. On page 2, after line 8, it is proposed to insert the following new section:

SEC. —. Section 9 (c) of the Agricultural Adjustment Act, as amended, is amended by adding at the end thereof the following new sentence: "Interest on mortgage indebtedness, taxes, and freight rates shall be included as elements in ascertaining the current average farm price and the fair exchange value of basic agricultural commodities."

Mr. SHIPSTEAD. Mr. President, this is an amendment to section 9, subsection (c), of the Agricultural Adjustment Act. It proposes to amend that part of the act which prescribes the method for arriving at a parity of prices for agricultural products in relation to the commodities the farmer buys.

I have been of the opinion that the farmers' taxes, interest, and freight rates are fixed charges that enter into his cost of production and should, therefore, be taken as an element in determining his parity prices. Before the Committee on Agriculture and Forestry the Secretary of Agriculture admitted that the failure to do that was a defect in the original act. I will read briefly from the hearings to show what the Secretary of Agriculture said:

Senator SHIPSTEAD. Mr. Wallace, taking the period 1909 to 1914 as 100, what have you now as the index price of commodities the farmer buys?

Secretary WALLACE. As I remember, it is about 18 percent above that base.

Senator SHIPSTEAD. You think that is all?

Secretary WALLACE. I don't know. That is what the figures show.

Senator SHIPSTEAD. These freight rates are more than double.

The CHAIRMAN. What was the question that you asked? I didn't get that. You asked how much the farmers paid above the level of prices for the period 1909 to 1914?

Senator SHIPSTEAD. Yes.

Secretary WALLACE. I see the Bureau of Agricultural Economics on January 15 released this statement, which answers your question:

"Prices paid by farmers for commodities advanced one point from November to December to 118 percent of the 1909–14 average."

In November it was 117 percent; in December it advanced one point and was then 118 percent.

Senator BANKHEAD. What is the other side of it, the level of prices the farmers get?

Secretary WALLACE. I will complete the sentence:

"Whereas prices received by farmers declined three points from November to December."

Senator SHIPSTEAD. That would be a disparity of 21 percent, according to those figures?

Secretary WALLACE. No; the prices paid to farmers averaged in November 71 percent of that pre-war period, and in December 68 percent, so the ratio to find out the purchasing power of the farmer's dollar you would have to divide in November 117 into 71, and in December 118 into 68, which would give you the purchasing power of the farmer's dollar in terms of that pre-war period.

Senator SHIPSTEAD. This may not be important, but here are four items that have all doubled since that time: Taxes, freight rates, price of farm machinery, and the amount of his mortgage. Now, those are the four heavy items the farmer carries that have doubled his burden, and in view of that fact I don't see how you can have those figures you have there.

Secretary WALLACE. Well, I suppose, you can say to that extent it is a fundamental defect in the bill. All the statement of the Bureau of Agricultural Economics professes to be is a statement of the cost of things farmers buy and things they sell. The bill itself is based on that ratio. You can say, if you wish, that the bill should have been drawn to establish a parity price on the basis of including in the things farmers buy the money paid for the interest, the money paid for taxes, and so on.

Senator SHIPSTEAD. It was assumed the bill would do that. It evidently hasn't done that.

Secretary WALLACE. No; that was a defect in the bill. That would be for the Senate to discuss and decide whether or not they would like to change the method of discovering the parity price to include those factors.

Senator WHEELER. The trouble is the Congress doesn't decide anything any more; we take whatever you hand down to us.

Senator FRAZIER. The taxes and the interest were left out of the bill when it came to the Senate?

Secretary WALLACE. It seems to me the appropriate time to worry about that is later on because we are still a long way from parity on the showing of these figures.

The CHAIRMAN. Let me get these figures in mind. The cost of the materials the farmer buys has risen since 1909–14 to 118, while his purchasing power is down to——

Secretary WALLACE. Fifty-eight percent.

The CHAIRMAN. The difference between 118 and 58 is a pretty wide gap to cover up.

Senator SHIPSTEAD. Then I misunderstood the Secretary. I thought he said the spread was only 18.

The CHAIRMAN. Oh, no; the increased cost of what he buys as compared with 1909–14 has increased 18 percent while the farmer's purchasing power is only 58. Now, do you get the spread?

Senator SHIPSTEAD. Yes.

That is all there is to the amendment. I ask that the amendment be adopted.

The PRESIDING OFFICER (Mr. CLARK in the chair). The question is on agreeing to the amendment offered by the Senator from Minnesota.

The amendment was agreed to.

Mr. O'MAHONEY. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be read.

The CHIEF CLERK. At the end of the bill it is proposed to add the following new section:

SEC. 7. The first sentence of subsection (2) of section 8 of the Agricultural Adjustment Act, as amended, is amended to read as follows: "After due notice and opportunity for hearing, to enter into marketing agreements with processors, producers, associations of producers, and others engaged in the handling of any agricultural commodity or product thereof, in the current of or in competition with, or so as to burden, obstruct, or in any way affect, interstate or foreign commerce.

Mr. O'MAHONEY. Mr. President, the purpose of the amendment is merely to insert the word "producers" in subsection 2 of section 8 of the Agricultural Adjustment Act. This section in the original act is the one which authorizes the Secretary of Agriculture to enter into marketing agreements, but as it now stands in the law it authorizes only associations of producers to enter into such agreements. The purpose of the amendment is to permit individual producers also to enter into such agreements. I may say that the amendment has the approval of the Department of Agriculture.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wyoming.

The amendment was agreed to.

Mr. HATCH. Mr. President, I send to the desk an amendment which I offer.

The PRESIDING OFFICER. The clerk will read the amendment.

The CHIEF CLERK. At the end of the bill it is proposed to insert the following new section:

SEC. 5. Section 11 of the Agricultural Adjustment Act, as amended, is amended by adding after the words "field corn" a comma and the words "grain sorghums."

Mr. HATCH. Mr. President, in connection with the amendment I desire to read a letter from the American Farm Bureau Federation received just a few moments ago:

WASHINGTON, D.C., *March 10, 1934.*

Senator CARL W. HATCH,
Senate Office Building, Washington, D.C.

MY DEAR SENATOR HATCH: The Senate has added several farm crops to the list of basic commodities in the agricultural act during its recent consideration of H.R. 7478.

There is one crop, however, which is important enough to be added to the basic commodities grown by our farmers. Reference is made to grain sorghums. This crop in certain parts of the Nation, particularly in New Mexico, is a very considerable part of the agricultural production. The producers of grain sorghums should be privileged to have full benefits of the Agricultural Adjustment Act along with our farmers who produce other basic and greater crops.

Accordingly, it is recommended by the American Farm Bureau Federation that you introduce and sponsor an amendment to H.R. 7478, reading about as follows:

"Change the period after the word 'cattle', in line 5, to comma, and add the words 'and grain sorghums'."

Very respectfully,

AMERICAN FARM BUREAU FEDERATION,
CHESTER H. GRAY,
Washington Representative.

The letter explains the purpose of the amendment I have sent to the desk, and I hope the amendment will be adopted.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendments and the third reading of the bill.

Mr. McNARY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Cutting	King	Reynolds
Ashurst	Dickinson	La Follette	Russell
Austin	Dieterich	Lewis	Schall
Bachman	Dill	Logan	Sheppard
Bailey	Duffy	Lonergan	Shipstead
Bankhead	Erickson	Long	Steiwer
Barkley	Fess	McAdoo	Stephens
Black	Fletcher	McCarran	Thomas, Okla.
Borah	Frazier	McGill	Thomas, Utah
Bulkley	George	McKellar	Thompson
Bulow	Gibson	McNary	Townsend
Byrd	Glass	Metcalf	Trammell
Byrnes	Goldsborough	Murphy	Tydings
Capper	Gore	Neely	Vandenberg
Caraway	Hale	Norris	Van Nuys
Carey	Harrison	Nye	Wagner
Clark	Hatch	O'Mahoney	Walcott
Connally	Hayden	Overton	Walsh
Coolidge	Hebert	Patterson	Wheeler
Copeland	Johnson	Pittman	White
Costigan	Kean	Pope	
Couzens	Keyes	Reed	

Mr. LEWIS. I desire to announce that the Senator from Arkansas [Mr. ROBINSON], the Senator from New Hampshire [Mr. BROWN], and the Senator from South Carolina [Mr. SMITH] are necessarily detained from the Senate. I ask that this announcement may stand for the day.

The PRESIDING OFFICER. Eighty-six Senators have answered to the roll call. There is a quorum present. The question is on the passage of the bill.

Mr. FRAZIER. Mr. President, I desire to take this opportunity of making some remarks on the bill.

Something must be done for the cattle industry. The prices of cattle have been practically the lowest in history; and I hope that when the plan is worked out the putting of livestock in under the processing tax will be a great help. It will be a help to the other products that are now included as basic commodities, as well as a help to livestock.

I desire to give just one example of the prices of livestock received in my State last fall. These are the returns from a car of livestock shipped from North Dakota to South St. Paul. This statement is dated October 2, 1933.

There were 36 head of cattle. The net weight was 24,945 pounds. The net price received for those cattle by the farmers in North Dakota was $245.08, or a little less than 1 cent a pound. If the farmers had received $4.37 more for this carload, they would have received 1 cent a pound.

In the items of expense that went into this carload of cattle there is included some hay that was fed at the stockyards at South St. Paul. I presume the cattle got in there in the evening, and they had to be fed over night. There were 1,500 pounds of hay, and the price for that 1,500 pounds of hay was $16.50—just a little more than a cent a pound for the hay that they fed the cattle the night before they were sold for slaughter, and the cattle sold for a little less than a cent a pound.

Mr. President, the returns from this carload of cattle indicate the prices received by the farmers of North Dakota for their cattle are away below the cost of production. The farmers cannot succeed under those circumstances, by any possibility.

Mr. SCHALL. Mr. President, has the Senator a statement of what the freight charges on those cattle were?

Mr. FRAZIER. Yes; the freight on these cattle amounted to $106.34. That is one of the big items of expense. The fact remains that the cattle netted the farmers less than a cent a pound.

Mr. President, there is one thing sure, that we cannot succeed with a processing tax on hogs unless we also have a processing tax on beef, which is a competing product. There is a clause in the law which provides that the Secretary may, after investigation, put a compensating tax on competitive commodities, and that would undoubtedly have to be done if the processing tax is not included in this bill.

The hard spring wheat farmers of the Northwest feel that they have been discriminated against in this farm program. In the first place, we never have produced a surplus of hard spring wheat. The surplus of wheat comes in the so-called "soft winter wheat." There is no surplus of hard spring wheat by any stretch of the imagination. But, of course, our farmers in the hard spring wheat territory have been limited in the production of wheat, the same as the farmers in other sections have been, and they are not complaining about that, but under the contract made with the Agricultural Department, farmers are not allowed to sow other grain crops on the land that is taken out of wheat production.

In the spring wheat territory we have what might be termed "a diversified farming program." Along with wheat, we raise rye, flax, barley, livestock, poultry, and dairy products. We feel that we must have rye, flax, and barley placed in this measure as basic commodities and they have been placed in it, and I hope they will be left in the bill by the conferees.

I desire to give some figures as to some of these products, but before I do that I ask unanimous consent to have printed in the RECORD at this point in my remarks a letter, under even date, from M. W. Thatcher, who is a representative of the Farmers' National Grain Corporation here in Washington, with respect to this particular proposition.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

CHEVY CHASE, MD., *March 10, 1934.*

Hon. LYNN J. FRAZIER,
Senate Office Building, Washington, D.C.

MY DEAR SENATOR: Will the Senate and House conferees retain in the bill H.R. 7478, the Senate amendment which designates flaxseed, rye, and barley as basic agricultural commodities?

This is what those commodities represent:

	Average acres	Average bushelage	At current value	At parity value
Barley	12,000,000	250,000,000	$109,250,000	$179,500,000
Rye	3,000,000	36,000,000	19,295,000	30,060,000
Flax	3,000,000	20,000,000	32,280,000	39,240,000
Total	18,000,000	306,000,000	160,825,000	248,800,000

Based on an average of 100 acres per farm, this represents 180,000 farm families. The difference in value between current cash prices at the farm and parity price, which is sought, represents a deficiency income on these grains to these families amounting to $88,000,000, or nearly $500 per farm.

These families are not receiving parity income for two reasons:

1. Imports are bearing down their cash prices far below parity.

2. These individual farmers have no collective power to bargain for parity prices.

Their only hope, during this emergency and under the present laws, rests upon receiving the same favorable consideration as has been extended to other commodities.

Not only do the imports bear down on the farmer's cash price, but worse, the Agricultural Adjustment Administration is imposing a parity tax against rye and barley processed for alcohol and declares it intends to use such collected taxes for benefit payments to corn-hog producers.

The Bankhead amendment to N.I.R.A. allotted $100,000,000 to the A.A.A. This money has been used, over $60,000,000 to cotton farmers, and $37,000,000 has been allocated by the A.A.A. for the benefit of the corn-hog program.

Rice, with but 750,000 acres, has been favored as a basic commodity and the rice farmer who contracts a 20-percent reduction in acres is to be paid full parity price. By agreement with the millers, 60 percent of parity shall be paid when the farmer markets his rice and the remaining 40 percent of parity shall be paid

at the end of the year from a trust fund set up by the millers. The noncooperator is paid nothing from the trust fund.

In the year 1932, 116,900,000 pounds of linseed, sunflower seed, perilla, tung, and soybean oils were imported. During the first 11 months of 1933, 175 million pounds were imported. We are thus losing acreage.

Recently (see schedule H, under Flax) the United States Department of Agriculture put out a bulletin, Considerable Shift from Wheat to Flax Would Not Create Flax Surplus. There is the Federal blessing.

Is it fair to the farmers of the West to ask reduction in acres when we are importing acres in the form of oils, rye, barley, and flaxseed?

Is it fair to permit imports of grain which bear prices far below parity price?

Is it fair to permit rye and barley prices to be lowered because of imports and then tax all rye and barley processed into alcohol, using such collected taxes to pay benefits to corn-hog producers? Bear in mind that the parity tax assessed to the distiller is the difference between the farmer's price and what it would be at the parity price.

Will Congress approve such a picture and then loan millions for seed and guarantee interest and principal of bonds issued by the Farm Credit Administration?

Does Congress believe our farmers can purchase at cost-plus N.R.A. goods, pay taxes, interest, and debts under such circumstances as outlined in these remarks?

Farmers will not strike and revolt if they are meagerly accorded consideration—but under such circumstances as above outlined they are ravaged.

The Senate should direct its conferees to insist upon its amendment to include flaxseed, rye, and barley as basic agricultural commodities.

Very truly yours,

M. W. THATCHER.

Mr. FRAZIER. During the last 5 or 6 months 8,000,000 bushels of rye were imported into the United States, most of it coming from Poland, I think.

According to an article appearing in the Wall Street Journal of March 5, it seems that the Polish Government has been paying a bonus of some 30 cents a bushel on rye to the farmers of Poland, exporting it from Poland into the United States and selling it on our Atlantic seaboard for less than the Chicago price, after paying the duty of 15 cents per bushel. Later on I want to put this article in the RECORD. That action makes it impossible for our farmers to raise rye in the Northwest to compete under these circumstances with the foreign countries which are sending rye into the United States.

In November I transmitted a letter to the chairman of the Tariff Commission, urging that they recommend an increase in the tariff on rye. I received a letter from the chairman, under date of the 27th of November, stating that they were considering the matter.

A few days later I received a telegram from a company in New York which imports and exports grain products, the W. E. Pritchard Co. I referred that telegram to the President on January 23, urging that the tariff on rye be increased.

On the 5th of March I received a letter signed by W. B. Gregg, Acting Secretary of Agriculture, stating that the telegram and my letter had been referred to them for reply. He stated that they had no authority to impose import restrictions, or anything of that kind, on rye.

Of course, I know that; but the fact remains that the President has not taken action, and, according to this article in the Wall Street Journal, the Tariff Commission made a report to the President on rye and, according to the story, recommended an increase of 50 percent. That would bring the duty to 22½ cents. No action has been taken up to date. So I feel that it is very important to include rye as a basic commodity and thus give our farmers the benefit of a processing tax.

I ask unanimous consent to have printed in the RECORD the article from the Wall Street Journal, entitled "Stirring Up a Hornet's Nest."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal]

STIRRING UP A HORNET'S NEST

On the eve of what may well be the most decisive world phase of American recovery plans, namely, tariff readjustment, a hornet's nest has been stirred up by the importation of a relatively small quantity of Polish rye even under that supposedly impregnable tariff wall set up for us in the act of 1930. And the question that currently rears its ugly head is, "Just what constitutes dumping?"

The facts of the case are these: Poland pays its grain monopoly in the form of import certificates, which enable that organization to receive rebates on otherwise taxed imports to the extent of 30 cents on each bushel of rye exported, and also thus to clear rye to the United States at figures under domestic levels, even with freight, insurance, and the regular American duty of 15 cents a bushel figured in. Some 8,000,000 bushels of Polish rye have already entered this country. The Tariff Act of 1930 contains a clause which permits this country to tax imports from countries giving export bounties to the extent of that bounty, which would mean another 30 cents a bushel, thus effectively extinguishing Poland as a threat. This has not yet been done.

The reason is obvious. We dislike the position of a man in a glass house throwing stones. At this very moment the Pacific Northwest Export Association is endeavoring to sell surplus wheat in the Liverpool market at 61 cents a bushel c.i.f., while that same wheat is selling in Portland, Oreg., for 75 cents. The Government has promised to take the loss of the differential between the home-market price and the best that the foreigners will pay in order to clear out the elevators in the Northwest.

Is Poland dumping? There are those, obviously including the Tariff Commission, which, in a report rendered on November 23 last to the President and Secretary Wallace, advocated the use of the 50-percent sliding-scale increase in the rye duty to 22½ cents, who hold this view. Incidentally, this report has apparently been lost in transit, for no comment on it has come out of official quarters. The northwest producers of rye have been setting up pleas of injury, word of which has not been lost to sensitive Washington ears. So have the private grain trade and the board of trade, which recently had put before it a resolution to ban all foreign grain from being deliverable on Chicago contracts. Our esteemed contemporary, perhaps the most severe local administration critic, the Herald Tribune, joins in the cry of "Wolf!"

The situation is a peculiar one, indeed. Must the administration be forced to raise a tariff when it admittedly is set on a program of lowering world-trade barriers? Or can imports be barred on the ground that Poland is dumping rye at prices below levels prevailing in its own country? If so, the United States Government, with its Pacific coast shipments, would be placed in the predicament of the ostrich, who thinks because he hides his head he cannot be seen.

Mr. SHIPSTEAD. Mr. President, will the Senator yield?

Mr. FRAZIER. My time is pretty nearly up, and I cannot yield.

The PRESIDING OFFICER. The Senator declines to yield.

Mr. FRAZIER. I have a number of other letters respecting the rye situation, from millers, from farmers, and others. I hold in my hand a telegram signed by the president and secretary of the Northwest Grain Association, an association covering the Northwest States. They are in favor of placing rye, flax, and barley in the bill as basic commodities. I ask that that telegram be printed in the RECORD as a part of my remarks.

There being no objection, the telegram was ordered to be printed in the RECORD, as follows:

MINNEAPOLIS, MINN, *March 7, 1934.*

Senator L. J. FRAZIER,
Senate Building.

Our association, composed of 100 farmer elevators, requests that you support amendment designating flax, rye, and barley basic commodity. Also to repeal section 15 (c) which exempts processing taxes. We are also opposed to use of processing tax funds for relief needs.

NORTHWEST GRAIN ASSOCIATION,
J. R. MADDOCK, *Vice President.*
G. W. CONNELL, *Secretary-Treasurer.*

Mr. FRAZIER. In the case of rye and flax, the farmers of the United States do not produce anything like enough to take care of our own demands. Approximately 50 percent of the flax used in home consumption is imported, either in the form of flax or linseed oil, or some other vegetable oil. There is no question that we can raise plenty of flax in the United States to take care of the needs here, providing the price is high enough to give us cost of production. The same is true of rye. Ordinarily we produce more barley than we use, I believe. We have ordinarily a surplus of barley, but it is being sold below cost of production, and if we can have a processing tax on it to increase the price to the farmer it will give him a great advantage.

The farmers of the spring-wheat territory feel that they have been somewhat discriminated against in the allotment plan. Two percent of the second allotment payment under

the contract goes to establish an export policy for wheat on the west coast, and something over a million dollars has been used for that purpose up to the present time. We are shipping wheat, according to the story in the Wall Street Journal, from the west coast, laying it down in foreign ports at 61 cents a bushel, paying the difference out of the processing tax. We are laying it, then, down in the foreign ports at 61 cents a bushel when the market price at Portland, Oreg., is 75 cents a bushel. I think probably it is necessary to take out some of the surplus wheat from the Pacific coast, and am in favor of that being done, but in order to do it we must have more processing tax from the various products, and I hope rye, flax, and barley will be maintained in the bill.

The PRESIDING OFFICER. The time of the Senator from North Dakota has expired.

Mr. FRAZIER. I ask unanimous consent to have an article appearing in the Wall Street Journal of Friday morning, March 2, 1934, printed in the RECORD at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article referred to is as follows:

[From the Wall Street Journal, Mar. 2, 1934]

PROCESSING-TAX COLLECTIONS LAG—A.A.A. EXPENDITURES FROM LEVY TOTAL $222,528,729, AGAINST $200,501,160 TAKEN IN

WASHINGTON.—Collections from processing taxes levied on agricultural commodities are lagging $22,027,568 behind A.A.A. expenditures from this source of revenue.

This was revealed by a Treasury report on processing-tax receipts and expenditures. It disclosed collections, as of February 26, to be $200,501,160. Expenditures totaled $222,528,729 as of February 27.

Expenditures chargeable against processing-tax revenues follow: Rental and benefit payments to producers of wheat, $59,088,258; cotton, $112,428,410; tobacco, $1,586,237; marketing export of wheat surpluses, $1,984,041; hogs bought by the Federal Surplus Relief Corporation, $4,420,586; dairy products purchased for the Federal Surplus Relief Corporation, $9,418,379 for butter and $128,883 for cheese; and emergency purchases of supplies, $33,473,933.

Indications are that within a few months the spread between collections and expenditures will increase. Farm Administration officials plan to distribute during March and April the first installment of benefit and rental payments under the cotton program for the current year. These payments will approximate $49,000.000.

Also, the first installment under the $350,000,000 corn-hog program is scheduled during spring months. Rental and benefit payments to cooperating wheat producers have not yet been completed.

However, A.A.A. officials are confident that revenue from the processing taxes will suffice to meet expenses of the individual crop adjustment programs at the end of the marketing year for the respective commodities.

Enactment of the pending beef-cattle amendment to the Adjustment Act in its present form would provide a $200,000 authorization for launching a joint beef-cattle and dairy-production adjustment program. However, Secretary Wallace has recommended that this authorization be repaid to the Treasury from processing taxes levied on beef and milk and its products.

Mr. CONNALLY. I move to amend the title of the pending bill.

The PRESIDING OFFICER. The Chair will state to the Senator from Texas that that amendment will be in order after the passage of the bill.

Mr. SHIPSTEAD. Mr. President, before the vote is taken, I desire to call the attention of the Senate to the testimony of Secretary Wallace before the Committee on Agriculture when he appeared to discuss the workings of the Agricultural Adjustment Act. Secretary Wallace testified that income to agriculture last year was about $6,000,000,000. He testified that if cattle were included in the benefit payments in the administration of the act and the benefits to be derived, as well as beet sugar, the total benefit to agriculture for the coming year, for the completion of the program for 1934, will be about $800,000,000.

He also testified that in addition to that he expected agricultural products to have some advancement in price, and estimated that by the end of the crop year of 1934, the farmer would have a total income of $7,000,000,000 to $8,000,000,000. He thought that the farmer's income could be raised to that amount. In 1926 the farmer had an income of $13,000,000,000. So that with all the benefit payments, and if we achieve the raise in farm price that is anticipated, the farmer in the United States at the end of 1934 will be short about $5,000,000,000 of what he had as income in 1926.

Mr. BORAH. Does the Senator from Minnesota take into consideration that the increased price of the things the farmer has to buy subtracts about $2,000,000,000 from that $6,000,000,000?

Mr. SHIPSTEAD. I thank the Senator. I was coming to that, and I was going to say that with the increased price of the commodities that the farmer buys under the N.R.A. his income will be diminished by at least as much as he receives in benefit payments under the Agricultural Adjustment Act; and if it is, he will not have any more, or possibly less, than he had at the end of last year; and if that production will be sustained in the future, at the end of the year the farmer will still then be $7,000,000,000 short of the income he had in 1926, and his fixed charges will have increased. His interest on his increased indebtedness has increased. His taxes have increased. Freight rates have increased. His fixed charges and the burdens that he must carry and pay, the obligations he must discharge, have increased, and he cannot carry them with an income of only half as much as he had in 1926.

Because of the fact that some Senators believe that this is an extravagant hand-out or a dole to agriculture, that it is a pork-barrel proposition, I want to make this statement before the final vote on the bill. As a matter of fact it is so small that it amounts to a mere drop in the bucket when we take into consideration the problem we have before us of reviving agriculture, at least to the position it had in 1926, and it was not paying its expenses at that time.

Mr. LEWIS. Mr. President, I wish to divert from the subject under discussion for one second to call the attention of the able Senator from Ohio [Mr. FESS] to the fact that, upon examining the CONGRESSIONAL RECORD of this morning, I think it will be disclosed to us all that there is an omission, which it is necessary to supply in order that we shall have a consecutive and accurate report of the observations passing between the able Senator and myself yesterday.

I think it will be recalled that I, with the permission of the Senator, interrupting him with his consent, put first the question, "To what object does the Senator have this newspaper article read? What is his purpose?" To which the Senator replied that he was seeking some method, or the basis of one, upon which to offer some appropriate suggestion or motion looking to the stopping, if it could be, or, at least, the postponing, of the carrying of the mail by the Army until other regulations could be properly provided.

Then came some other inquiry, and then began that which the RECORD discloses. But I wish to call the attention of the able Senator—I may add, both able and astute, and, as disclosed by his debate yesterday, most adroit and skillful—that there is this omission, which I feel ought to be remedied in order that the colloquy shown in the RECORD should have a point; otherwise, the beginning is peculiarly lacking in what is a necessary connection. If the Senator agrees with me, I am sustained; if he does not agree with me, then I have a memory that is not sustained.

Mr. FESS. Mr. President, I had not noticed that there had been any omission, and I hardly know how to interpret the suggestion of the Senator from Illinois. Evidently it is a suggestion of his that either the reporters failed to report in full what was said, or else on a revision of the notes after they were taken there was a deletion.

Mr. LEWIS. I have an idea, I may say, that possibly there was a good deal of confusion, and it is possible that it was not heard at the beginning. I could not attribute the absence of the language to which I refer to any such thing as the Senator suggests.

Mr. FESS. The present Presiding Officer is very conversant with the practice in another body about the revision of notes, but that practice of changing the notes or leaving out things is not a practice in the Senate, and I have made a practice, as all the reporters will confirm, of not looking over my notes, and when someone suggested the other day that the notes of the discussion on Monday, when I spoke of the labor situation, had been changed, the reporters had to tell the person who complained that I had not seen the notes—as I had not. I have not seen the notes of the

colloquy just referred to by the Senator from Illinois, but they are just as the reporters have submitted them to the printer. If there is anything deleted, I know nothing about it. In reading the RECORD, I do not recall that there is anything deleted.

Mr. LEWIS. Mr. President, it is not so important. If the Senator does not recall the opening of that colloquy then I would not have what I know has been omitted, supplied. There is no intimation from me whatsoever that it has been deleted by the Senator, or myself, or anyone else. I feel that the reporters, possibly in the confusion, or in some manner, merely omitted that which is essential to the RECORD, that opening observation of mine which called for the subsequent colloquy and speeches between myself and the able Senator from Ohio. If the Senator does not so recall it I shall not ask to have it put in on my word alone.

Mr. FESS. Has the Senator read the notes?

Mr. LEWIS. I read the RECORD of yesterday this morning. It having been called to my attention, I have called it to the attention of the Senator from Ohio.

Mr. FESS. The first interruption of the Senator from Illinois was this:

> Mr. President, will the Senator from Ohio state to the Senate in what way he would suggest that the mail be taken away from the present carriers at this particular time? What is the suggestion of the Senator?

That is the first statement the Senator made, and I answered that.

Mr. LEWIS. That is the first as reported, I may state to my able friend, but it is the remark preceding that to which I am alluding.

Mr. FESS. I do not recall any remark preceding that.

Mr. LEWIS. I am sure the Senator, if he could recall, would have me justified in this fact, that my first inquiry of the able Senator was asking permission to make the interruption, to which he yielded out of courtesy, after which I then said, "To what purpose is the Senator having this article read from the newspaper at this time? What is his object?" Then the Senator proceeded to state his object with the view of bringing the attention of the Senate to what he thought ought to be remedied, looking at it from a humane point of view, as to mail flying. Then came the question which the Senator has just now read. But if the Senator does not recall this preliminary portion, then, sir, we will dismiss the subject.

The PRESIDING OFFICER. The question is, Shall the amendments be ordered to be engrossed and the bill read a third time?

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass.

Mr. CAREY. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Chief Clerk proceeded to call the roll.

Mr. LOGAN (when his name was called). I have a general pair with the junior Senator from Pennsylvania [Mr. DAVIS], but I am advised that if he were present he would vote as I am going to vote, and has been specially paired on this question. Therefore I feel at liberty to vote, and vote "nay."

Mr. REED (when his name was called). I have a general pair with the Senator from Arkansas [Mr. ROBINSON]. I am unable to obtain a transfer, and therefore must withhold my vote. If permitted to vote, I should vote "nay."

Mr. VANDENBERG (when his name was called). On this question I am paired with the junior Senator from New Hampshire [Mr. BROWN]. In his absence, and not knowing how he would vote, I withhold my vote. If permitted to vote, I should vote "nay."

Mr. FESS. I inquire if the senior Senator from Virginia [Mr. GLASS] has voted?

The PRESIDING OFFICER. The Chair is advised that the Senator from Virginia has not voted.

Mr. FESS. I have a pair with that Senator, and, as I am not advised as to how he would vote, if present, I will withhold my vote.

Mr. LEWIS. I desire to announce that the Senator from New Hampshire [Mr. BROWN], the Senator from Colorado [Mr. COSTIGAN], the Senator from Florida [Mr. FLETCHER], the Senator from Virginia [Mr. GLASS], the Senator from Utah [Mr. KING], the Senator from Arkansas [Mr. ROBINSON], the Senator from South Carolina [Mr. SMITH], and the Senator from Mississippi [Mr. STEPHENS] are necessarily detained from the Senate.

I regret to announce that the Senator from Washington [Mr. BONE] is detained from the Senate on account of a severe cold.

Mr. HEBERT. I wish to announce that the Senator from Indiana [Mr. ROBINSON] has a general pair with the Senator from Mississippi [Mr. STEPHENS]. I am not advised as to how either of those Senators, if present, would vote on this question.

I also announce that on this vote the Senator from Pennsylvania [Mr. DAVIS] is specially paired with the Senator from South Dakota [Mr. NORBECK]. If present, the Senator from Pennsylvania would vote "nay", and the Senator from South Dakota would vote "yea."

I announce further a pair between the Senator from New Jersey [Mr. BARBOUR] and the Senator from South Carolina [Mr. SMITH]. The Senator from New Jersey, if present, would vote "nay", and the Senator from South Carolina, if present, would vote "yea."

I also desire to announce a pair between the Senator from West Virginia [Mr. HATFIELD] and the Senator from Florida [Mr. FLETCHER]. If present, the Senator from West Virginia would vote "nay", and the Senator from Florida would vote "yea."

I also announce a general pair between the Senator from Delaware [Mr. HASTINGS] and the Senator from Colorado [Mr. COSTIGAN]. The Senator from Delaware, if present, would vote "nay", and the Senator from Colorado, if present, would vote "yea."

I will add that the Senator from New Jersey [Mr. BARBOUR], the Senator from Pennsylvania [Mr. DAVIS], the Senator from Delaware [Mr. HASTINGS], the Senator from West Virginia [Mr. HATFIELD], the Senator from South Dakota [Mr. NORBECK], and the Senator from Indiana [Mr. ROBINSON] are necessarily absent.

The result was announced—yeas 39, nays 37, as follows:

YEAS—39

Ashurst	Duffy	McCarran	Russell
Bachman	Frazier	McGill	Schall
Bankhead	George	McKellar	Sheppard
Bulow	Harrison	Murphy	Shipstead
Byrd	Hayden	Neely	Thomas, Okla.
Byrnes	Johnson	Nye	Thomas, Utah
Capper	La Follette	Overton	Thompson
Caraway	Lonergan	Pittman	Trammell
Connally	Long	Pope	Van Nuys
Dill	McAdoo	Reynolds	

NAYS—37

Adams	Copeland	Hatch	Townsend
Austin	Couzens	Hebert	Tydings
Bailey	Cutting	Kean	Wagner
Barkley	Dickinson	Keyes	Walcott
Black	Dieterich	Logan	Walsh
Borah	Erickson	McNary	Wheeler
Bulkley	Gibson	Metcalf	White
Carey	Goldsborough	O'Mahoney	
Clark	Gore	Patterson	
Coolidge	Hale	Steiwer	

NOT VOTING—20

Barbour	Fess	King	Robinson, Ark.
Bone	Fletcher	Lewis	Robinson, Ind.
Brown	Glass	Norbeck	Smith
Costigan	Hastings	Norris	Stephens
Davis	Hatfield	Reed	Vandenberg

So the bill was passed.

The title was amended so as to read: "An act to amend the Agricultural Adjustment Act so as to include cattle, peanuts, rye, flax, barley, and grain sorghums as basic agricultural commodities, and for other purposes."

Mr. CONNALLY. Mr. President, I move that the Senate insist on its amendments, ask a conference with the House

thereon, and that the Chair appoint conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. SMITH, Mr. THOMAS of Oklahoma, Mr. MCGILL, Mr. NORRIS, and Mr. MCNARY conferees on the part of the Senate.

On motion of Mr. CONNALLY, the bill (S. 1981) to make cattle a basic agricultural commodity for the purposes of the Agricultural Adjustment Act, was ordered to be indefinitely postponed.

Mr. HATCH. In connection with the debate on the bill which has just been passed by the Senate, certain references were made to a letter addressed to me from the Secretary of Agriculture. In fairness to all concerned I think the entire letter should be incorporated in the RECORD. I, therefore, ask unanimous consent that the letter be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

The letter referred to is as follows:

DEPARTMENT OF AGRICULTURE,
Washington, D.C., March 8, 1934.

Hon. CARL A. HATCH,
United States Senate.

DEAR SENATOR: In response to questions raised in the Senate yesterday, I am sending to you a report of the reasons for my recommendation for a $200,000,000 appropriation to be used to supplement receipts from processing taxes in financing assistance to the dairy and the beef-cattle industries.

The proposal for this appropriation to a certain extent constitutes a recommendation for special assistance for the dairy and beef-cattle industries.

We were impelled to appeal to Congress for this special help for reasons which seem to us to be conclusive. Among these reasons are:

First, that these two related industries together constitute the largest cross section of American agriculture, and their recovery therefore is of the greatest possible importance to the Nation.

Second, that neither dairying nor beef-cattle producers have benefited to any substantial degree from the Agricultural Adjustment Act up to the present time.

Third, that whereas prices of cotton, tobacco, and wheat, being export crops, are established in the world markets and are affected little if at all by processing taxes, dairy and beef-cattle production, on the other hand, are domestic industries, relying greatly upon consumer purchasing power for price recovery, and therefore would be more likely to be affected by processing taxes particularly in the period before production is brought under control.

In studying the problems of the dairying and beef-cattle industries, the Agricultural Adjustment Administration has come to the conclusion not only that help should be forthcoming to the farmers engaged in these two industries, but also that if possible payments should be planned to reach them by the time the processing tax takes effect on the two commodities. The appropriation was recommended in order to enable advance payments to be made in this way.

There are two ways in which the markets can be relieved of oversupply of dairy products and beef cattle. One is by a recovery of purchasing power of the American consumer. This in itself would enable the consuming public to absorb larger quantities of beef and dairy products. The other way is through a restriction of oversupply pending the recovery in consumer purchasing power.

Aid can be obtained for the two industries through additional surplus relief purchases affording dairy products to the needy unemployed who otherwise would be unable to obtain them. Money can be used to good advantage in eradication of tuberculosis from dairy cattle. The appropriation can be utilized to provide for more substantial financial assistance to producers than otherwise would be possible at this time.

The importance of the appropriation in the dairy program is amply demonstrated by the fact that large numbers of people in the United States are not today getting the amount of milk which a proper diet requires. There is no absolute surplus such as is the case in respect to wheat and cotton. If the consumers of the United States had the money, they would buy all the milk products that the industry normally produces.

In fact, even with their present purchasing power American consumers probably would absorb most of the beef and dairy products if prices were permitted to fall low enough.

So many consumers of milk and beef are in financial distress as acute as the condition of farmers producing these commodities that the $200,000,000 appropriation is of particular immediate importance.

Our experience with the hog processing tax is significant in this connection. I have said that American consumers could absorb our dairy and beef products if prices were permitted to fall far enough.

We do not like to let this happen. It would mean severe punishment for beef and dairy producers. The severity of their plight would retard general economic recovery. These farmers of themselves represent an important section of consumer buying power.

Our experience with the hog processing tax indicates that when supply is uncontrolled and when, in consequence there is little competition among buyers, the tax has a tendency to affect the producer price more than the consumer price. This was the condition in November and December when marketings were unusually heavy.

The Government developed two methods of assisting producers. One was the emergency hog-buying campaign, involving the purchase of 6,200,000 pigs and 200,000 sows. This began to reduce marketings in January and February, helping materially to restore competition for supplies. The other method was resumption of Government relief purchases, which has been a competitive factor in the market.

These influences have contributed to the advance in hog prices which developed gradually in December, with the subsequent sharp rise in January. The prices received by farmers for hogs, in spite of the tax, have been higher every week since the tax went into effect than they were the corresponding week a year ago.

We will have to approach the beef and dairy industries with plans particularly worked out for these industries. If the $200,000,000 is provided, the plan is to get benefit payments to the farmers before the time the tax becomes effective.

Thus the appropriation will supplement the tax, make possible larger benefits, and help us gain some control over supply in time so that the tendency of the tax to reflect itself in producer prices can be minimized.

Our plans for both dairying and cattle would be flexible so as to permit gradual expansion of production to keep step with any increase in consumer purchasing power as rapidly as it develops.

Of course, appropriations from the Treasury have to be repaid ultimately out of processing taxes or other taxes.

But with the revival of demand for dairy and beef products that would accompany recovery of consumer buying power, the levy of processing taxes to replace funds used in the present emergency would be much less burdensome.

With regard to disposition of the $100,000,000 administrative fund and the $100,000,000 Bankhead fund, the following report is submitted, as provided today by the Chief Accountant of the Agricultural Adjustment Administration:

"In accordance with your informal request this morning, we wish to advise that the expenditures for administrative expenses through February 28, 1934, from the sum of $100,000,000 appropriated under section 12 (a) of the Agricultural Adjustment Act aggregated $4,906,995.22. Included in this total of expenditures, however, is the sum of $3,660,533.52, which is properly chargeable against the appropriation covering advances from the Treasury under section 12 (b) of the act, and the necessary adjustments will be effected later. Deducting the amount to be transferred leaves net expenditures from this $100,000,000 appropriation of $1,246,461.70.

"Estimated obligations against this appropriation for the fiscal year 1934 amount to $3,251,205, and $5,123,323 for the fiscal year 1935. The balance of this fund is retained as a reserve against possible deficit in processing-tax receipts in extensive programs already undertaken by the administration.

"As regards the sum of $100,000,000 authorized to be appropriated under section 220 of the National Industrial Recovery Act, $37,000,000 has been made available to the Agricultural Adjustment Administration for use in connection with the corn-hog program. No expenditures have been made to date out of this $37,000,000. The sum of $3,000,000 was allocated from the Bankhead fund to be used in the joint purchase of the capital stock of the Commodity Credit Corporation by the Secretary of Agriculture and the Governor of the Farm Credit Administration. The remaining $60,000,000 was allocated to the Farm Credit Administration to be used in the Farm Credit Administration's revolving fund in financing the handling of Government-owned cotton."

The dairy and beef cattle industries together represent the largest section of American agriculture. Dairy producers, whose gross income in 1929 totaled $2,300,000,000, represent the largest share of any farm group in the American farm income. The combined gross income of dairy and beef producers that year was $3,434,000,000 out of a total gross farm income of a little less than 12 billion.

So it is of the greatest importance to devise means of assistance to the dairy and beef producers of the United States.

Sincerely yours,

H. A. WALLACE, *Secretary.*

Mr. O'MAHONEY. I ask unanimous consent that there may be printed in the RECORD an article entitled "Today's Challenge to the Cattle Industry", by F. R. Carpenter, director, Western Slope Cattle Growers' Association, of Hayden, Colo. This article was published in the Producer, an organ of the American National Livestock Association, in its issue of February 1934, and contains much valuable information with respect to the bill upon which the Senate has just acted.

The PRESIDING OFFICER. Without objection, it is so ordered.

The article referred to is as follows:

TODAY'S CHALLENGE TO THE CATTLE INDUSTRY[1]

(By F. R. Carpenter, director Western Slope Cattle Growers' Association, Hayden, Colo.)

This is not the first time within our memories that the cattle producer has faced ruin for his industry. The great panic of 1893 and the great deflation of 1921 to 1925 are matters within the memory of many of us. It is only natural that in such a crisis as the cattle business is in today we should look first to the tried and proved remedies which have saved us before. But somehow the analogy to those times is not holding good, and even our greatest guiding star, the persistent belief that "prices will turn up, because they always have in times past", seems to have been transformed into a mocking hope.

It is amid such circumstances that the American cattle producer is faced today with the necessity of casting up a new balance and of meeting in a new way the new and changed world in which we live.

In considering that problem, I have divided what I have to say into three parts:

1. What is our situation today?
2. What can be done to better it?
3. How can we do it?

1. WHAT IS THE SITUATION TODAY?

We are cattle producers; specifically, we are western-range cattlemen. That is a comparatively young business. While the armies of Grant and Lee were locked in that struggle to settle forever the question of the supremacy of the Federal Government over dissenting States, there was another army of pioneers fast spreading across the Great Plains and the Rocky Mountain region as far as the Pacific coastal plain. There they were discovering what to you and me today are our homes—those great pastures that feed and raise the herds of cattle which have given us all the material resources we have. They were the great grazing grounds of America—a prize for him who could seize it. The vanquishing of the Indian, the building of the railroads, the extinction of the native cattle or buffaloes, and the adaptation of these ranges to individual herds of domestic cattle followed swiftly and within the span of a lifetime. Many of those who founded and built this association were participants in this great and never-to-be-repeated drama of western life.

The herds multiplied. The value of the southern ranges for breeding and of the northern ranges for maturing beef led to the great trail-herd movements; and soon American beef had overrun domestic markets and was setting forth upon a world-wide conquest. We became the greatest exporters of cattle of all the countries on earth. The peak of this movement was reached in 1894, when over 70,000,000 cattle roamed our pastures—a figure only once equaled, and that for a brief space in 1920.

In 1890 the Director of the United States Census had reported that, owing to the broken-up and individual settlements in the western territory, it was no longer possible to trace a line to call the frontier. This simply meant that the competition of the homesteader and granger for these western pastures was making itself felt, and that pigs, chickens, milk cows, and sheep were being raised on millions of acres whose sole use heretofore had been as spring and fall ranges to support beef cattle. The days of the old trail herd, of the shove-ups to summer and shove-downs to winter ranges, were passing; the spring and fall ranges were being fenced off; and, with them, the supplies of beef cattle were diminishing at the rate of about a million a year. From 1894 to 1914 the number of cattle in the United States decreased by 38 percent.

Thus the panic of 1893 was more than a money stringency to the western cowman, for it marked the turning point in his use of the great empire of grazing lands. From that time on, the settler, farmer, and homesteader made fast inroads on his pastures. The public domain shrank from 917,000,000 acres in 1900 to 200,000,000 in 1920.

From 1894 to 1905 the competition of South American cattle became a factor in the situation, and in 1905 the Argentine Republic outstripped the United States and became the foremost exporter of live cattle in the world.

In 1913 our imports of cattle exceeded our exports. The significance of this date for our purpose is this:

From the beginning of the range-cattle business up to 1914, when the balance turned from exports to imports, the price for stockers and feeders for western cattle producers was determined by the price which our large exportable surplus of cattle and beef brought in the world's markets. In other words, our industry was not controlled by a national price but by a world price, and up to that time cattlemen had no need to be bothered, nor were they, by questions of national tariff protection or control of home markets.

But something happened in that year which we had no part in bringing about, and which we understand as little today as we did at the time it occurred. The flame of war spread over Europe. From 1914 to 1918, millions of men left productive labor to engage in an occupation of destruction, and the national income for a hundred years to come was mortgaged and spent in the wasteful enterprise. An unnatural demand for beef sprang up, with rising prices; our exports increased; and the 38-percent shrinkage in numbers of cattle since 1894 was made up again, until the year 1920 found the peak of 70,000,000 cattle once more reached, though this number includes millions of dairy cattle.

For 6 years we had been spared the necessity of solving the problem of organizing a national industry. Then the Armistice was signed, the war was over, the great export trade was gone, and we were left with a tremendous surplus of cattle—some 5,000,000 more than we needed. From 1920 to 1928 the numbers of our cattle fell about a million a year. In the first half of that period practically every cattle producer in the range States went to the wall, and the rising prices during the latter half did not completely make up the great inroads into his capital represented by increased debts and mortgages.

From the seriousness of the cattle situation in 1920, and a few years following, we might have been expected to meet at that time, as we are meeting today, to take stock of our resources and liabilities, and plan a way out. We might have said then: "With our export trade now gone, and a surplus of cattle on our hands, let us organize to stabilize and control our domestic markets, and show in our industry an amount of intelligence comparable with that shown in other successful industries."

But again something happened, almost as unusual and unaccountable—and, in its final stage of destructiveness, as costly—as the World War. This country of ours, having suddenly become the creditor Nation of the world, went into an industrial expansion never before equaled in history, followed by a mad wave of speculation equally astonishing. Men got rich by staring at the financial pages of newspapers. City populations were obsessed with the speculative fever. From office boy to president, they scrambled for unearned wealth. As the numbers of our cattle fell, the price went up and up—from 4.5 cents a pound in 1925 to 13.21 cents in 1928. Again we lost sight of the one most essential factor in the cow business—control of the domestic price—and let the rise in the domestic price lull us into a false sense of security, the same as we had been lulled in 1914 when the war intervened to save us. Then came the crash of 1929. The stock bubble burst, and the whole industrial world seemed to be dragged down with it. Cattle prices broke sharply in 1930, and continued to take a nose dive at an increasing rate on through 1933.

The past 4 years we have been waiting, like a person who has been stunned, for something to come along and start the price back up to where a fair living was assured. That something has failed to materialize. Industry seems as prostrate as agriculture, and able to function only at a slow pace, unless stimulated by the hypodermic of governmental subsidy. There is no immediate prospect of a world war, or of another Coolidge era of prosperity. They say that when an Englishman gets to the place where he has to think, it makes him sick. We are soon going to know what the reaction of the western cowman is in that dilemma.

We now have on hand 66,000,000 cattle, of which 40,000,000 are beef cattle—about the same number that we had in 1914, and some 4,000,000 less than we had in the peak years of 1894 and 1920. The markets of the United States lie open before us, and, from the standpoint of supply, the picture is not at all discouraging.

Now let us take the other side of the domestic situation—the problem of consumption. Whenever I used to complain of the small check received for a shipment, my commission man would console me with the explanation that the people of the United States had gone vegetarian and were eating grapenuts and salads. What do the facts show?

In 1914 every man, woman, and child in the United States ate, on an average, 133 pounds of meat and meat products. In 1932 they average 133.3 pounds. The meat consumption of the American people is almost a constant over a long period of years. True, it is that beef has surrendered its chief place on the American menu to pork by about 18 pounds per capita; but last year, 1933, there were slaughtered and eaten 2,400,000 more cattle than in 1932—an increase of 13 percent, owing largely to the price factor. The more you study the figures of meat consumption, the more faith you will have in the ultimate successful meeting of the problems we are now studying. The American people eat their meat, good times and bad, one year with another. Just look at the interesting chart in the American Hereford Breeders' Journal for January, and you will see that the supply and demand for dollars is as great a factor in determining price as the supply and demand for beef.

The per capita consumption of wheat has fallen from 76 pounds in 1880 to 42 pounds in 1932. That is a real case of substitution, which is unlike the history of our product. We have, indeed, a stiff competitive battle with pork; but who can doubt that, if given a fair chance, the beef roast can hold its own with the ham, from the standpoint of taste or of health?

This, I think, gives you a fair picture of the situation we are in—the way our industry sprang up and prospered, and was saved from the necessity for control and direction by unforeseen happenings; a supply of cattle on hand about normal, and a demand nearly constant. Four years of rising value for the dollar have, however, driven the price of cattle to a destructive level, and set the stage for a change in marketing methods.

2. WHAT CAN BE DONE TO BETTER THE SITUATION?

Before we can very well know how to better the situation any producer is in, it might be well to analyze just exactly what his product consists of. What is this animal we have spent our lives raising? After the cow leaves our hands and is butchered, on the basis of values she consists of:

[1] Address delivered at the convention of the American National Livestock Association in Albuquerque, N.Mex., Jan. 10–12, 1934.

	Percent
Meat	80
Hide	12
Fats and oils	3
Other byproducts	5

Now, each percent in each subdivision has a direct bearing on our problem of the price of cattle, and each of these 4 parts can be considered from 2 angles—the international and the domestic. Because the international angle is by far the simpler to examine, I will take it up first.

We import live cattle largely from Canada and Mexico, dressed and canned meats from South America. The total value of all these importations in 1932 was less than $2,000,000; in 1933 it was less than $3,000,000. Translated into terms of cattle, they were in 1933 the equal of 240,000 head. This is 1.6 percent of the number of cattle slaughtered domestically. So get this clearly into your minds: If importations of cattle and meat never get beyond this year's importations in amounts, they will never appreciably affect the domestic price of cattle—and it is the domestic price of cattle that is our ultimate problem. We do not want importations to increase over this year's amount, and we believe in a strict regulation by tariff, by sanitary measures, and by quota; but we are not going to get so excited over a few cans of meat as to get off the main track of our inquiry. We now have a 3-cent tariff on cattle and a 6-cent one on dressed and canned meats. In both the Argentine and in Old Mexico good beef can be raised profitably for 1 cent a pound. While our domestic price is below those tariff figures plus the freight, they cannot step over the barrier; but let our domestic price go up even 1 cent a pound, and at once the present tariff figures become inadequate. It is only our present ruinous price which is saving us today and keeping down imports of live cattle to some 60,000 head. We need a tariff equal to the domestic price of cattle and one flexible enough to keep in touch with that price and not allow foreigners to flood our markets with beef raised for 1 cent a pound.

The second item is hides. While the hide is quoted at 12 percent in value, do not forget that it is 20 to 25 percent of the value of the canner cow—that awful bogey which pursues us nowadays. There is no tariff on hides except a small ad valorem of 10 percent, amounting to about 1½ cents a pound, which went on in 1930. Before that hides were free. "Free hides"—those are patriotic and almost sacred words in many parts of this country. Whenever I hear them I think of an honest and almost sainted man whose life was devoted to keeping hides on the free list, and whose picture hangs in most of the front rooms on Beacon Street in Boston, always with a small saucer of pansies in front of it. "Free hides" back there is as much a part of the Bill of Rights as "free speech", and it has certainly proved more profitable. Hides did not have much value in March of last year—about 4 cents a pound. By summer they went up to 12 and 13 cents. And then look at what happened! Hides were loaded onto every craft that could float, from every seaport opening toward America. There were brought over here kangaroo hides from Australia, buffalo hides from India, alligator hides from Africa, cattle hides from South America—hides from 46 countries, some of which I had never heard of; but all were welcome here, and came in almost duty free, to compete with the chief by-product of our cattle.

You can hear arguments, persuasive in their logic, that a tariff on hides would not help the price of cattle. But this fact is within your own knowledge that side by side on the ranges and in the feed lots with our cattle are the sheep. They wear an overcoat which has 36 cents a pound tariff protection. Last year wool was low, and fat lambs sold on the Denver market—the greatest lamb market in the world—for a nickel. This year wool was high, and lambs sold for 7 cents. The meat was worth no more than last year, but the pelt made the difference—and that difference meant salvation to the producer.

This year, after shipping, the sheepmen went home and paid their bills, and held up their heads, and pushed and squeezed a few of us a little farther off our old ranges and ranches. Protection to their byproduct did it. We have tried it for a hundred years with free hides; now let us have a trial of proper protection for hides as well as wool.

Now I come to the third item—fats and oils. Today we are the greatest importers of vegetable oils of any nation in the world, chiefly through our three great soap manufacturers. Copra, which is the coconut without the shell, comes in duty free. Its oil has almost entirely supplanted animal fats in soap manufacture. The poor hog, with his 40 percent fat, is a drug on the market; and, as beef is tied to pork in price, we are immediately concerned. Where do these coconuts come from? The South Sea Islands, South America, the Philippines, and many other tropical countries. They grow in luxuriance, with no labor or cost, or are gathered by 6-cent-a-day coolie labor. Since the Attorney General has ruled that the N.R.A. does not apply to the Philippines, 6 cents is the wage there, too, and copra comes in duty free to this country, allowing the soap manufacturers to cut their costs, but letting animal fats glut the world's markets. Eminent chemists tell us that animal fats can be treated to be the equal, if not the superior, of vegetable fats for nonedible purposes. We believe the great industrialists who keep vegetable oils on the free list are not in love with plants more than animals—they are in love with profits.

We have no one but ourselves to blame for thus neglecting our tariff walls and ignoring our byproducts; but, now that we know the facts, there can be no excuse for further disregard. We want fair protection on cattle, meats, hides, and fats to help maintain a living price for the American cattle producer.

Now we come to the domestic price of cattle—and that is the real nub of the whole inquiry. It does not respond to such a comparatively simple remedy as tariff revision, for you and I must realize that when we need a tariff law passed we speak as Americans to Americans. The Congress, the national administration, and, back of them, the great guiding force of public opinion, are all American bred and, like ourselves, American supported, and they naturally lend a sympathetic ear to our wants. The only trouble to date in that respect has been our lack of organization and our failure to be articulate. Once we overcome those obstacles, we may expect just as much protection as steel, wool, and all the rest.

But when we get together here and start to talk about our home market, in the midst of our own American National Live Stock Association, with its divided opinions, then, indeed, we must realize that we are working on a problem the answer to which has not yet been written in the back of the book. I used to think there was a kind of fitting, and somewhat humorous, justice in the way our national legislators reform the banking business. The year the Federal Reserve Act was passed, when the American bankers met in convention at Boston, only two delegates attempted to speak in favor of the legislation, and each was howled down. This year every banker in America puts on his most mysterious face (and did you ever know any class of men who could be more mysterious than the bankers?) whenever the administration's Security Act is mentioned. It seems as though Congress drags them along with a rope, and they hang back with all four feet set.

But now, how about ourselves? We can get fairly mysterious, or worse, when anyone mentions a processing tax; and so far I have not heard any very constructive suggestions put forth as to an alternative measure to take care of a surplus, if there is one. Let us try to get a close-up look at this problem and see what it really is. According to the carefully prepared figures of Prof. R. C. Ashby, livestock-marketing specialist at the Illinois College of Agriculture, the meat consumers of the United States paid $1,656,000,000 for their meat last year. That represents the consumer's dollar. It is that dollar we are aiming at, and the size of the bite the producer can get out of that dollar is what makes or breaks him. We, the producers, got $721,000,000 of that amount, and the distributors of our product—the railways, the stockyards, the commission men, the packers, the middlemen, and the retailers—got $935,000,000. Our bite of each consumer dollar was 43½ cents, and the distributors' bite was 56½ cents. We spend an average of 2 years raising, feeding, assuming the loss on, paying the taxes and interest on, and handling that animal. All of the distributors together handle our product, when killed, for less than a month, and many of them for only a few minutes. Their turn-over is from 12 to 200 times as fast as ours. We have invested in our ranches, pastures, equipment, and livestock, even at the deflated valuations of 1933, $22,000,000,000. All the distributors together, giving the railroads a proportionate value for the carriage of animals and animal products, have less than a $3,000,000,000 investment. Our time put in and our capital invested pale theirs into insignificance.

When we load cattle onto a freight car, we pay a fixed charge which is calculated to make a fair return on the railroad's investment. The same at the central stockyards and with the commission houses. When the packer buys today, he buys on a market with almost no competition worthy of the name, and when he sells, he adds a fair margin of profit to his goods. The retailer adds another percentage for his distributive service. But when the producer is selling, cost of production and capital invested have no part in the setting of the price.

In years past, competition played the leading part in maintaining a fair price for our product. From 1925 to 1929 there was competition on every central market in the United States. It consisted of what we called the speculators. They were a parasite on the trade—only one of our many; but they were real competition to the packers, and the prices paid showed the service they rendered to us in those years. They are gone now—put out of business by falling prices and large supplies. No one rides down the stockyard alleys these days to bid, till that certain telephone call comes in from packer headquarters in Chicago to name the price for the day. On the Denver yards, order buyers from the coast are the only spasmodic competition the packers have—unless you believe that they compete among themselves.

Now, do not mistake me. I am not here to "pan" the packers. We cannot help ourselves up by pulling someone else down. The packer knows that he did better and made more money when there was competition on the yards and prices were high, as in 1928 and 1929. It was not he, but conditions which he could not control, that wiped out the speculators. Yet, nevertheless, this is the true picture, as every shipper of cattle in this room knows. If we cannot have a price fixed by cost of production or return on capital invested, we must depend on competition; and if it is reduced and controlled by the buyers, where are we?

It seems to me that we are exactly at that turning of the road where we must decide whether we are going to remain like chicken raisers, who never expect to be an organized industry, but who depend solely on the law of supply and demand, manipulated and controlled at every turn, except at the point where the producer sells the live product; or whether we are going to see our situation and opportunity clearly enough to make the raising of cattle worthy of the name "an industry", which presupposes

organization, class consciousness, and reasonable control of its members.

The point is reached where we have left only one question, and that is the last one:

3. WHAT CAN WE DO ABOUT IT?

There is no use wasting time in talking about what we cannot do, but should like to do. Probably we should wish to be like the steel industry—sufficiently organized to have a controlling lobby all the time at the Capital, and able to maintain the domestic price throughout 4 years of depression, so that it would take the intervention of the President of the United States himself to chisel off a few pennies, as he did recently from the price of steel rails. Such objectives are reserved for industries with many years of experience and cooperation. The question is: What can we do today to help this business we love?

Take the smallest part of the difficulty—lack of proper tariff protection. That is neither a religious nor a social problem—it is a political one. It will be decided by Congress, which is a political body. If we want results, we must organize on political lines. Look at the record of the three greatest lobbies of the past 15 years—the labor lobby, the antisaloon lobby, and the veterans' lobby—all organized along political lines. Most of the major industries maintain lobbies at Washington, ready and able to furnish the legislators with all the available data on their business. But the cowman is back home riding herd. He is not back home because he is less intelligent, but because he has never had to present his case in Washington. If prices would continue up, or if more wars, or Coolidge eras were on the horizon, we might not go now. Right here in this assembly are the men and women who can properly organize this cow industry to make it politically irresistible. For we seek no special privileges for our industry; we seek to trample no one down; but we seek only to receive equal protection with other industries. From now on we shall have to ride herd on Congress as well as ride herd at home.

With these minor matters disposed of, we come right down to the question of how we are going to get a fair share of the consumer's dollar—a fair share of that meat bill of $1,656,000,000, which the American people pay annually for their meat. The bare statement that the producer gets less than half, and that the distributor gets more than half, shows on its face that something is radically—and it would appear fundamentally—out of adjustment. I think we are justified in that conclusion, and it is so fundamental that for a moment I want to digress and try to give you some historical explanation of this maldivision.

Meat is the result of two distinct contributions. The production part is wholly agricultural, and the distributive part is wholly industrial. The relationship of agriculture to industry is a national problem. Fourteen years ago Governor Lowden predicted that true prosperity would never come till those two got in gear. A hundred and forty-one years ago, when our present Federal Government was first launched under the present Constitution, it was weak in authority. The breath of life for any government is its income, and in that respect the infant Government was jealously watched by the great and well-established State governments that had allowed it to be created. The country at that time was 75 percent agricultural and 25 percent industrial. Any attempt to duplicate the State's tax levies on the rural population would have been suicidal. There was a certain long-nosed Secretary of the Treasury who was resourceful, and who saw that a tariff on imported manufactures not only would be a lucrative means of income, but, if used to restrict or bar foreign competition with the industries of the country, would put the merchant and commercial classes squarely behind the new central Government, and gradually build up their numbers and power.

The rest of the story you know. The Federal Government has protected industry, and industry has backed—and too often controlled—the Federal Government. Today the ratio is reversed—the country is 75 percent industrial and 25 percent agricultural. It will avail us nothing to attack this close alliance of industry and government, nor will it help our case to say, what any fair-minded man could see at first glance, that the producer of a fat steer should get more than the parties who cut it up and sell it. One hundred and forty years of tariff protection have given a tradition and assertiveness to the industrialists of this Nation which have more to do with our world position than any other one factor. But, coupled with his business acumen, the American industrialist today has an absolute disdain for the failure of farmers to stand together, and, with the calm assurance of the successful man, feels that the producer of farm products offends against the moral law if he tries to protect the price of his product by the methods successfully used by industry for the past hundred years. You may recall those words of that lately departed friend of agriculture, Alexander Legge—himself a great industrialist, but one who saw and was not afraid to speak—when he told the great bankers and industrial leaders to their faces that the farmers were of concern to them chiefly as material to make money from, and as customers for their wares.

I hold in my hand an act of Congress, passed and approved the 12th day of May 1933, called the "Agricultural Adjustment Act." I consider the declaration of policy in that act the badge of degradation of the American farmer. It states that its object is "to restore the purchasing power of the farmers." You men, belonging to the same class as the first President of this country, are an object of solicitude to the Congress of the United States in the year 1933 chiefly as potential customers. You are to be helped chiefly because you are needed as buyers of the output of industry in order to support its prosperity.

But, getting beyond the preamble of the act, we find in that law the very beacon light of hope of agriculturists. We can well afford to overlook the motive for its enactment, if it contains, as I believe it does, the weapons with which we may place ourselves on a par with our urban brothers.

I have sat here throughout this convention and heard this act discussed, and it would almost seem that we know as little about it as the Congress that passed it. In our discussions the act seems to be accepted as synonymous with the processing tax on beef, and our partisanship for or hostility against the act seems to turn on how we like what the processing tax has done to the hog industry.

I ask you to turn to part II of the act, where five subsections are enumerated. The Secretary of Agriculture is given power to provide for reduction in the production for market of any basic commodity by agreements with the producers. He is further given the power to enter into marketing agreements with producers of any agricultural product, with a view to controlling that product for the benefit of the producer. And, lastly, the Secretary is given the power, through licensing, to put teeth into such agreements and make them enforceable. In other words, here is the avenue, corresponding to the one opened up to industries under the N.R.A., to control an agricultural product, to protect its minimum price and to punish would-be chislers. Can there be any other construction of plain words?

True, there is a method devised to take surpluses off the market and pay for them with a processing tax, but the major premise to the infliction of a processing tax is overproduction. Overproduction is a fact not altered by your vote or mine. We might all vote that there is no overproduction, go down and take the Santa Fe train to Washington, all crowd into the Secretary's office, and repeat our conviction with a loud yell; and he might send for some pale young man with a bulging forehead and a pair of horn glasses, who would read a few words off a slip of paper; and we would all go home and feel foolish. There is just as much sense in voting for or against a processing tax as in voting on whether the hat I hold in my hand has 50 or 100 numbers in it. The processing tax is the smallest part of this act.

If I told you that we had one great power in our hands—the power of making or withholding shipments to market on any particular day that a fair minimum price was not paid for top beef cattle—you would agree with me that theoretically we had that power, and that, wisely exerted, it would be an irresistible weapon in maintaining a living price for our product. But you add in the next breath: "You can't work it! The producers won't stick to any rule for 2 days at a time." Then, you would give me the opportunity of reading you the sections of this act which make such an agreement binding on every shipper, and which give the Secretary power, through license or otherwise, to enforce it.

I do not mean that we should get into the dilemma which those poor hog men got into at Chicago last summer, when they let the commission men go on a price strike after the pigs were in the yards and on expense. That was pitiful, and the triumph of the packers was a shining example of their power and unscrupulousness. If we make an agreement, it will be to withhold shipments on our ranges and in our own corrals. The packer must fill his refrigerators when he gets his orders, and, if we can control the flow to the central markets, we can go farther toward restoring competition and maintaining a fair price than by any other means I know of.

Of course, we might back up a surplus. If we did, that is where the processing tax would come in to take care of it. There are plenty of statistics to show that beef cattle are not badly overproduced and that what is primarily needed is control and adjustment in the marketing of them. These are the weapons which this act offers us—not as final remedies but as something with which to try to help ourselves. If we are satisfied with our present methods, we should not experiment. If not, a refusal savors of lack of courage.

We have here an organization with 912 individual members and 86 affiliated associations—a loose organization and, from a national viewpoint, a very small one. We are trying to represent our industry on a budget of $15,000 a year. We think we cannot raise any more. Do you know that we cattle producers, through our 25-cent-a-car tax on shipments, are contributing fully half of the $100,000 a year which the meat producers turn over to the National Livestock and Meat Board to be used, with a like contribution from the packers, to help promote the use of meats? One hundred thousand dollars a year to help push meat products out, and $15,000 to help protect and foster the industry without which there would be no need for any meat boards!

It reminds me of the story of the village situated at the foot of a steep bluff, with many persons in the dark or fog driving off the road and over the bluff. Something had to be done about it, and the villagers met to decide. Some wanted to erect a wall to make such disasters impossible; others thought they should get an ambulance to take the victims to town. It seems that quite a business had grown up for the drug stores, hospitals, doctors, undertakers, etc.; and, when the vote was taken, the new ambulance won by a large majority.

The hour has struck for ranchmen and farmers to modernize their methods of marketing their products. The path to follow is a known and tried one. It is attainable by an organization fairly representative of the industry and properly financed.

The American Farm Bureau's budget in 1933 was $81,623. The budget of the National Grange was $106,500. The members of the American National Livestock Association in 16 States run 15,000,000 cattle. If an assessment of 1 cent a head was paid on two thirds of them, it would raise $100,000 a year. That should be a fair budget for an organization representing one of the major industries of the country.

The thing we can do, and should begin today, is to determine that we will have an organization that does really represent the producer, and that we will properly finance it. That, as I see it, is the challenge to the cattle industry today.

CONCENTRATION OF WEALTH

Mr. LONG. Mr. President, I hope I may have the attention of the Senator from Ohio [Mr. FESS]. I desire to read an Associated Press dispatch relating to a condition which has recently been investigated in the State of Ohio:

5 PERCENT OF OHIOANS HOLD THREE FOURTHS OF INCOME IN STATE

COLUMBUS, OHIO, March 9.—An insight into the distribution of wealth in Ohio was given yesterday in results of a survey conducted by the Research Division of the Special Joint Taxation Commission.

"Seventy-five percent of all productive income is held by 5 percent of the people, 10 percent of the taxpayers hold 83 percent of the income, while less than 2 percent hold more than 60 percent of all unearned income."

The survey was made to determine the results of a classified tax system of personal property. The classified property tax law was enacted to uncover and place upon the personal duplicate a volume of intangible wealth which previously had been overlooked in the filing of tax returns.

This was taken from the Washington Star of March 9, 1934.

Mr. President, I hope I may have the attention of the Senate to say that it does not make any difference how much the income of the country is. This survey in the State of Ohio shows that a little more than 1 percent of the people have more income than all of the rest of the 99 percent of the people put together.

I also wish to read a statement from Mr. Marconi which will be of interest not alone to the Senator from Ohio, but to other Senators as well:

[Washington Star, Mar. 9, 1934]

MARCONI DEFENDS MACHINE BENEFITS—DEFECTIVE DISTRIBUTION OF WEALTH BLAMED FOR WORLD CRISIS

ROME, March 9.—In defense of science and "it's offspring, the machine", Guglielmo Marconi struck out last night at "human selfishness" as one of the basic causes of the world crisis.

"The affirmation that science and the machine are responsible for the world crisis and unemployment must be definitely rejected", the famous inventor asserted in an address before Italy's most distinguished scientists in the Palazzo Venezia.

"They have made it possible for man, with enormously reduced effort, still to have everything he needs for a life of comfort.

"It is not the machine or science that have provoked the ills from which we suffer.

"We have been cheated of the advantages they have brought by a defective distribution of the wealth and resources providence has given us in abundance, and, above all, by human selfishness.

"The time when science was considered a luxury and merely a spiritual satisfaction has passed.

"It is now generally recognized that the collaboration of science, industry, and national defense will give a nation industrial and commercial superiority in time of peace.

"In time of war it gives technical superiority without which sacrifice, courage, and even heroism are often unavailing."

In the distinguished audience was Premier Mussolini, who showed his approval with emphatic nods as the inventor developed his subject.

Mr. President, I merely wish to remark that I am going to call up at an early day the resolution which I have pending providing for the income of the country and the wealth of the country to be distributed among and shared by the people. I do not need to go any further than the authority which I have just read. I hope that my friend from Mississippi [Mr. HARRISON] will take note that the income of the country is sufficient to take care of the people, that there is plenty of prosperity in the land, but that, as the Ohio survey shows, 1 percent of the people probably have more of the income of the country than all the other 99 percent put together.

APPROPRIATIONS FOR THE STATE, JUSTICE, ETC., DEPARTMENTS

Mr. McKELLAR. Mr. President, I move that the Senate proceed to the consideration of the bill, H.R. 7513, making appropriations for the Departments of State and Justice, and so forth.

The motion was agreed to, and the Senate proceeded to consider the bill (H.R. 7513) making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1935, and for other purposes, which had been reported from the Committee on Appropriations with amendments.

Mr. McKELLAR. I ask unanimous consent that the formal reading of the bill be dispensed with, that the bill be read for amendment, committee amendments to be first considered.

The VICE PRESIDENT. Is there objection? The Chair hears none, and it is so ordered. The clerk will state the first amendment.

The first amendment of the Committee on Appropriations was, under the heading "Title I—Department of State—Collecting and editing official papers of Territories of the United States", on page 5, line 6, after the word "this", to strike out "appropriation" and insert "or any existing appropriation for printing and binding of these papers", so as to read:

For the expenses of collecting, editing, copying, and arranging for publication the official papers of the Territories of the United States, including personal services in the District of Columbia and elsewhere, printing and binding, and contingent and traveling expenses, as provided by the act approved February 28, 1929 (45 Stat. 1412), $12,000: *Provided*, That the total number of copies of any volume to be printed and bound under this or any existing appropriation for printing and binding of these papers shall not exceed 1,227, which shall be distributed as provided in section 3 of such act, except that each Senator shall receive not to exceed three copies and each Representative not to exceed one.

The amendment was agreed to.

The next amendment was, under the subhead "Allowances for rent, heat, fuel, and light, Foreign Service", on page 8, line 10, after the word "exceed", to strike out "$500,000" and insert "$1,454,000"; and in line 12, after the word "light", to strike out "$1,271,955" and insert "$2,225,955, of which $238,000 shall be immediately available", so as to read:

For rent, heat, fuel, and light for the Foreign Service for offices and grounds, and, as authorized by the act approved June 26, 1930 (U.S.C., supp. VI, title 5, sec. 118a), for living quarters and not to exceed $1,454,000 for allowances for living quarters, including heat, fuel, and light, $2,225,955, of which $238,000 shall be immediately available.

The amendment was agreed to.

The next amendment was, on page 8, line 17, after the word "years" and the colon, to strike out the following additional proviso:

Provided further, That no part of this appropriation shall be used for allowances for living quarters, including heat, fuel, and light in an amount exceeding $720 for any ambassador, minister, or Foreign Service officer.

The amendment was agreed to.

The next amendment was, on page 9, after line 13, to insert:

COST OF LIVING ALLOWANCE, FOREIGN SERVICE OFFICERS

For allowances to diplomatic, consular, and Foreign Service officers and clerks, wherever the cost of living may be proportionately so high that, in the opinion of the Secretary of State, such allowances are necessary to enable such officers to carry on their work efficiently, as authorized by the act approved February 23, 1931 (U.S.C., supp. VI, title 22, secs. 12, 23a), $300,000, of which amount not to exceed $100,000 shall be immediately available.

Mr. McKELLAR. Mr. President, I desire to offer an amendment to the committee amendment. On page 9, line 18, after the word "officers", insert the words "and clerks."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 9, line 18, in the committee amendment, after the word "officers", insert "and clerks", so as to make the committee amendment read:

COST OF LIVING ALLOWANCE, FOREIGN SERVICE OFFICERS

For allowances to diplomatic, consular, and Foreign Service officers and clerks, wherever the cost of living may be proportionately so high that, in the opinion of the Secretary of State, such

allowances are necessary to enable such officers and clerks to carry on their work efficiently, as authorized by the act approved February 23, 1931 (U.S.C., supp. VI, title 22, secs. 12, 23a), $300,000, of which amount not to exceed $100,000 shall be immediately available.

The amendment to the amendment was agreed to.

The amendment as amended was agreed to.

The next amendment of the Committee on Appropriations was, under the subhead "Rescue, relief, and protection of American seamen", on page 12, line 19, after the figures "$6,000", to strike out the colon and the following proviso:

Provided, That no part of this or any other appropriation shall be available for making payment to steamship owners or operators for transporting a destitute or shipwrecked seaman if the last previous service of the destitute or shipwrecked seaman was on a vessel of such steamship owner or operator and was not terminated by desertion.

The amendment was agreed to.

The next amendment was, under the subhead "Contributions, quotas, etc." on page 14, line 11, after the word "Commission", to strike out "$3,500; in all, $579,498" and insert "$4,075, in all, $580,523, together with such additional sums, due to increases in rates of exchange as may be necessary to pay in foreign currencies the quotas and contributions required by the several treaties, conventions, or laws establishing the amount of the obligation for the fiscal years 1934 and 1935", so as to read:

For payment of the annual contributions, quotas, and/or expenses, including loss by exchange, in discharge of the obligations of the United States in connection with international commissions, congresses, bureaus, and other objects, as follows: Cape Spartel and Tangier Light, Coast of Morocco, $825; International Bureau of Weights and Measures, $4,342.50; International Bureau for Publication of Customs Tariffs, $1,400; Pan American Union, quota, $168,762, printing and binding, $20,000, in all, $188,762; International Bureau of Permanent Court of Arbitration, $2,000; Bureau of Interparliamentary Union for Promotion of International Arbitration, $7,500; International Institute of Agriculture at Rome, Italy, $5,400; Pan American Sanitary Bureau, $30,236.51; International Office of Public Health, $3,015.79; International Radiotelegraphic Convention, $7,527; Government of Panama, $250,000; International Hydrographic Bureau, $5,404; International Trade-Mark Registration Bureau, $14,330.20; International Bureau for Protection of Industrial Property, $1,350; Gorgas Memorial Laboratory, $50,000; American International Institute for the Protection of Childhood, $2,000; International Statistical Bureau at The Hague, $2,000; International Map of the World on the Millionth Scale, $50; International Technical Committee of Aerial Legal Experts, $250; Convention Relating to Liquor Traffic in Africa, $55; and International Prison Commission, $4,075, in all, $580,523, together with such additional sums, due to increases in rates of exchange as may be necessary to pay in foreign currencies the quotas and contributions required by the several treaties, conventions, or laws establishing the amount of the obligation for the fiscal years 1934 and 1935.

The amendment was agreed to.

The next amendment was, under the subhead "Waterways treaty, United States and Great Britain: International Joint Commission, United States and Great Britain", on page 17, line 22, after the word "vehicle", to strike out "$54,200" and insert "$74,200", so as to read:

For an additional amount for necessary special or technical investigations in connection with matters which fall within the scope of the jurisdiction of the International Joint Commission, including personal services in the District of Columbia or elsewhere, traveling expenses, procurement of technical and scientific equipment, and the purchase, exchange, hire, maintenance, repair, and operation of motor-propelled and horse-drawn passenger-carrying vehicles, $74,200, to be disbursed under the direction of the Secretary of State, who is authorized to transfer to any department or independent establishment of the Government, with the consent of the head thereof, any part of this amount for direct expenditure by such department or establishment for the purposes of this appropriation.

The amendment was agreed to.

The next amendment was, under the heading "Judicial—Expenses of United States courts, marshals, district attorneys, clerks, and other", on page 32, line 6, after the word "attorney", to strike out "$2,344,580" and insert "$2,494,580", so as to read:

Salaries and expenses of district attorneys, etc.: For salaries, traveling, and other expenses of United States district attorneys and their regular assistants, clerks, and other employees, including the office expenses of United States district attorneys in Alaska, and for salaries of regularly appointed clerks to United States district attorneys for services rendered during vacancy in the office of the United States district attorney, $2,494,580.

The amendment was agreed to.

The next amendment was, on page 32, line 13, after the figures "$600,000", to insert "of which $50,000 shall be immediately available", so as to read:

Salaries and expenses of special attorneys, etc.: For compensation and traveling expenses of special attorneys and assistants to the Attorney General and to United States district attorneys employed by the Attorney General to aid in special cases, and for payment of foreign counsel employed by the Attorney General in special cases, $600,000, of which $50,000 shall be immediately available.

The amendment was agreed to.

The next amendment was, on page 32, line 16, after the figures "$10,000", to insert a colon and the following additional proviso:

Provided further, That reports be submitted to the Congress on the 1st day of July and January showing the names of the persons employed hereunder, the annual rate of compensation or amount of any fee paid to each, together with a description of their duties.

The amendment was agreed to.

The next amendment was, under the subhead "Medical and hospital service", on page 43, line 17, after the figures "$1,400,000", to insert a colon and the following proviso:

Provided, That a report be submitted to Congress on the first day of the next regular session showing the names of the persons employed hereunder, the annual rate of compensation paid to each together with a description of their duties.

So as to read:

Support of prisoners: For support of United States prisoners, in non-Federal institutions in the Territory of Alaska, including necessary clothing and medical aid, discharge gratuities provided by law and transportation to place of conviction or place of bona fide residence in the United States, or such other place within the United States as may be authorized by the Attorney General; and including rent, repair, alteration, and maintenance of buildings and the maintenance of prisoners therein, occupied under authority of sections 4 and 5 of the act of May 14, 1930 (U.S.C., Supp. VI, title 18, sec. 696); support of prisoners becoming insane during imprisonment, and who continue insane after expiration of sentence, who have no friends to whom they can be sent; shipping remains of deceased prisoners to their friends or relatives in the United States, and interment of deceased prisoners whose remains are unclaimed; expenses incurred in identifying, pursuing, and returning escaped prisoners and for rewards for their recapture; and for repairs, betterments, and impovements of United States jails, including sidewalks, $1,400,000: *Provided*, That a report be submited to Congress on the first day of the next regular session showing the names of the persons employed hereunder, the annual rate of compensation paid to each, together with a description of their duties.

The amendment was agreed to.

The next amendment was, under the heading "Title III—Department of Commerce, Bureau of Lighthouses", on page 73, line 12, before the word "at", to strike out "purchased" and insert "purchase", so as to read:

General expenses: For supplies, including replacement of and necessary additions to existing equipment, repairs, maintenance, and incidental expenses of lighthouses and other lights, beacons, buoyage, fog signals, lighting of rivers heretofore authorized to be lighted, light vessels, other aids to navigation, and lighthouse tenders, including the establishment, repair, and improvement of beacons and day marks, and purchase of land for same; establishment of post lights, buoys, submarine signals, and fog signals; establishment of oil or carbide houses, not to exceed $10,000: *Provided*, That any oil or carbide house erected hereunder shall not exceed $1,000 in cost; construction of necessary outbuildings at a cost not exceeding $1,000 at any one light station in any fiscal year; improvement of grounds and buildings connected with light stations and depots; restoring light stations and depots and buildings connected therewith: *Provided further*, That such restoration shall be limited to the original purpose of the structures; wages of persons attending post lights; temporary employees and field force while engaged on works of general repair and maintenance, and laborers and mechanics at lighthouse depots; rations and provisions or commutation thereof for working parties in the field, officers and crews of light vessels and tenders, and officials and other authorized persons of the Lighthouse Service on duty on board of such tenders or vessels, and money accruing from commutation for rations and provisions for the above-named persons on board of tenders and light vessels or in working parties in the field may be paid on proper vouchers to the person having charge of the mess of such vessel or party; not exceeding $2,000 for packing, crating, and transporting personal household effects of employees when transferred from one official station to another for per-

manent duty; purchase of rubber boots, oilskins, rubber gloves, and coats, caps, and aprons for stewards' departments on vessels; reimbursement under rules prescribed by the Secretary of Commerce of keepers of light stations and masters of light vessels and of lighthouse tenders for rations and provisions and clothing furnished shipwrecked persons who may be temporarily provided for by them, not exceeding in all $5,000 in any fiscal year; fuel, light, and rent of quarters where necessary for keepers of lighthouses; purchase of land sites for fog signals; rent of necessary ground for all such lights and beacons as are for temporary use or to mark changeable channels and which in consequence cannot be made permanent; rent of offices, depots, and wharves; traveling expenses, including travel for the examinations authorized by the act entitled "An act to provide for retirement for disability in the Lighthouse Service", approved March 4, 1925 (U.S.C., title 33, sec. 765); mileage; library books for light stations and vessels, and technical books and periodicals not exceeding $1,000; traveling expenses of teachers while actually employed by States or private persons to instruct the children of keepers of lighthouses; all other contingent expenses of district offices and depots, including the purchase of provisions for sale to lighthouse keepers at isolated stations, and the appropriation reimbursed; purchase at not to exceed $3,600, exchange, maintenance, operation, and repair of motor-propelled passenger-carrying vehicles for official use in field work; payment of rewards for apprehension and conviction, or for information helpful to the apprehension and conviction of persons found interfering with aids to navigation maintained by the Lighthouse Service, in violation of section 6 of the act of May 14, 1908 (U.S.C., title 33, sec. 761); $3,752,980.

The amendment was agreed to.

The next amendment was, under the subhead "Bureau of Fisheries", on page 83, line 3, to strike out "$58,840" and insert "$57,125", so as to read:

Fishery industries: For collection and compilation of statistics of the fisheries and the study of their methods and relations, and the methods of preservation and utilization of fishery products, including pay of permanent employees not to exceed $24,270, compensation of temporary employees, travel, and preparation of reports, including temporary employees in the District of Columbia not to exceed $1,800, and all other necessary expenses in connection therewith, including the purchase (not to exceed $500), exchange, maintenance, repair, and operation of motor-propelled passenger-carrying vehicles for official use in the field work of the Bureau of Fisheries, $57,125.

The amendment was agreed to.

The next amendment was, on page 83, after line 22, to insert:

Enforcement of black bass law: To enable the Secretary of Commerce to carry into effect the act entitled "An act to amend the act entitled 'An act to regulate interstate transportation of black bass, and for other purposes', approved May 20, 1926" (U.S.C., supp. VI, title 16, secs. 851–856), approved July 2, 1930 (46 Stat., pp. 845–847), $13,715, of which not to exceed $1,620 may be expended for personal services in the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 84, after line 12, to insert:

Survey of fishes, State of Mississippi: For continuing the survey of the fishes and fisheries in the State of Mississippi, heretofore undertaken by the State game and fish commission in cooperation with the Bureau of Fisheries, $2,750, to be immediately available.

The amendment was agreed to.

The next amendment was, under the subhead "Patent Office", on page 85, line 12, after the word "exceed", to strike out "$25,000" and insert "$30,000", so as to read:

Salaries: For the Commissioner of Patents and other personal services in the District of Columbia, $2,921,931: *Provided*, That of the amount herein appropriated not to exceed $30,000 may be used for special and temporary services of typists certified by the Civil Service Commission, who may be employed in such numbers, at $4 per diem, as may, in the judgment of the Commissioner of Patents, be necessary to keep current the work of furnishing manuscript copies of records.

Mr. McKELLAR. Mr. President, I desire to have that amendment rejected, because in copying the bill a mistake was made. The amendment ought to be, in line 23 to strike out "$25,000" and insert "$30,000."

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

Mr. McKELLAR. Now, Mr. President, in order to carry out the intent of the amendment just rejected, I move to strike out "$25,000" in line 23 and insert "$30,000."

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 85, line 23, after the words "Patent Office", it is proposed to strike out "$25,000" and insert "$30,000", so as to make the paragraph read:

For purchase of law, professional, and other reference books and publications and scientific books, including their exchange, and expenses of transporting publications of patents issued by the Patent Office to foreign governments, directories, and for other contingent and miscellaneous expenses of the Patent Office, $30,000.

The amendment was agreed to.

The next amendment was, under the subhead "United States Shipping Board Bureau", on page 97, line 16, before "secs.", where it occurs the first time, to strike out "26" and insert "46", so as to read:

Salaries and expenses: To carry out the provisions of the Shipping Act, 1916, as amended, and the Merchant Marine Acts of 1920 and 1928, as amended (U.S.C., title 46, secs. 804, 805, 861–889; supp. VI, title 46, secs. 891–891x, act of June 16, 1933, 48 Stat., 298; Executive Order No. 6166, June 10, 1933), including the compensation of attorneys, officers, naval architects, special experts, examiners, and clerks, one technical expert in connection with construction loan fund, at not to exceed $10,000 per annum, and other employees in the District of Columbia and elsewhere; and for other expenses of the Bureau, including the rental of quarters outside the District of Columbia, traveling expenses of employees of the Bureau, while upon official business away from their designated posts of duty, including attendance at meetings or conventions of members of any society or association, the purpose of which is of interest to the development and maintenance of an American merchant marine, when incurred on the written authority of the Secretary of Commerce, and for the employment by contract of expert stenographic reporters for its official reporting work, $219,216, of which amount not to exceed $205,957 may be expended for personal services in the District of Columbia.

The amendment was agreed to.

The next amendment was, on page 100, line 20, after the words "United States Shipping", to insert "Board", so as to read:

No part of the sums appropriated in this act shall be used to pay the compensation of any attorney, regular or special, for the United States Shipping Board Bureau or the United States Shipping Board Merchant Fleet Corporation unless the contract of employment has been approved by the Attorney General of the United States.

The amendment was agreed to.

The next amendment was, on page 101, line 8, after the word "oil", to strike out "or" and insert "of", so as to read:

No part of the funds of the United States Shipping Board Merchant Fleet Corporation shall be available during the fiscal year 1935 for the purchase of any kind of fuel oil of foreign production for issue, delivery, or sale to ships at points either in the United States or its possessions, where oil of the production of the United States or its possessions is available, if the cost of such oil compared with foreign-oil costs be not unreasonable.

The amendment was agreed to.

The next amendment was, under Title IV—Department of Labor—on page 102, line 22, after the words "in all", to strike out "$53,000" and insert "$57,100", so as to read:

Contingent expenses: For contingent and miscellaneous expenses of the offices and bureaus of the Department, for which appropriations for contingent and miscellaneous expenses are not specifically made, including the purchase of stationery, furniture, and repairs to the same; carpets, matting, oil-cloths, file cases, towels, ice, brooms, soap, sponges, laundry, street-car fares, not exceeding $200; lighting and heating; purchase, exchange, maintenance, and repair of motorcycles and motor trucks; maintenance, operation, and repair of a motor-propelled passenger-carrying vehicle, to be used only for official purposes; freight and express charges; newspaper clippings, not to exceed $1,800; postage to foreign countries, telegraph and telephone service, typewriters, adding machines, and other labor-saving devices; purchase of law books, books of reference, newspapers, and periodicals, not exceeding $5,150; in all, $57,100; and in addition thereto such sum as may be necessary, not in excess of $25,000, to facilitate the purchase, through the central purchasing office as provided in the act approved June 17, 1910 (U.S.C., title 41, sec. 7), of certain supplies for the Immigration Service, shall be deducted from the appropriation "Salaries and expenses, Immigration and Naturalization Service", made for the fiscal year 1935 and added to the appropriation "Contingent expenses, Department of Labor", for that year; and the total sum thereof shall be and constitute the appropriation for contingent expenses for the Department of Labor, to be expended through the central purchasing office (Division of Publications and Supplies), Department of Labor.

The amendment was agreed to.

The next amendment was, on page 104, line 2, after the figures "$185,630", to insert a colon and the following proviso: "*Provided*, That the salary paid to any commissioner of conciliation out of this appropriation shall not exceed $10 per day", so as to read:

Commissioners of conciliation: To enable the Secretary of Labor to exercise the authority vested in him by section 8 of the act creating the Department of Labor (U.S.C., title 5, sec. 611) and to appoint commissioners of conciliation, traveling expenses, telegraph and telephone service, and not to exceed $14,635 for personal services in the District of Columbia, $185,630: *Provided*, That the salary paid to any commissioner of conciliation out of this appropriation shall not exceed $10 per day.

Mr. McKELLAR. Mr. President, as a committee amendment, I move to strike out "$10" and insert "$12."

The VICE PRESIDENT. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 104, in the committee amendment, in line 4, it is proposed to strike out "$10" and insert "$12."

The amendment to the amendment was agreed to.

The amendment, as amended, was agreed to.

The next amendment was, under the subhead "Immigration and Naturalization Service", on page 106, line 17, after the word "exceed", to strike out "$7,000" and insert "$22,600" so as to read:

Salaries and expenses: For enforcement of the laws regulating the immigration to, the residence in, and the exclusion and deportation from the United States of aliens, and persons subject to the Chinese exclusion laws; for enforcement of the laws authorizing a uniform rule for the naturalization of aliens; salaries, transportation, traveling, and other expenses of officers, clerks, and other employees appointed to enforce said laws; care, detention, maintenance, transportation, and traveling expenses incident to the deportation and exclusion of aliens, and persons subject to the Chinese exclusion laws, as authorized by law, in the United States and to, through, or in foreign countries; purchase of supplies and equipment, including alterations and repairs; purchase, exchange, operation, maintenance, and repair of motor-propelled vehicles, including passenger-carrying vehicles for official use in field work; cost of reports of decisions of the Federal courts and digests thereof for official use; verifications of legal papers; refunding of head tax, maintenance bills, immigration fines, registry fees, reentry permit fees, and naturalization fees, upon presentation of evidence showing conclusively that collection and deposit was made through error; mileage and fees to witnesses subpenaed on behalf of the United States, and for all other expenses necessary to enforce said laws, $8,460,000, all to be expended under the direction of the Secretary of Labor, of which amount not to exceed $477,800 may be expended for the salary of the Commissioner of Immigration and Naturalization and other personal services in the District of Columbia, including services of persons authorized by law to be detailed there for duty: *Provided*, That not to exceed $45,000 of the sum herein appropriated shall be available for the purchase, including exchange, of motor-propelled passenger-carrying vehicles: *Provided further*, That the Commissioner of Immigration and Naturalization, with the approval of the Secretary of Labor, may contract with officers and employees stationed outside of the District of Columbia whose salaries are payable from this appropriation, for the use, on official business outside of the District of Columbia, of privately owned horses, and the consideration agreed upon shall be payable from the funds herein appropriated: *Provided further*, That not to exceed $22,600 of the total amount herein appropriated shall be available for allowances for living quarters, including heat, fuel, and light, as authorized by the act approved June 26, 1930 (U.S.C., supp. VI, title 5, sec. 118a), not to exceed $720 for any person:

The amendment was agreed to.

The next amendment was, under the subhead "United States Employment Service", on page 109, line 4, after the word "expenses", to strike out "$1,590,000" and insert "$3,700,000"; in line 5, after the word "exceed", to strike out "$135,000" and insert "$190,000"; in line 7, after the words "sum of", to strike out "$1,590,000" and insert "$3,700,000"; and in line 8, after the word "than", to strike out "$1,125,000" and insert "$3,000,000", so as to read:

For carrying out the provisions of the act entitled "An act to provide for the establishment of a national employment system and for cooperation with the States in the promotion of such system, and for other purposes", approved June 6, 1933; personal services and rent in the District of Columbia and elsewhere; traveling expenses, including expenses of attendance at meetings concerned with the work of the United States Employment Service when specifically authorized by the Secretary of Labor; law books, books of reference and periodicals, printing and binding, supplies and equipment, telegraph and telephone service, and miscellaneous expenses, $3,700,000; of which amount not to exceed $190,000 shall be available for personal services in the department in the District of Columbia; and of such sum of $3,700,000 not more than $3,000,000 shall be apportioned to the States, and the remainder shall be available for all other purposes.

Mr. DICKINSON. Mr. President I think the Senator in charge of the bill ought to make a brief statement with reference to this increase and its purpose. The item is a large one, involving more than $2,000,000, and it ought not to be acted upon just as a matter of routine.

Mr. McKELLAR. Mr. President, the facts about that matter are these:

What is known as the "Wagner bill", a bill to do away with unemployment, passed this body and passed the House some time ago. The Budget estimate for carrying that bill into execution was $3,700,000. For some reason the House cut down the amount appropriated to $1,125,000. The Senate committee recommends the restoration of the Budget item, and I hope the amendment will be agreed to.

The VICE PRESIDENT. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

The next amendment was, on page 110, after line 19, to insert the following additional section:

SEC. 2. That no part of the money appropriated under this act shall be paid to any person for the filling of any position for which he or she has been nominated after the Senate has voted not to approve of the nomination of said person.

The amendment was agreed to.

The VICE PRESIDENT. That completes the committee amendments.

Mr. McKELLAR. Mr. President, on page 9, after line 22, I offer the amendment which I send to the desk and ask to have stated.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 9, after line 22, it is proposed to insert:

FOREIGN SERVICE BUILDING FUND

For the purpose of carrying into effect the provisions of the "Foreign Service Buildings Act, 1926", as amended (U.S.C., supp. VI, title 22, sec. 295), and for each and every object thereof, including the initial alterations, repair, and furnishing of buildings heretofore acquired under specific authorization of Congress, for the use of the diplomatic and consular establishments in foreign countries, $1,165,000, fiscal year 1935, to remain available until expended: *Provided*, That in extending appropriations for the foregoing purposes, obligations shall not be incurred which will require expenditures in excess of the total of $10,000,000, now authorized by law.

The amendment was agreed to.

Mr. McKELLAR. On page 20, line 10, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The CHIEF CLERK. On page 20, line 10, it is proposed to strike out "$1,044,230" and insert "$1,216,500", so as to read:

OFFICE OF THE ATTORNEY GENERAL

Salaries: For the Attorney General, Solicitor General, Assistant to the Attorney General, and other personal services in the District of Columbia; $1,216,500.

The VICE PRESIDENT. The question is on agreeing to the amendment.

Mr. DICKINSON. Mr. President, what is the purpose of these increases?

Mr. McKELLAR. Their purpose is as stated by the President. They were submitted to the Budget and were favorably passed on. They are for the purpose of adding a number of attorneys in the Department of Justice to look after the work that has been taken away from the Treasury Department and assigned to the Department of Justice.

Mr. DICKINSON. These estimates were not brought to the committee?

Mr. McKELLAR. No; they have come in since, and I offer this not as a committee amendment but as one offered by me. I will give the reasons for it.

At the time of the transfer from the Treasury Department to the Department of Justice of the functions enumerated in Executive Order No. 6166 it was roughly estimated that 22 attorneys and 16 stenographers would be required to handle the tax litigation. This was less than one half of the total force of the Civil Division in the office of the General Counsel which had been performing the

work. However, there were actually transferred from the personnel of the Treasury Department only 13 attorneys and 7 stenographers. The Budget Bureau allowed three additional attorneys at $5,600 out of the reserve funds of the Department of Justice. There was taken over with this personnel approximately one half of the cases pending in the district courts, the understanding being that the balance, amounting in round numbers to 1,200 cases, would be taken over between October 10, 1933, and June 30, 1934.

In our regular estimates for 1935 we asked for three more attorneys than we were allowed by the Budget for 1934, but we were only given the same number as had been allowed for 1934. Subsequent to the preparation of those estimates and also subsequent to the hearings before the congressional committee held early in December a complete survey of all the tax cases pending in various courts was completed by this Department. This survey now clearly indicates that the previous estimates have been entirely inadequate.

The report of the Treasury Department for the fiscal year ended June 30, 1933, showed that 196 cases were tried in the district courts. There will be from two and one half to three times as many cases disposed of in the district courts this fiscal year as last. This will result from the policy adopted by this Department in unison with the Treasury Department of accelerating the disposition of the cases.

Analysis of the cases taken over by us shows that many of them had been pending for 5 or 6 years or longer. The more expeditious disposition of these cases is made possible, in the first place, by the direct supervision which this Department exercises over United States attorneys and its closer contacts with the courts, and in the second place by reason of the fact that the releasing from the dockets of the various district courts of the thousands of prohibition cases has cleared the way for the setting and speedy disposition of the tax cases. Because of this acceleration in order adequately to handle the work which we have already taken over it has been necessary to appoint eight additional attorneys for the present fiscal year. Provision should be made for these attorneys in the 1935 estimates. In order to take over the 1,200 cases remaining to be transferred from the Treasury Department 21 additional attorneys will be required if those cases are to be disposed of at the same accelerated rate. This makes a total of 29 attorneys required to handle all the work; that is, those cases already taken over and those remaining to be taken over by June 30, 1934. This will mean that each attorney will have to carry on his docket an average of 85 cases, some 35 of which will be active—about the limit of the capacity of an attorney to handle efficiently.

It is roughly estimated that $125,000,000 are involved in these tax cases. Of this amount, $19,000,000 are involved in suits to collect unpaid taxes. Every one of these cases when brought to a conclusion means the payment of money into the Treasury. A number of these individual cases involve several hundred thousand dollars each. The balance of the $125,000,000 are involved in suits brought by taxpayers for refund of taxes. Many of them have been dragging along for years and in every case which is ultimately decided against the Government a refund must be made of the taxes paid, together with 6 percent interest. In the past, experience has proved that approximately 30 percent of these refund cases have been lost—thus every day's delay in the bringing of these cases to a conclusion means a loss to the Government of between $6,000 and $7,000 in interest.

Also the work is increasing in volume. In connection with the work of the Board of Tax Appeals, there has been an increase in the number of petitions for review filed in the Courts of Appeals in the first 8 months of the current fiscal year of about 33 percent over the number so filed in the corresponding period of the last fiscal year. It is estimated that there will be a corresponding increase in ratio of new cases filed in the district courts.

The work requires skilled attorneys. We therefore ask for 4 P–6, $6,500 attorneys, who will aid in supervision and review work; 13 P–6, $5,600, who will handle the more difficult and complicated cases; and 5 at P–5, $4,600, who handle the cases of average difficulty; 3 at P–4, $3,800, and 4 at P–3, $3,200, who will handle the less difficult cases.

Request is being made for 26 clerk-stenographers, consisting of 6 in grade Caf–4, at $1,800; 19 in Caf–3, $1,620; and 1 in Caf–2, $1,440. The 6 in grade Caf–4 are needed to perform secretarial duties as well as clerical and stenographic work. The service required of all of them requires special training and skill, and is constant and exacting. The number of stenographers required has been arrived at by an estimate of 1 stenographer for each 2 attorneys engaged in the appellate court work and 2 stenographers for each 3 attorneys engaged in district court work. Experience has proved that this is the ratio required to perform the work. It has been necessary in order to meet that ratio and perform the work already transferred to appoint seven additional stenographers for the present fiscal year. Provision is made in these estimates for the continuation of their employment. The remaining 19 stenographers are estimated as necessary to maintain the same ratio for the performance of the work which remains to be taken over.

Additional funds have been already provided the Treasury Department to defray the cost of its part in the intensive drive which has recently been inaugurated to collect taxes. The Department of Justice must play an important and integral part in this drive if it is to be effective. It cannot do its part unless the funds herein requested are provided.

Mr. DICKINSON. There has been no reduction in the number of attorneys in the Treasury Department?

Mr. McKELLAR. All the attorneys were not transferred; only 13 were transferred, and that number is wholly inadequate.

Mr. DICKINSON. What will the attorneys who have been handling tax cases in the Treasury Department do now that the cases have all been turned over to the Department of Justice?

Mr. McKELLAR. There are other cases besides tax cases, of course.

Mr. DICKINSON. I do not desire to object to the amendment, but I want to make this observation, that every time there is a consolidation of bureaus, every time there is a transfer of personnel, there is an increase in personnel—Democratic appointees—paid for by the taxpayers.

The VICE PRESIDENT. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McKELLAR. Mr. President, I offer another amendment, which I send to the desk.

The VICE PRESIDENT. The clerk will state the amendment.

The CHIEF CLERK. On page 20, line 13, it is proposed to strike out "$8,500" and in lieu thereof to insert "$10,130", so as to read:

Books: For the purchase of law books, books of reference, and periodicals, including the exchange thereof, for the Department of Justice, $10,130: *Provided*, That not to exceed $2 per volume shall be paid for the current and future volumes of the United States Code, Annotated.

The amendment was agreed to.

Mr. McKELLAR. I offer another amendment, which I send to the desk.

The PRESIDING OFFICER (Mr. BYRD in the chair). The clerk will state the amendment.

The CHIEF CLERK. On page 21, line 3, it is proposed to strike out "$85,000" and to insert in lieu thereof "$86,000", so as to read:

Contingent expenses: For stationery, furniture and repairs, floor coverings not exceeding $1,500, file holders and cases; miscellaneous expenditures, including telegraphing and telephones, postage, labor, typewriters and adding machines and the exchange thereof and repairs thereto, street-car fares not exceeding $300, newspapers, press clippings, and other necessaries ordered by the Attorney General; official transportation, including the repair, maintenance, and operation of five motor-driven passenger cars, one for the Attorney General, two for general use of the Department, two for the Division of Investigation for investigative work, delivery truck, and motorcycle, to be used only for official purposes, and purchase and repair of bicycles, $86,000:

Mr. McKELLAR. Mr. President, I think, perhaps, I should explain that amendment. On page 8 of the bill there was stricken out this limitation, "That no part of this appropriation shall be used for allowances for living quarters, including heat, fuel, and light in an amount exceeding $720", and so forth. The amendment I have just sent to the desk strikes out the same limitation as it relates to the Commerce Department, where conditions are similar to those existing under the other departments.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McKELLAR. I offer another amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 21, line 10, it is proposed to strike out "$275,000" and insert in lieu thereof "$282,000", so as to read:

Printing and binding: For printing and binding for the Department of Justice and the courts of the United States, $282,000.

Mr. McKELLAR. Mr. President, all these amendments refer to the same matter.

The amendment was agreed to.

Mr. McKELLAR. I offer another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 21, line 14, it is proposed to strike out "$25,000" and to insert in lieu thereof "$37,000", so as to read:

Traveling and miscellaneous expenses: For traveling and other miscellaneous and emergency expenses, authorized and approved by the Attorney General, to be expended at his discretion, $37,000.

The amendment was agreed to.

Mr. McKELLAR. I offer another amendment.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 30, lines 20 and 21, it is proposed to strike out the words "and not to exceed $720 for any one person", so as to read:

UNITED STATES COURT FOR CHINA

United States Court for China: For salaries of the judge, district attorney, and other officers and employees of the United States Court for China; court expenses, including reference and law books, ice and drinking water for office purposes, not exceeding $1,080 for allowances for living quarters, including fuel, heat, and light, as provided by the act approved June 26, 1930 (U.S.C., supp. VI, title 5, sec. 118a); traveling expenses of officers and employees of the court, and under such regulations as the Attorney General may prescribe of their families and effects, in going to and returning from their posts; preparation and transportation of remains of officers and employees who may die abroad or in transit while in the discharge of their official duties, to their former homes in the United States, or to a place not more distant for interment and for the ordinary expenses of such interment; the expense of maintaining in China, American convicts, and persons declared insane by the court, rent of quarters for prisoners, ice and drinking water for prison purposes, including wages of prison keepers, and the expense of keeping, feeding, and transporting prisoners and persons declared insane by the court, $42,440.

The amendment was agreed to.

Mr. McKELLAR. Mr. President, on page 31 I want to correct a typographical error. The words "expenses of the United States Courts" occur in line 12, when they ought to appear in line 13, and the words in line 13 ought to be put back into line 12.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 31, lines 12 and 13 should be transposed so as to read:

Marshals, district attorneys, clerks, and other expenses of United States courts.

The amendment was agreed to.

Mr. McKELLAR. I have one more amendment to submit, on page 46, line 13.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 46, line 13, it is proposed to strike out "$30,000" and insert in lieu thereof "$40,000"; and in line 14, to strike out "$25,000" and insert in lieu thereof "$35,000", so as to read:

FEDERAL EMPLOYMENT STABILIZATION BOARD

Salaries and expenses: To enable the Secretary of Commerce to carry out the provisions of the Employment Stabilization Act of 1931, approved February 10, 1931 (U.S.C., supp. VI, title 29, secs. 48–48g), including personal services in the District of Columbia and elsewhere, traveling expenses, purchases of equipment, furniture, stationery and office supplies, printing and binding, repairs to equipment, law books, books of reference, and other necessary publications, and to procure by contract or otherwise any information or data concerning construction which may be considered pertinent, and all other incidental expenses not included in the foregoing $40,000, of which amount not to exceed $35,000 may be expended for personal services in the District of Columbia.

The amendments were agreed to.

Mr. McKELLAR. I desire to suggest another amendment, on page 56.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 56, line 8, after the numerals "$36,000", it is proposed to strike out the colon and the following proviso:

Provided, That the maximum allowance to any officer shall not exceed $720.

The amendment was agreed to.

Mr. McKELLAR. I also move to amend on page 101, line 12.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 101, after line 12, it is proposed to insert a new paragraph as follows:

No part of the funds of the United States Shipping Board Bureau or the United States Shipping Board Merchant Fleet Corporation shall be available for the maintenance of a sea service bureau.

Mr. LA FOLLETTE. Mr. President, I desire to make a brief statement in regard to this amendment.

The Sea Service Bureau was created during the war, when the United States, through the Shipping Board and the Emergency Fleet Corporation, was operating a very large fleet of vessels. The Sea Service Bureau really acted as a sort of recruiting agency for the Government activities in shipping at that time. The Bureau has, however, been continued despite the fact that the need for it has practically disappeared. The law has always provided that United States shipping commissioners, under the Commissioner of Navigation, should provide the facilities for the registration of seamen, and certify them to sail on American vessels. The maintenance of the Sea Service Bureau is a duplication of this service required by law.

On numerous occasions the Senate has adopted an amendment similar to that now offered by the Senator from Tennessee, but it has on every occasion been eliminated in conference. I sincerely trust that it will be possible at this time for the Senate conferees to insist successfully upon this amendment, and that we may be relieved from this wartime incubus of the Sea Service Bureau, and thus prevent the unnecessary expenditure of money for that purpose.

Mr. McKELLAR. Mr. President, I am in sympathy with the amendment, and shall do all I can to have it retained in the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. McKELLAR. I send another amendment to the desk, which is merely for the purpose of making this particular provision of the bill conform to other provisions of the bill relating to the $720 limitation.

The CHIEF CLERK. On page 106, line 20, it is proposed to strike out the words "not to exceed $720 for any person", so as to read:

Provided further, That not to exceed $22,600 of the total amount herein appropriated shall be available for allowances for living quarters, including heat, fuel, and light, as authorized by the act approved June 26, 1930 (U.S.C., supp. VI, title 5, sec. 118a):

The amendment was agreed to.

Mr. GEORGE. Mr. President, I submit an amendment, which I send to the desk.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. On page 38, line 8, before the period, it is proposed to insert a colon and the following proviso:

Provided further, That no part of the prison industries working capital fund, during the fiscal year ending June 30, 1935, shall be used for the purchase of yarn from private industry for the manufacture of cotton duck or for the cost of operating any machine used in the manufacture of cotton textiles for more than 30 hours in any week.

Mr. McKELLAR. I have no objection to the amendment.

The amendment was agreed to.

The PRESIDING OFFICER. If there be no further amendment to be offered, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

CONSOLIDATION OF EXECUTIVE AGENCIES ENGAGED IN ENFORCEMENT OF THE INTERNAL REVENUE LAWS (H.DOC. NO. 281)

The PRESIDING OFFICER (Mr. BYRD in the chair) laid before the Senate a message from the President of the United States, which was read, and, with the accompanying paper, referred to the Committee on Finance and ordered to be printed, as follows:

To the Congress of the United States:

Pursuant to the provisions of section 1 of title III of the act of March 20, 1933 (ch. 3, 48 Stat. 8, 16), I am transmitting herewith an Executive order consolidating the executive agencies which are engaged in the enforcement of the internal-revenue laws.

The need for such a consolidation at this time springs primarily from the repeal of the eighteenth amendment. The tax and enforcement agencies of the Government should be reorganized in harmony with the changes which have occurred in the laws relating to the manufacture, transportation, and sale of intoxicating liquors. The changes made by this order will permit a more efficient administration of the internal-revenue laws as well as the laws carrying out the protective features of the twenty-first amendment.

Because of the obvious desirability of accomplishing the proposed changes at the earliest possible moment, I recommend that the order be given consideration by Congress with a view to the enactment of a joint resolution making its provisions immediately effective.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 10, 1934.*

PRETENDED CLAIM ON BEHALF OF THE PAPAGO INDIANS

Mr. ASHURST. Mr. President, thousands of persons in southern Arizona have for some months been aroused, and quite naturally so, over an attempt being made to induce Congress at its present session to recognize claims that are advanced on behalf of the Papago Indians to a fee simple title, antedating 1853, to 2,305,272 acres of land in a region bounded by the Colorado River, the Gila River, the Mexican border, and the Santa Cruz Valley.

The enterprise, which a small group of attorneys has in hand, was initiated under the pretext of helping a semi-nomadic Indian tribe in the area. Under the contract the lawyers are to get 10 percent of lands, or an equivalent value in cash, if Congress vests title in the Indians.

The area immediately involved amounts to 2,305,272 acres, but if the attorneys are successful in securing title to the Indians for this area, it is regarded as certain that this case will be considered a test case, and an attempt will be made to secure title to Indians in 16,000,000 acres in southwestern Arizona, a region embracing cities and towns, improved farms, and other valuable property held by white people. In short, it appears that an attempt is under way to invalidate the title to virtually all real property and mineral claims in a large part of the State of Arizona.

If Congress should accede to the demands of the legal representatives of the Indians in this case, a precedent would be set which might lead to placing in jeopardy the title to much of the land in Southwestern States.

Mr. President, I now recur to page 2858 of the RECORD of the proceedings of the Senate of February 20 last, where I said:

> It is not news when I tell the Senate that now, and for some months past, hovering over every department of the Government like obscene harpies, like foul buzzards, are lobbyists, grafters, place hunters, favor seekers, with sordid and seemingly unappeasable rapacity.

Mr. President, I ask to have printed in the RECORD at this juncture in my remarks a brief and statement of protest.

The PRESIDING OFFICER. Without objection, it is so ordered.

The brief and statement are as follows:

BRIEF AND STATEMENT IN SUPPORT OF PROTEST

A great injustice has been done to the State of Arizona and its residents and citizens by reason of the withdrawal order of October 28, 1932, made by Secretary of the Interior Ray Lyman Wilbur, temporarily withdrawing certain Papago Indian lands from mineral entry. The matter is of such importance that the undersigned have made a study and present this brief and statement in behalf of the State of Arizona, its residents and citizens.

The withdrawal order above referred to provides that:

"* * * all Papago Indian lands covered by Executive order of February 1, 1917, be temporarily withdrawn from all forms of mineral entry or claim under the public land mining laws until further notice, pursuant to the authority found in section 4 of the act of March 3, 1927 (44 Stat.L. 1347); in order that Congress may consider the claim of the Indians to the mineral rights within those lands."

A copy of the withdrawal order is attached, marked "exhibit A."

We respectfully submit that:

(a) The withdrawal order is in direct violation of an understanding and agreement between the Government of the United States and the State of Arizona, pursuant to which the Papago Indian Reservation was created.

(b) The withdrawal order is illegal, being outside the powers of the Secretary as conferred by the provisions of said section 4 of the act of March 3, 1927 (44 Stat.L. 1347).

(c) The Papago Indian Reservation was created by Executive order of February 1, 1917, with the specific understanding that the lands therein contained be "subject to exploration, location, and entry under existing mining laws of the United States * * * and shall continue to be subject to such exploration, location, and entry, notwithstanding the creation of this reservation." (Excerpt from Executive order.)

(d) The attorneys purporting to represent the Papago Indians, i.e., Eugene L. Graves, of Los Angeles; C. Bascom Slemp and C. C. Calhoun, of Washington, D.C., have a contract expiring February 1934, alleged to have been made with a council representing the Papago Tribe, but which in fact represented a minority. That said contract provides for a 10-percent fee plus expenses to said attorneys "from any funds or property which may be recovered for said Indians * * *." That the object of said attorneys is not only to establish title to the mineral rights in the Papago Indians within the reservation but also title to other lands without the reservation, based on so-called "Pueblo rights."

(e) The Papago Indians do not and never did have any title to the lands or minerals therein, either within or without the said reservation, as will hereinafter be shown by reference to the Gadesden Treaty and court decisions.

(f) The withdrawal order has been and is now depriving citizens and residents of Arizona from entering upon said reservation and exercising their legal rights in the prospecting and locating of mineral lands.

CREATION OF PAPAGO INDIAN RESERVATION

The Papago Indians, at the present time, have three reservations, the San Xavier Reservation on the outskirts of Tucson, Ariz., created in 1878; a small reservation adjoining the Pima Indian Reservation at Sacaton, Ariz., and the main Papago Reservation in Pima County, Ariz., extending south from Casa Grande, Ariz., to the Mexican Border. We refer herein primarily to the main reservation.

The main Papago Reservation was created by Executive order January 14, 1916, following negotiations between President Wilson, Arizona's representatives in Congress, and George W. P. Hunt, then Governor of Arizona. This Executive order was revoked and superseded by the Executive order of February 1, 1917, and the reservation thus created consisted of two large tracts, separated by a strip of public domain about 6 miles wide, commonly referred to as the "6-mile strip." By the act of February 21, 1931 (46 Stat. 1202), all of the vacant public lands within the 6-mile strip were added to the reservation. The main reservation when created containing 2,205,474 acres, to which was added the 6-mile strip, containing an additional 358,500 acres.

The Executive order referred to read, in part, as follows:

"The foregoing reservation is hereby created with the understanding that all mineral lands within the reservation which have been or which may be shown to be such and subject to exploration, location, and entry under existing mining laws of the United States * * * shall continue to be subject to such exploration and entry, notwithstanding the creation of this reservation."

Also, the act of February 21, 1931 (46 Stat. 1202), above referred to, creating the 6-mile strip, provided that this addition was made "exclusive of a tribal right to the minerals therein", and further provided that "all such lands shall be subject to disposition under the mining laws as provided in the Executive order of February 1, 1917, creating the Papago Indian Reservation."

It is clear that at the time the reservation was created it was not the intent to vest the title to minerals in the Papago Indians, or even for their benefit; but, on the contrary, it was made plain that the minerals therein should be subject to appropriation under the mining laws. If it had been the intent to apply leasing laws, or special jurisdiction of the Interior Department, or the Commissioner of Indian Affairs, it would have been then provided, as in the case of other reservations. The Commissioner of Indian Affairs recognized that the Papago Indians had no interest in the minerals, but that the same were open to mineral entry under the mining laws, as shown in his letter of March 27, 1916, to the Secretary of the Interior, in which he said:

"I have examined carefully the existing regulations pertaining to mineral lands on the public domain for the purpose of ascertaining whether such regulations are applicable to the Papago Reservation, and I believe that they may well be applied to the reservation, provided opportunity is given the Indian Office to investigate all applications for mill sites, in order that proper protection may be afforded the Indians in connection with their water rights.

"The Commissioner of the General Land Office has expressed a willingness to advise this office of all applications and entries for mining claims covering lands within the Indian reservation, in order that the Indian Office may investigate the bona fides of mineral claimants prior to the issuance of patent. If this course

is followed, of which I approve, and in addition, the suggestion as to mill sites observed, I believe that ample protection will be given the Indians in the occupation and use of their *nonmineral* lands. Under the mining laws and regulations, applications for mill sites may cover lands not mineral and not necessarily contiguous to mineral lands." (Italics ours.)

This was approved by the Commissioner of the General Land Office April 1, 1916, and by the First Assistant Secretary April 19, 1916. The mill sites referred to are nonmineral locations. Could the United States Government make itself more plain?

WHAT WAS THE UNDERSTANDING BETWEEN THE UNITED STATES GOVERNMENT AND ARIZONA?

At the time of the Executive order of February 1, 1917, creating the Papago Reservation, the representatives of Arizona in Congress were Senators Marcus A. Smith and Henry F. Ashurst, and Representative Carl Hayden. They evidenced a deep interest in the creation of the proposed reservation, and particularly as to reservation of minerals to permit appropriation under the mining laws.

The attitude of Senator Smith on the general subject is made clear from his remarks appearing on page 1632, volume 51, part 2, CONGRESSIONAL RECORD, Sixty-third Congress, second session, December 17, 1913, January 21, 1914. He stated:

"Mr. President, I do not like the principles which recognize, without further consideration, the right of the Executive, by a mere order, to extend an Indian or any other reservation so as to include mineral ground or mineral lands. I think every order made by a President that has extended an Indian reservation over mineral lands is to that extent absolutely void * * *."

Representative Hayden made himself very clear to the Secretary of the Interior, in a letter dated December 31, 1915 (CONGRESSIONAL RECORD, Appendix, p. 247, February 1916):

"If it can be arranged that mining development will not be hindered or prevented, I can see no reason why an Executive order reservation should not be established for the benefit of the Papago Indians in southern Arizona. * * * The Indians do not engage in mining and the mineral resources of the various reservations which include one fourth of the area of the State, have not been developed. The people of Arizona complain greatly about the state of affairs, for it is known that many of the reservations are rich in minerals. If Arizona is to prosper all of her mineral wealth should be made available for use. *I must therefore object to the creation of any more Indian reservations in Arizona if the old policy respecting mineral lands is to be followed.* * * *. When a reservation is established, which gives these Indians the right to use for agricultural purposes practically all of the country which they have heretofore occupied, they should not ask for anything more." (Italics ours.)

Representative Hayden, discussing a bill to permit metalliferous mining on lands previously withdrawn in Indian reservations in Arizona, said:

"You will note that this only applies to Indian lands that have heretofore been withdrawn from entry under the mining laws so that it will in no way interfere with mining on any Indian reservation where the same is now authorized by existing law. This is likewise true of reservations *where the title to the mineral in the lands has not passed to the Indians, as in the case of the Papago Indian Reservation in Arizona.* When that reservation was created the President wisely determined that the Papagos had acquired no right to the minerals in their country * * *, and in the Executive order establishing the Papago Reservation it specifically stated that the mineral lands within the reservation are to remain open to entry under the mining laws." (Italics ours.)

Senator ASHURST made his understanding of the situation very clear when he said (vol. 56, CONGRESSIONAL RECORD, p. 7525, 56th Cong., 2d sess., 1918):

"There was a tribe of Indians in Arizona, to wit, the Papagos, which the Arizona delegation in Congress felt ought to have some small addition made to their reservation—indeed, we went so far in 1916 as to ask the Department to set aside a proper area as an addition to their reservation, but when the Executive order came down we found, to our amazement, that instead of a few thousand acres being set aside, over 2,000,000 acres were set aside."

And again, later:

"There are reservations—I can mention one in my State—where the minerals are expressly reserved to the United States. I mention the Papago Reservation in Arizona. * * * *In that reservation the minerals were expressly reserved to and for the United States Government, and did not pass to the Indian tribe.*" (Italics ours.)

When the withdrawal order of October 28, 1932, was made, Senator HAYDEN protested to the Secretary of the Interior in a letter of November 30, 1932, and stated:

"I am familiar with the discussions which took place *prior to the time* President Wilson issued the Executive order of February 1, 1917, creating the Papago Indian Reservation, and know that the Papago Indians *made no claim to the mineral rights* within the reservation and *that it was always contemplated that the United States mining laws should continue to apply to the withdrawn lands.* This policy was adopted because the Papago Indians had never engaged in mining and were solely concerned in securing title to the lands for grazing and farming purposes. I believed then, and am still convinced that this was a proper solution of the problem and can see no occasion for the withdrawal of these lands from mineral entry. I, therefore, hope that in view of the representations made, you will direct that the withdrawal of October 28, 1932, be canceled." (Italics ours.)

Senator ASHURST and Representative Lewis W. Douglas also protested. The substance of the replies may be indicated by the letter of Indian Commissioner Rhoads, of January 30, 1933, to Senator ASHURST, in which, among other things, he said:

"Mr. Eugene L. Graves, one of the tribal attorneys for the Papago Indians, *has shown considerable interest in the possibility of establishing title in the Indians* through these old grants and has done considerable work in an attempt to learn what rights, if any, the Indians may have. It was our understanding at the time the withdrawal of October 28, 1932, was made that he would, in behalf of the tribe, present the matter to Congress." (Italics ours.)

Graves, Slemp, and Calhoun are the attorneys hereinbefore mentioned, who claim to have a contract with the Papago Indians on a 10-percent basis. It is not unlikely, in view of the Commissioner's letter, that they played an important part in obtaining the withdrawal order of October 28, 1932.

Governor Hunt, of Arizona, was fully conversant with all the negotiations leading to the creation of the reservation and that it was agreed that the lands therein be open to mineral location. Upon the issuance of the withdrawal order, Governor Hunt stated in the Arizona Republic of December 2 and 31, 1932:

"It was understood by all concerned at the time the reservation was created that the lands would be left open to mineral location.

"I consider the whole proposition as a flimsy pretext of the Indian Bureau to acquire possession of valuable mineral deposits on the Papago Reservation, to which it has neither moral nor legal right. The whole proceeding is a violation of faith.

"The actions of the Interior Department in withdrawing mineral lands and water-power sites, if approved by Congress, will compel the residents of Western States to pay in royalties for the support of the Indians that should be a Federal obligation.

"They will also alienate possible sources of State taxation that are needed to maintain our roads, schools, and other governmental activities.

"I consider that a department of our National Government has violated a solemn agreement with the State of Arizona and subsequent Executive order of the President creating the Papago Reservation.

"I refer to the act of President Wilson in creating the Papago Reservation under date of January 14, 1916 (and subsequent order of Feb. 1, 1917), under which the lands included within the Papago Reservation were left open to mineral entry.

"Have we come to the point in the relations between our States and the Federal Government where the pledged word of the Federal Government and the proclamations of the President are mere scraps of paper?"

It was but natural that Arizona should take a vital interest in the public domain and endeavor to keep open as much thereof as possible for location and entry. The total area of Arizona is 72,931,840 acres, of which 19,566,339 is within Indian reservations. National forests, parks, and military amount to an additional 13,192,123 acres; and the public domain which is now subject to acquisition by citizens amounts to 13,581,760 acres. The creation of a few more reservations could easily exhaust all remaining public domain.

Who is there who can truthfully state that there was any understanding, other than that the lands in the Papago Indian Reservation were to be open to mineral entry? And they have been open to mineral entry for nearly 15 years, until the tribal attorneys, working on a 10-percent fee basis, are given the right by Secretary Wilbur to "*present the matter to Congress*" in order that "Congress may consider the *claim of the Indians to the mineral rights* within those lands." (Italics ours.) As a matter of fact, the Indians are claiming no mineral rights. Graves, Slemp, and Calhoun, purporting to represent the Papago Tribe, are attempting to claim such rights. The population of the reservation, as of April 1, 1931, was 2,229 adults and 2,028 minors, and less than 70 Indians voted to give any contract to the above-named attorneys, and they represented only 15 of 60 tribes. On June 19, 1933, 168 Indians, representing a number of villages, petitioned the Commissioner of Indian Affairs and Secretary of Interior, complaining of the activities of Mr. Graves, and in their petition stated:

"We feel sure that we have proof that said Mr. Graves (Mr. C. Bascom Slemp's associate and representative) is not working in the interests of the Papagos, but, on the contrary, is scheming to deprive us of a large part of our reservation, and in doing so enrich himself and others."

And in September 1933 a further petition signed by 211 Indians was addressed to the Commissioner of Indian Affairs and the Secretary of the Interior et al. asking for the cancelation of the said withdrawal order of October 28, 1932. The petition alleged that the Indians had been misled by Mr. Eugene L. Graves and asserted that the withdrawal order had operated to the harm of the Papago Indians inasmuch as it had prevented mining work being done upon the reservation. Also attached are resolutions adopted by the Arizona Legislature and Arizona State Land Board, marked "Exhibits B and C."

We are of the opinion that were a bona fide vote now taken, free from duress or restraint, that a large majority of the Indians would vote to cancel the Graves-Slemp-Calhoun contract and also to open the reservation to mineral entry. In past years many Indians found good mining employment, not now available.

THE DEPARTMENT OF THE INTERIOR HAS REPEATEDLY TAKEN THE POSITION THAT THE PAPAGO INDIANS DO NOT HAVE TITLE, MINERAL OR OTHERWISE, IN THE LANDS WITHIN THE RESERVATION

In 1914 the pueblo of Santa Rosa, which is a Papago Indian village, petitioned the Secretary of the Interior to abstain from listing for entry or sale, as part of the public domain, any of the lands which the Papago Indians in the Santa Rosa pueblo, or village, claimed to own. The Secretary, on June 11, 1914, replied, denying the petition on the ground that the inhabitants of the pueblo had no title or property rights and that title vested in the United States Government. Thereupon the following suit was brought in the Supreme Court of the District of Columbia:

Pueblo of Santa Rosa v. *Lane, Secretary of the Interior et al.* Docket 33201.

In his answer to the complaint, the Secretary of the Interior alleged:

"The defendants deny that at the time of the Gadsden Purchase, or at the time of the acquisition from Mexico by the United States of sovereignty over the territory comprising land in the Santa Rosa Valley, or at any time, the so-called 'pueblo of Santa Rosa,' or any village or community in the Santa Rosa region, or any Papago village whatever, was the absolute owner of a complete, definite, indefeasible title to the land herein in controversy, or was owner of said land, or any land, but aver that all of said lands in controversy herein were then, and ever since have been, and are now, part of the public domain of the United States, subject to the sovereign right of the United States."

The Secretary alleged in his motion to dismiss—

"That the bill shows on its face that the lands involved were ceded to the United States by the Republic of Mexico under the Treaty of Mesilla (commonly known as the 'Gadsden Purchase'), and legal title thereto is in the United States, the Indians merely occupying the land by sufferance of the United States * * *."

The record of the suit is as follows:

Pueblo of Santa Rosa v. *Lane et al.* (46 App. D.C. 411).

Lane et al. v. *Pueblo of Santa Rosa* (249 U.S. 110; 63 L.ed. 504 (1919)).

Pueblo of Santa Rosa v. *Fall et al.* (12 Fed. (2d) 332 (1926); 273 U.S. 316; 71 L.ed. 658 (1927).

The Court of Appeals of the District of Columbia (12 Fed. (2d) 332) adopted the viewpoint of the Interior Department and found that the Papago Indians had no title as contemplated in article 6 of the Gadsden Treaty. The decision of the United States Supreme Court (273 U.S. 316) went off on another point.

It is plain that the Interior Department has always maintained that title to the lands in the reservation vests in the United States Government, and that the Papago Indians do not have title to the minerals or the surface. It has so asserted in court. Now, on October 28, 1932, Secretary Wilbur issues his withdrawal order in order that Congress may consider the claim of the Indians to the mineral rights * * *. It is no answer to say that the Interior Department wishes to give Congress the opportunity to consider the matter. We now directly ask the Interior Department what position it proposes to take before Congress and its committees when the matter is considered. What attitude will that Department now assume through its Commissioner of Indian Affairs? Is there to be a reversal of its position taken in the litigation before referred to, and a repudiation of the stand taken by the Commissioner of Indian Affairs in his letter of March 27, 1916, hereinbefore quoted in part? Are Graves, Slemp, and others to present the matter to Congress, aided and abetted by the Interior Department, and are only mineral rights to be considered? We hazard the prophecy that an attempt will be made to establish title in the Papagos not alone for mineral but for surface, and for an area greatly in excess of the 2,563,974 acres contained in the reservation. The withdrawal order is but an opening wedge, as we will more fully explain later herein.

THE WITHDRAWAL ORDER IS ILLEGAL

The withdrawal order of Secretary Wilbur, of October 28, 1932, is stated to have been made "pursuant to the authority found in section 4 of the act of March 3, 1927 (44 Stat.L. 1347)." Said section 4 is as follows:

"Paragraph 398d. Same; changes in boundaries of Executive order reservations: Changes in the boundaries of reservations created by Executive order, proclamation, or otherwise for the use and occupation of Indians shall not be made except by act of Congress: *Provided*, That this shall not apply to temporary withdrawals by the Secretary of the Interior." (Mar. 3, 1927, c. 299, par. 4, 44 Stat. 1347.)

This section refers solely to changes in boundaries and we submit that there is nothing contained in said withdrawal order even remotely touching upon boundaries of the Papago Reservation. It will also be noted that said section 4 is a part of chapter 12 which refers to leases for oil and gas mining purposes in Indian reservations. The withdrawal order does not purport to cover oil or gas mining, but distinctly refers to minerals. We submit that the withdrawal order therefore is illegal, as not being authorized by said section 4, or the law of which such section is a part. We also question the power of Secretary Wilbur to make the said withdrawal order for the reason that it directed that all forms of mineral entries or claims be not permitted in the said reservation. Clearly such an order is in direct violation of the Executive order of February 1, 1917, and the subsequent act of Congress of February 21, 1931 (46 Stat. 1202), which created the Papago Reservation, and under the terms of which it was understood that all mineral lands within the reservation would be subject to exploration, location, and entry under the mining laws of the United States.

We now request the Department of the Interior to obtain an opinion from the United States Attorney General as to whether or not, in view of the foregoing, the said withdrawal order of October 28, 1932, was valid.

REASONS ASSIGNED BY SECRETARY WILBUR FOR WITHDRAWAL ORDER ABSURD

Secretary Wilbur in the said withdrawal order said:

"It appears that 180 placer mining claims involving 20 acres each, within this reservation, have been surveyed and approved, 122 of which have been patented and 58 of which are yet unpatented. See copy of attached letter dated October 4, 1932, from Sherman C. Fiske, acting cadastral engineer, Phoenix, Ariz., to Mr. Eugene L. Graves, one of the tribal attorneys for the Papago Indians."

And then the order indicates that because of the foregoing "* * * it is incumbent on this Department in protecting the Indians in their livestock industry to take preventative measures toward stopping any further alienation of lands within the reservation through patenting of mining claims."

In the first place it is seen that Mr. Eugene L. Graves, representing himself and his associates, Slemp and Calhoun, obtained the information as to the number of mining claims, and same was made the basis for the withdrawal order. The reason assigned is that it is feared that the taking up of mining claims will alienate surface rights of the Papago Indians to a harmful extent. When analyzed, such claim is absurd. There are 2,563,974 acres in the Papago Indian Reservation. Within the last 80 years only 122 placer claims, comprising 2,440 acres, have been patented in this area now covered by the reservation, according to the withdrawal order. The figures speak for themselves and show the absurdity of any claim that danger confronts the Indians through alienation of surface by the patenting of mining claims. The Papago Indians are engaged, primarily, in the livestock industry, with very little tilling of the soil. In reality there is no conflict between the very limited patented mining area and the area used by the Papagos for grazing purposes. Also, the official census of April 1, 1931, showing 2,229 adult Indians within the reservation; which, considering the number of acres contained therein, would seem to be an unusually general allotment for a tribe of that size.

If we were to concede that the withdrawal order was legal, we are still forced to the conclusion that the reasons assigned for such order are absurd.

PAPAGO INDIANS HAVE NO TITLE TO EITHER SURFACE OR MINERALS OF LANDS WITHIN OR WITHOUT THE RESERVATION

The papago Indians are not pueblo Indians in the sense that that term is used as applied to Indians in New Mexico. On the contrary, as stated by the Secretary of the Interior in his answer in the case of pueblo of Santa Rosa, Docket 33201, hereinbefore referred to—

"The Papago Indians * * * are a seminomadic people, the greater part of whom inhabit Arizona and northern Mexico and have never lived in such pueblos or villages as are occupied by the Pueblos of New Mexico, but live, and have always lived, in scattered communities or valleys, or as termed by the Indians 'ooitak-fields.'"

The Papagos roamed through the territory of northern Mexico and what is now the southwestern part of Arizona, when such area was a part of Mexico. The United States acquired what is now Arizona, together with other territory, from Mexico, through the Gadsden Treaty of December 30, 1853. Whatever title, if any, the Papago Indians may have, either to the surface or minerals in the lands within or without the present reservation, depends wholly upon the title which vested in the said Papago Indians prior to the Gadsden Treaty, and pursuant to the laws of Mexico. Both the United States and Mexico at the time of the ceding of the territory covered by the Gadsden Treaty, endeavored to protect any and all then existing property rights. It was for that reason that article 6 was incorporated in the Gadsden Treaty, which provides:

"No grants of land within the territory ceded by the first article of this treaty bearing date subsequent to the day 25th of September when the minister and subscriber to this treaty on the part of the United States proposed to the Government of Mexico to terminate the question of boundary, will be considered valid or be recognized by the United States or will any grant made previously be respected or be considered as obligatory, *which have not been located and duly recorded in the archives of Mexico.*" (Italics ours.)

It will be noted that under the terms of article 6 the only grants of land to be recognized by the United States were those which were duly located and recorded in the archives of Mexico. The question immediately arises whether or not the Papago Indians held grants of land either from Spain or Mexico, duly recorded in the archives of Mexico. The question arose in the case of *Pueblo of Santa Rosa* v. *Lane, et al.*, hereinbefore referred to, and the court found (12 Fed. (2d) 332) that the Papago Indians did not have any titles which were duly recorded in the archives of Mexico and therefore that the courts were without power to establish any title to any grants of land in the Papago Indians. This decision affirmed the position and claims of the Department of the Interior in asserting the Papago Indians were without title to the lands in question and that title to same vested in the United States Government.

By the act of July 22, 1854 (10 Stat.L. 308, ch. 103), the office of Surveyor General for the territory of New Mexico was created, and by paragraph 8 thereof it was made his duty to examine into all claims for lands within the limits of that territory and to make full report thereof to Congress. In pursuance of this authority the surveyor general examined and reported upon various claims, and on June 21, 1860 (12 Stat.L. 71, ch. 167), Congress passed an act confirming several of them.

There is no record, however, that the Papago Indians at that time, and pursuant to that act, endeavored to establish title based upon any grants or title from Spain or Mexico.

The Court of Private Land Claims was established by an act of Congress on March 3, 1891, to investigate and determine the validity and extent of Mexican grants in Arizona, New Mexico, etc. This court completed the work assigned to it and ceased to exist by operation of law on June 30, 1904. The records were transmitted to the Department of the Interior. Again there is no record that the Papago Indians attempted to establish any titles to the lands within or without the present reservation. As a matter of fact, the Papago Indians of their own accord have never asserted title either to lands or minerals therein. As a nomadic tribe they have for many years wandered through this section of the United States and northern Mexico, and it was not until about 20 years ago that the United States realized the necessity of establishing some definite reservation within which they could be protected in grazing their livestock. We contend that the Papago Indians have no title either to surface or minerals of the lands in question, and further, that there are no recorded titles in the archives of Mexico vesting any title, mineral or otherwise, in the Papago Indians.

TITLE TO MINERALS COULD NOT VEST IN PAPAGO INDIANS UNLESS PROVIDED IN GRANT OF TITLE BY MEXICAN GOVERMENT

We have shown that the Papagos have no title recorded in the archives of Mexico, and that the Gadsden Treaty of 1853 provided that "no grants * * * will be considered valid or be recognized by the United States * * * which have not been located and duly recorded in the archives of Mexico." Therefore, the Papagos have no title to the surface or the minerals which the United States can recognize. We now go a step further to show that under the Mexican law the title to the minerals in the territory embraced in the Gadsden Treaty vested in the Mexican Government, and such title passed to the United States Government. Let us remember that whatever claims the Papagos may have had to surface or minerals must depend upon the Mexican laws and records.

Lindley on Mines (3d ed., vol. 1, p. 199), section 114: Ownership of Mines Under Mexican Law:

"Under the laws in force in Mexico at the date of the treaty of Guadalupe Hidalgo, mines, whether in public or private property, belonged to the supreme government. (*Castillero* v. *United States*, 2 Black, 17, 167, 17 L.ed. 360.)

"No interest in the minerals of gold and silver passed by a grant from the government of the land in which they were contained, without express words designating them. Such grant only passed an interest in the soil distinct from that of the minerals.

"The interest in minerals was conveyed through the operation of the mining ordinances, or by proceedings upon denouncement, when a mine, once discovered and registered, had been abandoned and forfeited.

"Mining rights under the Mexican laws were held upon conditions not affecting the title to the land as derived under the ordinary conveyances; and such rights might be acquired and held by others besides the owner of the land under the ordinary grants, and were terminable when, by their use, the minerals contained in the soil were wholly removed.

"In other words, there was a severence of the title to the minerals from the title to the land. The minerals, particularly gold, silver, and quicksilver, were jura regalia, and were considered to belong to the supreme government in virtue of its sovereignty.

"This was substantially the law of the ceding country at the date of the ratification and exchange of the treaty."

The Gadsden Treaty superseded the Hidalgo Treaty of 1848, and was a clarification thereof.

And again in the case of *United States* v. *San Pedro & Cañon del Agua Co.* (17 Pac. 337, 404 (N.M.)):

"Certain decrees were in force at the time of the separation of Mexico from Spain, whereby the mines of gold, copper, and silver were held by the Crown of Spain. Upon the separation, which resulted in creating Mexico a separate government, the title to all mines within her territory passed to and vested in the Mexican Government, including therein what is now New Mexico. A grant of land by the Mexican Government did not carry such mines. It did not require a reservation by the Government of such mines to prevent them from passing. No interest in such mines, whether in granted or ungranted land, could be acquired by the individual citizen, under the Spanish or Mexican law, except through mining ordinances. The law of those countries recognized the title to all such mines, whether in public or granted land, as in the Government, and not subject to be passed out of it by a mere grant. (Rock, Sp. & Mex. Law, 124–127, 130, 131, 411; Hall, Mex. Law, nos. 1210–1213, 1235; *Moore* v. *Smaw*, 17 Cal. 199, 12 Min.R. 418, 424–428.) We conclude then that by the grant of the land in controversy by the Mexican Government to Jose Serafin Raminez, of the Cañon del Agua, no interest and title in and to such mines therein contained was vested in him, and as it does not appear by the record that any individual interest in such minerals had been obtained by him, or those claiming under him, by virtue of the mining ordinances of the Mexican Government prior to the cession of the Territory of New Mexico to the United States, that these minerals were at that date the property of the Mexican nation, and by the cession passed, with all other property of Mexico within the limits of New Mexico, to and became the property of the United States (*Moore* v. *Smaw*, 17 Cal. 199)."

This case was affirmed by the United States Supreme Court (146 U.S. 120; 36 L.ed. 912).

Also, in *Moore* v. *Smaw* (17 Calif. 216), the Court said:

"The minerals were vested under the Spanish monarchy in the Crown, and * * * after the separation from Mexico, in that nation * * * did not pass, as we have already stated, by the ordinary grant of land without express words of designation. Such grant transferred only an interest in the soil, distinct from that of the minerals. The interest in the minerals was conveyed through the operation of the mining ordinances, by registry of discovery, or by proceedings upon denouncement, when a mine once discovered had been forfeited or abandoned. * * * They constituted, therefore, at that time the property of the Mexican Nation, and by the cession passed to the United States."

The facts are:

(1) The Papagos never had a grant from Mexico;

(2) That had a grant been given the Papagos by Mexico it would not carry minerals;

(3) That from 1853 to 1933, 80 years, the Department of the Interior, whenever the question has arisen, has taken the position that the Papagos have no title to surface or minerals;

(4) That the Papagos have never asserted or attempted to establish title, under the acts of Congress of July 22, 1854, and March 3, 1891 (Court of Private Land Claims), which were passed for the express purpose of adjudicating the validity of Mexican grants.

And yet Secretary Wilbur issues an illegal withdrawal order, denying to citizens the right to locate and prospect minerals within the reservation in direct violation of the Executive order and act of Congress creating same, and a breach of faith with Arizona, and for the absurd reason, as stated in said order, "that Congress may consider the claims of the Indians to the mineral rights within those lands." All done at the instance and request of Eugene L. Graves (operating under a 10-percent contract), through information obtained by him that 180 placer claims had been surveyed and approved within the reservation and the livestock industry of the Papagos might be endangered. What a picture—from 1853 (Gadsden Treaty) to 1933, 80 years, not exceeding 3,600 acres out of 2,663,974 (reservation) had been taken up as placer claims, and that, with possible future locations, constituted the danger prompting the withdrawal order.

One cannot but feel that the matter of mineral rights could have been referred to Congress without the necessity of withdrawing the reservation from mineral entry, thereby depriving a large number of people the opportunity of prospecting and mining, which would have been so helpful in these trying days.

THERE HAS ALREADY BEEN ONE SCANDAL IN CONNECTION WITH THE PAPAGO INDIAN RESERVATION

This situation grew out of the so-called "Hunter claims." Briefly, the facts are as follows:

Col. Robert F. Hunter was a West Pointer and a Washington attorney. In 1880 deeds were drawn and acknowledged by a number of Papago Indians, conveying to Hunter as trustee an undivided one-half interest in and to the lands, grants, and privileges of certain named villages. There were 15 such deeds, and in addition thereto, a sixteenth deed covering the entire southwestern portion of Arizona, which would include Yuma, Casa Grande, and a portion of Tucson, or approximately 16,000,000 acres. For some unexplained reason the deeds were not recorded for 34 years, or until 1914. Powers of attorney were also executed.

In 1911, Hunter entered into contracts with one Martin, by which the latter was to undertake to establish the Indians' title and was to receive an undivided three-fourths interest from Hunter. In 1914 Martin instituted suit in the Supreme Court of the District of Columbia, on one of the 15 deeds covering the village of Santa Rosa, and involving about 720 square miles. The title of the case was *Pueblo of Santa Rosa* v. *Lane et al.* This case went to the United States Supreme Court twice, and the citations are hereinbefore given. The purpose of the suit was to establish title in the Papago Indians under Mexican land grants. This suit was begun prior to the creation of the reservation but included land now within same.

We have hereinbefore pointed out that the Department of the Interior vigorously fought this case, and proved to the satisfaction of the court that the Papago Indians never had title to the land in litigation, either under Mexican land grants or otherwise; and the court so found (12 Fed. (2d) 332). The United States Supreme Court held that the Santa Rosa deed and powers of attorney were void, because they were not executed as required by Federal statutes "but without prejudice to the bringing of any other suit hereafter by and with the authority of the alleged pueblo of Santa Rosa" (273 U.S. 316; 71 L.ed. 658). This means that the Hunter claims are not dead, but can be revived at any time, if it can be shown that the deeds and powers were legally executed—a fact not shown in the above case. It will be seen that the stakes were and are big, for the reason that if one test case can be made to stand, that 16,000,000 acres are involved, including many cities, towns, farms, ranches, and mining properties, many of which are located entirely outside the existing reservation.

The Department of the Interior is now authorizing Graves, Slemp, and Calhoun to pick up the trail where Hunter-Martin temporarily left off, and ask Congress to determine the title rights

of the Papagos. If the Hunter deeds indicate the territory which the Papagos claim to own, and Congress recognizes same, it will result in the impairment of titles to millions of dollars of property. It may be suggested that we should only consider the area within the reservation. Presently, perhaps, but we must remember that the boundaries of the reservation were arbitrarily established and must be ignored if Congress is to recognize title in the Papagos to the vast area in which they roamed. If the Papagos are to receive title it cannot be limited to the reservation area, because it is a recognized fact that they wandered and migrated far beyond its now boundaries.

But to return to the Hunter-Martin matter. Martin and his associates preceeded to raise money by selling rights or units which were placed on the land, if, and when Indian title was established. It is reported that considerably more than $100,000 was raised. It achieved such notoriety that it become a matter of discussion on the floor of the Senate. (See remarks of Senator ASHURST, May 22, 1930.) And the Department of the Interior became so concerned in its desire to protect the investing public, that it issued circular no. 38285 in 1927, in which it said:

"It may also be said that title to the lands involved in the so-called 'Hunter deeds' is in the United States.

"As the reservation was created by Executive order no right of ownership to said lands is vested in Mr. Martin or any other individual, and this Department has consistently advised persons inclined to invest in the purchase of any rights in these lands to consider well before investing money in the proposition. The investors, in order to obtain redress, must look to the courts or to the promoters of the sales."

In passing it is interesting to note that the Department of the Interior in said circular again claimed title to be in the United States. The same title which the Department is now assisting Graves, Slemp, and Calhoun to question. As early as 1903 the Interior Department, General Land Office, and Commissioner of Indian Affairs asserted that no title vested in the Papagos. See letter of Cato Sells, Commissioner of Indian Affairs, to Hon. Carl Hayden, dated September 6, 1913, in which he said:

"This matter was carefully considered by the Indian Office, the General Land Office, and the Department. Under date of June 16, 1905, the Department, with reference to these lands and to the claim submitted by the said Robert F. Hunter, advised the Commissioner of the General Land Office, as follows:

"If the tenure of the alleged holding of the Indians is not by grant emanating from the Government of Spain, or Mexico, it is not such property right as was provided for and protected by the treaty (Gadsden Purchase of 1853). The mere possession of the land as Indian country with the right of use, does not prevent it from passing under the dominion of the United States as public lands, whatever the obligation of the United States to the Indians might be.

"A number of inquiries were received from time to time regarding the status of these lands, and invariably this office has advised the writers that the Papago Indians as a tribe, or the various bands, or villages thereof, had no title to the lands occupied by them which they could dispose of to others."

There are many who feel that the real objective of Graves, Slemp, and others is to establish title under the Hunter-Martin deeds, which would, of course, involve a much larger area than embraced within the reservation, and that the withdrawal order is but the first move in the program. That if they can prevail upon Congress to recognize any mineral rights as vesting in the Papagos within the reservation, they will have established a precedent, which should go far in forcing a recognition of title for the larger area outside the reservation, to which the Papagos are as much entitled as that within the reservation.

But whether or not that is the purpose of Graves and others, the answer is the same.

The Department of the Interior successfully terminated the Hunter-Martin scandal and assisted in protecting the investing public by showing in court and by proclamation that the Papagos have no title. It is inconceivable that the Department or the Commissioner of Indian Affairs will now assist Graves and others to prove the contrary, though the withdrawal order of Secretary Wilbur certainly shows a willingness to cooperate toward that end.

SUMMARY

The herein brief or statement has been prepared by the undersigned primarily for and will be presented to the President, the Secretary of the Interior, the Commissioner of Indian Affairs, Members of Congress, and particularly those upon committees dealing with Indian affairs. Copies will be distributed in Arizona to all newspapers, the Governor and public officials, clubs and similar organizations. We propose to make an aggressive and militant fight to prevent any injustice being done to the State of Arizona, its citizens, and residents; and in that fight we shall have the support of the entire State and not only our Representatives in Congress but many Members from other States. We shall welcome the opportunity of confronting Messrs. Graves, Slemp, Calhoun, and others before congressional committees or elsewhere.

We shall request that the withdrawal order issued by Secretary Wilbur of October 28, 1932, be forthwith revoked, for reasons herein assigned.

We shall request that the purported contract between Graves, Slemp, and Calhoun and the Papago Indians be forthwith canceled, or in any event that the same be not renewed upon its expiration in February 1934 until we shall have been afforded a hearing thereon.

We understand that the Solicitor of the Interior Department proposes to prepare a bill for introduction at the next session of Congress, providing for the resumption of mining in the reservation under leases. We shall request that we be supplied with copies when prepared. We propose to prevent, if possible, any such enactment, as in violation of the Executive order and act of Congress creating the reservation. We shall insist that the reservation remain open to mineral entry as agreed by President Wilson in his said Executive order and later concurred in by Congress.

We submit that equity, justice, and fair play permit no other course of conduct.

Respectfully submitted.

B. B. Moeur, Governor of Arizona; State Land Department, by B. B. Moeur, Governor of Arizona; James H. Kerby, secretary of state; Arthur T. LaPrade, attorney general; William M. Cox, State treasurer; Ana Frohmiller, State auditor; Howard J. Smith, State land commissioner; Tucson Chamber of Commerce; Phoenix Chamber of Commerce; Bisbee Chamber of Commerce; Douglas Chamber of Commerce; Yuma Chamber of Commerce; Casa Grande Chamber of Commerce; Nogales Chamber of Commerce; Safford Chamber of Commerce; Ajo Chamber of Commerce; State Chamber of Commerce.

December 18, 1933.

EXHIBIT A

UNITED STATES DEPARTMENT OF THE INTERIOR,
OFFICE OF INDIAN AFFAIRS,
Washington, October 26, 1932.

WITHDRAWAL ORDER

The Honorable the Secretary of the Interior, (through the Commissioner of the General Land Office.)

MY DEAR MR. SECRETARY: By Executive order of February 1, 1917, all public land in certain specified townships was withdrawn and set apart as a reservation for the Papago Indians in Arizona.

This withdrawal was made "exclusive of a tribal right to the minerals contained there" and also with the understanding "that all mineral lands within the reservation which have been or which may be shown to be such and subject to exploration, location, and entry under the existing mining laws of the United States and the rules and regulations of the Secretary of the Interior applying thereto, shall continue to be subject to such exploration, location, and entry notwithstanding the creation of this reservation."

The reservation thus created consisted of two large tracts separated by a strip of public domain about 6 miles wide running in a general easterly and westerly direction—commonly referred to as the "6-mile strip."

By the act of February 21, 1932 (46 Stat. 1202), all of the vacant public lands within the 6-mile strip were added to the reservation, and provisions was also made for the acquisition of all privately owned lands therein, which has been done. This addition also was made "exclusive of a tribal right to the minerals therein" and further provided "that all such lands shall be subject to disposition under the mining laws as provided in the Executive order of February 1, 1917, creating the Papago Indian Reservation."

In a letter approved by the Department April 19, 1916 (45 L.D. 537) it was held that the mining regulations of August 6, 1915 (44 L.D. 247), with but slight modifications were considered applicable to lands within the Executive order reservation of January 14, 1916, which Executive order involving substantially these same lands was revoked and superceded by the Executive order of February 1, 1917. However, as the Executive order of 1917 covers practically the same lands as those involved in the 1916 order, excepting of course the so-called "6-mile strip", the above departmental regulations were considered applicable to the later 1917 withdrawal.

It appears that 180 placer-mining claims, involving 20 acres each, within this reservation have been surveyed and approved, 122 of which have been patented, and 58 of which are as yet unpatented. See copy of attached letter dated April 4, 1932, from Sherman C. Fiske, Acting Cadastral Engineer, Phoenix, Ariz., to Mr. Eugene L. Graves, one of the tribal attorneys for the Papago Indians.

At a conference held in this Office Wednesday, October 12, 1932, attended by representatives of the Secretary's Office, of the General Land Office, and several employees of this Office, the matter was thoroughly discussed and the conclusion was tentatively reached that it is incumbent on this Department in protecting the Indians in their livestock industry, to take preventative measures toward stopping any further alienation of lands within the reservation through patenting mining claims.

It is, therefore, recommended, subject to all existing valid mineral rights and claims, that all Papago Indian lands covered by Executive order of February 1, 1917, be temporarily withdrawn from all forms of mineral entry or claim under the public-land mining laws until further notice, pursuant to the authority found in section 4 of the act of March 3, 1927 (44 Stat.L. 1347); in order that Congress may consider the claim of the Indians to the mineral rights within those lands.

Respectfully,

C. J. RHOADS,
Commissioner General Land Office, Washington, D.C.

I concur.

THOS C. HAVELL,
Acting Commissioner.

DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
October 28, 1932.

Withdrawal approved, and referred to the Commissioner of the General Land Office for appropriate notation on the records of that office, said withdrawal to be subject to all existing valid mineral rights and claims initiated prior to date of approval hereof.

(Signed) RAY LYMAN WILBUR, *Secretary.*

EXHIBIT B

(State of Arizona, Eleventh Legislature, House of Representatives, regular session.)

House Joint Memorial 15 on the withdrawal of lands in the Papago Indian Reservation from mineral exploration, location, and entry. (By the Committee on Mines and Mining, introduced Mar. 6, 1933)

To the Honorable the Secretary of the Interior, Washington, D.C.

Your memorialist, the eleventh legislature of the State of Arizona, respectfully represents:

By Executive order of February 1, 1917, supplanting an Executive order of January 14, 1916, there was set aside in southern Arizona, as a reservation for the Papago Indians, a great body of land, embracing a large portion of the territory lying between the city of Tucson on the east and Ajo on the west, and Casa Grande on the north to the Mexican border. To the reservation so formed has recently been added, by act of February 21, 1931, the so-called "6-mile strip", the whole body of land thus set aside as a reservation amounting to 2,633,974 acres.

As a result of negotiations between representatives of the Department of the Interior and the Governor of Arizona, or his representatives, the Executive orders creating this reservation contained a specific provision to the effect that all mineral lands therein should continue to be subject to exploration, location, and entry. Without such an agreement Arizona would have objected strenuously to the creation of the reservation, with its immense addition to the already tremendous area of Indian reservations within her borders.

Relying upon said exception, prospectors continued to search the mineralized portions of the reservation, with the result that 122 placer-mining claims of 20 acres each have been patented, while 58 others have been surveyed and approved for patents. There are also within the area several lode properties of importance.

These activities, while contributing to the prosperity of the State, have in addition afforded considerable employment to Indians residing on the reservation, and have in not the slightest degree curtailed or detracted from the use of the reservation lands by the Papagos.

Despite the fact that these lands were set aside with the understanding and agreement that the reservation rights so created should be exclusive of mineral explorations, locations, and entry rights, the Secretary of the Interior, under date of October 26, 1932, approved an order withdrawing the said land from all forms of mineral entry or claim "in order that Congress may consider the claims of the Indians to the mineral rights within these lands."

The records disclose that this action was taken at the instance of "certain friends of the Papagos", notably certain attorneys of Washington, D.C., and Los Angeles, Calif., whose friendship appears to be based upon a contract under which they would receive a percentage of any revenue accruing from the establishment of such mineral rights.

The result of this violation of both the letter and the spirit of the agreement under which the said reservation was created has been to put an end to prospecting within the area affected; to deny many idle American copper miners, thrown out of employment by the depression in the copper industry, the opportunity to work the gulches in which placer gold is found, or, aided by a "grub-stake", to search the hills for ore deposits; to discourage capital from giving assistance to the development of properties to which no other titles might be secured than objectionable and undependable Indian leases, and generally to stop all mining activities.

Wherefore your memorialist requests that the agreement of the Federal Government, embodied in the Executive orders creating the Papago Reservation, which was the basis of this State's withdrawal of objections to the said reservation, be carried out and not treated as a "scrap of paper"; that the order withdrawing the lands of the reservation from mineral exploration, location, and entry, be rescinded, and that encouragement be given to efforts to discover and develop such mineral properties as may be found within the said Papago Reservation.

And your memorialist will ever pray.

Passed the house March 6, 1933.

Passed the senate March 7, 1933.

EXHIBIT C

Resolution passed June 7, 1933, by Arizona State Land Board, comprised of the Governor, attorney general, secretary of state, State treasurer, and State auditor

Whereas the authorities of the State, prior to the withdrawal, were repeatedly assured that the right to prospect and mine in this area would be preserved, in return for their nonopposition to the said Executive order;

Whereas experience has conclusively shown that lands within governmental reservations or other withdrawn areas have not developed from a mineral standpoint: Therefore, be it

Resolved, That this withdrawal order is in violation of the intent and purpose of the original Executive order; is inconsistent, establishes a precedent whereby the States may no longer accept the word and moral contract of the Federal Government; is prejudicial to the interests of our citizens and will effectually prevent any and all mineral development without resultant benefit to the Indians; and be it further

Resolved, That we, the Land Board of the State of Arizona, in regular assembly, this 7th day of June 1933, do earnestly beseech the President of the United States, the Honorable Franklin D. Roosevelt, to evacuate the said order of the Secretary of the Interior and reinstate this area for the purpose of prospecting and mine development.

ARIZONA STATE CHAMBER OF COMMERCE,
By JAMES R. DUNSEATH, *a Director.*

Mr. ASHURST. I also ask leave to have printed at this point a copy of an opinion signed by Hon. Nathan R. Margold, Solicitor for the Department of the Interior.

The PRESIDING OFFICER. Without objection, the opinion will be printed in the RECORD.

The opinion is as follows:

UNITED STATES DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SOLICITOR,
Washington, March 7, 1934.

The honorable the SECRETARY OF THE INTERIOR.

MY DEAR MR. SECRETARY: At the suggestion of the Commissioner of Indian Affairs there has been referred to me for opinion the question of the validity of certain claims of surface and mineral rights asserted by the Indians of the Papago Tribe. These claims embrace an existing Indian reservation of more than two and one half million acres and a large amount of adjacent land in southern Arizona. The area is bounded, in a general way, by the Gila River, the Santa Cruz River, the Mexican boundary, and the Growler Mountains. For centuries it has been, and it still is, the home of the Papago Indians.

The Papagos claim that both surface and minerals belong to them in fee by virtue of a title vested in them before the area in question came under the sovereignty of the United States. Therefore, they allege, the land never became part of the public domain of the United States.

In 1853 this territory, then a part of Mexico, was acquired by the United States as a part of the Gadsden Purchase (10 Stat. 1031 (1854)). By act of July 22, 1854, Congress established the office of surveyor general of the Territory of New Mexico and placed under the jurisdiction of the surveyor general the examination of all claims to land asserted under the laws, usages, and customs of Spain and Mexico. Ultimate confirmation and rejection of such claims was made a function of Congress acting upon such report and recommendation as the surveyor general might make (10 Stat. 308 (1854)). After Arizona became a separate Territory, similar legislation was enacted creating the office of surveyor general of Arizona and defining the duties of that office (16 Stat. 291 (1870)). In 1891 Congress created the Court of Private Land Claims and conferred upon it jurisdiction to hear and adjudicate claims asserted under the Spanish and Mexican law (26 Stat. 854 (1891)). As early as 1874 the President of the United States by Executive order set apart a small tract of land within the Papago country immediately around the old Jesuit Mission and Indian village of San Xavier del Bac as an Indian reservation. Other comparatively unimportant reservations followed until Executive Order No. 2524, dated February 1, 1917, effected the reservation of more than 2,000,000 acres in the Papago country for the Indian inhabitants, but excepted mineral deposits and provided that the reservation area be open to entry and location under the mining laws of the United States. Congress recently has added to this reservation a contiguous strip of some 300,000 acres with the same exception and provision concerning minerals (46 Stat. 1202 (1931)). From time to time the United States has issued patents to white settlers and miners within the Papago country. It is to be remarked that during all these years of Indian occupancy and of Federal action presupposing the inclusion of the land in question within the public domain, only one instance of formal assertion of Indian title is recorded. In that case the Supreme Court of the United States considered an Indian claim to a particular small area within the Papago country. The litigation was indecisive. (*Lane* v. *Pueblo of Santa Rosa*, 249 U.S. 110 (1919); *Pueblo of Santa Rosa* v. *Fall*, 273 U.S. 315 (1927).) Under these circumstances and at this late date, those who assert that the Indians hold fee-simple title to this land must bear a substantial burden of persuasion.

A number of surveys and studies have been made of the Papago Indians and the territory they occupy. From such sources it is possible to draw a significant picture of the factual relation between these Indians and the land in controversy. The Geological Survey has published a monograph embodying the results of a recent survey (Bryan, The Papago Country, Arizona (1925)). Ten years earlier the United States Indian Service, through the agency of H. V. Clotts, assistant engineer, completed a comprehensive survey of the Papago country. Also valuable is an unofficial study by Carl Lumholtz, published in 1912, in his book, New Trails in Mexico. Studies by the Bureau of American Ethnology, official

census reports, and reports of the Secretary of the Interior, the Commissioner of Indian Affairs, the surveyors general of New Mexico and Arizona, and subordinate officials in the Indian Service complete the picture.

Lumholtz writes the following description:

"The Papago Indians of today, the principal natives of the desert, live in Arizona to the west and southwest of Tucson, as far as the Growler Mountains in the west, the Gila River in the north, and the range of Baboquivari in the east. * * * Until recent times they were found as far as the Colorado River. They occupy much of the same land as they did when first discovered in the seventeenth century by the Spaniards. The region was early named 'Papagueria', or, in its greater extension, 'Primeria Alta.' It is part of the great arid region called the 'Sonora Desert.' * * *

"The greater part of the tribe never could be induced to live in pueblos or villages, which was always the policy of the Spanish missionary. In spite of the efforts of the Jesuits and Franciscans, the Papagos are still living in their rancherias as of old, half nomadic in habit, resorting in the winter to the Sierras, where water is more plentiful and where their cattle, horses, mules, and donkeys find good grazing ground. In the summer they move to the broad, flat valleys to devote themselves to agriculture, which is made possible by the aid of the showers that fall in July and August." (At pp. 16, 25.)

See, also, Bryan at page 1; Indians Taxed and Indians Not Taxed in the United States at the Eleventh Census, 1890 (Department of Interior, Census Office, 1894), 142 folios.

The character and location of the Indian communities in the so-called "Papagueria" have been the subject of census. Clotts, Bryan, and Lumholtz report the Indian communities in some detail. Clotts describes 62 inhabited villages aggregating 1,013 houses with a total population of 5,560 persons and with 9,200 acres under cultivation. Lumholtz, similarly, lists 88 rancherias. Bryan devotes more than 150 pages to a description of all traveled routes through the Papagueria, and names and describes the scores of inhabited places to be observed along these routes. Earlier reports, apparently not predicated upon any detailed survey, show a much smaller number of communities. Soon after the Gadsden Purchase, Governor Meriwether, Superintendent ex officio of Indian Affairs in New Mexico, reported, "from the most reliable information in my possession", that the Indians within the area of the Gadsden Purchase were concentrated in "six Pueblos, or villages", near Tucson. (2 Sen. Ex. Doc., 34 Cong., 3d sess. (1856–57) 734.) The Surveyor General of New Mexico appended to his annual report for the year 1861 a table in which he attempted to include "all the pueblos whether in New Mexico proper or in Arizona." He listed therein 11 "Papago pueblos" located in Arizona, all of them, however, unsurveyed and of unknown area. (1 Sen.Ex.Doc., 37 Cong., 2d sess. (1861–62) 574, 578, 580, 581.) In 1863, Charles D. Poston, the first Superintendent of Indian Affairs in the Territory of Arizona, listed 18 Papago villages within his jurisdiction. (3 H.R.Ex.Doc., 38 Cong., 1st sess. (1863–64) 503, 504.)

The discrepancy between the earlier and later reports seems to reflect both incompleteness of the earlier data and some recent migrations of the Indians.

"The primitive condition of Papago society is giving way to the new. * * *

"Formerly they lived in large rancherias, but in the last 20 years the tendency has been to scatter. They have been touched by Americanism and are now showing energy in acquiring cattle and other properties. * * * During the last 20 years the tribe has acquired a considerable number of livestock, often 20 cows, and from 10 to 12 horses to a family." Lumholtz at 363, 364.

Comparison of the recent reports with the older ones confirms the quoted statement. Most of the communities named in the earlier reports appear in the recent ones, but with decreased population. This much seems clear: The life of the Papagos, conditioned by the aridity of the Papagueria, has not been sedentary. It is their habit to make seasonal migrations of some regularity between winter rancherias and summer rancherias. The search for pasturage and water for herds and flocks has necessitated even more extended wanderings than the exigencies of human life in an arid country alone would require. Yet, certain villages have existed for centuries. No survey of any of them seems to have been made at any time during the Spanish or Mexican dominion. Grazing lands throughout the Papagueria seem to have been common to the entire tribe regardless of village affiliations. From so much as already has been said by way of description, it must be apparent that, at the outset, the proponents of Indian title must face serious difficulties of proof in defining the area claimed and identifying the claimants to that area. Ownership in severalty is not asserted. Ownership by village communities can be established only if such communities can be defined. Moreover, a great part of the Papago country seems not to be part of any village community. A claim of tribal ownership of the entire Papagueria cannot be established without a fixing of boundaries. Certainly, the present arbitrary reservation is less extensive than the area over which the Papagos formerly roamed. The evidence at hand is insufficient for decision upon questions of boundary, but these difficulties of proof deserve mention, at least, before the general law of Indian tenure, and of mines, is considered.

The question of Indian tenure to be decided is this: Must the interest of the Papagos in the land they claim be subordinate to a superior proprietorship in the United States, or can these Indians have a perfected title in fee which precludes the United States from exercising any proprietorship over the land? That the Papagos have long occupied the Papagueria and should be protected in that occupancy, is not disputed. Indeed, the Executive order of February 1, 1917, is a recognition of an obligation which officials in the Indian Service have pointed out repeatedly ever since the annexation of the territory in question. That order, however, confirms and confers surface rights only. The contention now is that at the time of cession the Papagos had a perfected communal title in fee, no more subject to interference by the Federal Government—whether by creation of a reservation for the occupants, or by alienation of their land or its mineral wealth—than the fee simple title of any individual owner.

Had the land been part of the original territory of the United States it is clear that the contention advanced on behalf of the Indians would fail (*Spalding* v. *Chandler*, 160 U.S. 394 (1896); *Cherokee Nation* v. *Georgia*, 5 Pet. 1 (U.S. 1831)). However, Spanish and Mexican law are decisive of the question here presented.

It was the accepted legal theory of the European nations which colonized America that upon discovery of any new lands, complete jurisdiction and ownership, both imperium and dominium, became vested in the sovereign to whom the discoverer owed allegiance. For a convenient compendium, see Indian Land Cessions in the United States (Ethnology Bureau 1897), (H.Doc. 118, 56th Cong., 1st sess., 1899–1900 ff.). The King of Spain asserted a twofold claim to the vast area of New Spain and Mexico, predicating his title not alone on the right of discovery but also upon a grant from the Pope contained in the Papal Bull of 1493. See *Johnson* v. *McIntosh* (8 Wheat. 543, 573 (U.S. 1823); Hall, Laws of Mexico (1885), secs. 1, 2; Solorzano, Politica Indiana, bk. 1, ch. 9, sec. 16; id bk. 6, ch. 12, sec. 3). It follows that all rights or titles vested in private persons, severally or in groups, must derive their legal character from the Spanish Crown or succeeding proprietors.

It is not claimed that a particular grant to the Papago Indians as a tribal group was ever made by Spain. It is contended, however, that the numerous decrees of the Spanish King protecting Indians in their occupation of land are in effect a grant of complete title to Indian communities in possession generally.

The laws governing the disposition of Crown lands in Mexico under the Spanish regime appear principally in title 12 of book 4 of the Recopilacion of the Indies, and in a few uncompiled royal decrees. Law 14 of book 4, title 12 (apparently issued originally in 1578 but amended or republished in final form in 1591) is a convenient starting point:

"Whereas we have fully inherited the dominion of the Indies; and whereas the waste lands and soil which were not granted by the kings, our predecessors, or by ourselves, or in our name, belong to our patrimony and royal crown, it is expedient that all the land which is held without just and true titles be restored, as belonging to us, in order that we may retain, before all things, all the lands which may appear to us and to our viceroys, audiences, and governors, to be necessary for public squares, liberties (exidos), reservations (propios), pastures, and commons, to be granted to the villages and councils already settled, with due regard to their present condition as to their future state, and to the increase they may receive, and after distributing among the Indians whatever they may justly want to cultivate, sow, and raise cattle, confirming to them what they may want besides, all the remaining land may be reserved to us, clear of any incumbrance, for the purpose of being given as rewards, or disposed of according to our pleasure. For all this we order and command the viceroys, presidents, and pretorial audiences, whenever they shall think fit, to appoint a sufficient time for the owners of land to exhibit before them and the ministers of their audiences, whom they shall appoint for that purpose, the titles to lands, estates, Indian settlements, and caballerias, who, after confirming the possession of such as hold the same by virtue of good and legal titles, or by a just prescription, shall restore to us the remainder, to be disposed of according to our pleasure." (See Reynolds, Spanish and Mexican Laws (1895) 47.)

Supplementing this law is a separate decree of the same date, providing that lands occupied without lawful title—which lands are to be restored to the Crown under law 14, supra, "may be admitted to some convenient composition" and thereby confirmed to the possessor, thus providing much-needed accessions to the King's revenue. Exceptions are made, including a reservation "to the Indians what may be necessary for them to sow, cultivate, and raise stock." Among the lands to be admitted to composition are "chacaras" which seem to have been Indian farms or settlements. Unoccupied "chacaras" may be conceded to those who present proper petitions. The execution of this decree is intrusted to the viceroy and the council of the Indies. (Hall, 11–12.) In 1735 another decree made it necessary that grants of Crown lands be confirmed by the King himself. The great inconvenience of this system resulted in the decree of October 15, 1754 (Calvan's Ordinances on Land and Water), in which formal confirmation was intrusted to local officers, and their procedure and jurisdiction defined. Section 2 of that decree provided:

"The judges and officers in whom is delegated the jurisdiction over the sale and composition of Crown lands shall act with lenity, forbearance, and moderation, with verbal and not judicial process, in questions of lands held by Indians, and of others where it may be necessary, and in particular where their farms, farming, and stock raising are in question; since in regard to community lands and those granted their towns for pastures and commons, there is no occasion to do anything new but to main-

tain them in possession thereof and to restore to them those that have been taken from them and give them more land as the exigencies of the population require, and do not use rigor in regard to those held by Spaniards and people of other castes, keeping in mind the provisions of laws 14, 15, 17, 18, and 19, title XII, book IV, of the Compilation of the Indies." (Reynolds, 51.)

Without further setting out in detail the text of title 12 of book 4, it seems a fair generalization that the several laws therein protect the Indians in their occupancy without defining any estate. Moreover, it seems a clear implication of law 14 and of the Ordinance of 1754 that Indian lands are Crown lands and a part of the royal patrimony, the occupancy of which is surrounded by a special protection. This conclusion is supported by inference to be drawn from other laws of the Indies concerning Indians. In titles 2 and 3 of book 6 appear laws for the assembling of the Indians in villages. Law 23 in book 4, title 7, permits Spaniards to make new settlements in Indian territory, peaceably if possible, but otherwise "without doing any greater damage than shall be necessary for the protection of the settlements and to remove obstacles to the settlement." Such laws are incompatible with any recognition of ultimate title in the Indians. Again, the several laws with respect to compositions quoted above are significant in their reference to Indians. They indicate that occupants without grants from the Crown, whether Indians or Spaniards, remained in possession by sufferance only. Although the Indian occupant enjoyed a particular paternal protection, neither Indian nor Spaniard could obtain title except by formal composition. The Papagos might have perfected their title by formal proceeding, but, failing to do so, they continued in a protected possession subject to the superior title of the Crown.

Our courts have accorded significant recognition to this legal situation by confirming the power of Spanish officers to grant lands while still in the possession of the Indians. *United States* v. *Fernandez* (10 Pet. 303 (U.S. 1836)); *Breaux* v. *Johns* (4 La. Ann. 141 (1849)); *cf. United States* v. *Arredondo* (6 Pet. 691 (U.S. 1832)).

It is next contended on behalf of the Indians that even if no grant to them can be proved, lapse of time has resulted in the vesting of perfect title in them.

It has been asserted by the Supreme Court of the United States that prescription as against the Crown was recognized by the Spanish law. See Holmes, J., in *Carino* v. *The Insular Government of the Philippine Islands* (212 U.S. 449, 461 (1909)); cf. *United States* v. *Pendell* (185 U.S. 189 (1902)); *United States* v. *Chavez* (175 U.S. 509 (1899)). But see Field, J., in *Harrison* v. *Ulrichs* (39 Fed. 654 (C.C.S.D., Calif. 1889)); *Crespin* v. *United States* (168 U.S. 208, 218 (1897)). But, under Spanish law the prescriptive right which resulted from immemorial possession seems to have been no more than a privilege of acquiring title by appropriate formal procedure. See ordinance of October 15, 1754, section 4 (Reynolds, 50); Novisima Recopilacion, book 11, title 8, law 4 (2 White, New Recopilacion, 154); Hall, section 56; *Balanton* v. *Murciano* (3 Phil. 537 (1904)). In the *Carino case*, supra, where the question was whether the United States should confirm the title of an individual owner based on immemorial possession of a defined tract, no such formal proceeding had ever occurred. The Supreme Court avoided this difficulty by resort to the power of the United States as a sovereign to ignore "refined interpretation of an almost forgotten law of Spain", and to "recognize actual fact" in an effort to achieve what the Court considered an essentially just result. In contrast, the present question is essentially a formal one, although its decision must affect substantial claims. But more fundamental distinctions are to be observed: (1) This is a case of Indian tribal occupancy which seems to have been permissive and under royal protection. (2) The tract in question is not clearly defined. (3) The claim is one of communal ownership, whether by tribe or by villages.

This last consideration is decisive in itself. The nature of municipal and communal ownership of land under Spanish law too often has been adjudicated by the Supreme Court any longer to be a subject of controversy. The question has arisen most frequently with respect to the title of Spanish and Mexican pueblos rather than communities or tribes of Indians. Mr. Justice Field has thus described the tenure by which common lands within any community were held.

"By the laws of Mexico, in force at the date of the acquisition of the country, pueblos or towns were entitled, for their benefit and the benefit of their inhabitants, to the use of lands constituting the site of such pueblos and towns, and of adjoining lands, within certain prescribed limits. This right appears to have been common to the cities and towns of Spain from an early period in her history, and was recognized in the laws and ordinances for the settlement and government of her colonies on this continent. * * * It may be difficult to state with precision the exact nature of the right or title which the pueblos held in these lands.

"It was not an indefeasible estate; ownership of the lands in the pueblos could not in strictness be affirmed. It amounted, in truth, to little more than a restricted and qualified right to alienate portions of the land to its inhabitants for building or cultivation and to use the remainder for commons, for pasture lands, or as a source of revenue, or for other public purposes. *The right of disposition and use was, in all particulars, subject to the control of the Government of the country.*" (Italics added.) (*Townsend* v. *Greeley*, 5 Wall. 326, 336 (U.S. 1866). Accord *United States* v. *Sandoval*, 167 U.S. 278, 295–298 (1897); *United States* v. *Santa Fe*, 165 U.S. 675, 707–711 (1897); *Grisor* v. *McDowell*, 6 Wall. 363, 372–373 (1867); *United States* v. *Pico*, 5 Wall 536, 540 (1866); *State* v. *Gallardo*, 106 Tex. 274, 166 S.W. 369, 372 (1914)).

It is clear that the fee to all community land within the limits of any pueblo remained in the sovereign. Lapse of time did not improve the communal title of the group. There is no basis for any contention that the communal title of Indians, whether claimed by villages or by tribe, attained any greater estate. Indeed, in the case of the Papagos, where the greater part of the area involved is grazing land, both within and outside of the limits of particular villages, prescription is further impeded by specific provision of the law of the Indies that pastures are common to all persons (book 4, title 17, law 5, 2 White 56). The Papago claim to ownership in fee under the Spanish and Mexican law, whether based on grant or prescription, must fail.

Other and additional considerations make it clear that the Papagos enjoy no estate in the minerals contained in the land. The Spanish law concerning mines, as it existed from medieval times down to 1783, is conveniently summarized in an opinion of Chief Judge (later Mr. Justice) Field. See *Moore* v. *Smaw* (17 Cal. 199, 213–215 (1861)). The modern Spanish and Mexican mining law begins with a complete mining code for Spain and its colonies issued in 1783 and promulgated in Mexico the next year. For translations, see Hamilton, Mexican Law (1882), 235 ff.; 1 Rockwell, A Compilation of Spanish and Mexican Mining Law (1851), 49 ff. This code, commonly called the Ordinance of 1783, remained authoritative in New Spain and in the Republic of Mexico until after the Gadsden Purchase. See *United States* v. *Castillero* (2 Black 17, 167 (U.S. 1862); Hall, 357). Title 5 of the ordinance concerns the ownership of mines:

"SECTION 1. The mines are the property of my royal Crown * * *

"SEC. 2. Without separating them from my royal patrimony, I grant them to my subjects in property and possession * * *."

That section 2, supra, is not a present grant and does no more than make possible specific transfers of a qualified property right in the future is made clear in title 6 of the ordinance. In that title the manner in which new mines may be discovered and the formal proceeding of denouncement and registry, whereby a qualified title to any particular mine may be acquired from the Crown, are described. The exact language of certain sections may indicate more clearly the purport of this title.

"SEC. 14. Anyone may discover and denounce a vein, not only on common land but also on the property of any individual, providing he pays for the extent of surface above the same, and the damage which immediately ensues therefrom * * *.

"SEC. 18. Beds of ore (placeres) and all other deposits (criadores) of gold and silver, on being discovered, shall be registered and denounced in the same manner as mines or veins, the same being understood of all species of metal."

Section 22 makes the ordinance applicable to deposits of copper, tin, lead, quicksilver, and other metals.

In the laws of the Indies special provisions were made to bring the Indians within the general mining laws. The occasion seems to have been a loss of royal revenue caused by the failure of Indians to disclose mines for fear of confiscation. See Gamboa, Commentaries on Mining Ordinances of Spain (Heathfield's Trs. 1830), 34. In book 4, title 19, it is provided that all persons, including Indians, may discover and work mines, but that in doing so they must refrain from injuring Indians or other persons. Law 14 prohibits any restriction from being "imposed on their (the Indians) discovering, holding, and occupying mines of gold and silver or other metals * * * in conformity with the ordinance of any Province." Law 16 provides that groups of Indian discoverers shall share in a mine in the same way as Spaniards. In brief, under the mining laws of Spain and Mexico, the Indian enjoyed the same status and privileges as persons of Spanish descent. The legal situation as it existed down to the time of the Gadsden purchase is summarized in two statements, one a judicial opinion of the Mexican Supreme Court of Justice, the other a text by a Spanish jurisconsult, preeminent in the field of mining law.

"The ordinance (of 1783) disallows and condemns the system of accession, preserving the principles by which mines may be denounced upon the land of another person, and establishing the right upon the owner of the land to demand its estimated value (por tanto), thus declaring that mines are not accessories to the soil; fifth, as a consequence of this principle, independent in their judicial relations, the ownership of the mine and that of the soil, create two separate and diverse proprietors." (Opinion of Chief Justice Vallaria June 24, 1880, Hamilton, appendix VIII.)

"The correct opinion then seems to be that the property of the mines remained in the Crown, and that as the Sovereign cannot work them on his own account, he has given his subjects a partial interest in them under various restrictions." (Gamboa, at 24.)

Since the cession to the United States the courts in this country have recognized both the ownership of mines by Spain and Mexico before the cession and the succession of the United States to that ownership. (See *United States* v. *Castillero*, *supra*, at 190; *Chouteau* v. *Molony*, 16 How. 203, 228 ff. (U.S. 1853); *Moore* v. *Smaw*, *supra*, at 217; *Boggs* v. *Merced Mining Co.*, 14 Cal. 279, 308–313 (1859).) The Supreme Court has stated expressly that under Spanish law minerals in Indian lands were the property of the Crown, "but the privilege to work the mines in lands still in the occupancy of the Indians, he (the Spanish Governor) could give, because the mines were a part of the royal patrimony of the

Crown, and the King had directed that they might be searched for and worked in all his dominions by his subjects, both Spaniards and Indians." (*Chouteau* v. *Moloney, supra,* at 240.)

The Executive and legislative branches of the Federal Government likewise have recognized the succession of the Federal Government to the ownership of mines in what was formerly Spanish and Mexican territory. The Secretary of the Interior in his annual report for 1849 made the following statement:

"By the laws of Spain these mines did not pass by a grant of the land, but remained in the Crown, subject to be disposed of according to such ordinances and regulations as might be from time to time adopted. Any individual might enter upon the lands of another to search for ores of the precious metals; and, having discovered a mine, he might register and thus acquire the right to work it on paying to the owner the damage done to the surface, and to the Crown, whose property it was, a fifth or tenth, according to the quality of the mine. If the finder neglected to work, or worked it imperfectly, it might be denounced by any other person, whereby he would become entitled.

"This right to the mines of precious metals, which, by the laws of Spain, remained in the Crown, is believed to have been also retained by Mexico while she was sovereign of the Territory, and to have passed by her transfer to the United States. It is a right of the sovereign in the soil as perfect as if it had been expressly reserved in the body of the grant, and it will rest with Congress to determine whether, in those cases where lands duly granted contain gold, this right shall be asserted or relinquished. If relinquished, it will require an express law to effect the object; and, if retained, legislation will be necessary to provide a mode by which it shall be exercised. For it is to be observed that the regulation permitting the acquisition of a right in the mines by registry or by denouncement was simply a mode of exercising by the sovereign the proprietary right which he had in the treasure as it lay in and was connected with the soil. Consequently, whenever that right was transferred by the transfer of the eminent domain, the mode adopted for its exercise ceased to be legal, for the same reason that the Spanish mode of disposing of the public lands in the first instance ceased to be legal after the transfer of the sovereignty." (2 Sen. ex. doc., 31st Cong., 1st sess., 1849–50, 9–10.)

When Congress created the office of Surveyor General of New Mexico and provided machinery for the establishment and confirmation of land claims existing under the Spanish and Mexican law, it expressly excluded mineral lands from the operation of the statute (10 Stat. 308, sec. 4 (1854)). In the Court of Private Land Claims Act it is provided:

"Third. No allowance or confirmation of any claim shall confer any right or title to any gold, silver, or quicksilver mines or minerals of the same unless the grant claimed affect the donations of such mines or minerals to the grantee or unless such grantee has become otherwise entitled thereto in law or in equity; but all such mines and minerals shall remain in the property of the United States." (26 Stat.L. 854, 860 (1891); see *Lockhart* v. *Johnson,* 181 U.S. 516, 524 (1900).)

Upon the whole case, in the light of the facts now at hand, it is my opinion that in 1853 the United States acquired title to the land in question subject to an Indian right of occupancy of an area not exactly determined; that whatever surface rights the Papago Indians may have enjoyed, no interest in minerals was accessory or incidental to those surface rights; that complete and unencumbered title to minerals in the land was vested formerly in the Mexican State and passed to the United States upon cession of the territory. It follows that the question of the appropriate manner of protecting the Papagos in their possession was, and still is, a matter exclusively of political cognizance (*Cf. United States* v. *Santa Fe,* 165 U.S. 675 (1896); *Les Bois* v. *Bramell,* 4 How. 449 (1846)). The present measure of the rights of the Papagos is the Executive order of February 1, 1917, as modified by the act of February 21, 1931. The Papagos have no independent title which can make that action ineffective or embarrass any future action that to Congress may seem appropriate in the premises.

Respectfully,

NATHAN R. MARGOLD, *Solicitor.*

Approved: March 7, 1934.

OSCAR L. CHAPMAN,
Assistant Secretary.

CARRIAGE OF AIR MAIL BY THE ARMY

Mr. McKELLAR. Mr. President, I ask unanimous consent that there may be read from the desk a letter from the President to me, and one to the Secretary of War, with reference to air mail. I think every Senator will be interested in these letters.

The PRESIDING OFFICER (Mr. CLARK in the chair). The Senator from Tennessee asks unanimous consent that certain letters be read from the desk. Is there objection? The Chair hears none.

The Chief Clerk read as follows:

THE WHITE HOUSE,
Washington, March 10, 1934.

Hon. KENNETH MCKELLAR,
Chairman Senate Committee on
Post Offices and Post Roads, Washington, D.C.

MY DEAR MR. CHAIRMAN: I am enclosing a copy of a letter which I have just sent to the Secretary of War. In this letter I asked that he issue immediately orders to the Army Air Corps stopping all carrying of air mail, except on such routes, under such weather conditions, and under such equipment and personnel conditions as will insure, as far as the utmost human care can provide, against constant recurrence of fatal accidents.

This is an added reason for the desirability of the enactment of the legislation which I proposed to your committee a few days ago. I hope much that this legislation can be taken up as soon as possible in order that new bids for new contracts for carrying the mail may be invited.

Very sincerely yours,

FRANKLIN D. ROOSEVELT.

(Enclosure.)

MARCH 10, 1934.

MY DEAR MR. SECRETARY: On February 9 the Army Air Corps was given the temporary assignment of carrying the air mail and commenced the actual carrying on February 20. This action was taken on the definite assurance given me that the Army Air Corps could carry the mail.

Since that time 10 Army flyers have lost their lives. I appreciate that only four of these were actually flying the mail, but the others were training or were proceeding to the mail route. I appreciate also that almost every part of the country has been visited during this period by fog, snow, and storms, and that serious accidents, taking even more lives, have occurred at the same time in passenger and commercial aviation.

Nevertheless, the continuation of deaths in the Army Air Corps must stop. We all know that flying under the best of conditions is a definite hazard, but the ratio of accidents has been far too high during the past 3 weeks.

Will you therefore please issue immediate orders to the Army Air Corps stopping all carrying of air mail, except on such routes, under such weather conditions and under such equipment and personnel conditions as will insure, as far as the utmost human care can provide, against constant recurrence of fatal accidents.

This exception includes, of course, full authority to change or modify schedules.

As you know, the period of emergency will end as soon as the necessary legislation has been enacted and new contracts can be obtained. I am writing once more to the chairmen of the House and Senate committees urging speed in the enactment of the legislation. Because military lessons have been taught us during the past few weeks, I request that you consult immediately with the Postmaster General and the Secretary of Commerce in order that additional training may be given to Army air pilots through cooperation with private companies who later on will fly the mails. This should include, of course, training in cross-country flying, in night flying, blind flying, and instrument flying.

I am sending a copy of this letter to the Postmaster General in order that he may make arrangements with you. He will, of course, modify the instructions given on February 9 to conform with the Army plans.

Very sincerely,

FRANKLIN D. ROOSEVELT.

Hon. GEORGE H. DERN,
War Department, Washington, D.C.

Mr. McKELLAR. Mr. President, I may say that the Post Offices and Post Roads Committee has already been called to meet at 10:30 o'clock on Monday, when hearings will be had on this bill.

Mr. REED. Mr. President, I think something ought to be said for the Army.

The Army has undertaken this task without complaint. This change in the orders of the President is not made as a result of any complaint from the Army.

Anyone who goes into the Army knows that he is undertaking a hazardous vocation; he is there to obey orders, and I think the country ought to know that this extremely wise decision on the part of the President has not been inspired by any complaint or request from the Army aviators themselves.

Mr. FESS. Mr. President, I am delighted at the step that is being taken by the President. I doubt whether we are going far enough to reach what we want to accomplish, and for that reason I am sending to the desk a resolution which I have had prepared, and which has just been placed in my hands, looking to action broader than that suggested by the President. I should like to have the resolution read, and have it printed and lie on the table.

The PRESIDING OFFICER. The Senator from Ohio asks unanimous consent that the resolution may be read and lie on the table. Is there objection? The Chair hears none, and the clerk will read.

The resolution (S.Res. 204) was read as follows:

Whereas the following-named Army Air Corps pilots have met their death while training for and carrying the mails:

Lt. Durward O. Lowry, killed in a crash near Deshler, Ohio, while carrying the air mail from Chicago to Cleveland;

Lt. I. F. Patrick, killed at Denison, Tex., while en route to take over the command of an air-mail post;

Lt. Jean D. Grenier, killed while flying the dangerous air-mail sector between Salt Lake City and Cheyenne;

Lt. Edwin D. White, killed in the same accident with Lieutenant Grenier;

Lt. James Y. Eastman, killed near Barrymore, Idaho, while flying a difficult stretch of an air-mail route;

Lt. George F. McDermott, lost at sea off Rockaway Point, N.Y., while en route from Mitchel Field to Richmond, Va., to enter the Army Air Mail Service;

Lt. Otto Wienecke, crashed in a heavy snow storm near Chardon, Ohio;

Sgt. Ernest C. Bell, crushed to death when a heavily laden plane went into a spin at 500 feet shortly after taking off at Daytona Beach, Fla.;

Lt. F. L. Howard, killed shortly after taking off from Cheyenne, Wyo.; and

Lt. A. R. Kerwin, killed in the same accident with Lieutenant Howard: Therefore be it

Resolved, That the President is requested to discontinue the employment of the officers and facilities of the Army Air Corps, or the aviation forces of the Navy and Marine Corps, in the carriage of the mails until such time as after investigation and report thereon such forces shall have sufficient training in the type of flying required for such service and shall have become so familiar with the routes covered in such service, and until such aviation forces shall have been provided with such equipment, as to render carriage of the mails by such aviation forces consistent with the highest degree of safety obtainable by modern aviation science.

The PRESIDING OFFICER. The resolution will be printed and lie on the table.

NAVY DEPARTMENT APPROPRIATIONS—CONFERENCE REPORT

Mr. BYRNES submitted the following report:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7199) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1935, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 4, 14, 19, and 20.

That the House recede from its disagreement to the amendments of the Senate numbered 8, 9, 11, 12, 16, 21, 24, and 25, and agree to the same.

Amendment numbered 1: That the House recede from its disagreement to the amendment of the Senate numbered 1, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$65,000"; and the Senate agree to the same.

Amendment numbered 2: That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$62,000"; and the Senate agree to the same.

Amendment numbered 3: That the House recede from its disagreement to the amendment of the Senate numbered 3, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$1,176,482"; and the Senate agree to the same.

Amendment numbered 5: That the House recede from its disagreement to the amendment of the Senate numbered 5, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$15,542,000"; and the Senate agree to the same.

Amendment numbered 6: That the House recede from its disagreement to the amendment of the Senate numbered 6, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$13,662,200"; and the Senate agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$10,545,600"; and the Senate agree to the same.

Amendment numbered 10: That the House recede from its disagreement to the amendment of the Senate numbered 10, and agree to the same with an amendment as follows: At the end of the matter inserted by said amendment insert the following: ", who, if above the rank of lieutenant, shall not be entitled to receive increased pay for making aerial flights at a rate in excess of $1,440 per annum, all of such nonflying officers or observers"; and the Senate agree to the same.

Amendment numbered 17: That the House recede from its disagreement to the amendment of the Senate numbered 17, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$7,559,000"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 13, 15, 18, 22, and 23.

JAMES F. BYRNES,
ROYAL S. COPELAND,
PARK TRAMMELL,
FREDERICK HALE,
HENRY W. KEYES,
Managers on the part of the Senate.

W. A. AYRES,
GLOVER H. CARY,
M. J. HART,
J. HOWARD SWICK,
JOHN T. BUCKBEE,
Managers on the part of the House.

Mr. TYDINGS. Mr. President, I should like to ask the Senator having the report in charge what was done in reference to the amendment placed in the bill by the Senate touching the Naval Academy instructors.

Mr. BYRNES. Mr. President, the conference report contains the agreement between the two Houses authorizing the employment by the Superintendent of the Naval Academy of 8 additional civilian instructors, which number, together with 4 civilian instructors who were employed during recent months, makes a total of 12 civilian instructors who will be employed under the language of the bill.

Mr. TYDINGS. Will the Senator also tell us how many instructors, according to the estimate, will in all likelihood be not reemployed?

Mr. BYRNES. This whole matter grew out of the severance from the service in July of last year of 20 of these instructors, and authority is contained in the report for the reemployment of 8 civilian instructors. Since last July 4 have been reinstated, which makes 12 civilian instructors, in addition to those already in the service.

Mr. TYDINGS. I appreciate the efforts the Senator has made to help these men who have been connected with the academy for many years, in departments divorced from purely naval courses of instruction. I saw in the record of the proceedings of the House that in a colloquy between Representative Ayres and Representative Britten, the question was asked: "Does this reemploy all of the professors who were laid off?" And the answer was that it does. I simply wanted to bring out the fact that it would result in the reemployment of only 12 of the 20, and that 8 of them will still be off the pay roll.

Mr. BYRNES. The statement of the Senator from Maryland is absolutely correct.

Mr. VANDENBERG. Mr. President, I should like to inquire what happened as between the Great Lakes Training Station and the Newport Training Station?

Mr. BYRNES. The conference report eliminates the provision adopted by the House for opening the Great Lakes Station and the amendment of the Senate providing for opening the Newport Station. However, there is an increased appropriation for the maintenance of the Great Lakes Station and of the Newport Station.

The Navy Department stated that if the situation should change and there were some necessity for additional facilities for the training of recruits, then, under the existing law, there would be authority to use those stations, and if the necessity should arise they would do so; but, as matters now stand, they do not need them, and therefore they do not ask that either one of the stations be opened at this time. The Senator may not understand that they have been closed.

Mr. VANDENBERG. I understand that.

Mr. BYRNES. The question arose in the House when an amendment was offered, and by the action of the conferees, which has been agreed to by the House, neither one of the stations will be opened, but additional funds have been provided for their maintenance, so that they may be used at any time when, in the opinion of the Department, it is necessary.

Mr. VANDENBERG. So the score is nothing to nothing as between the two stations?

Mr. BYRNES. Nothing to nothing, but a million dollars to the people by our not opening either of them at this time.

Mr. President, I move that the conference report be agreed to.

The motion was agreed to.

The PRESIDING OFFICER (Mr. BYRD in the chair) laid before the Senate the action of the House of Representatives receding from its disagreement to the amendments of the Senate nos. 13, 18, and 23, and agreeing thereto with amendments, as follows:

Amendment no. 13: In lieu of the matter inserted by said amendment insert: "except for the public quarters occupied by the Chief of Office of Naval Operations and messes temporarily set up on shore for officers attached to sea-going vessels, to aviation units based on sea-going vessels, and to landing forces and expeditions."

Amendment no. 18: In lieu of the matter inserted by the said amendment insert: ": *Provided*, That, in addition to the appropriation herein made for the Office of Naval Records and Library, there is hereby appropriated $10,000 to begin printing historical and naval documents, including composition, clerical copying in the Navy Department, and other preparatory work, except that the 'usual number' for congressional distribution, depository libraries, and international exchanges shall not be printed, and no copies shall be available for free issue: *Provided further*, That the Superintendent of Documents is hereby authorized to sell copies at the prorated cost, including composition, clerical work of copying in the Navy Department, and other work preparatory to printing without reference to the provisions of section 307 of the act approved June 30, 1932 (U.S.C., supp. VI, title 44, sec. 72a)."

Amendment no. 23: In lieu of the matter inserted by said amendment insert: "June 27, 1933, except that the Secretary of the Navy is authorized to employ eight additional civilian instructors."

Mr. BYRNES. I move that the Senate concur in the amendments of the House to Senate amendments nos. 13, 18, and 23.

The PRESIDING OFFICER. The question is on the motion of the Senator from South Carolina.

The motion was agreed to.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

Mr. WAGNER. Mr. President, I give notice that as soon as I can secure the floor on Monday, I shall take the opportunity to address the Senate upon the pending St. Lawrence Treaty.

CARRYING OF AIR MAIL BY THE ARMY

Mr. McKELLAR. Mr. President, I move that the Senate proceed to the consideration of House bill 7966, to authorize the Postmaster General to accept and to use landing fields, men, and material of the War Department for carrying the mails by air, and for other purposes.

I will state to the Senator from Ohio [Mr. FESS] that the purpose of the bill is merely to give the War Department sufficient funds for carrying the mail as it has heretofore been carried. The bill has no further purpose.

Mr. FESS. Mr. President, I cannot agree to let that bill come up now for consideration.

Mr. McKELLAR. I am not asking the Senator from Ohio to agree. I am making a motion.

Mr. FESS. If the Senator desires to go into that, we will do so.

Mr. McKELLAR. Mr. President, I ask for a vote on my motion.

Mr. FESS. Mr. President, I cannot let a vote be taken on the bill at this stage unless I have an explanation as to its purpose. It may be different than I thought it was. I shall appreciate it if the Senator from Tennessee will take time to explain the purpose of the bill.

Mr. McKELLAR. I shall be very happy to do so. I am quite sure the purpose of the bill is entirely different than the Senator thinks it is.

This bill, Mr. President, is a House bill. In its first section it authorizes the Secretary of War to put at the disposal of the Postmaster General "such airplanes, landing fields, pilots, and other employees and equipment of the Army of the United States" as may be necessary to carry the mail.

The second section merely authorizes the Postmaster General to use the appropriations already made—it does not make any new appropriations at all—for the purpose of paying the Army and its fliers for carrying the mail from February 10, when it began.

The third section of the bill merely provides that—

The performance by military personnel of duty hereunder shall in no way disturb or change their military status under their respective commissions, warrants, or enlistments in the Army, or any right, privilege, benefit, or responsibility growing out of said military status.

That, I think, will commend itself to all.

In the fourth and fifth sections of the bill it is provided that Reserve officers whose services may be utilized shall have the same pay and be put upon the same status as Regular Army officers.

The sixth section merely requires the Postmaster General to submit a report to the Congress on the first day of the next session of every payment made by him under the bill, including the cost of transporting the mail by the War Department.

Mr. VANDENBERG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Michigan?

Mr. McKELLAR. I yield.

Mr. VANDENBERG. Does the Senator from Tennessee accept the amendment which I offered on February 28, reading as follows:

Provided, That this authority shall not be used unless and/or until such airplanes shall be fully equipped with the special equipment necessary by standard practice for safe night and day air-mail transport; and that pilots shall not be assigned to such airplanes unless and/or until fully and adequately trained in the use of such special equipment.

Mr. McKELLAR. I certainly do. I think it is a very wise provision, and I shall be very happy to accept it.

Mr. HEBERT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Tennessee yield to the Senator from Rhode Island?

Mr. McKELLAR. I yield.

Mr. HEBERT. Having in mind the recommendation of the President disclosed here this morning, I am wondering what the purpose of the proposed bill is, since all flying of the mail is to be stopped for an indefinite period of time.

Mr. McKELLAR. Not all flying of the mail will be discontinued, but the greater part of it, as I understand the President's order. The carrying of the air mail by the Army has been going on since the 10th of February. It has cost a good deal of money. This bill provides for the use of appropriations that have already been made for the purpose of paying for the services rendered by the Army fliers.

Mr. HEBERT. But, Mr. President, the bill does more than that. It takes care of the expenses that have been incurred up to date, and provides for the use of these funds in the future.

Mr. McKELLAR. Of course it does. There certainly will be some flying under the conditions named in the President's order, and under the further conditions of an amendment to this bill that is to be offered by the Senator from Michigan [Mr. VANDENBERG], providing that where Army officers are sent up in planes for the purposes of carrying the mail, those planes must be in perfect condition and have all the proper apparatus for safe flying.

Mr. FESS. Let me ask the Senator from Tennessee as to there being a requirement that the planes shall be in such shape that they may be safely used. One of the planes which crashed last night was an open plane, and the pilot sat in an open cockpit. That would not be such a plane as would be fully equipped, would it?

Mr. McKELLAR. I do not know.

Mr. FESS. That is what I want to know.

Mr. McKELLAR. I will refer the Senator from Ohio to the Senator from Michigan [Mr. VANDENBERG], who has offered that amendment. Let me say, however, that I have understood that the commercial companies engaged in carrying mail frequently send it out in planes with open cockpits. I myself have flown so little that I am not sufficiently expert to know, but I am quite sure that the Senator from Michigan has the facts.

Mr. FESS. Let me state that the planes that were purely mail planes, carrying no passengers prior to the Watres Act, might have been of the character referred to, but since the enactment of the Watres Act the open cockpit planes are not used for the purpose.

Mr. McKELLAR. If they are not, under the Vandenberg amendment they would be prohibited.

Mr. FESS. That is what I wanted to know.

Mr. VANDENBERG. Mr. President, I would not assume to speak with any authority whatever, because I have no technical knowledge on the subject, but I have discussed the matter with Captain Rickenbacker, whom I consider to be still the ace of aces next to Colonel Lindbergh. I think the clause, "special equipment necessary by standard practice for safe night and day air-mail transport", will cover every essential. I cannot undertake to detail the equipment to the Senator, but it is my opinion that that clause covers every essential of equipment.

The second provision of the amendment reads:

and that pilots shall not be assigned to such airplanes unless and/or until fully and adequately trained in the use of such special equipment.

Mr. President, I am advised that the private air-mail-transport operators do not permit even a copilot to go into the air with the air mail unless he has had 1,200 hours flying experience with the radio beam and similar special equipment, and that no full pilot is permitted to go aloft under such circumstances unless he has had 4,000 hours of training in the special radio beam, and so forth; and that no plane is permitted to go aloft unless it has both a pilot and a copilot. That, in my view, would be "standard practice."

So far as it is in the range of the authority of the Senate, if we require of the War Department Air Service that it abstain from the service except as it is prepared to certify that it has sent men into the air on this service fully and adequately trained in the use of special equipment, and if it must also certify that such special equipment meets the requirements of standard practice for safe night and day air-mail transport it seems to me that we shall have gone about as far as we can go in writing the specifications.

Mr. FESS. The judgment of Captain Rickenbacker is as good as that of anybody, I should think.

Mr. VANDENBERG. I do not want to be misunderstood. I would not say that Captain Rickenbacker had approved this precise language. I say that this language was drawn after my conversation with Captain Rickenbacker, and I think it meets the situation.

Mr. McKELLAR. To show what I think about the amendment, if it shall be adopted by the Senate and the bill shall be passed, in conference, before final agreement upon the amendment, it will be brought back to the Senate if it shall be necessary so to do. I will say that much, and I want to use diplomatic language, so far as the other House is concerned. I think, however, the amendment will meet the approval of the House. The Senator from Michigan offered it several days ago; we have had time to consider it, and have considered it; and it appears to me that it is as ideal an amendment to obtain safe flying in the air as it is possible to get.

Mr. FESS. Does the Senator from Tennessee accept that amendment?

Mr. McKELLAR. Indeed I do; and, not only that, but I shall fight for it.

Mr. FESS. Mr. President, the amendments go far to relieve some of the objections I entertain. I am quite sympathetic with what the Senator wants to do in regard to payment to the flyers engaged in this service and provision for their dependents.

Mr. McKELLAR. Some of the flyers have been killed, and this bill provides for payment to their dependents.

Mr. FESS. That is one of the things I had in mind when I said I was quite sympathetic with what the Senator proposed to do.

Mr. McKELLAR. I think it is very essential that the bill be promptly passed.

Mr. FESS. What does the Senator have to say of this bill in the light of the bill he introduced yesterday?

Mr. McKELLAR. This is a mere temporary measure, to provide for an emergency, and has nothing in the world to do with the bill introduced yesterday.

Mr. FESS. Mr. President, it does involve some considerations which I deplore. In other words, the bill, in a way, gives approval to having the Air Mail Service conducted by the Army; I do not want to approve that; and yet, in the light of the letter of the President and what I think is the commanding desire of the American people that all these hazards, so far as possible, be removed, and that the Army fliers be not jeopardized by being compelled to fly in all kinds of bad weather, I think I shall not offer any objection to the bill under the circumstances.

The PRESIDING OFFICER. The question is on the motion of the Senator from Tennessee, that the Senate proceed to the consideration of House bill 7966.

Mr. McNARY. Mr. President, just a moment. I thought that the wish the Senator expressed to me yesterday was to make this bill the unfinished business and then let it go over until Monday.

Mr. FESS. I wish that might be done.

Mr. McKELLAR. That was yesterday, and the idea, I thought, was to have the bill go over until today. I have been trying to get the bill up all week; but the bill to include cattle as a basic commodity consumed practically the entire week; it was the unfinished business; and I was unable to secure unanimous consent for the consideration of House bill 7966.

I believe the Vandenberg amendment is very essential. We will probably continue to send into the air in the Air Mail Service some of the Army fliers, and I think the provisions of this bill should become law and should be made applicable as soon as possible. Both the War Department and the Post Office Department are very anxious to have this bill enacted into law at the earliest possible date, and I do not think any real objection could possibly be raised against the measure. I do not know of any. It seems to me it would be helpful in the emergency. The bill will have to go to conference; that will take a day or two, at least, or perhaps more than that; and I had very much hoped that we could get it through this week. I hope the Senator from Oregon will not object.

Mr. McNARY. Mr. President, I must stand for what I believe to be the plain understanding had yesterday, namely, that after the passage of the appropriation bill, either yesterday or today, we would make the bill of the Senator from Tennessee the unfinished business and adjourn until Monday, when there will be a full attendance. Some of the members of the committee on this side of the aisle who have made an exhaustive study of the subject are not here today; a great many Senators have left the Chamber under the impression that there would be no business transacted except the consideration of the appropriation bill and speeches on the treaty. I am responsible for giving that notice to the several Members of the Senate.

Mr. McKELLAR. Under those circumstances, I shall not insist on a vote this afternoon.

Mr. McNARY. I knew the Senator would not.

Mr. McKELLAR. But I think that we should recess until Monday so that the bill may be taken up immediately after convening on Monday.

Mr. McNARY. I was satisfied when this situation was developed, and made perfectly clear to the Senator from

Tennessee that he would be willing to have the bill go over until Monday for consideration.

I suggest that it be handled under a unanimous-consent agreement, and if I have the consent of the Senator, I ask unanimous consent that House bill 7966 be considered at 12 o'clock noon on Monday next.

Mr. McKELLAR. I should be very happy to have that done. The Senator knows, however, that on Monday there are going to be a number of speeches delivered on the treaty. Could we not include in the unanimous-consent agreement that after meeting at 12 o'clock on Monday no Senator shall speak longer than 10 minutes on the bill?

Mr. McNARY. As a Member of this body I have followed the practice for a good many years never to try to impose upon the Senate a unanimous-consent agreement to limit debate until there has been a full discussion. I plead with the Senator to let the unanimous-consent proposal submitted by me be entered into; and if Monday shall be consumed by speeches on the treaty, then the bill may be considered and passed on the next day or the day following. I ask that my unanimous-consent request be put.

The PRESIDING OFFICER. There is a motion pending, which is the motion of the Senator from Tennessee to consider House bill 7966. Does the Senator from Tennessee withdraw the motion?

Mr. McKELLAR. No, Mr. President. Let the motion be put.

The PRESIDING OFFICER. The question is on the motion of the Senator from Tennessee.

The motion was agreed to; and the Senate proceeded to consider the bill (H.R. 7966) to authorize the Postmaster General to accept and to use landing fields, men, and material of the War Department for carrying the mails by air, and for other purposes.

Mr. McNARY. Now, Mr. President, I renew my request for unanimous consent that the consideration of the bill be postponed until Monday next at 12 o'clock noon, and that it be considered at that time.

The PRESIDING OFFICER. The Senator from Oregon submits a request for unanimous consent that House bill 7966 be considered at noon on Monday next. Is there objection?

Mr. LEWIS. Mr. President, I cannot allow this understanding to go through on the theory that I am abandoning the promise made to Senators on the other side, beginning with the eminent Senator from Nebraska [Mr. NORRIS], who have given notice that they will speak on the treaty on Monday. I myself have given such a notice, and others on this side, in fact, I may say on both sides of the controversy, have also done so; and I would not have the eminent Senators now entering into the present plan assume that those notices are being abandoned. I take it that those Senators are entitled to proceed, and I have announced the circumstances so that the able Senators from Oregon and Tennessee may reckon with them.

Mr. McNARY. This unanimous consent, if agreed to, will in no wise interfere with the unfinished executive business; debate may continue on the treaty on Monday until it shall have been completed; but, in the meantime, in order to postpone the consideration of this bill today, I am asking that, as the unfinished legislative business, it be taken up at 12 o'clock noon on Monday next.

Mr. McKELLAR. Mr. President, I should like to include in the unanimous-consent request a provision that when the Senate concludes its business today it recess until 12 o'clock Monday.

The PRESIDING OFFICER. Is there objection?

Mr. NORRIS. Mr. President, I have been out of the Chamber and have just returned. I am wondering whether there is anyone to speak on the treaty except the Senator from Illinois [Mr. LEWIS] and myself? We have given notice of our intention to speak on Monday.

Mr. McNARY. The Senator from New York [Mr. WAGNER] and the Senator from Louisiana [Mr. OVERTON] will speak.

Mr. NORRIS. I was wondering if there is going to be a conflict among us. Would it not be well for us to meet Monday at 11 o'clock?

Mr. McNARY. That was suggested yesterday, and the Senator from Michigan [Mr. COUZENS] made objection. It is understood that the Senator from Nebraska [Mr. NORRIS] will speak first on Monday.

Mr. NORRIS. Very well.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Oregon as modified by the Senator from Tennessee? The Chair hears none, and it is so ordered.

RELIEF OF GOVERNMENT EMPLOYEES IN FOREIGN COUNTRIES

Mr. PITTMAN. Mr. President, there is on the calendar a bill which I think should be taken up immediately by the Senate. It is a bill which passed the House sometime ago. It provides authority for the President to compensate employees of our Government in foreign lands for losses by reason of depreciation in the exchange value of the dollar.

The situation is quite serious. I think nearly every Senator knows how serious it is without its being necessary for me to go into the matter in detail at this time. For instance, in the case of our Foreign Service officers and employees in Italy, as shown by the correspondence, the exchange value of their money is only about 40 percent of its American value. The correspondence indicates that, as a consequence, a great many of those employees are compelled to live in the consulates and the embassy. The bill was considered by the full Committee on Foreign Relations and, with one slight amendment, was approved by the entire committee.

I ask unanimous consent for the immediate consideration of the bill at this time.

The PRESIDING OFFICER. The title of the bill will be stated.

The CHIEF CLERK. A bill (H.R. 7808) to authorize annual appropriations to meet losses sustained by officers and employees of the United States in foreign countries due to appreciation of foreign currencies in their relation to the American dollar, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Nevada?

Mr. McKELLAR. Mr. President, may I ask if such an agreement would supersede the agreement as to the unfinished business?

Mr. McNARY. Mr. President, of course if the bill referred to by the Senator from Nevada is made the unfinished business and its consideration should not be completed by Monday noon, it would supersede the other measure as the unfinished business.

The Senator from Idaho [Mr. BORAH], former Chairman of the Committee on Foreign Relations, stated to me a few days ago that he wants to be present when the bill is considered by the Senate. I think I should suggest the absence of a quorum in order to have him here.

Mr. PITTMAN. I was not aware the Senator from Idaho desired to be present. He voted in the committee for a favorable report on the bill.

Mr. McNARY. That may be. He may have changed his views or he may want to submit some expression of his present attitude. If the Senator presses his request, I shall feel compelled to suggest the absence of a quorum.

Mr. FESS. Mr. President, I was present at the meeting of the committee, but I do not think the Senator from Idaho [Mr. BORAH] was present. That is my recollection. I expressed myself at the time as believing that the bill ought to be considered and passed, but I reserved the right to say something on the floor of the Senate when the bill came up for consideration, because it relates to a condition resulting from the devaluation of the dollar.

Mr. PITTMAN. Very well. I submit my request.

Mr. McNARY. I have no objection at all to the Senator's submitting his request. I merely want to protect the interests of the Senator from Idaho [Mr. BORAH], and I am going to suggest the absence of a quorum if the Senator insists upon submitting his request. If the Senator from Idaho appears, then we can go forward with consideration of the bill.

Mr. PITTMAN. I think that is a good idea.

Mr. McNARY. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Adams	Dill	Kean	Pope
Bachman	Duffy	Keyes	Reed
Bulkley	Erickson	La Follette	Reynolds
Bulow	Fess	Lewis	Schall
Byrd	Fletcher	Lonergan	Sheppard
Byrnes	Frazier	McCarran	Steiwer
Capper	George	McKellar	Thomas, Utah
Caraway	Gibson	McNary	Townsend
Carey	Glass	Metcalf	Trammell
Clark	Goldsborough	Murphy	Tydings
Connally	Hale	Neely	Vandenberg
Copeland	Harrison	Norris	Van Nuys
Couzens	Hatch	O'Mahoney	Walcott
Dickinson	Johnson	Pittman	White

The PRESIDING OFFICER. Fifty-six Senators have answered to their names. A quorum is present.

Mr. PITTMAN. I ask unanimous consent that the unfinished business be temporarily laid aside, and that the Senate proceed to the consideration of House bill 7808.

The PRESIDING OFFICER. Is there objection?

Mr. McNARY. Mr. President, I objected a moment ago because of the absence of the senior Senator from Idaho [Mr. BORAH]. I have been informed by him that he will be unable to be present this afternoon, but that he has no objection to the present consideration of the measure.

There being no objection, the Senate proceeded to consider the bill (H.R. 7808) to authorize annual appropriations to meet losses sustained by officers and employees of the United States in foreign countries due to appreciation of foreign currencies in their relation to the American dollar, and for other purposes, which had been reported from the Committee on Foreign Relations with an amendment.

Mr. PITTMAN. Mr. President, I send to the desk a letter from the Secretary of State, which I ask to have read.

The PRESIDING OFFICER. Without objection, the letter will be read.

The Chief Clerk read as follows:

DEPARTMENT OF STATE,
Washington, February 8, 1934.

The Honorable KEY PITTMAN,
Chairman Foreign Relations Committee,
United States Senate, Washington, D.C.

MY DEAR SENATOR PITTMAN: As you already know, the decline of the dollar in its relation to foreign currencies on the international exchanges has reduced its purchasing power in terms of foreign currency in many parts of the world by over 50 percent. For a time, the President, through the shipment of gold abroad and the conversion of salary checks and drafts of officers and employees abroad at approximately mint par, sought to remedy the situation, but the revaluation of the dollar on January 31, 1934, has made that impracticable. Since February 1 no officer or employee of the Government has been able to obtain any pay except by a loss of from 40 to 50 percent of the amount of foreign currency which his salary was intended by Congress to purchase. This situation came after Congress, by its economy legislation, had abolished the greater portion of all supplemental allowances of members of the Foreign Service. Obviously it will be impossible to prevent the complete disintegration of the Service at an early date unless Congress shall speedily provide ample appropriations which will permit the restoration of the former normal purchasing power of all salaries and allowances of officers and employees of the Government in foreign countries. This applies not only to ambassadors, ministers, consuls, Foreign Service officers, and other employees under the Department of State, but it applies equally to the officers and employees of the Departments of the Treasury, Navy, War, Commerce, Agriculture, and Labor, and of certain independent establishments which maintain employees in foreign countries. There is no question of increase of pay involved. The matter to be dealt with is the restoration to their former normal purchasing power of the salaries and allowances fixed by Congress or by lawful regulation.

I am transmitting herewith a draft of a bill authorizing appropriations for the purpose indicated. The bill is submitted in accordance with the desire of the President, and it has the approval of the Director of the Budget. I greatly hope that you will be able to secure the passage of this measure by the Senate at the earliest possible moment, in order that the deplorable conditions existing among the officers and employees of the Government in foreign countries may be remedied without delay.

I have addressed a like communication to the Honorable Sam D. McREYNOLDS, chairman of the Committee on Foreign Affairs of the House of Representatives.

Sincerely yours,

CORDELL HULL.

Mr. PITTMAN. Mr. President, there are other letters here from ambassadors and consuls in support of the statements made in this letter. I consider it unnecessary to have them read, however, unless someone desires to have that done.

I ask to have the amendment of the committee stated.

The PRESIDING OFFICER. The amendment will be stated.

The CHIEF CLERK. On page 2, line 9, after the word "Government", it is proposed to strike out "except the Comptroller General of the United States", so as to make the bill read:

Be it enacted, etc., That there are authorized to be appropriated annually such sums as may be necessary to enable the President, in his discretion and under such regulations as he may prescribe and notwithstanding the provisions of any other act and upon recommendation of the Director of the Budget, to meet losses sustained on and after July 15, 1933, by officers and employees of the United States while in service in foreign countries due to the appreciation of foreign currencies in their relation to the American dollar, and to cover any deficiency in the accounts of the Treasurer of the United States, including interest, arising out of the arrangement approved by the President on July 27, 1933, for the conversion into foreign currencies of checks and drafts of officers and employees for salaries and expenses: *Provided*, That such action as the President may take shall be binding upon all executive officers of the Government: *Provided further*, That no payments authorized by this act shall be made to any officers or employees for periods during which their checks or drafts were converted into foreign currencies under the arrangement hereinbefore referred to: *Provided further*, That allowances and expenditures pursuant to this act shall not be subject to income taxes: *And provided further*, That the Director of the Budget shall report all expenditures made for this purpose to Congress annually with the Budget estimates.

Mr. FESS. Mr. President, all accounts of expenditures provided for by legislation, except where we make exceptions in cases like the Agricultural Adjustment Act, must pass under the eye of the Comptroller General. I thought provision for that ought to be included in this bill. The chairman of the committee stated in the committee, however, that the devaluation of the dollar was not uniform—that is, that it did not act uniformly in all countries—and not only that, but that it was not uniform over any particular period, and that if the Comptroller General had to approve every payment made from month to month the matter would be very complicated. I think probably that is true.

I dislike exceedingly to see any deviation from the usual rule made in legislation, so that payments may be made without being approved by the Comptroller General, as he is required to do under the law; but if the statement made is correct—and I am rather of the opinion that it is—we may be justified in not taking the view that the House took, which was that the Comptroller General should be required to approve these payments.

For that reason I shall not resist the amendment that has been reported by the committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was agreed to.

Mr. PITTMAN. Mr. President, there is one other amendment. It is suggested here that on line 8, page 1, after the word "officers", the words "enlisted men" should be inserted.

The PRESIDING OFFICER. Without objection, the amendment will be agreed to.

Mr. FESS. Mr. President, before we vote on the bill I desire to repeat what I said in the committee, that while I thought the bill should pass, attention should be called to the reason why this situation exists.

It grows out of the policy of devaluing the dollar, or of depreciating the currency. I am convinced that the bill ought to pass, because I have communications from persons in the Consular Service who tell me that they positively cannot subsist under the present purchasing power of the dollar in the particular countries where they are stationed. For that reason I think it would be very unfair and unjust from every standpoint for us to work this injury upon our people who are serving in foreign countries. Therefore, the

policy of devaluation having been entered upon, there is nothing else left for us to do; but I raise the question of the unwisdom of that policy, which I tried to express at the time we enacted it.

The time will come when what we are doing now for Americans living in foreign countries will be demanded of us on behalf of those who live in this country, because if the devaluation of the dollar will have the effect, as it was supposed that it would, of halving the purchasing power of the dollar, or halving the measuring unit, it will result in doubling the cost of living, and we will face the same situation at home when that policy gets in perfect working order in this country.

I am calling attention to what I regard as the very unwise policy of undertaking to increase the wealth of the country by an overnight decree, as a result of which we go to bed with a record of the Treasury possessing $3,000,000,000 of gold, and get up in the morning and find a record of twice that value of gold in the Treasury, without a single red penny having been added to the actual wealth of the country.

I do not think we can continue on that basis. While I am not going to resist the passage of this bill—it must pass—I do think the policy that made it imperative was a very unwise one.

Mr. REED. Mr. President, when the Thomas amendment was agreed to a year ago, it was very generally prophesied on this side of the aisle, as well as by the senior Senator from Virginia [Mr. GLASS] that a resort to any of the methods of inflation provided in that amendment would produce a series of results such as that called to our attention today by the pending bill.

The experience of France and of Italy, and of the countries of central Europe, had all shown that the reduction of the gold content of their money units was followed by just such adjustments as this act typifies. The devaluation of the dollar as of those currencies was reflected immediately in foreign exchange rates, and immediately in the prices of commodities like tin, rubber, hemp, and the other things which we ourselves do not produce and which we must import. To that extent the cost of living in dollars rose the very moment President Roosevelt debased the currency of the United States.

Inevitably, the cost of living rose instantly in the case of all Americans living abroad on incomes derived from this country. We made their problem harder by the terms of the economy law a year ago. For example, the American Battle Monuments Commission had about a dozen officers working in France completing the work in the military cemeteries and on the battlefield monuments. Those young men found that the purchasing power of their American dollar went down 40 percent as a result of its debasement. They found that their salaries were affected by the cut provided in the economy law. Another 15 percent was taken away from them through that act.

The "pay freeze", as it was called in the Army, prevented their receiving the pay which was given them by the pay act of 1922, and, all told, those cumulative reductions in their pay amounted in some cases to approximately 60 percent of the compensation on which those men and their families were living. Some of them actually found that their American pay, after these reductions, was not sufficient even to pay the rent for their quarters abroad, not to mention the cost of subsistence and their families' expenses.

It is a safe prophecy, because the experience of other countries has proved it over and over again, that the conditions which we are trying to correct by the pending bill will, after a comparatively short lag, be reproduced in this country for everyone who is living on a fixed income. The pensioners of this Government will be forced to come to Congress for a 60-percent increase in the compensation they are receiving as a result of their disabilities. The employees of the Government will be forced to come to Congress for a 60- or 65-percent increase in their pay, so that they may be on even terms with their situation before the debasement of our money took place. The employees of every private citizen of the United States, the employees of every firm and of every factory, will, by the nature of the case, be forced to demand a similar increase.

France debased her currency 80 percent, and as a result, following as surely as day follows night, every working man and woman in France had to insist on a 5 to 1 pay increase. Their pay had to be multiplied by five to enable them to enjoy the same standard of living they had before France was driven off the gold standard. Inevitably that will happen here, but it happens with unequal rapidity.

The men for whom this bill has been introduced are having the situation corrected for them first of all. But how about others? How about the working people who are unorganized, who cannot bring any collective pressure to bear upon their employers? How long will the lag be before the situation is corrected for them? Until it is corrected, this debasement of our currency is stealing from them 40 cents out of the value of every dollar they are paid.

Mr. President, when we said all this a year ago, when the Thomas amendment was pending, and when we said it again in January last, when the administration's gold bill was pending, it was stated that we were crying "Wolf!", that we were picturing things which would not happen. But here they are. Here is exhibit no. 1 of the consequences of the Democratic administration's inability or unwillingness to keep the promises on which it got itself elected to power.

The Democratic Party promised us a sound currency, to be maintained at all hazards, and at the very first appearance of the tiniest hazard, down goes our American dollar. It is made unsound. The promise is ignored, or covered over by administration propaganda. The promise is forgotten except by a few of us who recur to the Democratic platform. Now the country is beginning to reap the whirlwind.

It is a sure prophecy that during the next 5 or 6 Congresses numberless bills like that now pending will be introduced, seeking to correct belatedly the injustice that is done to the working people, to the pensioners, and to other people in the United States who are living on fixed incomes, because all those people have been robbed by the breach of the campaign promise to which I have referred.

Mr. PITTMAN. Mr. President, there are two other amendments of a nature similar to the other, first, on page 2, line 11, after the word "officers", to insert the words "enlisted men."

The CHIEF CLERK. On page 2, line 11, after the word "officers", it is proposed to insert a comma and the words "enlisted men."

The amendment was agreed to.

Mr. PITTMAN. Also, on page 2, line 6, I propose the same amendment.

The CHIEF CLERK. On page 2, line 6, after the word "officers", to insert the words "enlisted men" and a comma.

The amendment was agreed to.

Mr. PITTMAN. Mr. President, I am debarred from the opportunity of attempting to answer my distinguished friend, the Senator from Pennsylvania.

Mr. REED. Is there an answer?

Mr. PITTMAN. Yes; but I cannot afford to filibuster against my own bill, and I would rather take another time to start a debate on that subject. The question of the depreciation of the currency is a very interesting subject, but I should like very much to have a vote on the pending bill.

Mr. REED. If the Senator will pardon me, I hope the time for the debate to which he refers will come soon, because I should welcome it. Perhaps we could arrange it for Monday.

Mr. PITTMAN. Not for Monday, because I want to speak on the treaty on Monday; and as we are to vote on the treaty on Wednesday, the time for debate is getting quite short.

But I should enjoy such a debate any time after Wednesday, because I always enjoy listening to the Senator speak.

The PRESIDING OFFICER. If there be no further amendments to be offered, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

CARRYING OF AIR MAIL BY THE ARMY

Mr. McKELLAR. Mr. President, if I may have the attention of the Senator from Oregon [Mr. McNARY] for just a moment, while we are not to have a vote this afternoon on House bill 7966, which is the unfinished business, and which it was agreed should go over until Monday, would the Senator be willing, since only one amendment was reported by the committee, to have that acted on, and then have the Vandenberg amendment considered, so that that can be acted on this afternoon?

Mr. McNARY. Mr. President, I obtained unanimous consent for the consideration of the bill on Monday. I have conferred with the Senator from Michigan, and he is willing to present his amendment today. If we may have an understanding that if these two amendments shall be acted upon, and any objection shall be raised on Monday, the votes by which the amendments were agreed to may be reconsidered, I shall have no objection.

Mr. McKELLER. That will be entirely satisfactory to me. I ask that the committee amendment be stated.

The CHIEF CLERK. On page 3, after line 10, it is proposed to insert a new section, as follows:

SEC. 6. The Postmaster General shall make a report to the Congress of every payment made by him under this act, including the cost of transporting the mail by the War Department, on the first day of the next session of the Congress.

The amendment was agreed to.

Mr. VANDENBERG. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The clerk will state the amendment.

The CHIEF CLERK. It is proposed to insert at the proper place the following:

Provided, That this authority shall not be used unless and/or until such airplanes shall be fully equipped with the special equipment necessary by standard practice for safe night and day air-mail transport; and that pilots shall not be assigned to such airplanes unless and/or until fully and adequately trained in the use of such special equipment.

The amendment was agreed to.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

Mr. PITTMAN. Mr. President, I was under the impression that on yesterday I had given notice that on Monday I would discuss one phase of the problem of the Great Lakes-St. Lawrence Deep Waterway Treaty. I find that I have not done so, and I now announce that following those Senators who have heretofore given notice, I will seek an opportunity to address the Senate on that subject.

EXECUTIVE MESSAGES REFERRED

The PRESIDING OFFICER (Mr. BYRD in the chair), as in executive session, laid before the Senate messages from the President of the United States submitting nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

RECESS

Mr. McKELLAR. Mr. President, in conformity with the unanimous-consent agreement already entered into, I move that the Senate take a recess until 12 o'clock noon on Monday next.

The motion was agreed to; and (at 3 o'clock and 47 minutes p.m.) the Senate, in accordance with the order previously entered, took a recess until Monday, March 12, 1934, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate Saturday, March 10 (legislative day of Wednesday, Feb. 28), 1934

PUBLIC HEALTH SERVICE

The following-named officers in the United States Public Health Service, to rank as such from the dates set opposite their names:

TO BE MEDICAL DIRECTORS

Senior Surg. Harry J. Warner, April 4, 1934.
Senior Surg. Robert Oleson, April 9, 1934.
Senior Surg. Charles M. Fauntleroy, April 20, 1934.

TO BE SENIOR SURGEONS

Surg. Knox E. Miller, March 3, 1934.
Surg. Joseph G. Wilson, March 3, 1934.
Surg. Clifford E. Waller, March 4, 1934.
Surg. Charles V. Akin, March 4, 1934.
Surg. John H. Linson, March 5, 1934.
Surg. Newton E. Wayson, March 6, 1934.
Surg. Frank M. Faget, March 6, 1934.

The above-named officers have passed the examination required by law and the regulations of the Service.

APPOINTMENT AND PROMOTIONS IN THE NAVY

MARINE CORPS

Maj. John Dixon to be a lieutenant colonel in the Marine Corps from the 1st day of March 1934.

First Lt. James B. Hardie to be a captain in the Marine Corps from the 1st day of March 1934.

Second Lt. William R. Williams to be a first lieutenant in the Marine Corps from the 1st day of March 1934.

Second Lt. Roger T. Carleson to be a first lieutenant in the Marine Corps from the 1st day of March 1934.

Second Lt. Frank C. Dailey to be a first lieutenant in the Marine Corps from the 1st day of March 1934.

Douglas C. McDougal, Jr., a citizen of California, to be a second lieutenant in the Marine Corps, revocable for 2 years, from the 8th day of March 1934.

HOUSE OF REPRESENTATIVES

SATURDAY, MARCH 10, 1934

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D.D., offered the following prayer:

Our Father in Heaven, as the sons of God, we rejoice in that Name which is above every name. The Name of wonder, uniting the sweetest virtues, the gentlest manners, the purest wisdom, and the truest love ever known to man. Blessed Lord God, we thank Thee. By Thy grace enable us to bear everything that will do us good, everything that will make us greater, and everything that will enlarge the landscape of our lives. O keep us from immoderation of desire and from all wrong motives. We most earnestly pray Thee that we may be spared from the saddest experience of earth, namely, in which aspirations are prostrate, in which splendid purposes have fallen like broken columns and hopes lie dead. Heavenly Father, be our light in the darkness, our friend in loneliness, our bread in hunger, and our guide in each critical emergency. In the name of Jesus Christ our Savior. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Latta, one of his secretaries.

ACTING CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House:

HOUSE OF REPRESENTATIVES,
CLERK'S OFFICE,
Washington, D.C., March 9, 1934.

Hon. HENRY T. RAINEY,
House of Representatives, Washington, D.C.

DEAR SIR: Desiring to be temporarily absent from my office, I hereby designate Mr. H. Newlin Megill, an official in my office, to sign any and all papers for me which he would be authorized to sign by virtue of this designation and of clause 4, rule III, of the House.

Yours respectfully,

SOUTH TRIMBLE,
Clerk of the House of Representatives.

NEEDLESS SACRIFICE OF LIFE OF ARMY AVIATORS

Mr. REED of New York. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. REED of New York. Mr. Speaker, the Nation again stands aghast. Ten Army aviators have paid the price of political incompetency with their lives. Ten young Army officers have now been killed, not because they lacked skill in the technique of aviation, but because they were called upon to discharge a service without the equipment necessary to meet the dangers and extraordinary hazards incident to the task assigned to them.

A review of the past record made by our air-mail pilots clearly demonstrates that men, if given a fair chance, need not be sacrificed in this ruthless manner. Let us examine the record. The total number of miles flown by the air-mail pilots during the fiscal year 1933 was 35,909,812. This, in the aggregate, is equal to 1,436 trips around the world. The daily schedule for the air mail was 27,062 miles. These routes are more hazardous as a whole than the daily routes flown in any other country in the world.

Years have been required for our mail pilots to master the difficulties of these dangerous routes, many of them over precipitous mountain ranges, over vast stretches of desert, inland lakes, and vast expanse of ocean. Yet, the air pilots, because of experience and the benefit of proper equipment, have surmounted all obstacles with a minimum loss of life. The best evidence of this is the record of 36,000,000 miles flown in 1 year with only 8 fatalities to pilots. The death of 1 pilot to each 4,488,726 miles flown is the official record.

The time for legislative action to have stopped the indefensible sacrifice of human lives was when the Postmaster General issued his arbitrary and unauthorized order. Further delay by Congress will not be tolerated by an outraged public.

Why is legislative action imperative at this time? It is because you who live in the South have little conception of the cold which aviators in open planes have to endure in the northern area. The most severe blizzards and the most intense cold are yet to come in the North. I warn you men who seek to defend the Postmaster General and to minimize his official blunder that if he is permitted to continue his inhuman program, the death toll per week will be far greater in the future than it has been in the past.

I opposed by my vote surrendering a branch of the national defense and placing it in the hands of the Postmaster General. I am opposed to the wanton sacrifice of human lives in an effort to prejudge and punish commercial enterprises for alleged irregularities.

We have courts to determine the guilt of those charged with fraud, if it can be proved. There is not one mitigating circumstance to justify the action taken by the Postmaster General, which has already caused the death of 10 men. These young Army officers who have been sacrificed deserve the highest praise of their countrymen. The official who sent them to their untimely death has no defense. He stands condemned before the bar of outraged public opinion.

These lives could have been saved had the timely advice of Col. Charles A. Lindbergh and Capt. Eddie Rickenbacker been heeded. Each of these distinguished and experienced aviators saw the danger and sought to prevent it. The officials of this administration treated their communications with contempt and ridicule. When Postmaster General Farley issued his dictatorial and arbitrary order canceling the air-mail contracts, Colonel Lindbergh promptly and courageously wrote to the President and urged that a safe policy be pursued to prevent this needless program of manslaughter. Because Colonel Lindbergh exercised the right of an American citizen by pointing out the danger of the policy which had been adopted, he was charged with seeking publicity. It might not be out of place at this time to call the attention of the House to the fact that not infrequently when suggestions have been made by citizens in an honest effort to be helpful to the administration, officials of the Government have often met these suggestions with volleys of abuse and threats of reprisal.

Public indignation over the recent wanton sacrifice of young lives has been aroused to so high a pitch that even the present-day machinery of political propaganda, powerful and far-reaching as it is, can neither smother nor subdue it. The gravity of the situation has now become a matter of national concern in which the Congress has a duty to perform. The outraged citizens of this country expect this legislative body to discharge this duty and do it now.

Many of the legislative powers of Congress have been abrogated and surrendered, but it has still sufficient power and, I believe, self-respect to stop immediately this sacrifice of human lives. There is no man or woman in this Nation so selfish or so unsympathetic as to expect his Government to put Army pilots into defective and unsuitable planes and then send these young men to their death in an effort to deliver air mail. The air mail ought to be suspended this very day by proper legislative action until arrangements can be made to provide planes properly equipped to meet the dangers and hazards of this particular field of public service.

ARMISTICE DAY

Mr. KRAMER. Mr. Speaker, I ask unanimous consent to extend my own remarks by including an address delivered by me on Armistice Day to the war veterans at Huntington Park, Calif.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. KRAMER. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following address delivered by me before American war veterans on the occasion of the hoisting of the American flag at the cities of Maywood and Huntington Park, Calif., November 11, 1933.

Fifteen years ago today an order went forth from behind the American and allied lines in France to cease firing. This was the command that was heard around the world. The words "cease firing" reverberated in every city, hamlet, and village in the world.

Never before in the history of civilization have words been spoken that brought so much joy and happiness to millions of people, old and young, throughout the world, as these two momentous words.

Nation after nation had been drawn into this terrific conflict between the forces of militarism and democracy. Millions of lives had been sacrificed and billions of dollars wasted—the world went wild, literally speaking, at the news that the armistice had been signed and the war was over.

Armistice Day is the most sacred of all days that have ever been set aside for remembering the things that have passed. Each passing year finds Armistice Day growing more sacred in the eyes of the world—each passing year finds all of us realizing more and more what we owe to our brave comrades who journeyed to France and the battlefields to fight for a great cause. Many of them gave their lives in order that their loved ones and these great United States might live and endure.

The one great duty that we all owe in this celebration of Armistice Day is to the soldiers and sailors who fought the fight that kept America "the land of the free and the home of the brave." When the call went forth for soldiers 16 years ago, there were no questions asked as to their political party or their creed—it made no difference then whether they were Democrats or Republicans, Jews or Gentiles, white or black.

Their marvelous enthusiasm resulted in an unsuspecting Nation later having prohibition foisted upon it, while the people were devoting their energies to taking care of and finding jobs for the soldiers and sailors who returned home, and who, in many instances, found other men and women doing their work.

Every ex-service man, soldier or sailor, is entitled to consideration in finding employment in order to take care of his family, to make an honest living, and to keep body and soul together;

every ex-service man who was disabled during the war and is unable to find employment now is entitled to a pension; and you may rest assured that I shall give my full cooperation in helping him secure it. I want to see every disabled ex-service man receive the compensation he so justly deserves, and I want everyone of you to know and realize that you can count on my support at any and all times.

We have a few veterans here from the Civil War, we have several from the Spanish-American War, and many from the World War. To me it is one of the most inspiring things in my life to feel that I am here, talking face to face with so many brave men on Armistice Day who on three separate occasions were willing to go forth and die that their country and democracy might live.

I felt happy a year ago that I was able, with the fine assistance and cooperation of a few splendid friends, to help secure food and living quarters for the remnants of the bonus army when they returned here after their march to Washington. We are now waging a fight equally as important to all of us—a fight on depression.

We have a wonderfully brave leader in President Roosevelt. He is working day and night in an effort to lead us to victory in this fight on depression. As Assistant Secretary of the Navy during the World War, he was a brave and tireless worker and rendered heroic services to his country at that time. He is now devoting his entire time to helping you and me. He must have our full cooperation in order to win. There should be no party lines in this fight; we should be just 100-percent Americans in this great battle of today. Our President needs the help and cooperation of each and every one of us to win; every red-blooded American should rally to his call. We are gradually winning this battle, but it will be easier to win if we all give our President our loyal and whole-hearted support.

Let's all get behind the national recovery program and make it a complete success. If there are a few things in it that you do not like, just stop a moment and realize that there are many other features in it that you do like—and that the one governing motive behind the entire movement is to make conditions better for us all. It is vitally essential that President Roosevelt have the full cooperation of all the American people. A nation divided against itself cannot stand.

Friends, I feel highly honored in being instrumental in presenting to you an American flag which has flown from the United States Capitol in Washington. It is a gift from Washington to the veterans and to the people of Huntington Park. I am happy in the thought that it forms an unbreakable connecting link between Washington and Huntington Park. I am sure the people of Huntington Park will feel closer to Washington than ever before.

I should like to add also that this flag bears a personal message from President Roosevelt to all of you assembled here today.

So let's all get busy and show our appreciation of this gift of Stars and Stripes, by helping our President rout old man depression; and let's all do our part for the N.R.A.

One of our greatest Americans, during the time of a national crisis, when pleading support and cooperation, said "Liberty and union, one and inseparable, now and forever."

To me, this is what the N.R.A. stands for.

MYTHICAL MOUNTAINS OF SILVER

Mr. MARTIN of Colorado. Mr. Speaker, I ask unanimous consent to insert in the RECORD a radio speech I made last evening on the subject of silver.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. MARTIN of Colorado. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address delivered by myself over the system of the National Broadcasting Co., at Washington, D.C., Friday evening, March 9, 1934:

Fellow Citizens: Under what may strike you as the rather odd but nevertheless fitting title of "Mythical Mountains of Silver", I want to make a single and simple contribution to a very old issue, which has again come strongly into the foreground of national consideration, the question of the remonetization of silver.

The remonetization of silver, again adding silver to gold in the monetary system of the country, a place which it held for 80 years, is no longer, as it was in 1896, a largely sectional issue, with the West for it, and the East against it, and the South marking time. The demand for the remonetization of silver, at least for a greatly enlarged use of silver as primary money, is now Nation-wide, and with a greater display of zeal in these new fields of support than in some sections of the old battle fronts of the West, which made silver a national issue in the days of Silver Dick Bland and Bryan.

I am not going to discuss the theory or the mechanics of bimetallism. I am not going to argue for the remonetization of silver at the familiar ratio of 16 to 1 with gold, or at any other ratio. I am merely going to present some facts as to the quantity of available silver, with some comparative figures of gold supply, and allow you to draw your own conclusions.

It is the prevalent idea that there are such vast quantities of silver available, and produced so plentifully and cheaply, that to remonetize it would unloose upon the country such a flood of cheap and easy money as to dangerously inflate and debase the currency of the country and ultimately plunge it into economic disaster, if such a thing is possible atop the historic disaster that we are still in.

Silver is pictured in the national mind as lying in great white glaciers in the gulches of the mountains of the West. Demonetization of silver is the dam which protects the country from the inundating flood. It is the idea of those who want to do something for silver, to use the current phrase, to cut a sluiceway in this protecting dam, discharging a regulated quantity into the channels of the national currency, just enough to dilute it, not wash it away.

As illustrative of this viewpoint, I want to begin by quoting from a speech on the monetary system made in the House a few days ago, and then I want to tell one nearly as bad on myself. I want to quote the very able gentleman from Maryland, Mr. GOLDSBOROUGH, whose speech was an education on our monetary system, except silver, as embodying the prevailing view held by those who favor the use of silver in the metallic-money base but fear the creation of a silver Frankenstein which would ultimately destroy its creator.

The gentleman from Maryland said—and I read from the RECORD:

"I am not one of those who has any prejudice whatever against silver being used as a basis for the issuance of currency; but just as I would be afraid of issuing greenbacks without any sort of a metallic base, I think, in view of the fact that silver can be produced at a tremendous rate, probably we ought to use some caution in order to avoid an unhealthy inflation. I was about to suggest that it would be a perfectly wholesome thing to do for the Government to purchase at least a billion and a half dollars of silver at 75 cents an ounce and use that as the basis of an issue of a billion and a half dollars. Just whether I would be willing to start right off on a bimetallic basis at a given ratio of, say, 16 to 1, I am not prepared to say. But if I were not, it would only be for the reason that we are looking for social justice, and something might happen which would not be fair to the creditor class."

Noting particularly the statement of the gentleman from Maryland that the Government might purchase at least a billion and a half dollars of silver, at 75 cents an ounce, which would be 1,875,000,000 ounces, and use that as the basis of an issue of a billion and a half dollars, I want to relate something on myself that perhaps a Representative of a silver State, assuming at this time to be able to contribute anything of value on that subject to the knowledge of the country, might feel hesitant to admit.

Shortly after the election of 1932, while reflecting upon the question of the payment of the adjusted-service compensation, commonly known as "the bonus", the idea occurred to my mind that as part of the source of revenue necessary to be raised, the Government might purchase a billion ounces of silver at the then prevailing market price of about 28 cents an ounce and issue a billion dollars worth of silver certificates against it and pay out these certificates in exchange for that amount of adjusted compensation certificates. I happened to be in Denver at that time and it occurred to me as advisable before springing any such proposition to try it out on former United States Senator Frank J. Cannon, of Utah, who has since died, but who was at that time, and for many years prior, the head of a national bimetallic association at Denver and a recognized national authority on bimetallism. It was a very brief interview. As soon as I mentioned the billion ounces of silver, Senator Cannon cut me short with the question: "Where in heaven's name are you going to get a billion ounces of silver? Why, man, there isn't a billion ounces of silver available in the world."

I thought of that interview as I listened to the gentleman from Maryland and I wondered how many Members of Congress might be listening, with perhaps the thought in mind that the great quantity of silver mentioned, nearly 2,000,000,000 ounces, would make only a dent in the vast available mountains of the white metal; and it occurred to me that if I could marshal some facts going to show the fallacy of the wide-spread idea of such vast quantities of the white metal, it would be a worth-while contribution.

Now, let me quote you a contrary view as to the quantity and productivity of silver and let me quote it from the mouth of an opponent of silver and of remonetization, so you will have both sides of the picture before you. Perhaps when I say that this contrary view was published by a New York and Washington financial correspondent, it would be superflous to add that he is not in favor of anything in the form of money which is not securely anchored to and based upon the sacred gold standard. His article, appearing a short while ago in a Washington paper, is headed "Silver Agitation Growing. The Claim That It Will Help Western Recovery Is Belied by Facts." And what are his facts? Briefly, that there will not be a sufficient silver production even to materially benefit the silver-mining industry, to say nothing of making any appreciable contribution to the volume of circulating medium in this country. After stating this proposition generally and much to the discredit of the western advocates of bimetallism, this writer says:

"Let me be more specific. In 1931 the silver production of the United States, according to the report of the Director of the Mint, was approximately 31,000,000 fine ounces. At 29 cents an ounce, the average price for the year, the total value of the product, therefore, was a little under $9,000,000. In 1930 we

produced some 50,000,000 fine ounces and the aggregate value was about $20,000,000. The greatest production we ever had was in 1915 with 75,000,000 ounces.

"It is evident that by no stretch of the imagination can an industry that has only this amount of output be considered a major factor in our economic system. Suppose the price of silver was driven up to a dollar an ounce. The total value of the output, granting we equaled our greatest former production, would be only $75,000,000—an utterly insignificant amount as we deal in funds in this country. It would, in fact, be substantially less than the deficit of the Federal Government for the first week of this month."

Now, fellow citizens, this Washington writer comes much nearer the truth as to the production and quantity of silver available for coinage than the opposite view that it can be taken out of the bowels of the mountains of the West with steam shovels and loaded on trains for the mint. He advances a proposition, to which I want to give assent, that in this dire monetary emergency, this money famine, for that is what it is, the remonetization of silver alone, the throwing of the mints of the United States open to every ounce of silver that can be brought in, would not operate with sufficient speed to supply the country with a sufficient volume of money to revive commerce, and would not appreciably swell the total volume of our currency for many years. We need bimetallism as a permanent, not an emergency, monetary policy.

Supposing the President had thrown the mints of this country open, not merely to 24,000,000 ounces of domestic silver a year, as he did a few weeks ago, but to 100,000,000 ounces a year, what would happen? In the first place, he would not get the 100,000,000 ounces, and in the second place, if he did, the country would not know that it had happened, any more than it would know if the Federal Reserve banks were to retire in one day $100,000,000 worth of bonds with $100,000,000 worth of Reserve bank notes. Did you know, for example, that the latest Treasury report shows that money in circulation in this country had shrunk $350,000,000 in February, or more than $5 per capita of population?

Now before dropping the silver article of the Washington correspondent, let me direct your attention to a singular statement it contains, the statement that "it is evident that by no stretch of the imagination can an industry that has only this (limited) amount of output be considered a major factor in our economic system." There is certainly a novel yardstick for you for the measurement of a monetary metal and its value as money in the national economy. Measured by that yardstick, we should stop the mining of gold. Colorado is among the few gold-producing States in the Union and one of the five largest producers, including Alaska, yet in Colorado the annual value of the gold output is less, far less, than that of agriculture, far below sugar beets, or livestock, or even hay. Why should we mine and coin a metal like gold, which is only a minor industry in a half dozen States of the Union?

It has taken 2,000 years for the entire world to accumulate less than $20,000,000,000 worth of these two metals. They represent not 1 percent of the wealth of the world in intrinsic value. Their need and value as a measuring stick of values and medium of exchange, are to be determined by no such test.

But let me be on with the quest for the big rock candy mountains of silver.

Now, having in mind the proposition of the gentleman from Maryland that the Government purchase a billion and a half dollars worth of silver, and my proposition that it purchase a billion ounces of silver, to say nothing of bills pending in Congress to purchase two billion ounces of silver, and I have seen such bills, let us turn to statistics as to the actual quantity of silver available.

I shall begin by quoting an outstanding authority on silver production, not only in this country, but in the world. I refer to Mr. F. H. Brownell, of Seattle, chairman of the board of the American Smelting & Refining Co., to whom, as the result of 30 years' experience as head of the greatest silver refineries and dealers in the world, the silver production of the world is a chart on the wall. Before the House Committee on Coinage, in February 1933, Mr. Brownell stated that doubling of the price of silver—it was then about 30 cents an ounce—could not possibly bring into the market in excess of 350,000,000 ounces as a maximum and that he did not believe it would bring that, because other countries would start purchasing at the same time, and that in his opinion it would require a period of 5 years for the Government to acquire 650,000,000 ounces.

I have not the time now to go into the details of Mr. Brownell's testimony, showing the sources and quantities of silver throughout the world, but I may give you a brief summary here, just a few of his more striking statements.

I quote (hearings, Feb. 1 to 10, 1933, p. 226):

"Now the total amount of silver in the world at the present time does not exceed 10,000,000,000 ounces (I have given it as 12,000,000,000); the total gold monetary stocks of the world, I will say, are $11,000,000,000. * * * Now if that silver was worth $1 an ounce, it would not be doubling the total monetary value of gold at the present time, and all that silver would not come out"—that is, out into the market.

"At the present time you could not get a billion ounces of silver to save your life—I say, to save your life."

Think of that, Members of the Congress, with your bills to buy up a billion ounces of silver, or a billion and a half, or two billions, that you could not buy a billion ounces to save your lives; and this statement comes from the executive head of a company which handles one third of the entire annual silver output of the world.

Mr. Brownell then goes into particulars as to where your silver will come from when you start out to buy a billion ounces. He reflected that if you put silver up to a dollar an ounce you might get a billion ounces. So the Committee on Coinage put him to fishing, and this was the haul in the way of silver for sale:

	Minimum	Maximum
	Ounces	*Ounces*
India	150,000,000	200,000,000
China	100,000,000	150,000,000
London	25,000,000	25,000,000
New York	25,000,000	25,000,000
San Francisco	25,000,000	25,000,000
In transit	25,000,000	25,000,000
Total	330,000,000	430,000,000

So he figured as available spot or speculative silver, a minimum of 330,000,000 and a maximum of only 430,000,000 ounces, for purchase by the United States, in the event the United States paid enough for it.

I might ask if this is not a remarkable showing for a precious metal which has been demonetized and discriminated against for more than a century, until this program now includes nearly every government on earth? One cannot help conjecturing what would be the position and value of silver in the money stocks of the world today had as much been done to preserve its historic status and value as has been done to kill it.

In addition to the foregoing figures, Mr. Brownell showed that above these limited quantities of silver for sale in the world, China would have left 150,000,000 ounces and India 180,000,000; total, 320,000,000 ounces; grand total 750,000,000. So taking all we can get and adding to it all we cannot get, we still have only three quarters of our first billion ounces.

And where, by that time, may we ask, would the price of silver be? We might get some light from the phenomenon that India, which is now throwing her demonetized silver away, demonetized by England, was paying up to $1.39 per ounce for it, or 10 cents above par, with gold at 16 to 1, in 1920–21.

The witness went into every phase of silver production. He showed that three fourths of it is a by-product of lead, copper, and zinc, which metals must double or treble in the market in order to bring out the silver; that only one fourth of production is from pure silver mines, located largely in Mexico; that these mines could not be suddenly exploited, gutted, to unload on a high silver market, because the new equipment required would eat up the profits, and in 10 years eat up the mines, thus furnishing a natural check on Mexican silver production. He also showed that no new fields are being found. He made this significant statement:

"There have been no new silver mines found of any consequence in the last 20 years. It is just like gold. There have been no new gold mines of any consequence found since the first part of this century."

He says elsewhere in his testimony that the earth has been combed for new fields, in which work of exploration, the automobile, the hydroplane, even the airplane, has been impressed. The geologist may read the earth from the sky.

Concluding with Mr. Brownell, I want to quote him exactly. After saying (hearings, p. 217):

"Let me say at the beginning I am a gold-standard man. In spite of all my advocacy of silver I believe nothing should be done that is going to essentially imperil the gold standard";

he continued—

"I do believe that the world is going to need silver as a primary monetary metal, and that a way will be found ultimately in which its further use will be employed by the nations of the world.

"To my mind, gold production is going to decrease in the next 10 or 15 years, and if the population of the world and its commercial enterprises increase, gold will not be sufficient to afford a sufficient monetary base and silver will have to be used." (Hearings, p. 217.)

Incidentally, since Mr. Brownell expressed his concern over the gold standard, some unprecedented things have happened to it. The gold has been separated from the standard, locked up in the vaults of the National Treasury, eliminated from all obligations, public and private, and devalued 40 percent; but the bond market flourishes as of yore and the Government at Washington still lives.

In the quest for hoards of silver, I next want to call your attention briefly to an elaborate brochure entitled "Silver: A Menace and a Racket", issued recently by a firm of economists and financial counsel known as "Wagel and Associates" in New York, copies of which were received by all Senators and Representatives. If the official head of the American Smelting & Refining Co. may be accused of a friendly interest in silver, as these economists charge, no such charge can be laid against the authors of this brochure. It is distinctly, bitterly, and uncompromisingly hostile to silver and its advocates, and it evidences painstaking adverse research and study of the silver question, both at home and abroad. One can finish the reading of this document without feeling that anything hostile to silver has been left unsaid.

In this brief against silver, as in many others, the world silver bugbear is India. India even blots out the silver glaciers of the West and the limitless deposits of Mexico. India has but to break

down her silver dikes and there will submerge the world a flood of silver comparable only to the flood of water which engulfed it 3,000 years ago.

Yet, all I can find in it in the way of figures to sustain this devastating indictment of silver, is the statement that in addition to the 175,000,000 ounces which India said she must dispose of, and which she is permitted to dispose of under the London agreement of last summer, at the rate of 35,000,000 ounces a year, which is only the rate at which she has been disposing of it since her silver money was destroyed by the British Government, is that—

"A conservative estimate of private holdings available for sale in the bazaars of India, as soon as prices advance"—

Mark that, as soon as prices advance—

"May be placed at five hundred to seven hundred fifty million ounces."

And that—

"Spain claimed that she had a surplus of 20,000,000 ounces which she must dispose of", and which she is permitted to do at the rate of 5,000,000 ounces a year under the London agreement.

This gives a minimum additional total of what the authors consider waste silver of 520,000,000 ounces, and a maximum of 780,000,000 ounces.

Adding this minimum of 520,000,000 ounces to Mr. Brownell's minimum of 330,000,000, we have a grand total of 850,000,000 ounces; and adding the maximum of 770,000,000 ounces to Mr. Brownell's maximum of 430,000,000, we have a grand total of twelve hundred million ounces.

Splitting the difference between the estimates of these two authorities, which is a fair method, we finally locate our 1,000,000,000 ounces—to be exact, 1,025,000,000 ounces of silver—available for purchase by the United States, assuming that India will forthwith or at any other time sell us or any other nation all her metal currency. I think the mere statement of any such proposition is its own refutation.

Thus far I have dealt almost entirely with the quantity of silver available in the event the United States launched out on a world silver-purchasing program, or to put it another way and state what is really in the minds of the opponents of such a program, the quantity of silver which might be dumped onto the United States in the event it threw the Treasury open to an unlimited silver-purchase program.

We have seen that the result was largely a water haul. We have been told and given the figures both by friends and enemies of silver that in all the world there are no such deposits or stores of the white metal, that it is a practical certainty that not 1,000,000,000 ounces could be procured, even though the Government paid a dollar an ounce for it. A different but corroborating field of facts may be developed, with both gold and silver in the picture, and these facts should be at least suggested, and this is all I will undertake, to enable you to determine the probable effect of the program involved in these various bills for the addition of a substantial quantity of silver to the metallic money base of the country.

Recent mint reports carry the statistics of both the gold and silver production in the world since the discovery of America. I shall give you only a few totals, using round numbers.

Gold in fine ounces, 1,084,000,000; silver in fine ounces, 15,170,000,000; production ratio, 14 to 1.

Gold production in the United States 1792 up to and including 1931, 224,000,000 fine ounces; silver production in the United States 1792, up to and including 1931, 3,200,000,000 fine ounces; production ratio, 14⅓ to 1.

You will note the close adherence between world production for 450 years and United States production for 140 years, being 14 to 1 in the first case and 14⅓ to 1 in the second case. Nature seems to be able to provide and maintain a ratio even if governments cannot. For 60 years a controversy has raged around silver, the claim being that if it were to be remonetized at the ratio of 16 to 1, the great quantity of silver that remonetization would produce, would inevitably drive gold out of the field and break down the double standard. Upon what facts is this conclusion based?

Another instructive sidelight on the story of silver is that throughout the 80 years of its place in the double standard of gold and silver, prior to its demonetization in 1873, it was at a premium over gold and was exported to European countries, much of it to France, where the ratio was 15½ to 1, with a resultant profit to American producers of silver of about 3 percent.

This was a singular and unexpected demonstration of the so-called "Gresham law", of the cheap driving out the dear dollar, because instead of silver driving out gold, we find gold driving out silver, driving it out because at the American ratio it was the dearer metal. Surely the demonetization of silver, whatever its cause and however accomplished, remains the mystery of American monetary legislation. The picture in the national mind is that of a cheap, debased, overabundant metal. Upon what reality is this picture based?

I have said I would not argue bimetallism and I shall not. I shall, however, permit myself to ask a few questions. The proponents of silver are asked questions and it is conceded that some of them are hard ones. One of the hard questions relates to China, with which we are unable to carry on commerce because of the dearness of our gold and the cheapness of her silver. That question is whether the doubling, to use that figure, of the value of China's silver, will not double the cost of her production, which low cost of production is now giving her an advantage in the markets of the world, and thus deprive her of this advantage, to the corresponding benefit of other nations, of the United States for example, having much higher production costs. In connection with our efforts to increase the value of silver, and therefore of China's silver money, it is pointed out that we are at the same time trying to cut the value of our own money in half. And we are asked how we can reconcile the cutting in two of our dollar with the doubling of China's dollar.

A simple answer occurs to my mind, perhaps because my mind is simple. That answer is that if the industry and commerce of a nation, both domestic and foreign, can suffer because its money is twice too dear, as our country has suffered, it can also suffer because its money is twice too cheap. Our dollar at the beginning of the President's monetary policy was worth four times the dollar of China. It should not require an economist to prove that with two such dollars we cannot do business. An approximation of money values must be brought about. Our dollars should be scaled down and China's should be scaled up, to the ultimate benefit and stability of the financial structures of both countries and interchange of trade. That is my answer for what it may be worth.

But coming now to the questions I should like to ask, and I ask them solely for information. They will be based on undisputed facts, and with an awareness that differing conclusions may be drawn from the same premise.

First. The United States adopted the bimetallic standard in 1792 and maintained it until 1873, about 80 years. At the time the United States demonetized silver, and for 40 years prior thereto, the ratio had been 16 to 1. At that ratio silver was worth more in the markets of the world than gold, and was shipped abroad by American producers for the profit. The question is, If silver is such a cheap and plentiful metal that it cannot be safely maintained in our metallic money base, what maintained the high price of silver for 80 years prior to demonetization?

Second. In 1920 India required 200,000,000 ounces of silver for coinage for the purpose of redeeming her silver paper currency or rupee. The British Government could find this quantity of silver only in the United States. It bought 200,000,000 ounces of melted-down silver coinage at the Treasury of the United States for the price of $1 an ounce and sold it to India for as high as $1.39 an ounce. The question is, If silver is such a cheap and plentiful metal, why could it be found only in the United States, and why did it command such high prices in 1920 and 1921?

Third. There are, in round numbers, $12,000,000,000 in gold in the world, and 12,000,000,000 ounces of silver, a singular and significant correspondence. The market price of this silver is now only $5,000,000,000. If all the silver were to be remonetized at the ratio of 16 to 1, it would exceed the value of the gold by $3,000,000,000. The question is, What factor besides world demonetization drove silver to this low level?

Fourth. The ratio of production of gold and silver, as shown by the record for 400 years, has been approximately 1 ounce of gold and 14 ounces of silver. This establishes what is known as a natural ratio. The question is, If silver were to be internationally remonetized at the ratio of 16 to 1, or even at the natural ratio, what factors would operate to break down the parity or drive gold out of circulation, as the gold people fear?

Fifth. Silver has been universally demonetized and gold made the sole monetary standard of the world. The question is, If the position of the two metals were to be reversed and gold demonetized and silver made the sole monetary standard, what would be the effect on the price of gold and on the price of silver?

Authentic answers to these questions would do much to determine the right of a question which has vexed the country almost continuously since the discovery that Congress, without knowing it, had demonetized silver, and which bids fair to continue to vex it until silver is definitely and finally in or out of the picture as a primary money metal.

In this talk I have given you the result of a quest for mythical mountains of silver. I could have cited other corroborating authorities and statistics, but the showing made sufficiently covers the field and is from authentic sources. These mountains of silver do not exist. The available supply would be swallowed up like rainfall on a thirsty land. There is only one sufficient argument against the remonetization of silver, if the argument be true, and that is that we do not need the money.

PERMISSION TO ADDRESS THE HOUSE

Mr. HOWARD. Mr. Speaker, I ask unanimous consent to speak to the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska [Mr. HOWARD]?

Mrs. ROGERS of Massachusetts. Mr. Speaker, reserving the right to object——

Mr. O'CONNOR. Mr. Speaker, I object.

AIR MAIL

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent for the present consideration of the resolution which I introduced yesterday, asking that the Army flyers stop flying the air mail. Two more pilots have been killed, making 4 in all killed yesterday and 2 injured.

Mr. BLANTON. Mr. Speaker, that resolution has not been to any committee, and I object. It is a matter of too

much importance to be passed by unanimous consent and not to go to a committee and be given due consideration.

The SPEAKER. Objection is heard.

Mr. FISH. Mr. Speaker, I offer a resolution and ask unanimous consent for its immediate consideration.

The SPEAKER. Will the gentleman let the Chair see the resolution?

Mr. FISH. It is a resolution in favor of——

The SPEAKER. The Chair cannot recognize the gentleman for that purpose.

SHALL SPECULATORS AND BANKERS CONTROL DESTINIES OF FARMERS?

Mr. TRUAX. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. TRUAX. Mr. Speaker, 5,000 years ago the old Chinese philosopher Confucius made this sage observation:

> The well-being of the people is like a tree. Agriculture is its root, manufacturing and commerce its branches and its life. When the root is injured, the leaves begin to fall, the branches break away, and the tree dies.

It would have been well for the sage to have added to his commentaries that labor, both organized and unorganized, is the lifeblood that pulses through that tree, keeping it ever young, thrifty, and hardy.

No doubt peoples of all countries have ever had this fundamental truism of the great Chinese oracle before them. They have been reminded of it throughout the centuries, throughout the decades, and throughout the years. All countries have sipped from these words of wisdom that flowed from the old Chinese philosopher's lips. All peoples have partaken of it. Yet, throughout all the ages, throughout all the centuries, and throughout all the years, no one has been wise enough as yet to heed and follow and act upon the subtle warnings found in those words uttered 5,000 years ago that have been handed down through the ages.

I myself, for the past 14 years, have uttered these words in many speeches that I have made, not alone in Ohio, but through the long fight for the McNary-Haugen bills, those same words were uttered by me in States of the Northwest, in the Middle West, in the Southwest, and in the magnolia-bedecked Southland.

We firmly believed when we elected Franklin D. Roosevelt the thirty-second President of the United States that this ancient warning was to be heeded, was to be taken cognizance of, and that far-reaching steps would be taken to cure the ill once and for all time. We cast our votes at the polls, feeling secure in the knowledge that Franklin D. Roosevelt would prove to be the Moses that we had been seeking for years to lead us out of the wilderness of bankruptcy, grief, and woe. We still believe in the sincerity of purpose, the honesty of conviction of Franklin D. Roosevelt to fulfill in the *n*th degree his own conceptions of this great agricultural problem, the cause thereof, the remedies therefor, but we doubt seriously the fitness, the sincerity, the experience, the ability, and the wisdom of some of the men he has chosen to administer his agricultural policies.

We feel sure that the present Secretary of Agriculture, Henry A. Wallace, is no doubt sincere in purpose and honest in conviction, but we also feel that a man whose farming experience is limited to a swivel chair in the publisher's office of a great farm paper, whose farming contacts are limited to field work throughout one State in behalf of the welfare of his own publication, one who has never known the toil and sweat of the furrow, of the hot harvest days, the scorching sun of the wheat field, the sizzling heat of the haymow, the oozing mud and slush of the hog lot, is in a position to diagnose the agrarian ills and prescribe the remedy.

The mere fact that Secretary Wallace turns out to be the most prolific visionary author and dreamer of the century for the magazines, newspapers, and other publications, does not prove his fitness to get down to the grass roots and relieve the farm peasants and slaves from their economic serfdom.

If the National Recovery Act is economically sound and right and just, then the Agricultural Adjustment Administration and its policies is unsound, uneconomic, and as wet as the young bull calf grazing in the morning dew of early June pasture. [Applause.]

The avowed purpose of the National Recovery Act is to promote and avoid the restriction of production, while the Agricultural Adjustment Administration fosters the fallacious theory that production must be reduced and restricted. In other words, when people are starving, kill the hogs. When people are shivering in their nakedness, plow under the cotton.

Mr. Speaker, the National Recovery Act seeks to conserve and maintain all of our great natural resources. The Agricultural Adjustment Administration endeavors to destroy the agricultural resources that spring up from the soil through the sweat and toil of the tiller of that soil. The very vitals of the National Recovery Act is to recognize and guarantee to producers the cost of production plus a reasonable profit. The Agricultural Adjustment Administration goes along serenly on the damnfool principle that the farmer must consign himself to that sacred old ox, commonly known as the law of supply and demand, not inquiring or caring whether or not he receives cost of production, plus taxes, interest, and upkeep on his farming plant.

Gen. Hugh S. Johnson, the "Ride 'em cowboy" of the Roosevelt administration, through the knowledge gained by his long experience as an industrialist and manufacturer, cracks down on every industry that does not recognize as the minimum price the cost of production, and rightly so.

But the sophists, theorists, Wall Street lawyers, and crackpots in the Department of Agriculture and the Agricultural Adjustment Administration, motivated by the illusive writings and utterances of Mr. Wallace, that great journalist farmer, and actuated by the pet theories of the educated jackasses commonly known as farm economists, have no concern whatsoever that the farmer receive cost of production and prices for his commodities on a parity with industrial commodities.

What care they that the poor tenant cotton farmer of the Southland consigns himself to charity or to C.W.A., so long as they get a chance to demonstrate their dogmatic doctrines? What care they if the dimpled babe loses his plumpness and cries in hunger and the outraged and faithful mother wears faded-out, patched ginghams and calicoes, so long as they can raid the pregnant sows and kill the suckling pigs?

If General Johnson is right—and we think he is—then Wallace is wrong. On the other hand, if Wallace is right, Johnson must be wrong, and we should dismantle N.R.A. and the uplift it has brought about in wage levels, which is the most commendatory feature of the whole act. The two theories of operation cannot be reconciled, cannot be harmonized, are as far apart as the poles; one to elevate wages, one to elevate the prices of commodities and to bring cost of production plus a reasonable profit to producer, processor, retailer, and handler. That is the Johnson plan. The other to restrict production, to destroy the natural resources produced by the toil of men and the bountiful gifts of the Creator, to plow under the cotton, to cut down the wheat, to kill the pigs. People are hungry because there is too much to eat; people are homeless because there are too many homes; people are shivering because there is too much to wear. This is the Wallace plan.

Of course, in justice to Mr. Wallace and his associates, we must admit that the farmer is being paid for reducing his production. This might be successfully defended and praised were it not for the undeniable fact that the small amount that is paid back to him represents only an infinitesimal part of what he has lost in direct income. The present plan of collecting process taxes on the selling prices of all of our farm commodities from all the farmers and handing part of them back to some of the farmers for certain specialized crops, for which they have signed agreements with Government agents to produce less, is the wolf masquerading in sheep's clothing. When we rip the mask off

we find it is the same old, inconsistent, and untenable program of the Harding-Coolidge-Hoover administrations, namely, to attribute all of our troubles to surpluses and overproduction and to cure the ill by cutting down the acreage instead of controlling the seasonable surpluses that invariably are produced.

These blustering cockahoops are still handing to the American people the same old humbugs and apple sauce. The manner of presentation has changed, but the substance and theory remain the same.

Mr. Speaker, the remedy I propose is the same one that I have advocated for 12 years. This remedy is sound, tenable, and consistent. It is based on the elementals which have made the National Recovery Administration a success with labor and with producers. It is predicated upon the conclusions reached by the illustrious Chinaman 5,000 years ago. It contains no bizarre frills, fanceries, fripperies, or gewgaws. It recognizes the indisputable fact that the root of this great American tree, namely, agriculture, is mortally injured. The leaves have fallen. The branches are breaking away, and unless the injury to the root is repaired, and that soon, this giant oak in the forest of nations, known as "the United States of America", will topple with a crash that will rock the universe.

To repair the root, agriculture, means that agriculture must be placed upon the same solid base that industry has been placed on by the National Recovery Administration. That is, to guarantee to the farmer cost of production plus a reasonable profit for every bushel of wheat that he produces, for every bushel of corn that he raises, for every pound of pork that he sells, for every pound of beef, of mutton, and of butter, milk, and poultry products that he sends to the market to feed the milling multitudes of the cities, and for every pound of cotton and wool that he sends to the cotton gins and into the textile factories to clothe the backs of the teeming millions in the urban centers.

This is not difficult. It is not complicated. It is not technical. It does not require the services of professors, doctors, and dreamers. It needs only the application of common horse sense, which can be best gained from the farmer and not from those who farm the farmer. It will take into consideration the undeniable fact that it costs the farmer $1.25 a bushel to raise wheat, that it costs him 8 cents a pound to produce hogs, that it costs him 10 cents a pound to produce cattle, and that it costs him 15 cents a pound to raise cotton.

It costs him whether he be located on the rolling prairies of the Middle West, in the semiarid regions of the Northwest and Southwest, or the rock-bound hills of the New England States, or in the white, cotton-bedecked plantations of the South, 25 cents a pound to produce butter fat and $2 per hundredweight of milk.

It would recognize the justice of fixing the prices of farm products on a basis of 8 hours per day, 5 days a week, 40 or 50 cents an hour for the farmer's labor, the same as we have done through the N.R.A. for the industrial laborer and craftsman.

Give the farmer an honest wage. Give him a decent living. Give him cost of production plus a reasonable profit, and he will pay his taxes then; he will pay his debts; he will buy the commodities of life; he will buy shoes; he will buy clothing; he will buy a radio; he will buy an automobile; he will buy furniture; and perhaps he will buy some of the rectified products of the post-prohibition era.

I understand that a speculative firm in New York owns 2,000,000 bales of cotton. This 2,000,000 bales is enough to control the market, enough to make the pendulum swing up or down as those speculators and gamblers desire. In the past it has been enough to prevent the passage of an equitable cotton bill. The gamblers who own it are loath to part with it—they hold it for a higher market.

Under the Bankhead cotton bill they will be forced to part with it at the same price that real growers and the farmers receive for their products. With the passage of these 2,000,000 bales of cotton into the processing mechanistics of the textile industry, the baneful influence will be removed from the market, and the price of cotton to the farmers will rise.

For years and for decades the speculators on the New York Cotton Exchange held in their slimy hands the destinies of the cotton farmers of the South big and little, high and low. With the passage of this bill, we relieve forever the cotton farmer of this country from the strangling clutches of these modern racketeers.

The Bankhead bill is sound in principle. It is based upon the elementals of the old McNary-Haugen bill, which I, as vice chairman of the committee of 22, helped to pass twice in the Congress of the United States, and which bill was twice vetoed by Calvin Coolidge.

It is based upon the truism that man cannot control production. He may control acreage, but God Almighty alone controls production. To those who disbelieve this statement, to those who are inclined to doubt it; to the sophists, theorists, Wall Street lawyers, and crackpots who do not subscribe to this doctrine, I will say to them, "Go out and commune with God Almighty. See how the great Creator warms and moistens the soil that causes the germ to sprout." Just a few days ago, grains of wheat were taken out of an ancient tomb in Egypt. These grains of wheat were 4,000 years old. Yet a great British farmer took those grains of wheat, sowed them in his land. They are sprouting and will grow now, and after 4,000 years of time, will bring forth food and bread to those people who need them most.

The Creator alone can, and does, regulate the amount of sunshine, the amount of rainfall—He it is who directs the withering hand of the killing frost, who dries up the heavens, who makes the sun to shine as of shimmering brass, and the earth to appear as a bed of ashes. [Applause.]

Mr. Speaker, simply because we raise more bushels of wheat than we can consume, merely because of the vagaries of nature, we produce 20 percent more pork in 1 year than we can consume, is no reason why the producer thereof should be penalized. It is no reason why he should reduce his acreage one fourth. It is no reason why he should sell off his brood sows, because in that event we might have a one-half crop or a one-fourth crop of wheat the following year. In the winter the wheat-production field might be such that practically no crop at all would be produced because of extremely cold temperature, without snow covering for protection and due to continued freezes and thaws, it heaves the wheat out of the ground. In the cases of the pig crop during February, March, and April, when sows farrow their young, it might be cold and blustery and the pigs would freeze to death. It might be that it would be rainy and sloppy outside and the sows and their litter would necessarily have to be kept indoors until the weather cleared up. The pigs would nestle in dry warm pens. They would nurse the sows and, through lack of exercise, get fatty degeneration of the heart, commonly known as "thumps." The farmer would see his little pigs stand up and pump like a bellows for breath, and the next morning he would find them dead in their nest. In certain seasons, too, his pigs when weaned, immediately become the victims of internal parasites, worms and vermin, which without proper treatment eventually kill them and even with proper treatment always stunt them; then as these pigs go along toward maturity they may get such contagious and infectious diseases as swine plague, cholera, hemorrhagic septicemia, commonly known as the "flu", all of which diseases have a high mortality rate and cut into the farmers' herds and production like a pestilence.

Oh, no, we cannot depend on plowing under the cotton or killing the pregnant brood sows or killing the little pigs, or cutting down the number of sows to be kept over the next year, or reducing the meat acreage, or cutting down the corn acreage, to control or regulate the production of cereal crops and livestock commodities.

We can and must control the amount of the crop that moves to market. In the past, our exportations have never averaged more than 15 percent of the whole crop. This 15 percent which is sold in foreign markets, in the open market, in the world market, in competition with the peasant labor

of Europe, in competition with the peasant labor of Russia, in competition with the peon and mexicano labor of South America, in competition with the coolie labor of China, India, and Japan, in competition with the bushwhacker labor of Australia, not only determines the price of that part of the farm commodity sold in those foreign markets, but it fixes as well the price of all that proportion of the same commodity that is consumed in the United States of America. Thus the farmers, being forced to follow such an inconsistent and sophistical policy, has caused their staples to topple and decline in value, has caused their morale to descend and gravitate to the low level of the foreign labor heretofore mentioned, and is responsible for the downfall and subversion of the basic industry, agriculture, in this, the most productive country the sun has ever shone upon.

The remedy is apparent. Even to the laymen the corrective is visible. Even to the most uninformed it is patent. We must permit only that portion of the crop which can be consumed by ourselves or which can be exported at profitable prices abroad, to move to the terminal markets. That is the fundamental laid down in this bill, that is the principle and the foundation that should apply to the sale of wheat. It should apply to the sale of corn, of hogs, of cattle, and of dairy products. It should apply to the sale of poultry products. It should apply to the sale of wool. Then and then only can the farmer be assured of cost of production from year to year. Then and then only can his purchasing power be restored. Then and then only can he pay his taxes and interest on his mortgage. Then and then only, when purchasing power and debt-paying power is fully restored to American agriculture, normally reported to be 40 percent of the Nation's purchasing power and debt-paying power, can the Nation be assured of a certain, permanent, durable prosperity for all. [Applause.]

Mr. Speaker, just as the farmer has been dominated, influenced, and economically strangled by the speculators in the sale of his goods, so has he been crucified and emasculated by the banker, the 36-percent loan sharks, and other money lenders. Not only have the rates of interest been extortionately high, not only have these money-lending swindlers and racketeers robbed the farmer of $50,000,000,000 in the decline of the values of his land, not only have they robbed him of another $50,000,000,000 in causing the selling prices of his products to decline year by year since 1921, but, like the Shylocks they are, they have followed him like gray wolves, grotesque specters of the night, trailing him, dogging him, waiting for the time when his vitality is at the lowest ebb, his morale down to zero, and his finances exhausted and wiped out, to pounce upon him with the money lenders' strangling cord and foreclose his farm, foreclose his home, foreclose his livestock, foreclose his farm machinery and equipment, and then foreclose the birthright of his posterity to enjoy peace, happiness, and freedom as our forefathers did and as the Constitution of the United States decreed.

We Members of Congress thought that we had written a new Declaration of Independence when we passed the Farm Mortgage Act of 1933. We believed that we had thrown away forever, into Stygian depths, this bloody, strangling cord of the Shylocks. We talked of a new deal for the farmer, when he might retire at night, free from worries, free from care, and free from fear of foreclosure and confiscation of his property. The President of the United States asked for the passage of this act, inspired by the same thoughts and beliefs that we Members in Congress had. The President of the United States, too, believed that a new and brighter day was dawning for these countless toilers who give us our daily bread to eat and clothes to wear.

Mr. Speaker, woe be to the day, however, when this magnificent law and the funds appropriated by Congress were turned over to the tender mercies of the Farm Credit Administration, which is made up not of farmers, not of men in sympathy with the farmers, not of men who understand the problems of the farmer, but of men from the State of New York, but of men who were only graduates from the schools of dreamers and crystal gazers, men who have deliberately violated the purpose, the intent, and the plain mandate of the Farm Mortgage Act of 1933. This act says in unmistakable terms that values shall be based upon the land valuations of 1909 to 1914. These mandates of Congress have been ignored and repudiated by officials, by subordinates, by understrappers, and by so-called "appraisers" of the Farm Credit Administration. The personnel of this Farm Credit Administration today is W. I. Myers, governor; W. Forbes Morgan, deputy governor; A. S. Goss, land-bank commissioner; P. L. Gaddis, chief of the appraisal division. These men are responsible for the acts of their subordinates; they are responsible for the appointments and for the continued services of men unfriendly to the administration, of men hostile to the administration and to the new deal. Of men who have no knowledge whatsoever of land values; of men who never farmed a day in all their lives; of men who would not recognize a good Ohio cornfield if they met one in the middle of the road.

I have, on previous occasions, on the floor of this House, pointed out in no uncertain language, the kind of men that are acting as appraisers in Ohio. I have given their names. Their names are in the CONGRESSIONAL RECORD, together with their ages, with their life history, with their disqualifications to hold these positions, with their discrimination and utter lack of sympathy with the farmers, whom the Congress commanded them to serve and serve speedily.

Hundreds of letters are in my files, not only from my own State of Ohio, but from many other States. There are letters in my files of complaints. There are letters of protests. There are letters that would turn a heart of stone to sympathy. There are letters that would bring tears to eyes that are as dry as the desert of Sahara. There are letters which would arouse human sympathy in the most hardened, the most cold-blooded individual who ever trampled underfoot human rights for the iron-shod heel of property rights. My office daily is the recipient of dozens of letters. Even to this day these letters prove conclusively that farms worth $100 an acre in 1929 are being refused loans of $25 an acre. It shows that these half-baked appraisers and crackpots are turning down loans of worthy hard-working farmers for $30 an acre. These letters cite cases of aged couples and white-haired fathers and broken-hearted widows who are having their farms legally stolen, taken away from them forever, and then they must consign themselves to relatives, to charity, or to the poorhouse because of the damnable conspiracy, inefficiency, and heartlessness of this so-called "Farm Credit Administration."

Mr. Speaker, in many of these pathetic cases, I have been able to obtain reappraisals and granting of loans where refusals have been made, through the courtesy, through the cooperation, through the knowledge, and through the sympathy and understanding of the former president of the Louisville Land Bank and of the general agent for the Farm Credit Administration, Mr. Ernest Rice. In other cases transmitted to the officials, usually replied to, usually answered by the first assistant, second assistant, third assistant, or some other underling in this aggregation of crystal gazers that blatantly and brazenly boast of their reasons for rejecting the loans of these distressed people, by saying that they are too old, that the farm is run down, that it is in bad repair, that the soil is depleted, that at present price levels the farm will not pay overhead, taxes, keep the family located thereon, and cannot pay off the loan; facts which are well known by every farm lad of school age, but which these misfits have just discovered after obtaining authoritative appointment and fat salaries with the Government.

Why, certainly, you and I and every other Member of this Congress know that there is not a farm from coast to coast and Gulf to Lake, but what is run down, but what is in the need of repairs, but what the soil is not depleted after 13 years of continued ruinous prices. Everybody knows that at prevailing prices—3-cent hogs, 4-cent cattle, 8-cent chickens, and 10-cent-a-dozen eggs, and other commodities in like proportion—that no farmer can pay taxes, interest on the mortgage, operating expenses, overhead, keep the family, and make money.

It was because of these very unprecedented and bankrupt conditions of the American farmer that Congress passed the Farm Mortgage Act of 1933 at the request of the President of the United States of America, Franklin D. Roosevelt. We passed this act to relieve these people, to take over their mortgages, give them the valuations of 1909–14 at low rates of interest, so they could then begin to pull themselves out of the slough of despond and the quagmires of bankruptcy.

EXTENSION OF REMARKS

Mr. WHITE. Mr. Speaker, I ask unanimous consent to extend my own remarks in the RECORD, and to include therein a letter from Mr. Graham.

The SPEAKER. Is there objection to the request of the gentleman from Idaho?

Mr. TABER. Mr. Speaker, I shall have to object to the letter.

PERMISSION TO ADDRESS THE HOUSE

Mr. BLANTON. Mr. Speaker, I ask unanimous consent that the lady from Massachusetts [Mrs. ROGERS] have 3 minutes in which to address the House. I shall object to passing by unanimous consent without due consideration any resolution the lady may offer, but I think she has a right to be heard as a Member of Congress. This is our forum. I think she ought to be allowed to speak.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. BLANTON]?

Mr. CARPENTER of Nebraska. Mr. Speaker, I object.

CONTESTED ELECTION—WILLIAM C. FOX *v.* WILLIAM L. HIGGINS

Mr. PERKINS, from the Committee on Elections No. 3, submitted the following privileged resolution (H.Res. 296) (Rept. No. 894), from that committee on the contested election of *William C. Fox* v. *William L. Higgins*, for printing under the rule:

House Resolution 296 (Rept. No. 894)

Resolved, That William C. Fox is not entitled to a seat in the House of Representatives of the Seventy-third Congress from the Second Congressional District of the State of Connecticut.

Resolved, That William L. Higgins is entitled to a seat in the House of Representatives of the Seventy-third Congress from the Second Congressional District of the State of Connecticut.

EXCISE TAX UPON COCONUT AND SESAME OILS

Mrs. JENCKES of Indiana. Mr. Speaker, I desire to extend my own remarks in the RECORD, and I ask unanimous consent for that purpose.

The SPEAKER. Is there objection to the request of the lady from Indiana?

There was no objection.

Mrs. JENCKES of Indiana. Mr. Speaker, when the revenue bill, H.R. 7835, was before the Ways and Means Committee of the House of Representatives, I submitted an amendment to section 602 thereof, the purpose of which was to confine the application of the 5 cents per pound excise tax on coconut oil and sesame oil to the usage of these oils in edible products. In connection with this amendment, I desire to set forth my views in general in relation to the matter of imported oils and fats which are used in competition with dairy products produced in the United States. I also desire to give something of the history of my association with activities designed to secure protection for the American producers of dairy products against the competition of foreign oils and fats.

Under date of November 29, 1933, I wrote to the President of the United States suggesting that he levy an embargo against the importation of all foreign oils and fats entering into the United States. The President received my communication and referred it to the Secretary of Agriculture for a report. Under date of January 5 a memorandum prepared by the Secretary of Agriculture was forwarded to me. This report pointed out that nearly two thirds of the coconut oil consumed in the United States was used for inedible purposes, chiefly for soap making, and that an embargo on coconut oil would work severe hardship on those industries consuming it in such cases. It was further pointed out that the Philippine Islands are an important export outlet for American products, including especially products of agricultural origin. In 1929, the report stated, our exports of cotton goods to the Philippines were valued at $15,848,000; of wheat flour, $4,348,000; of dairy products, $3,035,000; of tobacco products, $3,151,000; and of various other products of agricultural origin amounts of no inconsiderable value. For cotton cloth and for condensed and evaporated milk, the Philippines are our leading export market.

The Secretary of Agriculture further stated that to meet the situation confronting the dairymen it would not be necessary to impose an embargo upon coconut oil. In this connection we must all agree that while a 5 cents per pound excise tax on coconut oil could be absorbed by the oleomargarine manufacturer, there is no doubt whatever but that a tax of this size would be practically an embargo in the case of the soap manufacturer, the rubber-tire manufacturer, and the tanners of leather who are the chief industrial users of coconut oil. I would hardly consider it advisable to lower the tax on coconut oil when used in the manufacture of oleomargarine or other edible products, as our American buttermakers need this much protection against the competition of coconut oil when used in edible products.

When the excise tax of 5 cents per pound was proposed, I began to receive numerous complaints from my congressional district and from elsewhere in the State of Indiana as well as from hospitals, women's clubs, laundry owners, soap makers, housewives, and others. These complaints were made not because of the fact that the tax was being applied to coconut oil used for edible purposes, such as the manufacture of oleomargarine, but because it was applied to coconut oil for industrial purposes, chiefly in the manufacture of soap. The resultant burden, they stated, would be most injurious to the consumers of soap and, in the case of the small soap makers, absolutely ruinous.

From other Members of Congress I ascertained that there was an enormous wave of consumer protest arising against the excise tax on coconut oil. I came to the conclusion that the American dairyman and buttermaker stood every chance of losing his opportunity to secure the protection which he so ardently desires against coconut oil's going into oleomargarine, when the revenue bill reached the Senate, if the application of the tax applied to coconut oil for industrial purposes was not eliminated. Accordingly, I submitted my amendment which would exempt the coconut oil consumed in the United States, in the making of soap, rubber auto tires, and the tanning of leather, from the tax. These industries account for 70 percent of the total consumption. The remaining 30 percent which goes into edible products would bear the full burden of the 5 cents per pound tax.

It is well known in Congress that I have a very definite interest in all forms of agriculture. I have been a farmer for many years. I am especially interested in the welfare of the dairymen and the creameries. I know the problems of the housewife. I felt that I had an opportunity to help them all.

I held conferences with the leading soap manufacturers in America and also the leading creameries in the Indiana area. The soap manufacturers advised me that they were willing to have all the oils and fats which they imported denatured or rendered unfit for food. I submitted this idea to Mr. H. C. Glick, president of the Midwest Producers Creameries, Inc., a cooperative association composed of many thousands of producers of butter fat in the four principal dairy States in the Midwest. Mr. Glick advised me that in his opinion the proposal was possessed of a lot of merit.

On January 21 of this year I met with the officers and directors of Mr. Glick's association at the Hotel Claypool in Indianapolis. I discussed every angle of the situation with them. They agreed that they could see no reason why the American dairyman and buttermaker in his effort to secure protection against imported oleomargarine ingredients should cause an extra burden to be levied upon consumers of soap and other industrial products of which the farmer is one of the principal buyers. They stated to me that they did not want their soap bills increased; that soap was an essential in the maintenance of cleanliness and sanitation in a creamery and the dairymen's establishments. On my return to Washington from the conference in In-

dianapolis, I ascertained that it was impractical in connection with the impending revenue bill to offer an amendment that coconut oil be denatured. There is a denaturing provision in the Tariff Act of 1930. It is incorporated in paragraph 1732 thereof. This denaturing provision could not be made use of as it would have required an amendment of the 1930 Tariff Act, whereas the excise tax on coconut oil concerns only the revenue act. Accordingly, I reached the conclusion that the application of the proposed tax solely to the edible oils and fats would result almost in the same benefit to American dairymen and butter makers as though the coconut oil were denatured. At least, it was a practical and immediately available opportunity to help the American butter maker—one for which we would not be obliged to wait until tariff revision.

Still seeking to find if the American farmer butter maker has any concern in the coconut-oil matter from a point of view other than as a producer of butter fat, I examined into the matter of the production of tallow. I referred to the Packers' Encyclopedia, or the Blue Book of the American Meat Packing Industry. I found that from a 1,000-pound steer the meat packer secured only 5.36 pounds of inedible tallow. The balance, it appears, the packer leaves on the carcass in order that he may procure the meat price for it. Thus the farmer secures the meat price from the final consumer for every pound of tallow which he produces with the exception of this 5.36 pounds of inedible tallow which is unavoidably removed from the carcass in the packing house. This amount of tallow represents the sum total of the beef raiser's interest in the matter of inedible oils and fats. He has no interest in the tallow which is reclaimed from the garbage pails of the cities.

It is true that the garbage-pail-tallow processors have been endeavoring to inject themselves into the farm dairy and butter-making picture. They have presented their case to Congress. But there is no possible connection between this refuse material collected from the restaurants, boarding houses, hotels, and the men on the farm. On every pound of it the farmer has received the meat price from the consumer. Even the few meat scraps which the renderers of refuse fats collect from the butcher shops is cut off the meat after it has been weighed out and sold to the consumers.

I find, moreover, that coconut oil is not used in the manufacture of soap, rubber auto tires, or in the tanning of leather for any purpose for which tallow could be employed. Coconut oil is used in all these products, I am informed by chemists, because of its lauric-acid content, and I am further informed that there is not a vestige of lauric acid in tallow or any other domestically produced oil or fat. It is the lauric-acid content of coconut oil which gives soap its free-lathering properties. We women who use washing machines in the home, know that we could not wash clothes efficiently without free-lathering soap. If we gave up our coconut-oil soaps, we would have to go back to the washtub and scrubbing-board method of doing our own laundry work.

I find from the report of the United States Tariff Commission that the usage of coconut oil in soaps in the United States has not been at the expense of domestically produced oils and fats. In 1912, we used 600,000,000 pounds of domestic oils and fats in the manufacture of soap. In 1932, according to a report of the Bureau of the Census, we used practically 900,000,000 pounds, an increase of 50 percent. This shows that the coconut oil which soap makers use is carrying our domestic oils and fats into consumption rather than crowding them out of consumption in the soap kettle. These smaller soapmakers in the State of Indiana told me that coconut oil is the only raw material which they can purchase on a basis of equality with the larger soapmakers. If the tax is levied on coconut oil, they believe it will snuff out their existence. Since the tariff upon 90 percent of the soap produced in the United States is only 15 percent ad valorem, it is obvious that if my amendment is not accepted, Canadian and European soap manufacturers will dispossess our domestic soap manufacturers of their American market because the proposed tax on coconut oil is far higher than the existing tariffs on soap.

Representatives of the automobile-tire manufacturers and the tanner's oil producers tell me that if the tax is levied they will be forced to go into Canada and manufacture the products which they require from coconut oil and ship them to the United States for use in the manufacture of auto tires and leathers. There is, of course, no reason why American labor should not be allowed to continue to do this work in the United States. It is to our American dairymen and buttermakers' best interest that they be allowed to continue to do so. If they can work, they can buy the American dairymen's and butter makers' products.

I want to protect our American dairymen and creamerymen. I want to accord needed protection to all my farm constituents, but I know that they would not want me to inflict a grave injustice upon the consumer and other important branches of industry. In fact they have told me so. In the light of all this, I sincerely believe that the amendment which I have introduced will be a most happy solution to the present situation. The American dairyman and buttermaker will get protection against foreign oils and fats, which he might not be able to obtain unless an amendment such as mine is adopted. My amendment reads as follows:

To amend Sec. 602, Par. (a), line 15, as follows: Strike out the comma after the word sale and insert the following language: "as a food product intended for human consumption," so that the sentence reads: "For the purposes of this section, the term 'first domestic processing' means the first use in the United States, in the manufacture or production of an article intended for sale *as a food product for human consumption*, of the article with respect to which the tax is imposed." (Italics mine.)

I invite our dairymen, creamerymen, and buttermakers from the State of Indiana, and of the entire Nation, if they wish to do so, to write to me and advise me as to whether or not, in their belief, my method of approaching a solution of this manner of securing protection for them is correct and practical.

PERMISSION TO ADDRESS THE HOUSE

Mr. GRAY. Mr. Speaker, I ask unanimous consent to address the House for 15 minutes on the proper place of the N.R.A. in the recovery program, to proceed without interruption to conclusion.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

Mrs. ROGERS of Massachusetts. Mr. Speaker, reserving the right to object, I shall not object if the House will grant me 5 minutes in which to discuss the air-mail situation. It is a very serious one.

Mr. BYRNS. Mr. Speaker, regular order.

The SPEAKER. Is there objection to the request of the gentleman from Indiana [Mr. GRAY]?

Mr. TABER. Mr. Speaker, I object.

Mr. GRAY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. GRAY. Is it the proper time for me to announce that I will enter the air-mail contest myself in order to gain a proper status for recognition as a belligerent and thereby safeguard myself from the dangers and hazard of a neutral or noncombatant?

The SPEAKER. That is not a parliamentary inquiry.

COTTON CONTROL ACT

Mr. DRIVER. Mr. Speaker, I call up House Resolution 292.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H.R. 8402, a bill to place the cotton industry on a sound commercial basis, to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, to provide funds for paying additional benefits under the Agricultural Adjustment Act, and for other purposes. That after general debate, which shall be confined to the bill and shall continue not to exceed 8 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Agriculture, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the consideration of the bill

for amendment the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit, with or without instructions.

Mr. DRIVER. Mr. Speaker, pending the consideration of the resolution, I yield 30 minutes to the gentleman from Massachusetts [Mr. MARTIN], who will control the time for the minority.

Mr. Speaker, the purpose of this resolution is to make in order the consideration of H.R. 8402, introduced by the gentleman from Alabama [Mr. BANKHEAD], and known as the "cotton-control measure." The rule provides for open consideration with 8 hours of debate, to be confined to the bill, and the bill is subject to amendment. I make that explanation in order that the House may know that its consideration is subject to any change the judgment of the House may see proper to impose upon it.

The provisions of the Bankhead bill pertain to the cotton-producing area of our country.

While it is true that any control of farm products necessarily manifests itself on the business structure, the cotton producers find it is necessary to change the voluntary system which the Secretary of Agriculture originally contemplated placing on the reduction program in order to effectuate his purpose of stabilizing the prices of cotton commodities.

The conditions in the cotton area, Mr. Speaker, are peculiar as compared with conditions in other areas and with respect to other basic farm crops. If there is an overproduction of wheat, while that necessarily manifests itself immediately on the price structure however, through the operations of natural conditions the value of the product deteriorates rapidly; and there is some little hope to be held out to the producers through the natural elimination of the surplus. This is not true, however, with respect to cotton, for when properly baled and properly warehoused there is no deterioration of the cotton, either in the grade or in the staple, whether it remains there 1 year or 10. Hence, every bale of cotton produced in excess of the world's demand for American cotton is that much cotton that must be dealt with in the commerce of future years and influences the prices for such subsequent production.

From reports emanating from the Department of Agriculture we know that the consumption of American cotton has been reduced from 15,000,000 bales in the course of a 10-year period to 11,500,000 bales, with the result that we have today piled up at our ports and in the warehouses practically 10,000,000 bales of surplus cotton. This is tantamount to a world supply of American cotton for a full year, even though we failed to plant one single seed. The effect of the reduction campaign of the past year was to diminish the surplus to about 10,000,000 bales. At the beginning of that activity we had about 12,500,000 bales of surplus cotton. So we find it is necessary to make a drastic reduction in cotton production.

We started on the theory of voluntary action and, be it said to the credit of the rank and file of cotton producers, they patriotically joined in the program, and to the extent that they committed themselves, they religiously observe that committment; but, Mr. Speaker, there is an element engaged in the production of cotton that is independent of the sources of financing available to the average producer. We can use coercive means on the average cotton farmer, for it is necessary that he go to a governmental agency for financial help. We can employ coercive measures on these men; but the large element who own broad acres, who are independent of such sources of financial aid, unfortunately, through the urge of selfish interest, are inclined to disregard the voluntary agreements through which we were undertaking to effect the reductions inaugurated by our Department of Agriculture.

It is a known fact that fertilizer, to the extent of 100 percent over the use of the past year, has been contracted for largely for use in cotton production. Another factor that is worthy of mention is that the use of fertilizer, the use of narrow rows, and intensive cultivation may effect great increases in the production of cotton even on the reduced acreage; and, if the report be true that 100 percent additional fertilizer purchases have been made, then we are faced with a dangerous threat to our whole reduction campaign, without the employment of compulsory measures. The man who refuses to act in concert with his fellow man for mutual interest is not entitled to any consideration. It is for the salvation of the people producing cotton that this campaign be made a success, and production brought within limits so that the price of the product can be reasonably controlled.

It has been suggested that danger will result from the program through increasing values to an inordinate height. There is no such danger. We realize that when the value of products increase there is a natural incentive to competing countries to increase production. This in itself is a limitation on the amount of value that can be sustained and provides a self-executing governor on the price structure.

Mr. HOEPPEL. Mr. Speaker, will the gentleman yield?

Mr. DRIVER. I cannot yield at the present time. To give you an illustration, we have in our vast southern area a climate in many instances approximating that of the magnificent Golden State whence comes my friend who was just on his feet. We can produce the major crops of the Nation there, but we are not induced to do so because we realize that if we used our cotton acreage for the purpose of producing wheat or corn that we would destroy not only the market for our own corn but, as well, that of our neighbor who can produce nothing but corn.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. DRIVER. I yield.

Mr. RANKIN. That brings us down to the crux of the real difficulty with this bill. If it is passed in its present form, then the Government will have the right to say to a farmer who owns his own land: "You shall not raise more than a certain number of bales of cotton on this land, and on the land which you do not plant cotton you shall not raise corn, hay, or dairy feed", and so forth. In other words, it puts the farmer in a strait-jacket as to what he shall do with his own land not planted in cotton.

Mr. DRIVER. And he ought to be in a strait-jacket if, when he comes before this Congress appealing for regulations to give reasonable value to his product, he refuses to restrict or diminish the quantity of other basic commodities.

Mr. RANKIN. It would go so far as to not permit him to raise a field of corn or other crops necessary for his family and his cattle; it leaves him with vacant idle lands to pay taxes on and leaves him in a situation where he is worse off than he is now.

Mr. DRIVER. We have provided for a processing tax to pay the expense of this operation; and the man who is not permitted to utilize that land in competition with the other products of the country has received a rental value for his land and has no legitimate right to complain when he is restricted from using the land for the purpose of increasing the principal crops in competition with other areas that today are in exactly the same condition as the southern cotton farmer.

Mr. RANKIN. If this bill passes with that provision in it, it will destroy the value of farm land in the South.

Mr. DRIVER. I differ with the gentleman. If we can pass this bill and get a reasonable price for our cotton and reasonably stabilize the cotton industry by removing the surplus now smothering us, the utilization of the acreage for cotton permitted in this bill will enable the people to make more money and to place themselves in a better economic position than they are now or have been for the years in which they planted enormous acreage and failed to find a profitable market for their product.

Mr. RANKIN. Of course, the gentleman represents a different class of farmers from what I do. My farmers do not live by cotton alone. Whenever you say to a farmer that he shall only raise a certain number of bales of cotton on the land he has been planting in cotton and that he cannot

plant any corn, hay, and foodstuffs, you absolutely do that man more harm with the other provisions than could do him good. It will destroy his land value.

Mr. DRIVER. This program is based on cotton acreage. It will not affect the lands employed for hay and grain crops heretofore.

Mr. RANKIN. I did not say all of it.

Mr. DRIVER. This is based on future cotton acreage and does not include other than acreage planted in cotton. This means taking his production over an average number of years and allotting to him the amount of cotton that he may produce and place in commerce in proportion to his neighbor's, and he will still use his accustomed acreage for the growing of corn and other crops for his immediate consumption and for feed purposes. He may continue to use his acreage for hay, for garden crops, and so forth. This only reduces his cotton acreage.

Another requirement of the bill is that before it is placed in operation 66⅔ percent of those engaged in the industry must express approval of the plan.

Mr. HOEPPEL. Will the gentleman yield?

Mr. DRIVER. I yield to the gentleman from California.

Mr. HOEPPEL. I am inclined to follow the majority voice of the representatives of the South who are affected by this bill. For that reason I would like to know if the gentleman can give us some information as to what percentage of the southern representatives are inclined to favor this bill.

Mr. DRIVER. I am unable to answer the gentleman's question except by way of an indication. From the communications I have from the cotton growers in one of the largest producing cotton districts in the United States, 95 percent of the expressions are in favor of compulsory control as outlined in this bill.

Mr. HOEPPEL. I would be inclined to follow the representatives of the Southern States if the majority of them are in favor of the bill. Under those circumstances I would probably vote for the bill.

Mr. DRIVER. My home county is the largest cotton-producing unit in the United States. The district is largely in the alluvial valley of the Mississippi River and a large cotton producer. The people are intensely interested in the program. I may say on their behalf that during the campaign of last fall but few farmers in the district failed to join with their neighbors in making the campaign an effective one; yet we always find a few who stand out. It is very much the attitude we found when we undertook to readjust our debts in the reclamation areas. On account of the uncertainty of the value of the equities of the landowners in those districts and to get a basis for refinancing the property, it became necessary to appeal to this body for a measure for refinancing, and we secured the same, but now find we are up against a wall in connection with refinancing operations due to the fact that the 10 percent scattered over the face of the earth cannot be reached, and therefore the attitude of that small majority denied the home owners in these areas the benefits of the relief acts that Congress passed in good faith for them.

Mr. BLANTON. Will the gentleman yield?

Mr. DRIVER. I yield to the gentleman from Texas.

Mr. BLANTON. I notice the committee has tried to meet all conditions, but paragraph (c) of section 8 attempts to exempt counties where during the last 3 years there has been an unprecedented drought. It so happens that in about 60 counties of central west Texas in the years 1929 and 1930 there was an unprecedented drought when even the grass would not grow. Practically nothing was produced. I do not think this paragraph (c) of section 8 should stand. It ought to go back 5 years instead of 3, otherwise it would do a great injustice to 60 fine counties in west Texas.

Mr. DRIVER. There is no doubt that this bill could possibly be amended and some valuable additions made. I have no doubt that when the gentleman raises a plea for the benefit of those unfortunate farmers he will meet a ready response.

Mr. BLANTON. The West Texas Chamber of Commerce, which embraces the territory from Fort Worth nearly 700 miles west to El Paso, in behalf of these 60 counties, states that it will hurt materially the farmers in said 60 counties, and be unjust to them, if this bill goes into effect, with paragraph (c) of section 8 limited to only 3 years. It should be 5 years.

Mr. DRIVER. There is no doubt but what we will pass a measure which is fair and just to all. I have no doubt that in certain sections exceptional conditions exist, and while this is not the time to thoroughly present the particular provisions of the bill, I have examined the situation carefully and I may say to the gentleman from Texas that the committee has worked laboriously to ascertain the true situation. They have put in some liberalizing amendments which will fairly meet the demands of the cotton producers.

Mr. KELLER. Will the gentleman yield?

Mr. DRIVER. I yield to the gentleman from Illinois.

Mr. KELLER. Is it not true that exactly the same sort of regulations asked for in this bill have been applied to the other business of the country, or at least in the process of being applied?

Mr. DRIVER. Yes; and I hope the program will continue until we dispose of the surplus and stabilize values, which will make it profitable to continue in agricultural pursuits.

Mr. Speaker, I reserve the balance of my time, and yield 30 minutes to the gentleman from Massachusetts.

Mr. MARTIN of Massachusetts. Mr. Speaker, it is not my purpose to oppose the adoption of this rule. There is no occasion for this. The rule is an open one, gives liberal debate, and presents the opportunity for amendment and recommittal. It is a new deal for the House, for which the minority is profoundly grateful, and hopes it will be adopted in the days that are to come. [Applause.]

I rise in opposition to the measure, because I am opposed to granting this subsidy by the methods to be employed. First, may I say that I appreciate the motives that prompted my good friend the gentleman from Alabama [Mr. BANKHEAD] in offering this measure. For 10 years I have been privileged to enjoy his friendship, and I know there is no finer, fairer, or able man sitting on either side of the aisle than the gentleman from Alabama. [Applause.] I know he is actuated in this measure by a genuine desire to serve his distressed people, and with that I am in thorough sympathy.

I regret I do not believe the proposal will accomplish what he seeks. While it may give temporary relief, eventually it will cause people to be thrown out of employment and will cause many heartaches in the Southland.

What is the question before the House today? I believe the question we are going to answer is this, Shall we take advantage of the distress of the American farmer and sell him into eternal bondage? Shall we put the American farmer into the hands of the arbitrary bureaucrats here in Washington?

If it were not for the distress he would not be here, and when you take advantage of that distress and put him under absolute control of the Washington bureaucracy you are jeopardizing his future and doing him a great injury. You are placing him in perpetual serfdom because unquestionably if you take full control of prices, that policy will be continued and in the long run will be most detrimental to the farmer.

If the Government can control the production of cotton down to each plot of land, then the Government can and will eventually control all the crop and livestock production on every foot of land. Cotton happens to be the first commodity singled out for the great adventure, but eventually it will be expanded to include every commodity. A bureaucracy greedy for power will take care of the growth of the system.

Mr. JOHNSON of Texas. Will the gentleman yield?

Mr. MARTIN of Massachusetts. Not just now. If you deprive the farmer of the control of his land, he has lost title to the land. He will not be any better off than the peasant in Russia, who can control his soil but has no

ownership. Ownership to be of any value must convey the right to do with your land what you actually want to do. In this legislation you are going to remove the control of the farmer over his own land.

Is this not too big a price for the American farmer to pay for relief? Give him relief, by all means, but let not the price of relief be the depriving of the farmer of his independence and self-respect.

I believe ultimately the proposal will be tragic in its results. We are asked today to curtail production of cotton to 10,000,000 bales. I am inclined to believe this is not the end, that eventually we will be required to make further reductions. When we increase the taxes on one commodity and do not increase the taxes on the competing commodities, we lessen the demand for the taxed article. It has ever been thus, and it ever will be. The cotton industry has already suffered from the effects of competition. We have seen a great amount of the trade go into rayon, and even at this very moment manufacturers of certain cotton products are deeply concerned over inovations in the wood-pulp industry which threaten new and serious competition. We must be careful how we put taxes on one class of commodities, without making the taxes apply to their competing commodities. Let me show the severity of competition confronted by the cotton-spinning industry. The Philippine Islands were once a great market for the American textile manufacturers. These little islands in the Pacific gave to the American cotton industry sufficient business, if it were all placed in one city, to make a great mill city like the city of Fall River, which I am privileged to represent, operate at full capacity for the whole year. Lately we find Japan has been able to undersell us in that market. The market has been gradually slipping away until today we have only a small share of the business we enjoyed in the past. That is a situation which interests also you men of the South, because all of the American manufacturers naturally buy their cotton from the American cotton grower; but Japan is under no obligation to do that. She will buy her cotton in Egypt, in America, in India, or any other country where she can purchase to the best advantage.

The cotton industry must and expects to bear its just share of any national burden, but it should not be singled out to carry a burden greater than other industries.

The presence of this bill here is an admission of the failure of the so-called "processing taxes" which have been in effect during the past year. It might be well to here recall the tremendous burden that has been placed upon the consumers of this country through this so-called "processing tax", which should be known actually as a consumers' tax.

Mr. BANKHEAD. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. Yes.

Mr. BANKHEAD. If the theory of the sponsors of this bill is correct, that is one of the things we hope to absolutely eliminate by controlled production. We hope to get away from the necessity for these processing taxes and this other artificial stimulation.

Mr. MARTIN of Massachusetts. The gentleman does not mean to say to the House that this will do away with the processing tax on cotton, if it is adopted?

Mr. BANKHEAD. Not for this year.

Mr. MARTIN of Massachusetts. Or for any other year.

Mr. JOHNSON of Texas. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. Yes.

Mr. JOHNSON of Texas. The gentleman comes from a State where no cotton is produced, but where there are large buyers of cotton for the mills.

Mr. MARTIN of Massachusetts. Yes; absolutely.

Mr. JOHNSON of Texas. This bill is limited to 2 years. It is not permanent legislation. If the bill is not a success, it will automatically die at the end of that time, and other industries about which the gentleman expresses fear, will not be affected, because unless the bill is a success, at the end of 2 years it will die.

Mr. MARTIN of Massachusetts. I shall answer that by asking another question. Does the gentleman ever expect that we can stop a subsidy once it is granted? Gentlemen have been talking about subsidies for the air mail, and subsidies for ocean mail. Those subsidies have been continuing for years; they keep on going, and so will this subsidy, if we grant it.

Mr. JOHNSON of Texas. The trouble is that we have never had any subsidies in the agricultural sections. The subsidies have been in the regions where the gentleman lives.

Mr. MARTIN of Massachusetts. I never had a subsidy in my district either.

Mr. DARDEN. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. Yes.

Mr. DARDEN. Does not the gentleman think that due to the fact that 60 percent of the cotton crop is sold abroad, that will in itself prevent an unreasonable rise in prices, if this bill is enacted into law?

Mr. MARTIN of Massachusetts. I don't think there will be an unreasonable increase in prices at the present time, but I believe you are sounding the death knell of the American cotton industry by reducing the acreage. Last year we reduced our cotton production and it was an invitation for the rest of the world to increase theirs, and they did it, with the result they will eventually get your foreign markets.

Mr. DARDEN. There is some force to the gentleman's argument, but there is no doubt that in itself will check unreasonable rise in prices for a year.

Mr. MARTIN of Massachusetts. The unreasonable prices will probably be checked.

Mr. DARDEN. But the industry will not suffer.

Mr. MARTIN of Massachusetts. The cotton industry will suffer if it is taxed and these competing commodities do not have a similar tax. You might be forced to make your selling prices so high the American purchaser will not be able to buy cotton goods if the costs are too high.

Mr. JONES. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. Yes.

Mr. JONES. The gentleman does not take the position that this bill will stop the export of cotton?

Mr. MARTIN of Massachusetts. Oh, no.

Mr. JONES. Under the reduction plan, we have been exporting more cotton than we have been exporting heretofore.

Mr. MARTIN of Massachusetts. I did not make that statement. What I meant to convey is that when you stimulate cotton production abroad, their costs will be lower than ours, and you will eventually lose the foreign market because of the production of cotton abroad.

Mr. JONES. The gentleman understands this does not interfere with the sale of the commodity in a foreign market or in the open market?

Mr. MARTIN of Massachusetts. I understand that perfectly.

Mr. RICH. Will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield.

Mr. RICH. The gentleman made the statement a few moments ago that this was only for 2 years. We have had a processing tax for 2 years. They want to do away with that. We will do away with this probably in 2 years. Is it not possible to get something that would be permanent for the cotton growers, because a colleague of mine in a cotton-growing State says the cotton farmer cannot exist without Government subsidy.

Mr. O'CONNOR. Will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield.

Mr. O'CONNOR. There has been a processing tax on cotton for a year. I understand that the cotton mills in the gentleman's district in New England have been especially busy, and have increased their employment, and have had a very exceptional year. Is that substantially the fact?

Mr. MARTIN of Massachusetts. That is true in comparison to recent years, but does the gentleman want to know the reason?

Mr. O'CONNOR. The processing tax has not interfered with it?

Mr. MARTIN of Massachusetts. Yes, the processing tax has interfered with it, and I will tell the gentleman it almost put out of business one factory that I have personal knowledge of, which employed 700 people. This tax must be paid by the manufacturer, and a great many men who are operating a manufacturing business have been in a position where capital and surplus have been very scarce recently. This tax must be paid before they can get their money, and men have been obliged to pay the processing tax long before they receive reimbursement, with the result that I know of one man not being able to get bank loans and, the Government failing to give him any consideration with regard to loans, was almost on the brink of closing the factory when someone came to his relief.

Mr. O'CONNOR. I can understand that ultimately it will fall on the consumer. I know very little about this, and I want to get some information. Has it in any way retarded the development of the textile industry in the North?

Mr. MARTIN of Massachusetts. The textile industry of the North has benefitted because of the uniformity of labor laws that have recently been adopted. Business which had normally gone South has gone to the northern factories, and they have enjoyed a good year.

Mr. O'CONNOR. In other words, the gentleman says they did that in spite of the processing tax?

Mr. MARTIN of Massachusetts. The business would have been greater if the processing tax had not been on.

Mr. O'CONNOR. Is it not a fact that the southern mills, too, have had a very prosperous year, in spite of this processing tax?

Mr. MARTIN of Massachusetts. I think the cotton industry as a whole has had a good year. I think it has put more people to work than any other industry.

Mr. BLANTON. Will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield.

Mr. BLANTON. The gentleman from Massachusetts stated that a mill employing 700 men was in a terrible situation until someone came to its relief. That was the situation all over the country with regard to everybody until Franklin D. Roosevelt came to their relief. He was the "someone."

Mr. MARTIN of Massachusetts. Franklin D. Roosevelt did not come to the relief of this man. He tried to borrow money from the Federal Government and could not get it. He was fortunate enough to have a friend to help him out.

Mr. BLANTON. But he did not get that help until we had Franklin D. Roosevelt in the White House.

Mr. CARPENTER of Kansas. Will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield.

Mr. CARPENTER of Kansas. It has been stated that this measure is only to be in force for 2 years, and then if it is not a success it can be done away with. Would it not be almost the same argument to say that we will abandon the Constitution of the United States for 2 years, we will do away with it for 2 years, and if we can successfully run the Government without it, then we will proceed without it, and if we cannot run the Government without it, then we will revert to the Constitution?

Mr. MARTIN of Massachusetts. There is a great deal of force in what the gentleman says.

Mr. DRIVER. Will the gentleman yield for a statement?

Mr. MARTIN of Massachusetts. I yield.

Mr. DRIVER. Possibly the gentleman's suggestion might be somewhat apropos, were it not for the fact that in that 2 years we could get rid of the surplus that is now smothering the cotton industry. That was the purpose of providing for the 2-year alternative.

Mr. CARPENTER of Kansas. Will the gentleman yield again?

Mr. MARTIN of Massachusetts. I yield.

Mr. CARPENTER of Kansas. Has the constitutionality of this measure been considered?

Mr. DRIVER. No. It has not been considered so far as this measure is concerned.

Mr. JONES. Oh, yes. We have gone into that question very thoroughly with good lawyers and we have held considerable hearings on that subject.

Mr. FITZPATRICK. Will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield.

Mr. FITZPATRICK. If this bill is passed, will it be mandatory or optional with the President?

Mr. MARTIN of Massachusetts. It will be mandatory.

Mr. GLOVER. Will the gentleman yield?

Mr. MARTIN of Massachusetts. Yes.

Mr. GLOVER. The gentleman stated a few moments ago that this was for 2 years. This is to be submitted to two thirds of the farmers this year, and they will try it out this year, and the same will be true next year, and if they do not like it the first year, it will not be put into operation the second year.

Mr. MARTIN of Massachusetts. How does the gentleman know what the Congress will do next year?

Mr. GLOVER. I say the act itself provides that the farmers themselves are to decide.

Mr. MARTIN of Massachusetts. Are we delegating our power to the farmers of the South in this respect?

Mr. GLOVER. We are setting up a machinery whereby the farmer may use it. That is all.

Mr. MARTIN of Massachusetts. If that be true, the bill is worse than I thought it was.

Mr. MAY. Will the gentleman yield?

Mr. MARTIN of Massachusetts. Surely.

Mr. MAY. The Congress has regulated practically everything except the law of supply and demand. What does the gentleman think will happen if we get this surplus out of the way and then we have a drought and do not produce but very little cotton?

Mr. MARTIN of Massachusetts. I shudder to think what would happen to the American people who use cotton goods. Now, let us review the voluntary reduction in cotton this past year which we are now being asked to make permanent. In 1932 the area planted for cotton was 36,000,000 acres; and in this same year we had the largest carry-over of cotton in the history of this country. Now, were I a manufacturer and in one year had not been able to sell half my goods, I certainly would not expect to increase production next year. But the Congress served notice it was going to pay for acreage reduction. Those in charge of the putting of the law in effect were a little tardy. I do not criticize their tardiness, but by the time they got around to reducing the acreage it was found that instead of 36,000,000 acres planted there were some 40,500,000 acres growing cotton. The problem was to start at 40,500,000 instead of 36,000,000 which should have been the case. When they took 27 percent off the acreage, we all said, "Well, that is fine. That means at least a 20-percent reduction in cotton production." For the last 20 years the average cotton yield per acre has been around 173 pounds, but for some mysterious reason in 1933 the average yield per acre was 206 pounds, with the result that, although the people paid $125,000,000 in processing taxes in order to reduce production, the total yield of our cotton crop was 125,000 bales greater than it was last year.

Mr. ALLGOOD. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield.

Mr. ALLGOOD. That is exactly what we are trying to do in this bill, limit the number of bales.

Mr. MARTIN of Massachusetts. I hope you will be more successful in that than you were last year.

Mr. BLANCHARD. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield.

Mr. BLANCHARD. Does the gentleman insinuate that the proponents of this measure believe the voluntary crop reduction plan was a failure?

Mr. MARTIN of Massachusetts. That is admitted by the presence of this bill in the House. It has been a failure, else this bill would not be here; that is certain.

Mr. ALLGOOD. We are trying to get rid of 4,000,000 bales. We should have had 13,000,000 bales last year instead

of 17,000,000. This bill strikes at the fundamental difficulty. We are trying to get down to a yield of 9,000,000 or 10,000,000 bales; we are trying to reduce this 12,000,000-bale surplus.

Mr. CHRISTIANSON. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. I yield.

Mr. CHRISTIANSON. To what does the gentleman attribute the increased production last year, to more favorable climatic conditions or to an increased use of commercial fertilizer?

Mr. MARTIN of Massachusetts. Personally I think it was due to intensive cultivation by the people who would be aided by the subsidy.

Mr. WHITTINGTON. Mr. Speaker, will the gentleman yield?

Mr. MARTIN of Massachusetts. Yes.

Mr. WHITTINGTON. I should say that the cultivation of the cotton crop had been practically completed by the time the bill in question was passed; so, in my opinion, the increase last year was due to weather conditions and more favorable growing conditions.

Mr. MARTIN of Massachusetts. It is more probable somebody heard of what was contemplated.

It is idle to talk of the constitutionality of this act. That is something which apparently is considered old-fashioned, and I am not going to presume to do so here this afternoon. I am protesting against this bill because I believe it will make the farmer a vassal of the Washington bureaucracy; I believe while we give him temporary relief that ultimately we will bring disaster by restricting his future.

I protest against the bill because I believe it will be a hardship to the cotton-spinning industry.

I protest against the bill because it places upon the consumers of this country a great burden. Their income is diminishing. The masses of this country patriotically endured this tax last year in a hope it might aid recovery. Now that the experiment has proven to be a failure we should not take advantage of their patriotism any longer. We should relieve them of the burden. No part of our population have had less help than the poor working people, whose plight has been the worst.

Finally, I protest against the bill because I believe it is contrary to the American ideals.

As I review the world I do not conclude that everything which is distinctly American is now wrong. Neither do I believe that every experiment tried out in Russia must necessarily be right. The American people, even in these distressful days, are infinitely much better off than any other people in the world. There is hardly a person in any other country but would be glad to come to America.

There is a reason for this, and I believe that reason is the American ideals which we are being asked to sacrifice.

In closing, may I urge you not to lose courage in this trying period? Let us be true to the fundamentals which have made America a great country and we will hasten the return of recovery which we all anxiously seek.

Mr. DRIVER. Does the gentleman from Massachusetts wish to use any additional time?

Mr. MARTIN of Massachusetts. No.

Mr. DRIVER. Then, Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER. The question is on the adoption of the resolution.

The resolution was agreed to.

Mr. JONES. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill, H.R. 8402, to place the cotton industry on a sound commercial basis, to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, to provide funds for paying additional benefits under the Agricultural Adjustment Act, and for other purposes.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill, H.R. 8402, with Mr. HILL of Alabama in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Without objection the first reading of the bill will be dispensed with.

There was no objection.

Mr. JONES. Mr. Chairman, I yield to the gentleman from Mississippi [Mr. DOXEY] such time as he may desire.

Mr. DOXEY. Mr. Chairman, when my distinguished chairman yielded me such time as I might desire to discuss this measure I feel I can show my appreciation no better than by discussing the measure itself and explaining to the Membership of the House what I know about the bill and its general provisions, being a member of the Committee on Agriculture, that reported the bill for your consideration.

At the outset I may say that I regret exceedingly that our distinguished chairman, the gentleman from Texas [Mr. JONES] is feeling so badly that he at this time does not feel like opening this discussion. In passing, I may further say that the distinguished author of this bill, the gentleman from Alabama [Mr. BANKHEAD], together with his distinguished brother who graces the Senate, have not only given great thought and consideration to the principles involved in this bill but they have carried their messages to the far reaches of the cotton-producing sections.

From the time this bill was first introduced and referred to the Committee on Agriculture, which was more than a month ago, that committee has, day and night, not only endeavored to improve the bill but has cooperated and worked in a way that we feel has resulted in some very practical changes being made in the bill H.R. 8402, which we are considering today. We have brought to you nothing in the nature of a gag rule or any other rule, except freedom of discussion and action. If you can help make this a better bill for the cotton-producing sections of this country, we want your assistance in doing just that thing. The bill is wide open for your consideration. [Applause.]

I am not going to talk to you about the acute economic situation throughout the cotton-producing States. I am not going to talk to you about the program that we have had under the Agricultural Adjustment Act. This has been a voluntary program. It has worked splendidly. I may say to you that we feel this bill is only supplemental to and aids and assists in the further carrying out of that program.

May I take a practical illustration of just how this bill will work out if it is enacted into law. We say that this bill is not a permanent measure. It is a temporary measure, and I will explain this later if I have time. We say that the production of cotton is limited to 10,000,000 bales for this year. A certain number of bales is allotted to each cotton-producing State in proportion to the ratio that that particular State raises to the total amount raised by all the cotton-producing States throughout the United States for the basic period of 5 years beginning with the year 1928 through and including 1932. Can anything be fairer? The various States are given their allotments and, for the purpose of illustration and as a concrete example, take my own State, Mississippi. Assume that we will be allotted a million bales this year. There are 82 counties in the State of Mississippi. Not all of them, but practically all of them produce cotton. Each county is allotted its proportionate share on the same ratio basis. Then in each county there are farmers who have to have their allotments.

These allotments are made under rules and regulations set out definitely and specifically in this bill. The allotment goes to the farmer, the owner, the renter, sharecropper, tenant, or whoever controls the farm. There is every effort made in this bill to take care of the little man, the man who by the sweat of his brow produces the cotton. When this allotment is made on a fair and equitable basis, the man who wants to raise his cotton applies for what is termed a "tax-exempt certificate." He knows, for instance, that he is permitted to raise 10 bales of cotton when this tax-exemption certificate is issued to him. It states that "Sam Smith" of such-and-such a farm in said county in the State of Mississippi, is allotted 10 bales of cotton, which

is tax exempt. He does not have to pay a nickel on this cotton when he produces it, gins it, and puts it into the market and trade. The allotment is based on the fairness of the situation, and will possibly cause some complications in the mechanics of the thing, but what can you do without trouble and complication if you are going to handle as technical and great an industry as the cotton industry in a fair, just, and equitable way?

As Members of this Congress, you want to know who pays the tax. There is no tax on any cotton other than the cotton raised over and above the allotment, whether it is to the individual farmer, whether it is to the county, to the State, or to the Nation.

If a bale of cotton above and beyond the allotment is raised there is a tax due on that bale. The purpose of this bill is not only to bring about more parity between production and consumption but is an effort to raise the price of cotton by limiting the production of cotton, and everyone who is a friend of the farmer will acknowledge this principle.

Mr. MAY. Will the gentleman yield?

Mr. DOXEY. I yield to the gentleman from Kentucky.

Mr. MAY. I would like to have the gentleman explain just what tax would be imposed on the cotton which is produced and marketed or attempted to be marketed in excess of the amount allotted, and whether or not he thinks the tax as provided in this bill is or is not in conflict with the constitutional requirement that taxes must be uniform?

Mr. DOXEY. My discussion would be incomplete if I did not endeavor to explain the tax situation which, of course, the gentleman knows I was going to do anyway. I may say to the gentleman from Kentucky that I am not going to engage in a discussion as to the constitutional question. I might ask the gentleman under the emergency situation and the conditions under which we live whether it would be fair at this time to discuss a question which is somewhat similar to my asking you the question: Who is the Unknown Soldier's widow? I say to the gentleman that it is not a field here that we should get into, and I do not propose to discuss it in the limited time I have. I will answer the gentleman's question with reference to the tax matter by saying that the amount of tax imposed on the nonexempt cotton is 50 percent of the central market price of the cotton in the 10 spot-cotton markets throughout the United States as fixed by the Secretary of Agriculture. In other words, if the central market value of cotton is 12 cents, then the tax would be 50 percent or 6 cents. The law says that it shall not be less than 5 cents per pound on lint cotton and further says that this tax will be the rate of tax fixed until the Secretary of Agriculture declares a different central market value.

Mr. MAY. Will the gentleman yield?

Mr. DOXEY. With pleasure.

Mr. MAY. I am afraid my friend misunderstood my motive. I am trying to relieve myself from a doubt about the constitutionality of the measure. I am trying to get to the point where I can support the bill.

Mr. BANKHEAD. Will the gentleman yield to me?

Mr. DOXEY. I will gladly yield to the gentleman from Alabama.

Mr. BANKHEAD. The gentleman from Kentucky is a good lawyer, and if he will read the brief incorporated in the RECORD in the Senate proceedings, I am sure he will be convinced of the constitutionality of this measure.

Mr. MAY. I am delighted to have that information. I am inclined to support the measure, but the imposition of a penalty by way of a tax I considered as an unconstitutional feature of the bill, but I can be mistaken, for I have been mistaken in times past. I hope my friend will understand my motive.

Mr. DOXEY. I appreciate the gentleman's motives. Our committee gave careful consideration to that, and if the gentleman will read the brief of the gentleman from Alabama in the RECORD, I know my friend, who is a good lawyer, will be convinced that it is constitutional.

Mr. MOTT. Will the gentleman yield?

Mr. DOXEY. I yield to the gentleman.

Mr. MOTT. Will the gentleman tell us approximately what is the cost of production of a pound of cotton?

Mr. DOXEY. I cannot answer that definitely, because the cost in one section is not the cost in another section, but the cost of production has no relative bearing on the legislation we are considering.

I will say that the cotton South has been in this depressed economic condition because we cannot sell the finished product for what it costs to produce it, and that has brought about a condition that I am sure the gentleman will agree with me is deplorable, and that every man interested in restoring prosperity will try to aid as best he can.

Mr. MOTT. If the gentleman will yield further, perhaps he can tell us approximately the cost of producing a pound of cotton in his own State?

Mr. DOXEY. I would not attempt to do that, because in one section they raise long-staple cotton and in other sections short staple; one farmer has one kind of machinery and another farmer has another, difference in land cultivated, labor used, and so forth, would make it impossible to even try to give the average cost with any degree of accuracy.

Mr. MOTT. Well, if the gentleman cannot tell us, of course, he cannot. I thought it would be helpful. The purpose of my question was to find out whether a tax of 50 percent imposed upon surplus cotton would be a confiscatory tax.

Mr. DOXEY. I think I can answer that in this way: The law specifically provides that the amount of tax shall not be less than 5 cents a pound. That is equivalent to saying that you will stabilize cotton at 10 cents a pound, and you might say that we are indirectly trying to do that in that way.

Mr. MOTT. The gentleman has answered, whether unconsciously or not, my question, that you have to have 10 cents a pound to make it profitable.

Mr. DOXEY. I do not want the gentleman to think that I was begging the question on the cost of production. It will cost more this year to produce cotton than it did last year. It may cost 12 cents per pound or 10 cents, but certainly we cannot sell our cotton for less than 12 cents per pound and have any money with which to pay our debts and buy your goods.

Mr. WADSWORTH. Mr. Chairman, will the gentleman yield?

Mr. DOXEY. Yes; gladly to the gentleman from New York.

Mr. WADSWORTH. What is the present price of cotton?

Mr. DOXEY. It is fluctuating; and what we want to do in this bill is to keep it from fluctuating as much as possible, but I may say it is so much higher now than it has been that we are much pleased. I do not know exactly what the market is today, but I know it is around 12 cents.

Mr. WADSWORTH. The gentleman does not mind when it fluctuates to 12 cents?

Mr. DOXEY. Not at all; and we hope that it will fluctuate to 15 cents. That is hope, and if we do not live in hopes, we may feel that we are dying in despair.

Mr. WADSWORTH. If the power is given to the Secretary of Agriculture to impose this tax, he has to impose it at 50 percent of the market price?

Mr. DOXEY. The central market price.

Mr. WADSWORTH. The market price upon any day that he selects.

Mr. DOXEY. Yes. We have looked at this thing in a practical way. Today he would say 12 cents a pound, and he could tomorrow, if the market justified, say 12.05 or 11.56.

Mr. WADSWORTH. He has the power to change the tax from day to day at his own discretion.

Mr. DOXEY. Not the tax, but the basis for the rate of tax.

Mr. WADSWORTH. That is the same thing.

Mr. DOXEY. And it remains stationary until he announces a change.

Mr. DARDEN. Mr. Chairman, will the gentleman yield?

Mr. DOXEY. Yes.

Mr. DARDEN. If the crop this year is limited, as is designed by the bill, will not the carry-over of cotton now in sight guarantee the consumers of this country against an unreasonable rise in the price of cotton? Have we not enough cotton in sight to guarantee them that they will not have to pay an exorbitant price for finished cotton goods?

Mr. DOXEY. Certainly. If we can carry out the life of this bill in 3 years and absorb this enormous carry-over that is hanging like the sword of Damocles over the cotton producer and reduce the carry-over to 4,000,000 bales, we can eventually stabilize the cotton market at a point where the price would be fair and reasonable.

Mr. DARDEN. And with that price we can retain the foreign trade?

Mr. DOXEY. Yes; and we will retain our foreign trade because there is nothing in this law preventing us from negotiating and carrying on all the foreign trade that we can get with any foreign country.

Mr. BAILEY. Mr. Chairman, will the gentleman yield?

Mr. DOXEY. Yes; certainly to my Texas friend.

Mr. BAILEY. Can the gentleman direct me to any part of the hearings on this bill in which attention was directed as to the power of Congress to levy this direct tax?

Mr. DOXEY. We have a brief on that question but, for some reason or other, it was not printed in the hearings. We went into that in a general way, but more fully in executive session, where we did not have any hearings, and our proceedings were not reduced to writing.

Mr. BAILEY. What is the gentleman's opinion?

Mr. DOXEY. I feel that to discuss the power to tax, and the constitutionality of the law, I would be trespassing on the time of this House, because it would take too long, and I do not want to consume too much time.

Mr. JONES. Will the gentleman yield?

Mr. DOXEY. I yield to my chairman.

Mr. JONES. There are numerous instances of specific taxes, like the tax on ginning. We have levied a processing tax. The court has sustained a tax on bank note issues, a tax on oleomargarine, and on many other specific activities. These matters were gone into in the hearings. There is no question about the right to levy a tax. The only question that arose was whether we could go to the point at which the tax would become prohibitive, and that was the reason the committee cut the tax down from the point where it would probably have been prohibitive to the point where it would produce some revenue and thus be within the terms of the law.

Mr. BAILEY. I was not raising that in the form of an objection, but I wanted to have my attention directed to some authorities on the subject.

Mr. DOXEY. I know that the gentleman, in endeavoring to get that information, had only the loftiest motives in view, and I want to help in any way that I can.

Mr. JONES. In the brief which has been put into the RECORD of last Thursday, March 8, several of that type of taxes are cited, which have been upheld, and there is no question about that.

Mr. BAILEY. There may be some gentlemen who have the same question that I have. My attention has been called to the RECORD of Thursday, March 8, in which the author of this bill, Mr. BANKHEAD, has very thoroughly discussed that question.

Mr. DOXEY. I thank the gentleman for his contribution. I have tried to tell the Members about that very able discussion, in answer to the gentleman from Montana. I directed him to that very brief in the RECORD of March 8.

Mr. LANHAM. Will the gentleman yield?

Mr. DOXEY. I yield.

Mr. LANHAM. From the information before the committee, can the gentleman estimate to what extent the contemplated restriction of production in this country under the terms of this bill, will encourage foreign countries, which can grow cotton, to do so, and thereby restrict permanently our foreign market for our surplus cotton?

Mr. DOXEY. I will give my estimate, and one man's thought and guess is just as good as another's, but there would be no use to encourage them to increase their production unless they felt that the United States of America could not supply the world market. There is no danger, with a 10,000,000-bale limit, and with the great carry-over that we have, stored throughout this United States, but what we can fill all the orders we can get from any country anywhere on this globe. I do not think the argument as to the bugaboo about encouraging oriental and European countries to go in for a greater production of cotton should keep us from endeavoring to get a fair market price here at home, and endeavoring to raise the price of cotton by reasonably limiting our production. The only way we know how to raise the price is to reduce and restrict production. I do not know how to restrict production except by the voluntary method that we are using, and that has certainly been wonderfully successful, in my humble judgment.

Now, to supplement, aid, and assist that plan, we are limiting in this manner, for a brief period of time, our cotton production. I feel this method will be about as complete a program as we could hope to get under the circumstances, and I hope I am not wrong.

Mr. WHITTINGTON. Will the gentleman yield?

Mr. DOXEY. I am delighted to yield to my colleague from Mississippi.

Mr. WHITTINGTON. If my colleague will permit me, I should like to offer this statement, with respect to the cost of production of cotton: Already the cost of producing cotton has increased in the last 6 or 8 months at least 30 or 35 percent. As a cotton grower, it is my thought that the present price of around 12 cents a pound is less than the present cost of production of cotton. Based upon the cost of the products that go into the production of cotton, I should say that the reasonable cost of production of cotton at present is around 15 cents.

Mr. DOXEY. I thank my colleague for his contribution. Of course, I announced at the beginning that I was not going to take up any conditions or discussions as to the general situation that most of us are familiar with, but contributions like that are very helpful. I appreciate it, and I am sure the Members do.

Mr. TAYLOR of South Carolina. Will the gentleman yield?

Mr. DOXEY. I yield.

Mr. TAYLOR of South Carolina. Does the gentleman think that under this bill the Secretary of Agriculture will arbitrarily fix rules to restrict the planting of other crops on the retired acreage that are to be used in home consumption?

Mr. DOXEY. Now, the gentleman has raised the same question that my distinguished colleague, Mr. RANKIN, from Mississippi, raised when they were discussing the legislative rule in regard to this legislation. I refer the Members to section 26, on the last page of this bill, which is a permissive and not a mandatory suggestion to the Secretary of Agriculture. I want to say that the cotton men of this House, and on my committee especially, out of a spirit of fairness, wanted to go along with the men who represented other agricultural commodities and basic commodities, because these men on our committee have always been generous and fine in going along with us; and when they in committee said, "Now, we do not feel it is fair for you to reduce your cotton acreage and plant it in corn, wheat, or something that will enter into competition with our products", we said, "Brothers, no; we do not think that is fair. We know that in order to reach an agreement there must be a willingness of give and take, and we cotton men have always demonstrated that position, and we appreciate the position you who live in sections other than the South take."

We said, "Now, you gentlemen suggest what you want to do with these so-called 'idle acres'"; you realize something had to be done; but this language says to the Secretary of Agriculture, "You are permitted to make these rules and regulations for the things to be planted that go into the marts of trade for sale."

Nothing in this bill prevents the man at home from raising anything he wants to for his home consumption.

You know legislation here is not always what you personally want, but in order to get a few things you want, it is necessary to compromise with the other fellow. For if you do not get his help, you do not get very far with any kind of legislation. There are 25 men on our Agriculture Committee from all sections of the United States and we as a Committee try to pull together for the common good of all.

But may I ask my friend from South Carolina, Do you not think it would be right to have some safeguard in this bill in order that our friends from other sections would know that we do not intended to go into serious competition with them? This, in brief, is the position of the Committee on this bill; you will find that is one of the purposes of section 26; you will find it is permissive. You have got to leave some discretion to the Secretary of Agriculture and his Department, in a measure of this kind.

Mr. TAYLOR of South Carolina. Mr. Chairman, will the gentleman yield?

Mr. DOXEY. I yield.

Mr. TAYLOR of South Carolina. Does not the gentleman believe further that by specific limitation of this kind you cannot restrict crops that are to be consumed on the premises?

Mr. DOXEY. That language is in the bill.

Mr. TAYLOR of South Carolina. Where is the limitation?

Mr. DOXEY. It is permissive.

Mr. TAYLOR of South Carolina. It is permissive, yes; but how broad is the limitation?

Mr. DOXEY. I would ask the gentleman to read the language of the bill: To limit agricultural production, and so forth and so on, for sale. It does not apply to some little stuff the farmer may grow for his own use. We cannot go into too great detail in a bill of this kind.

Mr. ELLZEY of Mississippi. Mr. Chairman, will the gentleman yield?

Mr. DOXEY. I yield gladly to my colleague from Mississippi.

Mr. ELLZEY of Mississippi. Is it not a fact that under the provisions of the present Agricultural Adjustment Act the Secretary of Agriculture has just as much authority to control the milk industry as he would have under this bill to control the cotton industry?

Mr. DOXEY. The Secretary of Agriculture under the Agricultural Adjustment Act necessarily has some authority in administering the broad provisions of the act, but we cannot carry out this program with respect to cotton or to any other commodity without enlarging that power; we must allow him to use some discretion, and use his best judgment in administering some of these measures.

Mr. WADSWORTH. Mr. Chairman, will the gentleman yield?

Mr. DOXEY. I yield.

Mr. WADSWORTH. Has the gentleman given any thought to this: As I understand it and as he has explained this bill, the cotton farmer is forbidden, or may be forbidden, by the Secretary of Agriculture to raise any other crop salable for cash on the acreage which is abandoned for the cultivation of cotton. Is not that right?

Mr. DOXEY. That he may not enter into serious competition with any other basic agricultural commodity.

Mr. WADSWORTH. That includes corn.

Mr. DOXEY. Certainly, and wheat also.

Mr. WADSWORTH. Would they raise wheat in your country anyway?

Mr. DOXEY. In our country we can raise most anything; but we will stick to cotton if you will help us, and if you do not help us, we shall be forced to go to something else.

Mr. WADSWORTH. Here is what I am getting at: If the principle formulated in this bill is to be carried out generally over the country, section by section, and the attempt made by the Congress and by the Department of Agriculture to allot the major production of a certain crop in this section and of another crop in another section, and a third crop in a third section, then we can say good-by to diversification in agriculture.

Mr. DOXEY. My good friend is entering the realm of prophecy, and into this realm I do not care to go.

Mr. TRUAX. Mr. Chairman, will the gentleman yield? I do not want to trespass upon his time, but I wish to clarify one point.

Mr. DOXEY. Yes; I yield to the gentleman from Ohio.

Mr. TRUAX. With the gentleman's permission, I would like to clarify one question that has been uppermost in the minds of several Members, namely, as to the probability of the cotton producers of the country losing the foreign markets by reducing production, or acreage. This instance is the case of one of the large foreign cotton-producing countries, and there are only four. I refer, however, to Egypt. In 1931 it seems that their cotton growers were having the same difficulty and experiencing the same ills as our cotton growers; so the Egyptian Government adopted a compulsory reduction plan.

Mr. DOXEY. Pardon me for interrupting, but I suggest if the gentleman wants to make a speech he can get time in his own right.

Mr. TRUAX. I am coming to the point right now and then I shall be through. As a result of this compulsory reduction plan in Egypt their cotton crop was reduced from 1,288,000 bales in 1932 to 950,000 bales in 1933, a reduction of 25 percent. So we will not feel competition from that source if we make this control effective.

Mr. DOXEY. I thank the gentleman for his contribution.

Full well do I realize the complications and complexities presented by the terms of this bill known as the "Bankhead bill" (H.R. 8402). I can readily agree that to administer the provisions of this measure in accordance with the language and intentions that the committee had in amending the bill is going to be extremely difficult. In any effort made to handle an industry such as cotton in a manner that will benefit the most people, necessarily some are helped and others suffer hardships.

The House Committee on Agriculture began hearings on this bill about a month ago. The hearings are now printed, and I am sure this House realizes that our committee has given this bill thoughtful and earnest consideration. I feel that my friend, the distinguished gentleman from Alabama [Mr. BANKHEAD], the original author of this bill, believes that the contributions made by our committee have strengthened and improved the bill.

Early in the hearings I felt that it might be better in some wise to amend the Agricultural Adjustment Act than to enact a bill of this type at this time, as I am sure most of us agree that it is a departure from the philosophy that most of us are schooled in. Furthermore, the principle of this Bankhead bill is compulsion; the acreage reduction program that is now being employed under the Agricultural Adjustment Act is voluntary. I was doubtful, should the principles embodied in the Bankhead bill become a law, whether the two could work side by side without one supplanting the other. Certainly I did not want and I do not feel that any of us want, the benefit payments that the cotton producer is now receiving and has contracted to receive for the years 1934 and 1935 to be discontinued.

With that in view, the questions I asked and the position that I took as disclosed by the hearings, indicate that I felt we should be extremely cautious before enacting a law of this kind. Therefore, in the executive session of our committee, I submitted various amendments to the Agriculture Adjustment Act which tended, in my judgment, to make more attractive the acreage reduction contract to the cotton producers who cooperated in the program, and at the same time endeavored to deny some privileges to those cotton producers who did not and have not cooperated with the Government's voluntary acreage reduction program. However, the committee and representatives of the Agriculture Department were of the opinion that to amend the Agriculture Adjustment Act so as to contain these provisions would be a most difficult proposition not only from the standpoint of constitutionality but from the standpoint of

administering same. Too, it was thought that such amendments would likely involve and complicate the workings of the act as it now exists with reference to some other agricultural basic commodities.

Some of the amendments submitted by me, and considered in executive session by the committee, had to do with the precessing tax on cotton, the tax to be fixed by a definite figure and left to the discretion of the Secretary of Agriculture to be administered within limits, and to be collected in the manner now prescribed by law and to be used by the Secretary of Agriculture in paying rentals and other benefits which the Secretary of Agriculture deemed proper to the producers of cotton who voluntarily signed contracts and complied with the Government's acreage reduction program.

The Secretary of Agriculture wrote a letter to the committee in which he pointed out the difficulties that would likely be encountered if such an amendment were enacted into a law. In fact, while he was before the committee testifying I asked him for an opinion on the question, If the Agriculture Adjustment Act were amended to permit higher processing tax rates than are now permitted, would it have the effect of controlling a noncooperating producer? He expressed the opinion in writing that it would not. Therefore, after the amendment feature was thoroughly considered by our committee, the committee rejected my proposals.

Then I submitted in executive session for the consideration of the committee a proposed measure which was prepared by my friend, the Honorable Oscar Johnston, of Mississippi:

Mr. Johnston made a very able and forceful statement before our committee, which appears in the printed hearings beginning on page 45. It will be observed that a great number of the objections raised in the testimony of Mr. Johnston to the original Bankhead bill have been eliminated by committee amendments placed in the bill as reported by our committee, which you are now considering.

The proposed emergency measure prepared by Mr. Johnston and submitted by me to the committee in executive session is as follows:

An act to relieve the existing national economic emergency affecting the marketing of cotton, cottonseed, and the manufactures thereof

Be it enacted, etc.—

DECLARATION OF EMERGENCY

SECTION 1

The free, unlimited, and unrestricted movement of cotton, cottonseed, and the manufactures thereof in interstate commerce and for export has brought into existence and caused the existence of a national economic emergency in reference to the marketing of these products which today seriously threatens the existence of the industry and which threatens to impair the balance of trade between the United States and other nations. This condition has also resulted in impairing the purchasing power of millions of persons residing in the cotton-producing States of the United States, thus contributing to the existence of the national economic emergency.

SECTION 2

It is hereby declared to be the policy of Congress to control and regulate the movement of cotton, cottonseed, and the manufactures thereof in interstate commerce and/or for export during the existence of the emergency declared in section 1 of this act, such control to be exercised until suspended by proclamation of the President of the United States.

SECTION 3

It is hereby made and declared to be unlawful for any person, firm, or corporation to ship, transport, or to move in any manner any cotton, cottonseed, and the manufactures thereof in interstate commerce or for export unless such cotton and/or cottonseed shall have been produced in accordance with regulations or conditions prescribed by the Secretary of Agriculture.

SECTION 4

By and with the consent of the approval of the President of the United States, the Secretary of Agriculture is hereby authorized and empowered to prescribe rules and regulations controlling the interstate and export movement of all cotton and/or cottonseed and the manufactures thereof produced in the United States of America from the crop of 1934, and such regulations, when so approved, shall have the force and effect of law.

SECTION 5

Any person who shall be convicted of violating any rule or regulation promulgated by the Secretary of Agriculture and approved by the President of the United States relating to the movement of cotton and/or cottonseed in interstate commerce, shall be subject to a fine of not exceeding $1,000 and imprisonment for not more than 1 year for each such violation. Any person who shall be convicted of moving in the stream of interstate commerce any cotton, cottonseed, and/or the manufactures thereof, in a manner contrary to any rule, regulation, or condition promulgated by the Secretary of Agriculture and approved by the President, shall be subject to a fine of not more than $1,000 or imprisonment for not more than 1 year, or both, for each such violation.

With regard to this emergency piece of legislation the question of constitutionality was raised. Also, we found that the Secretary of Agriculture and his Department, who were charged with the responsibilities of administering the act and any amendments that might be made thereto, were opposed to being invested with such wide powers and the responsibility of regulating the cotton-producing industry without a more specific and definite chart to guide them. Therefore, after serious consideration, the committee, in executive session, rejected this proposal and also all my proposed amendments to the Agriculture Adjustment Act. We then set about as a committee to amend as best we could the original Bankhead bill and yet retain most of its original principles. The bill before you today differs from the orgial Bankhead bill as referred to our committee in many very important phases.

The bill that we are considering today is designated as an emergency measure and is not a permanent program. If this bill is enacted, the life of the law is to be 2 years and continued an additional year upon proclamation of the President, who is also vested with the power and privilege to terminate this legislation at any time prior to the specified date if in his judgment the present acute economic emergency has ceased to exist.

The Secretary of Agriculture is given wide privileges and prerogatives under this bill and is to be governed by the will and wishes of those who produce cotton throughout the United States. He is to ascertain whether the owners, renters, share-croppers, or those who control two thirds of the land upon which the cotton is produced, favor a levy of a tax on the ginning of cotton in excess of the allotment made to meet the market requirements.

This bill provides that for the crop year 1934–35, 10,000,000 bales shall be fixed as the maximum amount of cotton that may be marketed exempt from the payment of the tax levied in said bill. The tax fixed to be paid on all cotton in excess of the 10,000,000 bales so allowed is to be at the rate of 50 percent of the average central market price per pound on lint cotton, but in no event less than 5 cents.

If the cotton is harvested during a crop year with respect to which the tax is in effect, the tax shall apply even though the ginning occurs after the expiration of the crop year. In other words, if the producer of cotton raises more than his allotment, he has to pay the tax on that year's surplus cotton, no matter when he gins it or markets it.

The average central market price per pound of lint cotton is to be the average price per pound of basis ⅞-inch middling spot cotton on the 10 spot-cotton markets, (designated by the Secretary of Agriculture) as determined and proclaimed from time to time by the Secretary of Agriculture. The average central market price determined and proclaimed shall be the base for determining the rate of the tax until a different average central market price for lint cotton is determined and proclaimed by the Secretary of Agriculture.

There are several exceptions where no tax shall be imposed under this act with respect to cotton; for instance:

First. Cotton harvested by any publicly owned experimental station or agricultural laboratory.

Second. An amount of cotton harvested in any crop year from each farm equal to its allotment.

Third. Cotton harvested prior to the crop year 1934–35.

The amount of cotton to be raised in the designated crop years is to be proclaimed by the Secretary of Agriculture, who shall apportion to the several cotton-producing States the number of bales the marketing of which may be exempt from the tax herein levied, which shall be determined by the ratio of the average number of bales produced in each State during the 5 crop years, 1928–32, inclusive, to the average number of bales produced in all the States during

the same period. It is prima facie presumed that all cotton and its processed products will move in interstate or foreign commerce.

The amount allotted to each State shall be apportioned by the Secretary of Agriculture to the several counties in such States on a basis and ratio applied to such counties similar to that set forth in subsection (a) of this bill.

After the State and county allotments are made as stated, the producer of cotton in the various counties is given his respective allotment and files an application for what is designated as a " tax-exemption certificate ", which is nothing more or less than a certificate exempting the allotted number of bales that the owner, renter, or share cropper or person who controls the land on which the cotton is produced is entitled to gin and market free from the tax imposed.

The producer of cotton before being awarded these tax-exempt certificates must comply with the rules and regulations and agree to cooperate and comply with the conditions and limitations as to the production of cotton as may be prescribed by the Secretary of Agriculture.

This bill is specific and lays down in no uncertain terms just how any such allotments are to be made and just how such tax-exempt certificates are to be issued and just what rules and regulations must be complied with, and further provides that when the allotment is made to each State, 10 percent of the number of bales so allotted to each State is to be held back for the purpose of aiding and assisting the producers of cotton on farms where for the preceding 3 years normal cotton production has been reduced by reason of drought, storms, floods, insect pests, or other uncontrollable natural cause and other conditions therein set forth that might hinder the issuance of tax-exemption certificates in excess of the bales under normal conditions allotted.

One of the purposes of this bill is to equalize existing inequalities; another is to safeguard a fair and just administration of its principles. It gives the Secretary of Agriculture wide discretion and broad powers in enforcing the program contained in this measure, as a supplement to the Agricultural Adjustment Act.

Every bale that is tax exempt is to be identified as well as every bale upon which a tax must be paid is also identified by special markings and tags. Whenever a bale tag is secured, the tax is due, if it is not exempt cotton. The ginner is held responsible for the tax. Who pays it is another question that remains to be seen when and if the measure is put into operation. We all have a right to our opinion.

Bale tags may be secured for any cotton at any time after ginning—

First. Upon the payment of the amount of tax which would have been payable at the time of ginning.

Second. Upon the surrender of certificates of exemption covering an amount of cotton not less than the amount of such cotton.

This bill definitely and specifically endeavors to protect the rights and interests of renters, tenants, and share-croppers and obligates the Secretary of Agriculture in administering this act to make such rules and regulations as will protect them so far as possible in securing the proper allotments as well as obtaining their proper share of the tax-exemption certificates and other proposed benefits.

It was also my purpose and at my suggestion that our committee wrote into this measure a provision that cannot be misunderstood with reference to the proceeds derived from the taxes made available by this act. This money is to be plainly earmarked and used for the purpose of carrying out the cotton program of the Agricultural Adjustment Act and the benefits to be paid thereunder to the cotton producer and for administrative expenses and refunds of taxes under this act.

The Secretary of Agriculture is further authorized to purchase cotton that may be produced in excess of the quantity allotted to producers at a price not to exceed 55 percent of the central market price to be used for charitable purposes and in other ways that will not seriously interfere with the normal marketing of cotton or cotton products. The cotton so purchased shall be exempt from the tax imposed by this act.

Our committee devoted much time and thought as to what provisions should be written into the bill permitting the cotton producers, who necessarily would have to reduce and limit their cotton acreage, to use the acreage not necessary for cotton production. The language used is permissive rather than mandatory.

This bill provides that just and fair regulations may be made by the Secretary of Agriculture with reference to these so-called " idle acres " wherein they should not be used to produce other agricultural commodities for the purpose of sale only to the extent of seriously competing on the market with other agricultural commodities, as well as of one or more basic agricultural commodities. The regulations are only to apply to sales of commodities and in nowise affect producing any commodities for home consumption.

With much care and caution our committee, by definitions and specific instructions, endeavored to make plain to those charged with the administration of this act just what is the intent of the bill and what those of us who helped to draft it had in mind.

Its purpose is to place the cotton industry on a sound commercial basis, to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, to provide funds for paying additional benefits under the Agricultural Adjustment Act, to relieve the present acute economic emergency devoted to cotton production, to more effectively balance production and consumption of cotton, to raise the price of cotton by limiting the production thereof, and for other purposes.

This bill is designed to supplement the cotton program of the Agricultural Adjustment Act and to make effective by preventing those who do not cooperate from destroying the present cotton program.

Regardless of what objections that may be raised to this bill, our committee felt, and you all know, that if we do not raise more than 10,000,000 bales of cotton for any one year during the life of this bill there will be no necessity for putting the machinery provided herein into operation. In that event, no harm will be done by enacting this bill into a law as an emergency measure only. Much good will be accomplished by having it, so to speak, as a safety valve in case the production of cotton exceeds the 10,000,000-bale mark and it is properly administered.

Then, again, should conditions become so improved or should there arise emergencies, such as war, when more cotton is needed, even if this law is on the statute books, it would be of no effect, for by proclamation the President can terminate it at any time he sees proper so to do.

This is just one of the many features wherein our committee changed the provisions of the original bill, known as " H.R. 7971 ", the original Bankhead bill.

By comparison of that bill with this bill (H.R. 8402) that we are now considering, as reported by the Agriculture Committee, you will readily agree with me that this is a much better bill. Therefore, if the country were in favor of the original Bankhead bill, if that were true, then certainly when the country understands the provisions of both bills those affected will be much more in favor of the bill you are soon to vote on.

Mr. RICHARDS. Will the gentleman state whether or not it is a fact that the cotton-growing States can grow corn, wheat, oats, and other basic products?

Mr. DOXEY. Well, there is hardly anything we cannot grow, but we do not want to go into active competition with these other lines of agriculture if we can put on a paying basis our present line of endeavor.

Mr. RICHARDS. Is it not a fact that unless something is done with this cotton we are going to have to go into real competition with the West?

Mr. DOXEY. I hope that we will be able to paddle our own boat and that they will do the same and both go on up the stream together until the depression is over, and all prosper in their own way.

Mr. RICHARDS. This will help them as well as the cotton producer?

Mr. DOXEY. It will help them and I think they will realize it by voting for this bill.

Mr. HASTINGS. Will the gentleman yield?

Mr. DOXEY. I yield to the gentleman from Oklahoma.

Mr. HASTINGS. May I emphasize and reemphasize that after this year the bill does not continue except with the consent of two thirds of the cotton producers?

Mr. DOXEY. I do not want to go into a detailed discussion of that at this time. I have heretofore touched upon it, generally.

Mr. HOLMES. Will the gentleman yield?

Mr. DOXEY. I yield to the gentleman from Massachusetts.

Mr. HOLMES. I know the gentleman is very much interested in this subject, and I am, too. May I ask the gentleman how it affects his own State, and how many cotton producers there are in the State of Mississippi? What is the acreage in Mississippi?

Mr. DOXEY. I believe my colleagues from Mississippi will make speeches on this bill and will touch on the specific conditions in our State. I should like to go into that, but I feel I have taken too much time already. Although I was given unlimited time and am pinch hitting for my chairman, nevertheless I feel that I should conclude now. I have consumed more than 40 minutes and realize that our time is limited and there are many others who desire to speak. I am sure they will answer your questions. I thank you. [Applause.]

Mr. HOPE. Mr. Chairman, I yield 20 minutes to the gentleman from Ohio [Mr. MARSHALL].

Mr. MARSHALL. Mr. Chairman, I have a very mixed feeling in regard to this proposed legislation. I would not want my position to be construed as in any way unfriendly to the great cotton industry. I am as much interested in the success of agriculture as any Member of this body, representing probably the largest agricultural district in the State of Ohio. I fully realize that the successful operation of the cotton industry in the Southland means everything to the citizenship of that part of the United States, and I also appreciate that it means very much indirectly, if not directly, to the success and welfare of the entire country; so I have endeavored to approach this subject in the same spirit and attitude that I would if this bill applied to the agricultural products of my own district.

The Committee on Agriculture held extensive hearings on this bill, and they approached it earnestly. I happen to be one of the members of that committee who saw fit to sign a report opposing the reporting of the bill to this body. My purpose in speaking briefly here today on this legislation is partly to explain why some of us were moved to file this minority report, and I am hopeful that something that I may say will be of interest and probably of some help to those Members of the Congress who have not had the benefit of the study of this measure in committee.

On the very first page of this bill under the declaration of policy it says:

> That in order to relieve the present acute economic emergency in that part of the agricultural industry devoted to cotton production and marketing by diminishing the disparity between prices paid to cotton producers—

And so forth.

In other words, we have done much in this Congress in the name of emergency and many of us have done many things that we would not have done in any other name.

Some of us in that committee differ, and I think there will be many on this floor who will differ, on the proposition as to whether or not there is an emergency existing as regards cotton. Some of us feel and have been informed that the southern farmer is in a better condition today than the farmers of the rest of the country.

I was led to believe, and it was only recently that I heard anything to the contrary, that the workings of the A.A.A. or the farm-relief measure had been an outstanding success so far as cotton was concerned. It was held out as the 100-percent proposition so far as the workings of the Agricultural Administration were concerned. I never heard anything to the contrary until the sponsors of this measure, by its introduction and the support of it, have made a frank, open confession that the A.A.A. has been a failure so far as the voluntary control of production is concerned. Due to perfect weather conditions and some other things, it is true that there was a larger crop of cotton raised in the South last year, but there are about 85 percent, so we were informed, of the cotton farmers who have signed up for another year under the voluntary control measure. I am willing, as I was last spring, to support any farm-relief measure, with the hope that it may do some good. I would be willing to go a long, long way with the voluntary program for the control of cotton, or any other industry, if I knew it would benefit that industry and thus the whole country, but I shall have to oppose the compulsory control of cotton production. I hope Congress will not take this step.

This bill, in effect, tells each individual farmer who raises cotton just exactly how many bales he may or may not raise. The fact of the matter is, it is a question in my mind whether under the workings of this bill a farmer down there, who for some reason probably sufficient unto himself, has not been engaged in raising cotton for the last 2 or 3 years, could raise any cotton during the life of this bill.

Now, that restriction is one that I do not want to support. If you will turn to section 8 of this measure, the sponsors of the bill there undertake to take care of this by a 10-percent proposition. Under section 8, 10 percent of the allotment to each State is set aside to be divided up in four ways. Here is what they say:

First, to producers of cotton on farms where for the preceding 3 years less than one third of the cultivated land on such farms has been planted to cotton.

Second, to producers of cotton on farms not previously in cotton production.

Third, to producers of cotton on farms where for the preceding 3 years normal cotton production has been reduced by reason of drought, storm, flood, insect pests, or other uncontrollable natural cause.

Fourth, to producers of cotton on farms where for the preceding 3 years acreage theretofore planted to cotton has been voluntarily reduced so that the amount of reduction in cotton production on such farms is greater than the amount which the Secretary finds would have been equitable reduction applicable to such farms in carrying out a reasonable reduction program.

That 10 percent is not going to go very far.

Now, I hesitate to mention this, but one of the main arguments made against prohibition was that it was a curtailment of individual liberty and individual rights. If it is unreasonable to curtail what a man shall drink, what do you say of this compulsory feature of the bill? I say it is very unsound. The word "freedom" is a word sacred to the people of America. It was freedom that caused them to come and carve out this country. In 1776 it was for freedom they fought the Revolutionary War, and in 1812 it was for freedom of the seas.

In my opinion, the farmers of the United States will rise up en masse and protest against the principle of this bill, that it is a complete regimentation of agriculture.

Now, this tax is, to my mind, absolutely a prohibitive tax. There will not be any revenue raised in taxes because of this law. There is no tax anticipated by the sponsors of the bill; there is no tax desired by the sponsors of the bill. If this bill in its operation should work out in that way to produce a tax, it will defeat the purpose of the bill. There will not be any tax, and the purpose of the bill is to control production of cotton.

I am not going to deal in detail with the constitutional features of the bill, but I think if any court is called upon to pass on its constitutionality it will decide that you cannot control the production of cotton in this manner. This bill attempts, under the guise of a tax, to prohibit or control production.

Now, Secretary Wallace was one who testified before the Agricultural Committee in regard to this measure, and at page 45 of the printed record he indicates plainly a lukewarm attitude toward the bill, and I want to read one or two statements.

He says:

> But, except for the fact that it is likely to cost quite a bit of money, as long as the South is willing to offer itself as an experimental economic laboratory, it would be very interesting to see the varied human reactions that would come out of trying such a program. I have told the Southern people at various times, that if they were willing to offer themselves for this experiment it was awfully nice of them to do so, that coming from the North, I thought it was very nice for them to make the offer.

My humble opinion is this, that if it had not been for the urge from the White House this bill, involving the principle of compulsory control, as it does, would not have come out of the Agricultural Committee, and would never have been here for your consideration today. On page 139 of the printed record appears a letter drafted by the President of the United States, in which he says:

> My study of the various methods suggested leads me to believe that the BANKHEAD bills in principle best cover the situation. I hope that in the continuing emergency your committee can take action.

In the name of emergency, the President of the United States is asking us to embark on this new and untried field, which is the first step toward complete compulsory regimentation of all farming activities, and the farmers of my part of the country are now writing to me in opposition to enacting such a principle into law. I honestly believe that if the Membership on the Democratic side of the aisle is left to vote their own conviction, they will vote against this bill, and I believe the time has come when the citizenship of the United States wants the Congress to assert itself to the extent that it legislate from now on according to its own best judgment.

Mr. ALLGOOD. Mr. Chairman, will the gentleman yield?

Mr. MARSHALL. Yes.

Mr. ALLGOOD. Speaking about the emergency, and the improved conditions, that have come to the South through the A.A.A., I say that we have had improved conditions under the A.A.A., but there are millons of dollars of debts that were incurred not only in the South but throughout the Nation when commodity prices were high. We mortgaged our farms, and a large percentage of the farms in the South are mortgaged today, possibly 60 or 70 percent, mortgaged at a time when cotton was selling at $100 a bale, and then cotton went down to $25 or $30 a bale. During that period of depression there was an underconsumption of cotton, which piled up a surplus of 10,000,000 bales to 12,000,000 bales, and that is the surplus that is confronting us, and these mortgages are over our heads, and the emergency still exists.

Mr. MARSHALL. I yielded for a question. What is the question?

Mr. ALLGOOD. Will not the gentleman admit that there is an emergency if 80 or 90 percent of the people are living under mortgage?

Mr. MARSHALL. In Ohio there are farmers who bought land at $175 to $200 per acre and mortgaged it when wheat was selling for $2 to $2.50 a bushel, but you cannot expect the Government of the United States, by compulsory control of that crop, to assist them in paying that mortgage. In other words, I would not vote for this measure as a compulsory control of production if it applied to the products of my own district any more quickly than I would vote for it when it applies to the products of the South. I have been led to believe that the people of the South are in a much more prosperous condition than they were a year ago. I would have gone along here, and it was the hope of the Agricultural Committee that we could amend the Agricultural Act, and leave out this compulsory control, and yet make the proposition more attractive, so that all would come in. That is the program that many members of the committee would like to have adopted, and I would have gone along on a program like that.

Mr. ALLGOOD. But how about the chiselers?

Mr. TRUAX. Mr. Chairman, will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. TRUAX. I would like to remind my colleague from Ohio, for whom I have great respect—he has been my friend for years—that already in Ohio, during the past 10 years, we have gone through successful compulsory regulations of certain farm activities. For instance, there is the eradication of bovine tuberculosis, which was started in 1923, and was fought violently, but was carried to a successful conclusion about 1930. I know that my colleague will be tolerant with me on this observation.

Mr. MARSHALL. Let us get to the question.

Mr. TRUAX. The inference is expressed that Secretary Wallace is opposed to this bill, or at least supporting it half-heartedly. That would convince me that it is a good bill. On page 88 of the Senate hearing on this bill this statement is made by Secretary Wallace:

> I think the best slogan is larger yields on smaller fields. I think that is really the efficient way out.

That is the reason that they had bigger production per acre last year than the year before. He cannot, and I cannot reconcile the two theories of voluntary acreage reduction on the one hand, and intensive increased production per acre on the other hand. Therefore, I think that this method is the only practical way of controlling the part of the crop that moves to the market.

Mr. MARSHALL. The gentleman is not asking me to reconcile what the Secretary of Agriculture does in each instance? I could not do that this morning.

Mr. TRUAX. I would not ask anyone to do that.

Mr. TERRELL of Texas. Will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. TERRELL of Texas. It has been stated that the plan voluntarily adopted last year was a success, as far as cotton production was concerned. If so, why could not the same voluntary plan be carried out? If the people in the South that grow cotton—and I am a cotton grower—want to curtail the production of cotton, why can they not do it without the Federal Government stepping in and saying how much cotton they shall grow?

Mr. MARSHALL. In answer to the gentleman I will say I had hoped that they could do it; and I am willing to go along on a program that will enable them to do it.

Mr. TERRELL of Texas. If you will let them alone, they will do it.

Mr. MARSHALL. I am not bothering them.

Mr. TERRELL of Texas. I know it.

Mr. MARSHALL. For example, in Ohio, a man who does not go into the hog contract had better get out of the hog business, because he will get $5 a head less than the fellow who does go in. What I mean by that is whether a man signs that contract or not, he will take the same market price the next November for his hogs whether he is a party to the contract or not. If he is a party, he gets $5 a head more for each one. Now, it is still a question in my mind whether or not, when he adds his tax to what he gets, he will be any better off than he would have been if there had not been a tax, because the testimony before the Committee on Agriculture shows conclusively that the farmer is paying the tax. But that is a voluntary program, and so long as they want to use it, fine. I would go along with such a voluntary program, but I will not join in a compulsory control proposition.

Mr. JENKINS of Ohio. Will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. JENKINS of Ohio. I listened to the gentleman's speech, and I think he has made a wonderful address.

Mr. MARSHALL. I thank the gentleman.

Mr. JENKINS of Ohio. I want to say that the gentleman represents the largest agricultural district in the State of Ohio and is representing it well. There is some agriculture in my district, but I should like to ask the gentleman, because he is an expert and I am not, as to whether there is anything in this bill which, if it has any advantage at all, could be applied to the hog industry and the corn industry in our State?

Mr. MARSHALL. Answering the gentleman, I would say that is just what I am afraid might happen, that this is the first step toward complete regimentation of agriculture, to the extent that the Government of the United States will tell each and every farmer what he shall raise and how much he shall raise.

Mr. JENKINS of Ohio. Has the gentleman had any urgent demand from any of the great agricultural organizations in Ohio for any such legislation as this?

Mr. MARSHALL. All the communications I have received have been to the effect that the people back home object to the Government of the United States dictating complete management of the farming industry in Ohio.

(Here the gavel fell.)

Mr. HOPE. I yield the gentleman 10 additional minutes.

Mr. CARPENTER of Kansas. Will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. CARPENTER of Kansas. The gentleman has just concluded a very fine speech, with which I am in agreement, especially with what he says about compulsory and voluntary relief of agriculture. The point has just been mentioned that, if we carry out the policy included in this proposed legislation to its final sequence, the Government will then tell every farmer how much wheat he can grow and how much corn he can grow, and how many hogs, and how many cattle he can raise. Then, carrying it a step further, we will have the Secretary of Agriculture or some other governmental official telling every married man how many children he can raise. Would that not be the natural sequence?

Mr. MARSHALL. I do not believe I care to answer that question. That is a little aside from farming. [Laughter.]

Mr. CARPENTER of Kansas. If they do, then we will have to go back to the time of Moses and have the soldiers go through and paint the lintels and say that each male child is to be slaughtered.

Mr. ELTSE of California. Will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. ELTSE of California. Is the gentleman prepared to give us an estimate of the number of people it would take to administer the survey of census required to be made under this act?

Mr. MARSHALL. I may say in answer to the gentleman from California that according to my recollection there was no discussion in the committee, and I have no figures to give or any prediction to make as to what the administration of this act would cost.

Mr. ELTSE of California. It would require a great number of people to administer it, would it not, in the field?

Mr. MARSHALL. I would think it would require a great number.

Mr. ELTSE of California. And it sets up a new bureau for that purpose.

Mr. MARSHALL. Yes.

Mr. BLANCHARD. Will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. BLANCHARD. Under a compulsory crop production proposal of this kind, the figures probably are available or were made available to the committee as to the probable acreage reduction in cotton. Can the gentleman tell me how much they propose to reduce the acreage of cotton?

Mr. MARSHALL. This is not an acreage control bill.

Mr. BLANCHARD. I understand that perfectly.

Mr. MARSHALL. It is a baleage control bill. In other words, you are given an allotment of five bales. No matter how many or how few acres you plant, that is all you can sell.

Mr. BLANCHARD. It is reasonable, however, to expect that will naturally follow acreage reduction in cotton.

Mr. MARSHALL. I presume there would be, because nobody is going to raise cotton and keep it if he cannot sell it.

Mr. BLANCHARD. Is there anything in the bill that prescribes that the abandoned land may not be used in competition with other agricultural commodities?

Mr. MARSHALL. There is a provision in the bill which prevents its being used in competition with other farm crops that are raised in continental United States.

Mr. TRUAX. Mr. Chairman, will the gentleman yield.

Mr. MARSHALL. Yes; I yield to the gentleman because he comes from Ohio. Then I must pass along.

Mr. TRUAX. The gentleman voices the opinion that he would object to the bill if it proposed to include corn and hogs in such regulations in Ohio. So would I. I think it is unfair, grossly unfair, to leave the inference, as was done by my good friend, Mr. CARPENTER, that this will be extended to the crops of the Corn Belt. I have read the hearings, and it seems that in the case of cotton three quarters of the cotton growers of the South are for this bill. They are for some plan that will force the men who did not cooperate in the voluntary reduction plan to do their part, to make some sacrifice if they are to receive the benefits; that they must cooperate with the plan.

It has been truthfully said that the gentleman from Ohio [Mr. MARSHALL] represents the greatest agricultural district in the State of Ohio. His distinguished predecessor, whom many of you know better than I, the Honorable Charles Brand, was one of the early advocates of the McNary-Haugen bill. In my humble judgment, the pending bill comes the nearest to containing one of the principles of the McNary-Haugen bill with respect to one of the staple crops of any bill we have had, because it proposes to control the surplus at the point of its distribution rather than to attempt the fallacious theory of controlling production through reduction in acreage. I thank the gentleman for yielding to me.

Mr. MARSHALL. Answering the gentleman's statement, it is not my impression, from what I learned at the committee hearings, that the majority of the people who raise cotton want this bill. You will find throughout the South the desire to bring in and force people who have been staying out to cooperate.

Mr. ALLGOOD. Mr. Chairman, will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. ALLGOOD. I realize the gentleman is a friend of the farmer; I believe that sincerely.

Speaking of the regimentation of agriculture, if a great majority of the farmers in the gentleman's district were in favor of extending this to other farm products, such as corn and wheat, and they should let him know they were in favor of it, as the farmers of the South have notified the Representatives from the South, do you not think you would endorse a similar bill? Going further, I attended a farm meeting at Birmingham. There were some 6,000 farmers there from every county in the State. They called the roll and 6,000 farmers answered. They voted for this cotton-control plan. There was not a dissenting vote. Now, if this bill proves to be successful and helps our farmers and brings prosperity to them, does not the gentleman think the farmers in his district would want the same regimentation; would want the same prosperity?

Mr. MARSHALL. I will answer the gentleman by saying that I am not going to cross that bridge before I come to it. There are so many conditions to your question I cannot answer it.

Mr. CULKIN. Will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. CULKIN. Will the gentleman please inform me what effect this measure will have on the processing tax?

Mr. MARSHALL. No effect at all.

Mr. CULKIN. There is no change in the situation with reference to the processing tax?

Mr. MARSHALL. Not at all. This is supplementary to and in addition to the Agricultural Adjustment Act.

Mr. CULKIN. There is no mention of an extension of the processing tax either on rayon or any other substitute for cotton?

Mr. MARSHALL. No.

Mr. MOREHEAD. Mr. Chairman, will the gentleman yield?

Mr. MARSHALL. I yield.

Mr. MOREHEAD. I never have to wait a great while when a measure is pending on the floor of the House before someone voices my sentiment much better than I am able to. I am glad, however, that the gentleman confined his wonderful agricultural district to the State of Ohio, for I represent in Nebraska the greatest and most resourceful agricultural district in the United States.

I disagree with the gentleman from Alabama that the farmers are at this time ready for compulsory limitation of production. My people are in a rebellious state of mind when they see the trend of legislation in Congress to place governmental supervision over them, for that means someone to take charge of their farms. Such measures cause them more concern than any other legislation during my 12 years in Congress.

The constitutionality of the measure was touched very lightly. I plead my ignorance as I have not been able to give this point close attention; but can the gentleman refer me to a case of any legislation that was sponsored by the President of the United States and became a law and had his unqualified endorsement, that was ever held unconstitutional by the United States Supreme Court?

Mr. MARSHALL. I have not the time in which to answer the gentleman's question.

[Here the gavel fell.]

Mr. DOXEY. Mr. Chairman, I yield 15 minutes to the gentleman from Arkansas [Mr. GLOVER].

Mr. GLOVER. Mr. Chairman, during the last 10 days more attention and study has been given to the marketing of cotton than was ever given to it in the past by this Congress. The first bill on this subject was introduced in this session of Congress by Senator JOHN BANKHEAD, of Alabama. Hearings were had on his bill before the Senate committee and I attended as many of those hearings as I could.

It was found that inasmuch as the bill carried a revenue feature that under the Constitution of the United States the bill would have to originate in the House. Senator BANKHEAD's brother, Hon. WILLIAM B. BANKHEAD, introduced the bill in the House and it was referred to the Committee on Agriculture, of which I have the honor to be a member.

The two brothers appeared before our committee in advocacy of the bill and stated that they were not wedded to the language of the bill so much as they were to the principle of control of orderly marketing.

The President of the United States, Franklin D. Roosevelt, in a letter to our chairman, Hon. MARVIN JONES, stated that he was for the principle of the Bankhead bill. His letter reads as follows:

MY DEAR MR. CHAIRMAN: As you know, I have watched the cotton problem with the deepest attention during all these months. I believe that the gains which have been made—and they are very substantial—must be consolidated, and, insofar as possible, made permanent. To do this, however, reasonable assurance of crop limitation must be obtained.

In this objective the great majority of cotton farmers are in agreement. I am told that the present poll by the Department of Agriculture shows that at least 95 percent of the replies are in favor of some form of control.

My study of the various methods suggested leads me to believe that the Bankhead bills in principle best cover the situation. I hope that in the continuing emergency your committee can take action.

Sincerely yours,

FRANKLIN D. ROOSEVELT.

The committee heard many experts and also landowners who are growing cotton. In my opinion we get the best advice from the man who is actually producing cotton.

After getting all the information obtainable the committee has very materially amended the bill which was very acceptable to the author of the bill, and the bill was reintroduced by Mr. BANKHEAD on the 4th of March 1934, and with slight amendments adopted since it was last introduced.

The bill in its original form was believed by many eminent lawyers to be unconstitutional under the decisions of the Supreme Court of the United States. The committee amendments now in the bill in my opinion make it constitutional and I think the courts will so hold.

The real purpose of the bill is to, within the next 2 years, get rid of the surplus cotton which is now about 10,000,000 bales. The surplus should never be reduced under 3,000,000 bales, so if we get 7,000,000 bales of this surplus cotton out of the way, we can easily bring cotton back to 20 cents per pound and stabilize it there.

No finer spirit of cooperation was ever shown by any people than has been shown by the farmers growing cotton. At least 85 percent of them have for this year voluntarily signed up with the Department of Agriculture to reduce the crop for 1934 about 40 percent.

The Department believes that this voluntary reduction plan will reduce this year's crop to about 9,500,000 bales, and this bill is intended to protect those who have so willingly agreed to reduce the acreage to get rid for once, and we hope, for all, a great carry-over surplus that has cost the South multiplied millions of dollars and will continue to do so until it is disposed of.

I am informed that many of those in my State could not qualify to sign up for acreage reduction because of the fact they had not been producing cotton, or for other causes. This other 15 percent in my State can sign up under this bill and make it 100 percent perfect control.

It is only when one grows more than his allotment that this will effect at all. It simply insures and protects those that have so willingly accepted the Government plan.

We now have a President and a Secretary of Agriculture that are each trying to pull agriculture out of the mire and this Congress has nobly cooperated and set up the legislative machinery to accomplish something for agriculture.

The legislation passed by this Congress saved last year to the cotton farmer $317,000,000. We found cotton down to 5 cents per pound. We have raised it until it is now worth more than 12 cents per pound, and if this bill is passed it will be 15 cents per pound within less than 60 days.

The processing fee is 4.3 per pound on cotton used in the United States. We use more than 6,000,000 bales each year. This fee is now bringing in about $127,000,000. The pay for acreage kept out of cotton by the farmer is paid out of this fund and not out of the general Treasury, as some think.

The title of this bill is "A bill to place the cotton industry on a sound commercial basis, to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, to provide funds for paying additional benefits under the Agricultural Adjustment Act, and for other purposes."

The declaration of policy in this bill is declared to be that in order to relieve the present acute economic emergency in that part of agricultural industry devoted to cotton production and marketing by diminishing the disparity between prices paid to cotton producers and persons engaged in cotton marketing and prices of other commodities and by restoring purchasing power to such producers and persons so that the restoration of the normal exchange in interstate and foreign commerce of all commodities may be fostered, and to raise revenue to enable the payment of additional benefits to cotton producers under the Agricultural Adjustment Act—

It is hereby declared to be the policy of Congress to promote the orderly marketing of cotton in interstate and foreign commerce, to enable producers of such commodity to stabilize their markets against undue and excessive fluctuations, and to preserve advantageous markets for such commodity, and to prevent unfair competition and practices in putting cotton into the channels of interstate and foreign commerce, and to more effectively balance production and consumption of cotton.

This bill is intended only as an emergency measure and is applicable for 2 years only, unless at that time an emergency exists and the President orders by proclamation to continue it for 1 more year. Within that time all of the surplus will be used and we will not be bothered by that again.

The Bankhead bill as originally drawn provided that when the Secretary of Agriculture found that a majority of the landowners wanted the principle of this bill applied that he might put it into force. The bill was amended by the committee to provide that—

When the Secretary of Agriculture finds that the persons who own, rent, share crop, or control two thirds of the land in the United States on which cotton is produced favor this plan of control that he may then put in force the provisions of this act.

In other words, this leaves it in the hands of the farmers themselves who grow cotton to determine when and how long they desire to use this act.

If this act is passed, which we feel sure that it will be, it is then the intention, as we understand it, that the Department of Agriculture will submit the proposition back to the farmers by questionnaire, and, if two thirds of them favor this provision, it will then be put into force and effect by the Secretary of Agriculture. This sets up the machinery for the control of the marketing of the crop by the farmers themselves.

The original bill provided for an allotment for the 2 years 9,500,000 bales of cotton and the committee amendment raised that to 10,000,000 bales. Ten million bales is not subject to any penalty provided for under this act, nor to any tax of any kind or character. It is only intended to keep any cotton over the 10,000,000-bale allotment from entering into the market, but it can be stored either in lint or bale, and held over until the next year and put in the second year's allotment. It is not expected that a single bale of cotton will ever pay the tax provided in this bill. It is believed that this provision will provide for the marketing for that which can be marketed at a price of at least 15 cents per pound.

Cotton should never sell for less than 20 cents per pound and within 2 years' time there is no question but what the acreage reduction made effective by this bill will place it to at least 20 cents per pound and stabilize it there.

The farmers, after trying out this plan for 1 year, will, I hope, have the same privilege of stating the second year whether or not they desire the continuance of the plan of control as provided for in this bill. In other words, as stated a moment ago, it leaves it absolutely in the hands of the farmer to control it and we feel sure he will do so.

The bill does not apply to cotton already ginned, but only to that which is produced hereafter and for the next 2 years.

Section 8 of the bill as amended provides that whenever an allotment is made pursuant to section 3, not to exceed 10 percent of the number of bales allotted to each State shall be deducted from the number of bales allotted to such State, and allotted in such State—

First. To producers of cotton on farms where for the preceding 3 years less than one third of the cultivated land on such farms has been planted to cotton;

Second. To producers of cotton on farms not previously used in cotton production;

Third. To producers of cotton on farms where, for the preceding 3 years, normal cotton production has been reduced by reason of drought, storm, flood, insect pests, or other uncontrollable natural causes; and

Fourth. To producers of cotton on farms where, for the preceding 3 years, acreage theretofore planted to cotton has been voluntarily reduced so that the amount of reduction in cotton production on such farms is greater than the amount which the Secretary finds would have been an equitable reduction applicable to such farms in carrying out a reasonable reduction program.

It is further provided that the allotments provided for as mentioned above shall be in addition to the amounts apportioned to the counties under section 5 (b).

Section 23 of this bill provides as follows:

> The President is authorized to enter into agreements with foreign countries to fix the amount of cotton that may be exported by the respective countries entering into said agreements, and to make all rules and regulations necessary for carrying out said agreements.

Very little cotton has ever come into the United States from other countries and none except the exceedingly long staple used for certain purposes, and we believe that can be grown in this country as well as elsewhere, and we hope to encourage the growth of it.

The Department is hoping to have reduction acreage in all the countries of the world growing cotton, and to cooperate in this plan for this period of time in order that the world's supply of cotton can be brought to where it can be maintained at a fair price to the growers.

The real reason for our surplus of cotton in the United States now is the overproduction of a short-lint cotton in India, China, and other places. Prior to the last war the foreign countries were growing about half the cotton they are now. India, for instance, grows four and a half million bales. This condition was brought about by reason of the fact that we were on the gold standard and they were on a silver basis of money, and the money in their silver dollar under our standard of gold was only worth a fraction over 25 cents on the dollar. In other words, when they bought our cotton, which was selling here for 5 cents per pound, under our gold standard they paid in their money practically 20 cents per pound for it, and the farmers got only 5 cents. That condition has now been changed, and we hope that the increased use of silver money and our going off the gold standard will decrease the production of this short-line cotton in foreign countries, and they will again buy our cotton as they once did. Then we will have no cause for ever worrying about an overproduction of cotton in the United States.

The normal average cotton crop in the United States is about 14,000,000 bales. It is thought by the Department of Agriculture that within 2 years' time we can go back to the production of fourteen or fifteen million bales of cotton and not be troubled about a market.

There is one other provision in the bill that provides that in case of an emergency for the use of cotton that the President, by Executive order, could terminate the provisions of this act.

The committee has tried to work out all the objectional features that were in this bill in the beginning and tried to make it just as acceptable to the man growing cotton as it is possible, to make it effective.

The results of the cotton-reduction program under the Agricultural Adjustment Administration is the most wonderful achievement that has ever been accomplished.

The 1933 cotton crop was the most valuable of all since 1929, owing entirely to the stimulation of the market by cutting production and to the plow-up checks paid to the farmers by the Government for destroying a part of the cotton acreage.

The December farm price of cotton in 1932 is given by the Government as being 5.7 cents. The value of the 13,000,000-bale crop of 1932, exclusive of seed, is listed at $571,861,000. The value of the 1933 crop of 13,177,000 bales is listed at $617,716,000. The December price, 1933, is given as being 9.4 cents. Add to the value of the 1933 crop the $112,148,000 covering plow-up checks and the $48,000,000 covering cotton options and the total value of the 1933 crop stands at $777,864,000, and becomes the most valuable crop since 1929, when the price was 16.8 cents.

It is the general consensus of opinion that had there been no plow-up campaign and had we gone to harvest with the 17,600,000-bale crop, the price would have ranged around 5 cents, with perhaps little or no market at all. [Applause.]

Mr. HOPE. Mr. Chairman, I yield 15 minutes to the gentleman from Kansas [Mr. McGUGIN].

Mr. McGUGIN. Mr. Chairman, in the early part of my remarks I shall discuss this bill in the light of the underlying principle involved in the Agricultural Adjustment Act as it is being administered. Let there be no mistake, the real underlying purpose of the Agricultural Adjustment Act, as it is being administered, is not to give emergency relief to the cotton raiser, the wheat raiser, or any other farmer. When that bill was passed, it was the view of Congress that it was just what the title of the act indicated, namely, an adjustment act, an act which would adjust the present economic maladjustments in agriculture growing out of this depression. We all thought that by a mere adjustment, possibly reducing the production for a year or two, that then the American farmer would be left to proceed in a truly American manner. I think that was the intention of the Congress; but once that bill was passed by the Congress and was turned

over to the Agricultural Department for administration, the destiny of American agriculture was largely in the hands of Mr. Rexford G. Tugwell, whose fundamental ideas are not American, whose fundamental ideas are not shared by 1 Member in 10 of this House of Representatives on either side of the aisle, whose fundamental ideas above all are not shared by any Democrat who has any right to profess to be a follower of any principle ever propounded by Jefferson. Let me read what Mr. Tugwell has said, not before this act was enacted, but let us see what he says now is the purpose of the Agricultural Adjustment Act. He said:

> We are now engaged in a drastic program of controlling agricultural products for the emergency. This in itself means that we are trying to control the entire utilization of all agricultural lands.

When we passed that bill, you and I fully realized that we were placing in the hands of Government the power to control the utilization of the land for an emergency, but that power was based on the farmer's voluntarily going into it. We were firm in the conviction that it was for the purpose of meeting the emergency. I do not believe there was a Member of this House who voted for the Agricultural Adjustment Act who believes that the purpose of that act was for Government to try to control the entire utilization of all agricultural lands. Why, the act provided for only three or four basic commodities; yet Mr. Tugwell himself says that the control of all agricultural lands is the program. You and I might have been excused for voting for the Agricultural Adjustment Act in the first instance, but today we are not to be excused if we vote to give one iota more of power to the Agricultural Department unless we are ready and willing to join the philosophy of Mr. Tugwell and say that the purpose of the program is primarily to control the entire utilization of all the land in this country. That is a Soviet program, and I will not join with that program. The truth is that he who today votes for this bill or any other bill which gives one bit more power to the Agricultural Department, so long as it is dominated by Mr. Tugwell, must stand in the position of saying that he approves of the socialistic program of the Government's controlling the entire utilization of all lands.

Mr. WADSWORTH. Mr. Chairman, will the gentleman yield?

Mr. McGUGIN. I cannot yet. I shall later. So that there may be absolutely no mistake about it, let me read to you what Mr. Tugwell says in the concluding words of his Philadelphia speech. I quote:

> Private control has failed to use wisely its control of lands. For the first time the Government is interested in the land as a whole. For the first time we are preparing to build a land program which will control the use of that greatest of all natural resources, not merely for the benefit of those who happen to hold title to it, but for the greater welfare of all the citizens of the country.

Those are the words of Mr. Tugwell. When we passed the Agricultural Adjustment Act, you and I thought that we were passing an act which would undertake to take care of the surpluses of wheat, cotton, tobacco, and possibly one or two other basic commodities. We did not understand that we were passing a land program, the purpose of which was to control land, not for the benefit of the man who happens to own it, but for the benefit of the greater welfare.

Mr. MAY. Mr. Chairman, will the gentleman yield?

Mr. McGUGIN. Not now. But what do we find? This Congress has passed no land bill. It has passed nothing except an Agricultural Adjustment Act. Yet Mr. Tugwell does not say that we are engaged in a program of trying to take care of the surpluses of a few basic farm commodities. Not at all. He says that we are engaged for the first time in building a land program which will control the use of that greatest of all natural resources, not for the benefit of the man who happens to own title, but for the benefit of the greater welfare of all the citizens of the country.

Who is going to determine what is the greater welfare of all the citizens? Why, Mr. Tugwell and the Agricultural Department, of course; and when you get it down to that point, it is verbatim the Russian policy. The Soviet is controlling all the land of Russia, not for the benefit of the man who happens to hold title, but for what the Soviet thinks is for the greater benefit of the Russian people. I am not yet ready to join in that program of collectivism.

Now, let us come to this bill. Whereas in the beginning it was a voluntary program, and the individual, free-born, God-fearing cotton raiser of America could join such program if he wished to do so voluntarily—but when you pass this bill, what is the position of the cotton grower? He will either join and let the Government dictate and control the use of his land or the Government will tax him out of existence. Boil it down and it is nothing less than legalized racketeering on the part of the Government to undertake to do indirectly what it has no right to do under the Constitution directly. Under the Constitution, the Congress of the United States has no more interest in a farm down in Texas than it has in a farm in England, but by this act, indirectly, Congress will exercise control over that farm in Texas, by using the power of taxation and saying to the man who operates that farm, "You will produce what the Government at Washington tells you to produce; and if you produce more, we will tax it and take it away from you." That is an artful way of the Government of the United States exercising control and domination over real estate within the borders of the respective States.

Mr. BANKHEAD. Will the gentleman yield?

Mr. McGUGIN. No; I cannot yield now. I must finish.

That is a power which is reserved to the States. My heart goes out to you southern Representatives from the Cotton Belt. I know the cotton producer is in distress, and he has been led to believe that this bill is going to give him a ray of hope. I do not believe that down in the bottom of his heart 1 Democratic Congressman in the South out of 10 really believes in the principles and precepts of this bill. I still believe that you Representatives from the great and gallant South still believe in the fundamental principles of the sovereignty of the States. I do not believe that you want to come here and make your States subservient to the Federal Government; however, in the political exigencies growing out of the depression, probably some of you think you must vote for this bill, but you will live to rue the day when you place the Southland under the domination of a Washington bureau.

Mr. MAY. Will the gentleman yield?

Mr. McGUGIN. I yield.

Mr. MAY. According to the quotation from Mr. Tugwell's speech, he has already planned the idea of building up a bureauracy and ignoring land titles. Is that so?

Mr. McGUGIN. Certainly, and he is just using these bills to give him a greater opportunity to do it. This bill is a means to an end.

Mr. KLEBERG. Will the gentleman yield?

Mr. McGUGIN. I yield.

Mr. KLEBERG. Of course, I hesitate to ask the gentleman to yield, being from the outlaw State of Texas, which the Constitution and Congress of the United States ignores; but I should like to ask this question, and only for the purpose of easing my friend's frame of mind. The gentleman seems to be very, very much afraid that the piece of legislation which we are now considering, which provides, first of all——

Mr. McGUGIN. Well, just a moment. I cannot yield further. If the gentleman desires to ask a question, he should ask it.

Mr. KLEBERG. This is a question.

Mr. McGUGIN. I yield to the gentleman to ask a question, but not to make a speech.

Mr. KLEBERG. The gentleman is worried over a piece of legislation which provides, first of all, for a referendum by those directly affected, and only those.

Mr. McGUGIN. I am coming to that in a minute.

Mr. KLEBERG. I hope the gentleman will discuss that phase of it.

Mr. McGUGIN. I will when I get to it.

Now, in considering this bill, if I did not have a single interest in the bill other than the social welfare of a given

section of the country, my interest in the future of the Southland would preclude me from supporting this piece of legislation. You are taking away 40 percent of the cotton production. Very well. When you take away 40 percent of the cotton production, what are you going to do with 40 percent of your cotton producers? This cotton program being forced upon the South, I fear, will bring to that land a woe and distress which it has not suffered since the days of reconstruction. You are not going to be able to drive from the plantations of the South 40 percent of your share croppers, black and white, and cast them upon the highways without bringing social despair to your fair land; and yet that is exactly what the Agricultural Adjustment Act, as applied to cotton, is doing today.

Mr. JONES. Will the gentleman yield?

Mr. McGUGIN. No; I cannot yield further. I must finish my remarks. I want to go into that in a little greater detail. In a goodly part of the South your cotton is produced on large plantations. Large planters own the land and rent it out to small croppers. When it was reduced 20 percent this summer, what happened was this: If the planter had 1,000 acres, he did not reduce the acreage of each of his tenants 20 percent, but in many instances he dismissed 20 percent of his tenants.

[Here the gavel fell.]

Mr. HOPE. Mr. Chairman, I yield the gentleman 10 additional minutes.

Mr. McGUGIN. Mr. Chairman, I hold in my hand Harper's Magazine, the February issue; and he who will read the article Tightening the Cotton Belt, beginning on page 308, will realize that the hope of a better day for the Southland is not to be found in reducing its cotton acreage 40 percent, and thereby driving 40 percent of the tenants out of business. Human selfishness enters into it. In the granting of the allotment checks, in great sections of the South, the tenants did not get their share of the checks. They were held out for debt, and now they are cast into unemployment and distress. When you drive 40 percent of those tenants from the plantations of the South, you are not going to drive them into the cities. They cannot go to the cities. There is no place in the cities for them. There is no place for them to remain, save back in their own neighborhood.

With thousands of these dismissed tenants in distress and despair, trouble is bound to come upon the Cotton Belt; and what is more, those who will suffer that hunger and want will be an uneducated class of people and, therefore, poorly disciplined socially to withstand their hunger and their want. Bloodshed on a wide scale may be the result.

It is said this bill is justified upon the ground that the tax cannot be applied unless there is a favorable referendum. I challenge the vote. It is not an honest vote. They tell us the Secretary of Agriculture has taken a referendum. All right; that is not an honest vote; it is not a fair vote. Why, one of the Democratic members of the Committee on Agriculture said it was a vote taken of 22,000 planters and that there were more than 22,000 cotton producers in his own district. There never will be an honest vote. This bill does not set up any machinery providing for an honest vote—just send out a mail-order referendum. If the time has come that we are going to operate government in the United States on the basis that the elected Representatives under the Constitution will abdicate, delegate their authority to the Secretary of Agriculture and tell him to act upon a mail-order referendum, then the time has come when the dignity of the great democracy of the United States has sunk far lower than our forefathers ever expected it to sink. If you believe in this, stand up here like legislators under the Constitution and vote today for the tax that you want to levy. The idea of transferring the taxing functions of the Government from the Congress to the Secretary of Agriculture, with him instructed to exercise it upon a mail-order referendum! That kind of government does not rise to the dignity of idiocy, to say nothing about the dignity of common sense.

So all this talk about a referendum is just so much smoke screen to shield those Members of Congress who are about to vote for this piece of legislation which they cannot in good conscience vote for open and aboveboard. So much for the referendum. I shall now turn my attention to other portions of the bill.

There are certain inalienable rights which should be preserved for the individual, and the founders of this Government thought they had preserved them. They never foresaw a time when a Congress would meet and pass legislation delegating the taxing power to some Cabinet officer with the provision that he should exercise it based upon a mail-order referendum. The next thing is when the referendum is taken, it will not be taken down to the poor illiterate white or black share cropper; it will be taken from the few large planters. That is the trouble with the agricultural program today in wheat, cotton, or hogs; it is playing into the hands of the large producer; it is monopolizing agriculture and denying a fair chance to the poor, lowly, struggling American citizen to make an honest living following that ancient and honorable occupation of producing food.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. McGUGIN. No; my time is limited.

Mr. BANKHEAD. The gentleman has made a very unfair statement.

Mr. McGUGIN. If I have, then the gentleman can get time in his own right and answer it. I cannot yield to the gentleman from Alabama.

Every move that has been suggested plays into the hands of the man who has been strong enough financially to produce even under unfavorable prices during the last few years, and that means that the man who has not been strong enough to produce during the last few years is left out. Whatever may be said, my friends, there is no answer to the agricultural problem which will prove to be for the general welfare of America, which answer penalizes the small individual farmer.

The primary purpose of the land is to make a livelihood for those who live upon the land; the secondary purpose is to make profits from the products thus produced. Instead of enacting legislation which protects the financial welfare of the large producer at the expense of the small producer, we had better enact legislation which will secure the rights and the opportunities of the small producer. Take the wheat bill, for instance; it played into the hands of Tom Campbell, the man who farms 75,000 acres of wheat a year. Proportionately as it has paid him a bonus, it has taken money away from the small individual who could hardly make a livelihood.

Now I want to discuss a provision or two in the bill itself. When you get down to subsections 1 and 2 of section 7 of the pending bill, it really looks as though you are legislating and providing something by law. But then you turn to subsection 3:

> Or upon such basis as the Secretary of Agriculture deems fair and just that will apply to all farms to which the allotment is made under this paragraph uniformly, within the county, on the basis or classification adopted.

Reduced to its last analysis, here is what this section of the bill is: You give to the Secretary of Agriculture the power to grant these allotments to individuals under such basis as he by regulation may prescribe. The only real, honest-to-God law provided in the bill is the manner in which the allotments are divided as between the different States and as between the counties within a given State. When it comes to the question of dividing the allotments as between individuals, you dodge that point and do not legislate but leave it to a pure matter of regulation by the Secretary of Agriculture.

[Here the gavel fell.]

Mr. HOPE. Mr. Chairman, I yield 5 additional minutes to the gentleman from Kansas.

Mr. McGUGIN. In closing let me say there is not a universal demand in the South for this legislation, because there are a lot of people down there who do not want it. I shall read a letter I received from a lady in La Grange, N.C.:

LA GRANGE, N.C., *March 6, 1934.*

Hon. HAROLD MCGUGIN,
House of Representatives.

DEAR MR. MCGUGIN: I am writing to ask you to tell Congress that I hardly think there are a majority of farmers of the South that want the Bankhead bill, or any other bill that is plunging us American farmers into Russian socialism, as the so-called "A.A.A." is doing. There are a large majority of farmers in this section that have signed the tobacco and cotton contracts (my husband did) not because they wanted to, but because it seems as if they were forced to do so, in order to sell what they make. And I want to say here that we had rather have the whole act repealed at the earliest possible moment than have the Bankhead bill passed.

So I am asking you, and all others in the House to stop such bills as the Bankhead bill.

We are asking for a check and balance between the President and Congress. We are asking that the administration go back to the promises of 1932 and let us be the free people that we should be. There may be some who have been asleep and haven't yet awakened, who think this will only last 2 years, that are in accord with it. But we who know that dictatorship, socialism, communism and such have been forced on other nations by so-called "emergency relief programs", know what is really being forced on us now. I wish you would read this to the House so they may know that everybody is not in accord with things like the Bankhead bill. We want to be able to own our homes and farms and to work those farms as we see fit and pay our just taxes, instead of being servants of a socialistic government.

When I speak my own convictions, I know that I speak the convictions of thousands of others.

I am, yours, with best wishes.

MRS. NANNIE STALLINGS.

There is a lady, the wife of a small farmer in North Carolina; but, none the less, from the language of her letter, one knows she is an educated woman; one knows she still loves and reveres the America of yesterday. She prefers the America of yesterday to an America built on the Tugwellian theory. What is more, she is yet a Democrat of the Jeffersonian school, and her thoughts are not controlled by any future elections; she is not reelection-conscious. She still stands in defense of America, in defense of her home, and in defense of the Southland, if you please. I thank you. [Applause.]

Mr. GILCHRIST. Did the lady date her letter?

Mr. MCGUGIN. It is dated March 6 of this year.

Mr. DOXEY. Mr. Chairman, I yield 10 minutes to the gentleman from Mississippi [Mr. WHITTINGTON].

BANKHEAD COTTON CONTROL ACT

Mr. WHITTINGTON. Mr. Chairman, the remarks of the gentleman from Kansas [Mr. MCGUGIN] are an excellent illustration of the accepted statement that it is much easier to criticize than it is to construct. The gentleman speaks of his interest in the people of the South. He admits the difficulties of cotton production. He has emphasized the problems of cotton growing. I dismiss his criticism by calling attention to the significant fact that he has offered no solution. For my part I prefer to follow the leadership of Franklin D. Roosevelt, who understands the problems of the South as well as the problems of the Nation, and who has demonstrated his ability not only to understand but to solve. [Applause.]

The pending bill is materially different from the so-called "Bankhead bill" as originally introduced in the Senate. That bill undertook to tax production. It is far different from the bill introduced by my colleague, Representative BANKHEAD, of Alabama. He undertook to tax the sale of cotton. The measure has been liberalized. At first it limited production in 1934 to 9,000,000 bales. Ten million bales are permitted under the pending bill.

The defects in administration have been remedied and many of the faults of the original bills have been eliminated. While not altogether free from difficulties of administration or from constitutional questions, I believe that the bill, as an emergency measure, is constitutional. Many of the defects pointed out by my able friend, Hon. Oscar Johnston, in the hearings before the committees in the Senate and House have been eliminated. The sharp practices of which tenants complain are prohibited. The bill will do justice to both the landlord and tenant.

I advocate the passage of the bill because I believe there must be compulsory control. The committee has done its best to report a fair and just control measure.

An alternative measure was suggested by my friend Oscar Johnson, whose opinions I value highly. He advocated conferring upon the Secretary of Agriculture the power to prescribe rules and regulations controlling the interstate and export movement of cotton, and providing penalties for those who violated any such rules and regulations. I have given careful consideration to the proposed alternative. I believe that it would be a delegation of legislative power that would be unconstitutional. There is no such delegation in the pending bill. A formula or standard is prescribed. The details of execution and the ascertainment of facts are to be exercised by the Secretary of Agriculture.

I favor the voluntary principle. I oppose compulsion. I oppose bureaucracy. The act is to supplement the Agricultural Adjustment Act. It will involve no substantial expenditure of public funds except in the collection of taxes, which is to be under the jurisdiction of the Commissioner of Internal Revenue. The machinery of the cotton-reduction program in the Agricultural Adjustment Act will be utilized in allotments and in the execution of the pending measure. Like the Agricultural Adjustment Act, it is emergency legislation. It is for the duration of 1 year, with 2 additional years, within the discretion of the cotton growers, the Secretary of Agriculture, and the President of the United States.

CONSTITUTIONAL

The bill imposes an excise tax on the ginning of cotton. It is to be uniform. The due-process clauses of the Constitution are not a limitation upon the taxing power. Congress has the power to lay and collect taxes, duties, imposts, and excises. The purpose is to reduce production. In the case of the *United States* v. *Doremus* (249 U.S. 86), the purpose was to suppress dealing in drugs. In *McCray* v. *United States* (195 U.S. 27, 61), the Supreme Court upheld the validity of the statute taxing oleomargarine. The intent was not to provide revenue but to prevent the selling of oleomargarine. The motive is immaterial. Congress passed an act levying a 10-percent tax on bank notes in 1866. The purpose was not to tax, but it was to prevent the issuance of bank notes by States. It was held constitutional. *Veasie Bank* v. *Fenno* (8 Wall. 533).

The so-called "*Child Labor cases*" may be cited in opposition. In the Child Labor case (259 U.S. 21), the court decided that the purpose was to regulate intrastate business and not to raise revenue. In the Board of Trade case, *Hill* v. *Wallace* (259 U.S. 44), the same doctrine was announced. The purpose was to regulate intrastate business. The Supreme Court of the United States will follow the oleomargarine case in passing upon the constitutionality of the pending bill. Both are interstate products and cotton oil finds its way into commerce.

NO DELEGATION OF LEGISLATIVE POWER

The bill prescribes the principle or formula. It stipulates the facts. The Secretary of Agriculture is vested with the execution of the act. From the days of Washington, Jefferson, and Madison, Congress has passed laws containing a general principle leaving the execution to executive officers. Much is left to the discretion of executive officials. The principles are summarized in *Mutual Film Corporation* v. *Ohio Industrial Commission* (236 U.S. 230–245). The flexible provisions of the Tariff Act of September 2, 1922, authorizing the President, within prescribed limits, to increase tariffs was upheld in the case of *Hampton & Co.* v. *United States* (276 U.S. 394).

SUPPLY AND DEMAND

The price of cotton depends upon the supply and the demand. While cotton is a world product, inasmuch as the United States produces the larger part of the world supply of cotton, the American price determines the world price. The supply is determined by the annual carry-over and the annual production. A large crop brings less in the aggregate than a small crop, as I shall undertake to show.

The pre-war production from 1909 to 1913 was about 13,000,000 bales annually, with an average carry-over of 3,132,000 bales, and with an average acreage of 32,153,000 acres. From 1925 to 1930, there was an increased carry-over and

the acreage jumped from 32,000,000 to 45,000,000. The carry-over in 1928 was 5,206,000 bales; in 1929, 4,507,000 bales, and in 1932, 13,228,000 bales. The average production for 1929, 1930, and 1931 was 15,155,000 bales. The carry-over has been reduced from 1932 and will likely be about 10,000,000 bales in 1934, but it is still excessive. It hangs like the sword of Damocles over the cotton growers of the South.

Cotton, of all agricultural products, is the most sensitive to the mandates of the law of supply and demand. The world price follows the American price.

THE GROWERS ARE ENTITLED TO THE COST OF PRODUCTION

The pre-war parity price 1909–13 was around 12½ cents per pound. The parity price is approximately 15 cents per pound today. Recovery means increased prices for cotton and all other agricultural products. The costs of cotton production have already increased 30 to 35 percent over what they were a year ago, and before the crop is harvested the costs will be at least 60 percent more in 1934 than they were in 1933.

AGRICULTURAL ADJUSTMENT ACT BENEFICIAL

The reduction program in 1933 under the Agricultural Adjustment Act was beneficial. The surplus of 1932 was reduced by a million and a half bales. The cotton acreage in 1933 was reduced by 25 percent. There was a reduction of at least four and a half million bales in production. The program was both successful and beneficial. It was a part of the general program for recovery. The currency legislation and other emergency legislation was helpful, but the reduction program of 1933, coupled with the reduction program for 1934, supplemented by the pegging of the price of cotton at 10 cents, has been the salvation of the cotton growers of the South, but it has not gone far enough. I hazard to think of the plight of the cotton farmers if there had been no reduction program in 1933. Cotton increased from 5½ to 10 cents per pound. With ideal weather conditions there was a production of 13,000,000 bales and if there had been no reduction there would have been 17,500,000 bales with 5-cent cotton.

It is asserted that the cotton growers of the South favor the compulsory plan. I believe that the cotton growers advocate legislation that will force cooperation by all. I think there is a prevalent idea that compulsory legislation will only apply to those who refuse to cooperate. Such would be class legislation. It would violate the Constitution. There would be no uniformity. All must be embraced. If there is to be compulsion, it must be for all or none. In practice, compulsion in 1934 will mean that those who have cooperated will be allotted the average yield of their lands for the years 1928 to 1932, inclusive. At the same time, those who have refused to cooperate will be compelled to join in the program without rental benefits. Such will be the practical effect.

It is said that 85 to 90 percent of the growers have signed the program for 1934. Owners of 5 acres or less are exempt. All the States, except North Carolina and Texas, have substantially cooperated. Those cultivating 5 acres and less in North Carolina and the great number in Texas largely account for the failure of full cooperation in these two States.

The program for 1933 took 10,000,000 acres out of cultivation. The program for 1934 will take 16,000,000 acres out of cultivation. The bill under consideration, I repeat, will supplement and not take the place of the 1934 program. It will really compel all to cooperate in the program by preventing the sales of those who do not reduce their acreage and thus reduce their bales.

VOLUNTARY PROGRAM NOT ENOUGH

If all cooperated in the voluntary program, the problem would not be solved. Intensive cultivation and increased use of fertilizers will increase production, thus increasing the carry-over and reducing the price. Acreage reduction has been tried. While it has been of great benefit, it has not completely solved the problem. Bales, after all, determine the price. The pending bill contemplates a maximum fixed production. If nature is unusually indulgent, if the weather is ideal, there is no prohibition against harvesting the excess, but it must be carried forward into the succeeding year or be subjected to the prescribed tax. The prohibition is against sales. The average 5-year period is the yardstick. The remedy is to provide for a definite production with the least possible injury to the grower. A man may grow as much cotton as he desires, under the bill, but he cannot market more than his allotment. The manufacturer is dependent upon the farmer for the sale of his product. I maintain that for the common good of our common country, the farmer should not market in any year in which it is grown more than the amount of cotton allotted to him.

I wish we might avoid limitations. There are similar limitations upon the manufacturer, but we have tried the voluntary method in the South for 25 years. I know of no efficient solution that does not involve compulsion. All legislation is more or less compulsion. The greatest good to the greatest number is to be considered.

[Here the gavel fell.]

Mr. WHITTINGTON. May I have a little more time?

Mr. HOPE. I will yield the gentleman 10 minutes more. I want to ask the gentleman a question. Is it not the opinion of the gentleman that the voluntary plan has broken down?

Mr. WHITTINGTON. I do not think it has. No voluntary plan that was as wide-spread as the voluntary plan of 1933 is a failure, when you take out of the production four and a half to five million bales of cotton, that resulted in the price of cotton being increased from 5½ to 12 cents a pound. I challenge the statement that there was failure in the voluntary reduction of 1933. It was general and the most wide-spread ever known.

Mr. HOPE. Is it not a fact that 85 percent of the cotton acres were signed up for the voluntary plan?

Mr. WHITTINGTON. Yes; except in two States—Texas and North Carolina—and I say it without criticism. North Carolina, because they do not recognize any farmer with less than 5 acres, and Texas because of its large area and great number of growers. I repeat, that if 100 percent of the cotton growers signed up, by the use of fertilizer and intensive cultivation, in my judgment, there would be no guaranty of definite production.

Mr. HOPE. Does the gentleman think the cotton growers of the South are going to violate the spirit of the law by using more fertilizer and more intensive cultivation?

Mr. WHITTINGTON. Well, they are just as human as the wheat growers of Kansas.

Mr. HOPE. I do not think the farmers of my State would knowingly violate the spirit of the law, and I do not think they intend to do it.

Mr. WHITTINGTON. I want the cotton growers of the South to raise the best crop they can. I do not want to deprive them of the initiative for their individual success or rewards. The excess production can be stored without paying the tax.

Mr. HOPE. In the gentleman's opinion, will this bill result in any revenue being collected?

Mr. WHITTINGTON. Well, the compulsory feature of the bill is a fundamental part of it, and I doubt if there will be a large amount of taxes collected.

Mr. CHRISTIANSON. Will the gentleman yield?

Mr. WHITTINGTON. I yield.

Mr. CHRISTIANSON. I would be interested in having the gentleman explain, if he can, the difference in principle between this bill and the child labor bill, which was declared unconstitutional by the Supreme Court of the United States a few years ago, on the ground that it was an improper exercise of the power regulating interstate commerce?

Mr. WHITTINGTON. I am glad to answer the question. I do not want to evade, and I wish I had the time to discuss, the legal phases of the legislation. I would be glad to discuss the constitutional provisions, as I say, if I had the time, but

I make this statement with respect to the so-called "*Child Labor cases.*" There were two of them. One was declared to be unconstitutional by the Supreme Court of the United States because it undertook to regulate the intrastate business of manufacturing concerns employing child labor (247 U.S. 251). The other was declared to be unconstitutional because the Supreme Court of the United States held that the tax was prohibitive; that it was a penalty in the name of a tax, and thus void (259 U.S. 39). There was no emergency. Probably the most important phase of the legal feature involved in this act is that we are in the midst of an emergency—an emergency that has provoked the N.R.A. Oh, yes, gentlemen on the Republican side may smile, but in my judgment we are in a lot better condition now than we were in 1930–32. We may have made failures, but to err is human. We are in an emergency, I repeat. This legislation is limited to the period of the emergency, and in and of itself it does not involve the expenditure of very much Federal funds because the taxes are to be collected by existing agencies, and if there be no large amount of taxes collected, there will be no material additional expenditures from the Public Treasury, inasmuch as, under the terms of this act, practically all expenditures would be in the collection of taxes.

Mr. CHRISTIANSON. Then, as I understand the gentleman, he does not seek to harmonize this with the holding of the Supreme Court of the United States.

Mr. WHITTINGTON. I undertake to say that those two cases were held unconstitutional for the reasons stated, but cotton is not only an article of interstate commerce; it is the most important of all articles of international commerce. We are dealing not only with the most extensive article of interstate commerce in the United States but in the world, for millions, not only in the South, not in the United States but in England, France, Germany, and the other civilized countries of the world, are dependent for their daily bread upon cotton and the manufacture of cotton.

Mr. CHRISTIANSON. I do not think the gentleman has answered the question, because it is conceivable, of course, that the manufacture of cotton and the employment of child labor in the manufacture of cotton are intrastate to the extent that those acts occur within the State, but so is the growing of cotton, and I do not see how the gentleman can distinguish between the right to apply the power of taxes to control the growing of cotton, when the Supreme Court has distinctly said it cannot use it for the purpose of preventing child labor in the manufacture of cotton.

Mr. WHITTINGTON. I value the opinion of the gentleman, but I insist that he must distinguish between intrastate and interstate commerce. I have undertaken to distinguish the *Child Labor cases* from the pending measure by pointing out that we are dealing here, as is declared in the policy of the act, with cotton in its interstate relation.

Mr. CHRISTIANSON. It was intrastate, so long as it is being grown, but nevertheless it passes into interstate commerce. The cotton cloth that is being manufactured with child labor is intrastate so long as it is being manufactured, but it becomes interstate. I do not think there is any validity in the distinction of the gentleman.

Mr. WHITTINGTON. While personally I think the decisions sound, I am inclined to believe that if the *Child Labor cases* were before the Supreme Court at the present time, or at least one of them, instead of our having a 5-to-4 decision against their constitutionality, we would have a 5-to-4 decision in favor of their constitutionality.

Mr. CHRISTIANSON. The gentleman has finally made the argument that I expected him to make.

Mr. WHITTINGTON. Control is not without legal and practical difficulties, of course, but no forward movement, no legislation to meet modern conditions can be.

Mr. Chairman, I say that voluntary limitation or reduction is not enough. It has been tried. It has been helpful. I have undertaken to point out why there cannot be a perfect permanent solution. It is difficult to ascertain the sentiment of the farmers in the South as well as it is elsewhere. This one thing I do know. The farmers of the South advocate legislation that will require all to cooperate, and they favor cooperation today as they have never favored it before, because they have seen the beneficial results. It is impossible to force cooperation by all unless all classes are included in the legislation.

The CHAIRMAN. The time of the gentleman from Mississippi has again expired.

Mr. HOPE. Mr. Chairman, I yield 2 minutes more to the gentleman from Mississippi.

1926 COMMODITY PRICE

Mr. WHITTINGTON. Mr. Chairman, the purpose of much remedial legislation in both currency and agriculture was to restore the 1926 price level, but it would be a sad day for cotton if the price of 1926 obtained. There was a maximum crop that year. It was the largest in history—18,000,000 bales were produced. The price per pound December 1, 1926, was $0.109. The aggregate value of the crop, based on December 1 price, was $982,736,000. In 1927, with 5,000,000 bales less, the price was $0.196 and the aggregate value was $1,269,885,000. In other words 5,000,000 bales less brought twice as much per pound and $287,885,000 more for the crop. It is the irony of fate that prosperity to the farmer really means adversity—a good crop always means a lower price. There is something wrong with our economic system when the success of the farmer really spells his doom.

Again, in 1923 there was a production of 10,000,000 bales, with a price of 31 cents per pound, and an aggregate price of $1,571,829,000; whereas, as I have pointed out, in 1926, with 8,000,000 bales more, the average price was 10 cents and the aggregate value $600,000,000 less. The following table gives the price per pound received by the producer and the total amount received for the years 1923 to 1929, inclusive:

Year	Production (bales)	Price per pound received by producers, Dec. 1	Farm value, basis Dec. 1 farm price
1923	10,140,000	$0.310	$1,571,829,000
1924	13,628,000	.226	1,540,884,000
1925	16,104,000	.182	1,464,032,000
1926	17,977,000	.109	982,736,000
1927	12,955,000	.196	1,269,885,000
1928	14,478,000	.180	1,301,796,000
1929	14,828,000	.164	1,217,729,000

THE BILL

The bill is intended to limit production in 1934 to 10,000,000 bales. If more than the allotment is produced, it may be stored without the payment of the tax. Such storing will result in a reduction in the following year.

Production is apportioned among the States under standards prescribed. I should like to see the allotments liberalized among the States, in the event of failure in some or overproduction in others. A tax is levied against the ginning of cotton, to be paid at the time of sale.

The State of Mississippi produced approximately 11 percent of the average cotton crop, 1928 to 1932. Mississippi will thus be allotted 1,100,000 bales. The Agricultural Adjustment machinery will be used in making the allotment. The bill will be applicable in 1935 if the owners of two thirds of the cotton lands favor the allotment plan. The President may, by proclamation, declare the emergency passed and proclaim that the act shall no longer be applicable.

AMOUNT OF THE TAX

The yardstick for ascertaining the amount of the tax is fixed—it is 50 percent of the central-market price. Such a price is not without difficulties, but the decision of the Secretary of Agriculture in ascertaining the facts will control. The method has been tried. He fixed the amount of the processing tax. The Secretary is required to proclaim the national allotment at least 60 days prior to the beginning of the cotton year.

10-PERCENT TOLERANCE ALLOTMENT

Many good farmers have not raised cotton to a considerable extent in the past few years. They desire to cooperate

in the program. There is a provision for an allotment not to exceed 10 percent of the total lands in the States to those who could have produced cotton if they had cultivated their lands to cotton. In other areas there were droughts, storms, and floods that prevented normal production. The 10 percent will enable the Secretary, within these States, to adjust production so that all may be considered.

COMPULSORY CONTROL

The independence of the farmer has been his handicap. I oppose compulsion, but it is essential that laws promote the greatest good to the greatest number. I wish that the farmers might cooperate without compulsion. It would be ideal if society could exist without laws. It is necessary for some to yield for the common good. The patriotic citizen will not complain and the citizen who refuses to cooperate without valid excuse will be compelled.

Compulsory control will not completely solve our problems. Cotton is a world product. There must be tariff adjustments if the cotton grower is to prosper. World cooperation is necessary. We cannot sell unless we buy. In tariff adjustments the manufacturer and the grower must be considered. There must be concessions that will enable the collection of our foreign debts, both public and private, and the sale of our surplus agricultural products.

There are difficulties in compulsion. The way of progress is the way of difficulty. We have tried inaction. We have been content to criticize. We know the difficulties. We must look to the future.

It is said that with the reduction of cotton acreage, tenants will be without employment. I believe that the cotton growers will be better off with reduction. Home ownership will be encouraged. The farmer will raise feed and food. He will become self-sustaining. There will be a satisfied and satisfactory farm life.

EXPENSE AND SUBSIDY

The material expense under the act will be in the collection of the ginning tax. It is not contemplated that this collection expense will be large and the probability is the expenses of the legislation will be negligible. It must always be kept in mind that the organization and machinery of the reduction program will be utilized in the compulsory program. The processing tax has enabled the cotton-reduction program to be substantially self-sustaining. Any expenditures of administration and tax collecting, under the bill, would be justified if the bill results in a fair price to the cotton growers of the South. They will thus be enabled to purchase from the manufacturers. A prosperous agriculture means a prosperous industry.

COOPERATION

I deplore the regimentation of agriculture and industry. I appreciate the difficulties in administration and execution in the pending act. In the program for national recovery, President Franklin D. Roosevelt advocated aid to agriculture as fundamental. He now advocates the principle of control in cotton reduction. He is given authority to discontinue that control in the pending act. He has demonstrated that if the measure fails, he will be among the first to acknowledge failure and advocate another solution.

I know that the President is the friend of the South. He knows the problems of the Nation. Without any loss to the Federal Treasury he brought salvation to the cotton growers of the South by advocating the Agricultural Adjustment Act and by subsequently pegging the price of cotton at 10 cents per pound. I am persuaded that the President will continue to advocate a square deal for the South and for my part, I shall continue to cooperate with him. [Applause.]

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I yield 10 minutes to the gentleman from Texas [Mr. TERRELL].

Mr. TERRELL of Texas. Mr. Chairman, I want to advert to another subject for just a few moments. I want to get away from the humiliating discussion we have had about "legalized murder" and talk a little bit about "unlegalized bank robbing."

I want to relate a little incident I saw just a day or two ago where a bank in Greenville, S.C., had been robbed of $50,000 and another in Richmond, Va., where a messenger was robbed of $60,000, and one man killed. Just a few days ago 2 bank robbers in my little town of Alto, Tex., a town of only 1,000 population with 2 banks, undertook to rob 1 of those banks. While they were looking around to see how they could approach that bank, the president of the bank became suspicious, so he secreted himself with a shotgun in the bank, and when the two robbers came in with guns in their hands and held up the cashier and two or three customers, lining them up against the wall, the man from the secreted spot turned loose a shotgun fire on the robbers, and this frightened them so that they ran out of the bank to their car, with the bank officials shooting at them. The city marshal heard the guns outside, and he began shooting at the robbers and killed one before he could get into his car. He and the bank employees gave chase to the other robber and captured him before he could get away.

One of them is dead, and the other is in jail. That is the way they handle bank robbers in my town. [Applause.]

Now, Mr. Chairman, in my limited time I cannot discuss the merits of this bill, and for the further reason that it has no merit. [Laughter and applause.] One gentleman said a while ago he would be glad to accept perfecting amendments to perfect the bill. There is only one amendment that could be offered that would perfect this bill, and that is to strike out the enacting clause. I wish I had time to discuss the provisions of this bill.

Mr. KENNY. Will the gentleman yield?

Mr. TERRELL of Texas. I yield.

Mr. KENNEY. Does not the gentleman believe that it is about time we struck out some of the taxes?

Mr. TERRELL of Texas. Yes, sir; I do.

Now, Mr. Chairman, unless my time is extended I cannot answer any questions. I regret that very much, for you could not please me any more than to allow me to stand here for an hour and answer questions for you. I want you to understand that this bill proposes to regulate the marketing of cotton in interstate and foreign commerce, when its sole object is to control production. It undertakes to do that by a tax on cotton. The advocates of the bill frankly say there will be no tax collected. They do not intend to collect any tax, but they intend to control the production of cotton in the States.

The Federal Government has no right to control the production of cotton in any State in the Union. If it can control the production of cotton, it can control the production of all other products.

North Carolina, for instance, manufactures more cotton than she produces. Do you think that, if North Carolina wants to manufacture her cotton in her factories, the Federal Government can go in there and put a tax on cotton in order to limit production? If they cannot tax cotton in North Carolina, how can they tax it in any other States?

The gentleman from Minnesota [Mr. CHRISTIANSON] a while ago, asked a question about the decision of the Supreme Court in the child-labor case. The question was not answered, except in an evasive manner. The fact is the court held in that decision that the Congress could not do indirectly that which it could not do directly, and that the tax was a subterfuge, and they rightfully declared it unconstitutional.

This tax is a subterfuge and a scheme to get around the plain letter of the Constitution. Let me show you how they are trying to get around it in another way. Realizing the weakness of the argument they make, this is what they write into the bill: "It is prima facie presumed that all cotton, and its processed products, will move in interstate or foreign commerce."

They are going to write that into the bill to make it legal. Prima facie they presume it is moved in interstate

and foreign commerce, when they know it is not all going that way. Every State in the Union has some factories, one or more, and they will manufacture some of that cotton. The cotton manufactured in the State where it is grown will not go into interstate or foreign commerce. Men who sell directly to the cotton mills in their State, could double, or quadruple, their production, and a Federal law could not legally reach them. Thousands of tons of cottonseed and cottonseed meal are fed to livestock in the State where it is produced, and do not go into interstate commerce. Therefore, a Federal law could not legally control these products. This is nothing in the world but a subterfuge to try to violate the Constitution and control individual rights, just because we have a little surplus cotton now.

I want to show you the cause of that surplus. Before I come to that, I want to state that a few years ago there was a great hue and cry throughout the South to limit the cotton acreage by law, and several States passed such laws. My State passed a law. We produce over 5,000,000 bales of cotton. We are the largest producer of cotton in the United States. I told the advocates of the law that it would not be legal; that it could not stand the test of courts even in my State, but they passed the law because there was a clamor for it; and as soon as it went to the courts, it was stricken down by the District Court. Then it went to the Court of Civil Appeals, and that court struck it down, and they dared not carry it any further—to the Supreme Court of the State of Texas.

I do not want to see this law passed; but I believe if it is enacted, we can yet depend on the Supreme Court of the United States to strike down a law of this kind, even though they have upheld some laws the constitutionality of which was very doubtful.

The surplus cotton we now have in this country is not caused by overproduction. It is caused by underconsumption. There has never been overproduction in this country since cotton was first grown. We never destroyed cotton until last year, and that was done voluntarily; and if that was a success, as claimed by the advocates of this bill, we ought to continue the voluntary plan. There have always been lean years when there was a short crop to take up the surplus. We had a big crop in 1920, and in 1921 we had a short crop and only made about 8,000,000 bales and we took up all the surplus. In 1926 we had a large crop of more than 17,000,000 bales, and the price of cotton dropped down again. The next year we had a short crop and the market went right back up again. There has never been a permanent surplus. The only reason there is a surplus now is because the people of this country, and of foreign countries, have not had the money with which to buy the cotton. They can use every pound of it now for the manufacture of clothing, if they had the money with which to buy it. That is what is the matter; it is not overproduction of cotton; it is underconsumption.

I shall insert a short table, showing the world cotton production and the production of cotton in the United States, with the average United States prices covering the years from 1925 to 1932, inclusive. Also showing the production and price of wheat in the United States for the 8-year period from 1925 to 1932, inclusive.

World cotton production (bales)

1926	27,900,000
1927	28,400,000
1928	24,000,000
1929	36,900,000
Total	107,200,000
Average	26,800,000
1930	26,500,000
1931	25,800,000
1932	27,500,000
1933	24,000,000
Total	103,800,000
Average	25,950,000

United States production

1925	16,000,000
1926	17,977,000
1927	12,955,000
1928	14,477,000
Total	61,409,000
Average	15,352,500
1929	14,825,000
1930	13,932,000
1931	17,096,000
1932	12,737,000
Total	58,590,000
Average	14,647,500

United States price

1925	24.21
1926	19.71
1927	14.74
1928	19.98
Total	78.64
Average	19.66
1929	18.98
1930	16.16
1931	10.08
1932	6.20
Total	51.42
Average	12.35

United States production of wheat (bushels)

1925	668,982,000
1926	833,554,000
1927	874,633,000
1928	926,130,000
Total	3,303,299,000
Average	825,824,750

Average, 825,824,750.

1929	812,573,000
1930	857,427,000
1931	900,219,000
1932	726,831,000
Total	3,297,050,000
Average	824,262,500

United States price per bushel

1925	$1.40
1926	1.20
1927	1.11
1928	.98
Total	4.69
Average	1.17
1929	1.03
1930	.67
1931	.39
1932	.35
Total	2.44
Average	0.61

These figures show that the difference in the average price of cotton for the 4-year period from 1925 to 1928, inclusive, and the average price for the years 1929 to 1932, inclusive, is 7.31 cents per pound. This means a loss to the cotton grower on the 58,590,000 bales grown during the last 4-year period, compared with the previous 4 years, of $2,050,650,000.

They also show that the difference in price of wheat for the same 4-year period is 56 cents per bushel, and this means a loss to the wheat growers in the past 4 years on the 3,297,-050,000 bushels grown of $1,846,348,000. No wonder the farmers have no purchasing power. The same loss can be shown on corn and all other farm products and livestock. Restore this purchasing power to the farmers and there will be an immediate demand for manufactured goods and the wheels of industry will begin to turn and idle labor will be employed to supply the increased demand for factory products.

During the years from 1929 to 1932, the average price of cotton was 12.35 cents, compared with the price of 19.66 cents, for the period from 1926 to 1929, inclusive. Why? Because, during the latter period the people had not the

purchasing power to buy the cotton or its products. They could use it all, if they had the money to buy it.

The trouble has been the maldistribution of money. The money has been hoarded and idle, in the hands of a few, who put it into interest-bearing, tax-exempt bonds, when it ought to be at work employing labor and making goods for the people, and making purchasing power, so the people could buy the goods. Get this money back into the hands of the people by paying them a better price for their products and give them purchasing power, and prices of farm products will take care of themselves. [Applause.]

The table, presented above, shows that there was more cotton produced during the 4-year period when the price was 19.66 cents, than there was during the years the price was 12.35 cents; and more wheat was grown during the years when the price was $1.17 per bushel than during the years when it was 61 cents per bushel. The population was also greater during the last 4 years when we had shorter production and lower prices of both cotton and wheat, which would seem to indicate that we should consume more, at lower prices. This paradox cannot be accounted for on the theory of overproduction. It is underconsumption. The demand is here, but money, the medium of exchange, is lacking.

Some seemingly intelligent people look upon this panic as though it were a curse sent by God Almighty, upon the people. It is sacrilegious to charge God with this panic. It is a man-made panic, and man will have to work out of it.

You cannot get out of it by curbing the productive capacity of the people, and by issuing interest-bearing, tax-free bonds, and taxing the people for 40 years to pay the bonds. You cannot borrow this country out of debt or borrow it into prosperity. We must produce something and sell it at a profit before prosperity can be restored. [Applause.]

It will require a better distribution of the money supply to restore prosperity; and the sooner we get back to basic principles of money supply and control, the quicker we will restore prosperity. We cannot do this by coercing the people, and limiting production, or by shackling industry in a strait-jacket, as the N.R.A. is doing, or by controlling hours of labor and wages, and running private industry by Federal bureaucrats, in Washington. Threats are now made that this control of agriculture and industry must be made permanent. If so, it must be done as it is being done in Italy and Russia, by a Mussolini or a Stalin, with an army to enforce it, and we are rapidly approaching the Soviet system.

The Government must exercise its constitutional function to coin money and regulate its value and distribution to meet the business needs of the country, before prosperity can ever be restored.

I should like to call the attention of the Members who do not live in cotton-growing States to the effect this bill will have on them in case it becomes a law. More than half of all farmers in the South are tenants, or share croppers; and if cotton production is reduced 30 or 40 percent, this land taken out of cotton will be devoted to the cultivation of other crops that will compete with farmers in other States and increase the surplus of the crops you grow and lower the prices of your products.

We must raise other crops to take the place of cotton, or 30 or 40 percent of our tenant farmers will have no homes and no land to work. You should seriously consider this very grave problem before you vote for a bill like this, which is sure to dislocate our proper agricultural equilibrium and the present system of exchanging our surplus farm products with our neighbors in other States; and if it should temporarily help us by raising the price of cotton, it would hurt you, because we would grow the very products you have been selling us.

I speak from experience as a practical farmer, as I have worked in all phases of farm life from hired hand, where I received 25 cents per day, 50 cents per day, and $1 per day; worked as a tenant farmer and as a landowner. I have paid for my farm and no one holds a mortgage against it, and I am not asking any assistance from the Government, except that it take the tax-eaters off my back and not try to run my business. [Applause.]

Texas produces 5,000,000 bales of cotton annually, and can easily produce 10,000,000 bales, which is all that is allowed for the cotton-producing States under this bill. She produces 50,000,000 bushels of wheat, and can, and will, produce 100,000,000 bushels, or one eighth of the entire crop, if cotton production is curtailed by law. It will then require another law to curtail the production of wheat, and there will be no end to Government regulation of the farmers' business. I earnestly urge the Members from the States not producing cotton to consider the seriousness of this measure before casting their votes for it. You need not think that because a few men have been in Congress 15 or 20 years and lost touch with the people, they know more about the sentiment of the people than those who are fresh from the ranks of the people.

As commissioner of agriculture of my State for 10 years, I became thoroughly familiar with agricultural conditions in all parts of my State, and I know the conditions and sentiments of the people, and I believe that a vast majority of them do not favor having the Government control their farming operations.

If the Government will stop the fixing of prices of farm products by the gambling exchanges, and permit the natural laws of supply and demand to operate, and perform its functions in the issuance, regulation, and control of the money, as provided in the Constitution, and stop issuing interest-bearing, tax-free bonds, and lessen our tax burdens, we will ask nothing more. [Applause.]

Mr. JONES. To save time, I may state to the members of the Committee that when we go back into the House I shall ask unanimous consent that all Members may have the privilege of revising and extending their remarks on the bill.

Mr. Chairman, I yield 10 minutes to the gentleman from Arkansas [Mr. MILLER].

Mr. MILLER. Mr. Chairman, I am just as much interested in preserving the individual rights of the American people as anybody can be. We may make beautiful speeches based on theory, but in this country today we are faced with a condition which demands action if a great industry is to be preserved and if the people engaged in it are to obtain the relief they have the right to expect.

Certain facts we all may concede as being true; one is that world consumption of American cotton is around 12,000,000 bales per year. The average production of American cotton not only supplies the domestic needs but exceeds the export requirements by approximately 3,500,000 to 4,000,000 bales a year. This condition has prevailed for years. As a result, the accumulated surplus today is around 13,000,000 bales. This surplus is a menace to the welfare of the cotton grower. He cannot hope to obtain the cost of production, to say nothing of a profit, until this menace is removed, and this can only be done by controlling the future production until this surplus has been exhausted and has ceased to exist. It matters not what the cause of the existence of the surplus may be, the fact is that it exists and must be removed before the cotton farmer will be guaranteed that the price of his product will be governed by supply and demand. No commodity within my knowledge is so susceptible to the law of supply and demand as is cotton, and if this bill is enacted it will mean to the farmers of the South that they will receive a fair price for their labor, and the farmer who is using that crop as a producer of cash will have the assurance that his labor will not be in vain. There is no question of individual liberties involved herein. It is a question of saying to those men who are unwilling to cooperate that you must conduct your business along and upon such a scale that you will not impoverish your neighbor.

Another fact we must admit is that we cannot impoverish millions of people in this country who are engaged in cotton production and still expect a well-balanced prosperity to return, or long remain if it should return. Therefore we

are faced with the necessity of doing something to regulate the supply of cotton. The States cannot do it. We have discussed it in the South for years. The States cannot do it, because Arkansas will not reduce her acreage 50 percent for fear Tennessee will not do it; Tennessee will not do it for fear Mississippi will not; and so on. Thus has been brought about the necessity for action.

Last year we undertook to reduce the production of cotton by restricting the acreage by the plow-up campaign; and I ask you gentlemen who have not had first-hand experience in the South not to be misled into believing that that campaign was a failure. It was everything but a failure; it was a success. We cannot, however, control the production of cotton by a reduction in acreage, because, by the use of fertilizer and through the practice of intensive cultivation, 60 acres can be made to produce as much cotton as 100 acres without this intensive cultivation and use of fertilizer; so the only sensible control is a baleage control. This is the reason this legislation is presented; and the basis of this legislation is baleage control.

Some of the Members are very solicitous about the South. We appreciate your solicitude, but no man is more solicitous of the South than we who live there. We want to see the agriculture of the South prosperous as you gentlemen claim you want to see it; we want to be able to buy the things the Northern States produce; we want to be able to afford the Northern States a market for the things they produce. But unless we can sell the things we produce at above the cost of production the North cannot have this market, and we cannot buy.

Prosperity, Mr. Chairman, cannot exist in unbalanced proportions. It must be well rounded; and you people who do not produce cotton are just as much interested in cotton-production control, from an economic standpoint, as we are.

Some Members have said they would be glad to support this bill if its provisions were not compulsory, and point to the success of the reduction program last year which was not a compulsory program. Let me tell you the reason why this must be compulsory. Unfortunately in the South, as elsewhere, are a few men—we called them cotton hogs for a long time; you have them in the North; they may be wheat hogs, corn hogs, or some other kind of a hog—we have men everywhere who seek to profit at the expense of their neighbors.

We have men there who will not cooperate in the voluntary reduction program; but by far the greater majority of the people do realize the absolute necessity of reducing the production of cotton, and they want it. Therefore, make it uniform. This bill provides that the program will be put into force when and only when two thirds of the parties in interest indicate that it should be. It is just; it is fair and equitable, and all producers of cotton will be treated alike. The same rule and same proportion of reduction will apply to one that applies to another. No fair-minded man will object if all are treated alike and the chances for obtaining an unfair advantage are removed. The man who is unwilling to cooperate for the benefit of all in these times is not entitled to much consideration and it is only that man who can or will complain.

Mr. HOPE. Will the gentleman yield?

Mr. MILLER. I yield to the gentleman from Kansas.

Mr. HOPE. That does not apply, however, to this year?

Mr. MILLER. No; I may say to the gentleman the reason why it does not apply this year is because it is not necessary to invoke the referendum to obtain the thought and desires of the people of the South. About 85 percent have signed up on the voluntary plan, indicating they favor control of production.

Mr. BLANCHARD. Will the gentleman yield?

Mr. MILLER. I yield to the gentleman from Wisconsin.

Mr. BLANCHARD. Does the gentleman think it is necessary to extend the compulsory feature to all agricultural products now subject to the A.A.A. program?

Mr. MILLER. I may say that the condition of the surplus of each particular commodity would largely control the answer to that question; in other words, the amount of the surplus would be the controlling factor.

Mr. BLANCHARD. Let us assume that in a given field—for instance, wheat—there is a surplus. Does the gentleman believe it is necessary to extend the compulsory feature to wheat in order to control that surplus?

Mr. MILLER. If 66⅔ percent of the bona-fide wheat producers of the country want to reduce their acreage or want to reduce their production, the recalcitrant one third should be compelled to join hands with them for the benefit of all.

Mr. KLEBERG. Will the gentleman yield?

Mr. MILLER. I yield to the gentleman from Texas.

Mr. KLEBERG. In connection with the referendum on this bill and the figures contained in the hearing, is the gentleman acquainted with the fact that the replies generally covered all of the committees that had to do with the voluntary-reduction campaign in cotton acreage in the United States, and in reality expressed the opinion of the cotton raisers contacted by committees as directly as if an all-inclusive individual referendum had been conducted?

Mr. DONDERO. Will the gentleman yield?

Mr. MILLER. I yield to the gentleman from Michigan.

Mr. DONDERO. Will the gentleman touch on the phase of what is to become of the 40 percent taken out of the cotton industry and whether it will be used in competition with other agricultural products?

Mr. MILLER. No; it will not be used in competition with the other agricultural products included in the Agricultural Act, but the curse of the South—and I may say the curse of agriculture in general and every agricultural community—has been the one-crop system.

Mr. HOPE. Mr. Chairman, I yield the gentleman 3 additional minutes.

Mr. MILLER. Whenever any district, be it North, South, East, or West, follows exclusively the one-crop system as a cash proposition, that district is not going to be prosperous very long at a time.

There is one other thing to which I call your attention. This refers to section 8 of the bill. No one need fear that the little cotton producer is going to be harmed by this bill. Section 8 takes care of this proposition.

Section 8 reserves 10 percent of the allotment to the States for the purpose of taking care of the man that goes out on his 40-acre farm and desires to plant 5, 7, 8, or 10 acres in cotton.

I have discussed the matter with the cotton section of the Agricultural Adjustment Administration. They felt that 5 percent would be all that would be necessary. I doubt whether 10 percent is enough, and unless I am convinced that 10 percent is sufficient I am going to propose an amendment that that reservation be made 15 percent in order to take care of the little man and the man who has heretofore been cooperating. The big cotton producer does not need anyone to look after his interests. He is looking after himself. He is the man largely responsible for the condition in this country today, so far as the cotton industry is concerned. He is the man that must be dealt with. He is the recalcitrant man who has insisted on producing from year to year this enormous surplus; and, therefore, he is the man who has brought about the condition that exists in the South today.

May I call attention to another section? The original section 3, as written, I think was right. The consent was based upon two thirds of the persons who own, rent, share-crop or control the land. That is just. I am not criticizing the committee, but they in their wisdom thought that they were doing the right thing to have this changed to the persons who own, rent, share-crop, or control two thirds of the land. It is my present opinion that the bill as reported by the committee should be amended so that two thirds of the persons will control the question as to whether control shall be undertaken, rather than to provide that two thirds of the land used in the production should control. In other words, in ascertaining what the desires of the people in interest are, I am not willing that 1 man who controls 640 acres of

cotton land should by his vote nullify the vote of 16 men with families who control only 40 acres each; and it is my purpose, if the committee does not, to offer an amendment for that purpose. [Applause.]

[Here the gavel fell.]

Mr. HOPE. Mr. Chairman, I yield 20 minutes to the gentleman from New York [Mr. WADSWORTH].

Mr. WADSWORTH. Mr. Chairman, I think no thoughtful person in America, much less any Member of this House, will deny that step by step, with extraordinary rapidity, we are approaching a great battle in this country; a battle that will rage from one end of the land to the other, and as it rages will claim the interest and attention of practically all of our citizens.

That battle will rage around a fundamental question which is difficult to describe in one brief sentence. As I see it, under our present trend the constitutional liberties of the American people are to be threatened within a 2-year period. As I see it, under the present trend an effort is being made and will be made with ever increasing intensity to change the whole picture of American life socially, industrially, and politically—to transform America and set up here within our borders a kind of government that scarce anyone dreamed of 5 years ago.

I remember very well when the National Industrial Recovery Act was before the House in the extra session. I think most of you will remember especially that remarkable speech of the gentleman from Pennsylvania [Mr. BECK] in which he endeavored to portray the philosophy underlying that measure.

I think it fair to say that at that time a majority of the persons in the country regarded that measure as temporary. In fact, by its own provisions, it expires 2 years after the date of its enactment.

I was not one of those, however, to regard it as temporary. I took the liberty of stating on the floor at that time that under the leadership of the present administration and with its open encouragement, a school of thought was being built up in the United States teaching its people that all that has gone before was error, and that a new philosophy of government and society must be set up to take the place of the old.

I ventured the prophecy that so soon as the N.R.A. got into full operation determined preparations would be made to convert it into a permanent political and industrial system.

I confess that I was surprised at how quickly its sponsors, including the President of the United States, justified my prophecy. Now we know, through the utterance of the President himself, that the N.R.A., transforming all of our theories of government in a fundamental way, if its sponsors have their way about it, shall become the permanent policy of the United States. At the same time they are proceeding along parallel lines in the control of agriculture seeking to attain the same goal.

This bill before us today is but a preliminary skirmish, in my judgment, in advance of the great battle that will come when A.A.A. expires by limitation in accordance with the provisions of that particular act. So in May or April of 1935, when these two measures are about to expire, we know that the President of the United States will attempt to lead this country into the adoption of both of them and the philosophies underlying them, as the permanent policy of the United States.

Mr. BLANCHARD. Mr. Chairman, will the gentleman yield?

Mr. WADSWORTH. Yes.

Mr. BLANCHARD. This measure here provides for extension into 1936.

Mr. WADSWORTH. Oh, yes. Emphasis has been placed by some of the supporters of this bill, on the contention that it is merely temporary in character. I hope we shall not delude ourselves into having any confidence in that assertion. That assurance was given us with respect to the National Industrial Recovery Act. It was given us with respect to the Agricultural Adjustment Act. This is not intended to be temporary. The men who believe in this kind of thing are in control of the Government of the United States in its executive departments, and scarce a day goes by but they endeavor to persuade the people that their philosophy is to be the saving of this country, and that it must be adopted permanently. Step by step we have seen them making progress. Here a temporary measure, there a permanent one. Then again a temporary measure, with assurance that it will expire after a little time; but we must judge these things in accordance with the trend, and in accordance with the well-known convictions of the men who are running the executive branches of the Government supported as they have been up to this point by an overwhelming majority of the members of the Democratic Party in both Houses of Congress.

Mr. BANKHEAD. Mr. Chairman, will the gentleman yield?

Mr. WADSWORTH. Yes.

Mr. BANKHEAD. It is admitted, of course, that the so-called "experiment" or new venture of the National Recovery Act has not had a full opportunity to demonstrate whether it is a wise system or not. It is being criticized and taxed from many angles.

Mr. WADSWORTH. The President has decided that it is wise and must be permanent.

Mr. BANKHEAD. I want to approach it from a broad standpoint. If it should demonstrate by a fair test over a period of 2 or 3 years that in the principles involved in the control of industry and the social life of the country, as governed by the principles of the N.R.A., are successful and promote the general welfare and happiness of the people, their financial and economic prosperity, would not the gentleman advocate acontinuance of it, if it demonstrated its worth by trial?

Mr. WADSWORTH. If the gentleman will be certain to include within the term "happiness and welfare" the preservation of liberty to our people, I am with him, but if the element of liberty is left out, I am against him. [Applause.]

Mr. JOHNSON of Minnesota. Mr. Chairman, will the gentleman yield?

Mr. WADSWORTH. I prefer to proceed, if I may. My time is limited.

Mr. JOHNSON of Minnesota. Does not the gentleman think that if the political leaders of his party and the captains of industry of this country had followed along and pushed instead of pulling the other way and chiseling, that we would have been on a good deal better road to recovery than we are today?

Mr. WADSWORTH. Lots of things could have happened, if and when.

Mr. JOHNSON of Minnesota. But I want an answer to that question.

Mr. WADSWORTH. It is impossible to answer it now, because it would carry me into a discussion that would take us far from this bill. What I am trying to portray is what is coming to this country.

Mr. JOHNSON of Minnesota. But I want to have an answer.

Mr. WADSWORTH. I have asked to be excused from answering because it would take me far afield from a discussion of this trend and this bill. I am willing at some other time, and, if necessary, in another place, to discuss that with the gentleman.

Mr. JOHNSON of Minnesota. You come up to Minnesota and we will debate it there.

Mr. WADSWORTH. Mr. Chairman, let us go back a little way and see if we can trace and estimate the efforts of the Government of the United States to restrict the productive capacity of a great people. I doubt if the attempt has ever been made on so large a scale as is now going on in the United States. It is a determined attempt to reduce production, to keep the people, either by persuasion or by force, from producing those things which they are able to produce, with the resources at hand, and the major portion of the attempt is being made in the field of agriculture.

We started in under the A.A.A. last summer by the promulgation of a wheat-control program under which the Department of Agriculture invited the wheat farmers of

the country to sign a contract agreeing to reduce their acreage for 1934 by 15 percent, and assuring them that if they signed such a contract they would give them a bonus, I think, of 28 cents per bushel on the amount of wheat which they were raising or were about to harvest in 1933. They were to be paid in advance, as it were, for not raising so much wheat the following year. The money to pay them is being raised by a processing tax on all those concerns in the country, great and small, which do anything to wheat in the way of changing it into a more edible substance. The contract provided, however, that when the 15 percent of acreage was abandoned in the production of wheat, that acreage should not be used or planted for the production of any other crop which could be sold for cash.

I saw the contracts in my part of the country. Many of my neighbors brought them to me. They asked me what I was going to do as a wheat producer. I told them I could not do anything, because there is a law upon the statute books which prohibits a Member of Congress entering into a contract with the Government; so that let me out. [Applause.]

Comparatively few east of the Mississippi signed those contracts, but the complaint I heard was not so much that the farmers were asked to reduce their production of wheat, but that having signed the contract, they would be forbidden to put that 15-percent acreage into producing something else. They said, "That interferes with my liberty." They said, "Does the Government mean to say that I cannot plant oats, or corn, or beans, or peas, or sweet corn, or tomatoes on my own land if I sign this contract?" Being reminded that that was the nature of the contract, hundreds and hundreds of them said, "I will never sign such a contract." In other words, the attempt, in large areas of the country, to restrict the natural productive capacity of a people, failed to that extent.

Then we went into the famous hog program, and in order to create a shortage of hogs the Department of Agriculture, under the A.A.A., decided that it would buy from the farmers, the hog producers, 4,000,000 little pigs. They had to weigh less than 100 pounds. Little ones, with no immediate commercial value, for a 100-pound hog is not a commercially valuable hog. He is not a complete product at that weight. They would buy them ranging from 9¾ cents a pound for the 25-pound pig—think of it, a little 25-pound pig, down to 6½ cents per pound for a 100-pound pig. The lighter the hog the higher the price. The heavier the hog the lower the price, the idea being, of course, to get as many little pigs sent in as possible. And they came in there by the million. Seventy thousand a day came into the Chicago stockyards alone. They were clubbed to death, 4,000,000 of them. I ventured to say, when the A.A.A. bill was before the House at the extra session, that some of its provisions were fantastic. Has there been anything as fantastic in all the history of Government as that "slaughter of the innocent" last summer?

Mr. ALLGOOD. Will the gentleman yield?

Mr. WADSWORTH. I prefer not to.

What to do with the little bodies? They loaded them into coal cars by the trainload and took them out of Chicago, and finally, after much protest, found a burial place for them down in the southern part of Illinois. The destruction of property, in order to bring back prosperity, in the first instance, and to control or restrict the productive capacity of a people!

Then the Department also invited the farmers of the country to send in 1,000,000 pregnant sows and have them killed off, in order, once more, to control production. There, however, the Department ran straight up against the prejudice of the livestock man, and if my information is correct, they did not get one fifth the number of those sows they were seeking to destroy.

Livestock men do not like to be parties to that kind of business.

The price of hogs, within 1 month, if I recall correctly, after this indiscriminate slaughter, instead of going up, went down by almost a cent a pound. They went down to $3.20 per hundred pounds, if I remember correctly. They have gone up since to $4.25 or $4.20 in recent months, not as the result of any law of supply and demand. The Department went into the open market and bought hogs of suitable size and weight and the price went up somewhat.

Now, the men who put those things into effect were perfectly sincere. They really wanted to accomplish the purpose which they had in view. I mention these things to try to indicate the impossibility of any government on the face of the earth successfully controlling or restricting for any length of time the productive capacity of its people, for the simple reason that the effort runs contrary to human nature. Today with this hog program, voluntary, of course, in full effect, there are bootleg hogs being bought and sold right and left all over the country. Many a truck load of bootleg hogs goes along the highways at night, evading the processing tax.

The CHAIRMAN. The time of the gentleman from New York [Mr. WADSWORTH] has expired.

Mr. HOPE. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. PIERCE. Will the gentleman yield for a question?

Mr. WADSWORTH. I must finish. I would rather not. We are running up against the same kind of thing in this effort to control and regiment people as we ran up against in the matter of the eighteenth amendment. This bill will bring that same kind of thing, only this goes further, because this is not voluntary. This is compulsion. I am not surprised at the introduction of this bill. Compulsion must inevitably be resorted to by a government that attempts such a thing as this administration or any other government attempts along these same lines. First, the invitation to volunteer. Then if it is not successful there is compulsion, confiscatory taxation, and, finally, criminal prosecution and jail sentences. The N.R.A. has already come to that. The voluntary day of the N.R.A. has gone. The President himself says that from now on the penalties of the law are going to be imposed, and General Johnson stands ready to crack down on any man who ventures to disobey a code, which has the force of United States law.

Now, if these acts in the field of agriculture or in the field of industry bore with them any taint or element of moral turpitude, then the forbidding of them and the infliction of suitable penalties could be successfully carried out.

The trouble is there is no moral turpitude connected with the act of killing a pig and selling its carcass to a friend without paying the tax; you cannot persuade the average man that that act involves moral turpitude; hence the bootleg pigs; and you will have it all through industry. You will have it all through agriculture. People in increasing numbers will insist that the Government has no right to control the progress of their daily innocent lives. They will resent these restrictions; and the harder the Government works to force them down the throats of the people the greater will be the resistance. Then the administration—it may not be this one, but the next one—will come to Congress and ask for more teeth in the law and we will have a "five and ten" law just as we did under the eighteenth amendment. After that juries will begin to refuse to convict; resistance will increase, protests will increase, and eventually a great issue will be placed squarely before the people: Shall liberty cease in America or shall we consent to become a regimented people obedient to the bureaucracy at the Capital?

This bill is but one step; there will be others, if not in this session in the next session. This parade has started. It is under the command of the President. Do not charge all the responsibility to Professor Tugwell, to Professor Moley, or to Professor Mordecai Ezekiel, or to any of the so-called "brain trust"; the leader of the movement is the President of the United States. He believes in it sincerely and deeply; it is his program; he supports this bill by his own letter.

My attempt upon this occasion is to portray to you, if I can, the significance and the philosophy of this whole movement. It seeks the abandonment of the American conception of liberty under a Constitution. It challenges the tenth

amendment by putting the Federal Government in the possession of complete authority over those matters which that amendment reserves to the States and the people. It spells the end of the Federal Union of States. It sets up a Government imperial in character, ruled by a huge bureaucracy. Our children will exist as subjects in a land where their forefathers have lived as masters. Yes; pass this bill, drive in nail after nail, clamp the lid down permanently, my friends, but do not shut your eyes to the consequences.

[Here the gavel fell.]

Mr. JONES. Mr. Chairman, I yield to the gentleman from Georgia [Mr. PARKER], such time as he may desire.

Mr. PARKER. Mr. Chairman——

Mr. KOPPLEMANN. Mr. Chairman, will the gentleman yield?

Mr. PARKER. For a brief request; yes.

Mr. KOPPLEMANN. I was going to ask that the gentleman in charge of the time on either side give to the gentleman from New York [Mr. WADSWORTH], an additional 5 minutes that he may give us his program to take care of the conditions we found on March 4 of last year. [Applause.]

Mr. PARKER. Mr. Chairman, I am in favor of the passage of this bill. I advocate it because I believe it to be an emergency measure and because I know the legislation is going to be temporary only. If this were permanent legislation I doubt that I could support it. I am of the opinion that as permanent legislation it would be uneconomic and destructive of the main industry in which are engaged a great majority of the people who live in my congressional district. The congressional district I represent is one of the largest cotton-producing districts in the United States. The county that produces more cotton than any other county in Georgia is located within the confines of the First Congressional District. There are 4 counties in my congressional district that were among the first 6 or 7 of the cotton-producing counties of Georgia in the year 1933.

It goes without saying that the cotton farmers in Georgia as well as those in the other Southern States have not been engaged in a profitable business for the last 2 or 3 years. When a farmer is required to sell the commodity he produces at a price less than the cost of production he is not engaged in a profitable undertaking. The trouble encountered by the cotton farmer in America today is the result of the great surplus of cotton. The purpose of this bill is to rid the American farmer of this surplus of cotton.

I want the bill to be a temporary measure; and the more temporary it is made the better I shall like it.

There is one other feature of the bill that concerns me. Let us have its language made plain and clear. I want it to be written in unmistakable terms showing it to be the intention of Congress that when the seasons are unusually good and when nature smiles abundantly on the cotton farmer and he makes a bale or two more of cotton than is allotted to him, that it will be understood by every one that such farmer can hold this surplus cotton in the seed, or if it has been ginned and baled, in his barns, and that it will be possible for him to sell it the next year or in succeeding years as a part of his allotment. I do not want him to be required to pay a tax on one or two bales of surplus cotton that he may produce just because the seasons may have been unusually good with the result that he produced more cotton than was allotted to him.

I should like for the Chairman of the Committee on Agriculture before the debate is concluded to explain to the Membership of the House exactly what is meant by certain language in the bill. I refer particularly to page 4, lines 13 to 16, inclusive, under section 4, the subject of which is tax and exemptions. I read:

> If the cotton was harvested during the crop year with respect of which the tax is in effect, the tax shall apply even if the ginning occurs after the expiration of such crop year.

Then, on page 6, lines 12 to 14, inclusive, I read again:

> In such cases the payment of the tax shall be postponed, but shall be paid at the time when bale tags are secured for such cotton.

Mr. DOXEY. Mr. Chairman, if the gentleman will yield, I will answer him.

Mr. PARKER. I yield.

Mr. DOXEY. It means simply this:

If a farmer harvests his crop this year, when this law is in effect, and says, "I want to store it and I will wait and have it ginned at the expiration of the 2 years, or 3 years", this law says that you cannot defeat the purpose of the law by waiting, because you have to pay the tax when you gin it. Does not the gentleman think that is fair and right?

Mr. PARKER. Suppose the law is in effect the next year, will he be permitted to gin his cotton?

Mr. DOXEY. He will be permitted to gin his cotton as tax-exempt cotton if he considers it a part of the allotment he is entitled to under the law. This bill is for the purpose of keeping certain interests from evading the provisions and from keeping the cotton, which is not perishable, stored in this country or even sending it abroad in an effort to evade payment of the tax.

Mr. PARKER. Of course, I do not advocate that, but I do want it made plain that the farmer who produces one or two bales more than his allotment may sell it in his next year's allotment without paying the tax.

Mr. DOXEY. There is nothing to prohibit that. This is for the individual who will hold the cotton in an effort to avoid paying the tax.

Mr. SNELL. Will the gentleman yield?

Mr. PARKER. I yield to the gentleman from New York.

Mr. SNELL. I understood the gentleman to say that he would not support this bill if it was to be permanent legislation, or had any indication of being permanent. When this bill was originally written and sent to the House it provided for permanent legislation. When the President of the United States, on February 16, recommended the bill to the committee and said he favored it, the statement was made by him, "The gains to be made must be permanent." At that time the President, in my judgment, endorsed it as permanent legislation, and I believe it is the policy of the present administration to make this permanent.

Mr. PARKER. I do not believe the gentleman is correct in that assumption.

Mr. SNELL. Then I should like to ask the chairman of the committee this question: When this bill was sent up here originally did it not provide for permanent legislation?

Mr. PARKER. I will answer the gentleman's question. The purpose of the bill is to rid the farmers of this surplus cotton that is now in existence.

Mr. SNELL. That is all right, but I asked a definite question. Am I right or am I wrong when I make the statement that when this first was sent up here it provided permanent legislation?

Mr. PARKER. I do not know. I have not seen the bill except in its present form.

Mr. SNELL. I will ask the chairman of the committee the question.

Mr. JONES. When this was sent up in the form the gentleman states it was first introduced, it provided for permanent legislation, but no consideration was given by the committee to that feature.

Mr. SNELL. When it came here with the President's endorsement, it was permanent legislation?

Mr. JONES. No. The gentleman is wrong. This was after the committee had determined to write the temporary feature into the bill. I had talked with various members of the committee and with Congressman BANKHEAD, and it was generally understood the measure would be made a temporary one. What the President stated, and to which the gentleman refers, was that the benefits to be derived should not be frittered away by allowing a great surplus to come back. He evidently wanted to make the benefits permanent by getting rid of the abnormally large surplus, and the consequent danger to the recovery program.

Mr. SNELL. Every effort has been to make this permanent legislation.

Mr. JONES. May I say to the gentleman that the question whether anything is later made permanent is purely

academic. By the very specific terms of this legislation as it is written it is temporary. If it proves to be the best thing that can be done under the circumstances, then I would want to make it permanent. If it does not, I would want to leave it temporary, and end with the emergency.

Mr. SNELL. Every step that has been taken so far is to make this permanent legislation. The gentlemen on the other side have overworked the term "emergency."

Mr. JONES. That will be determined when we reach it. This is not made permanent by its terms. That is not what we are passing. If the gentleman votes for this bill as it is presented, he will vote for temporary legislation. Anything that is started may be made permanent later.

Mr. SNELL. If I am not misinformed, at the time that the President wrote this letter on February 16 it had not been determined to make this bill temporary legislation.

Mr. JONES. The question of making this temporary legislation was determined practically before we ever began the hearings. We had discussed this matter with each other.

Mr. SNELL. Before the bill was introduced?

Mr. JONES. No; before the hearings were begun. It was understood, as a matter of fact, that that change would be made. The letter to which the gentleman refers was not written until the hearings were nearly completed.

Mr. SNELL. Does the gentleman mean that?

Mr. JONES. The hearings had been going on several days when the letter was written.

Mr. MOTT. Will the gentleman yield?

Mr. PARKER. I did not yield to the gentleman from New York to make a speech. I will ask the gentleman to make the speech on his own time. I yield to the gentleman from Oregon.

Mr. MOTT. Does the gentleman subscribe to the explantation of the gentleman from Texas as to the permanent status of this legislation, and is he satisfied with the explanation just given?

Mr. PARKER. Absolutely! I may say to the gentleman that every farmer in the congressional district I represent, and with whom I have had occasion to communicate on the subject, is in favor of the passage of this bill.

Mr. MOTT. If this legislation is good as temporary legislation to serve the purpose that the gentleman has indicated, why would it not be good permanent legislation?

Mr. PARKER. When we get rid of the 10,000,000 bales of surplus cotton we will not need this legislation.

Mr. MOTT. If this legislation should remove the surplus of cotton, and the legislation were repealed or should automatically come to an end, may I ask the gentleman if he does not think the suspension of this law would again result in an oversupply of cotton?

Mr. PARKER. Time alone can tell. If another surplus is created, the Congress might have to take steps to eliminate that surplus.

Mr. MOTT. From whatever cause the surplus should arise?

Mr. PARKER. Regardless of that. If we produce another surplus we might want to enact legislation to get rid of it.

Mr. McGUGIN. Will the gentleman yield?

Mr. PARKER. No; the gentleman from Kansas refused to yield to me and I must decline to yield to him.

Mr. HOPE. Mr. Chairman, I yield 5 minutes to the gentleman from Massachusetts [Mr. GIFFORD].

Mr. GIFFORD. Mr. Chairman, the report of the minority states that this is the first time in the history of the Nation that compulsory control of production has been initiated. I think that there are a great many farmers' cooperative associations throughout the country that would be very glad to have the Federal Government attempt to compel the independents which refuse to join them to do so.

I desire to place in the RECORD a little of the political doctrine of that popular economist to whom millions listen at about 5 o'clock every Sunday afternoon and whose presence before certain legislative committees has recently been sought. He claims much credit for the devaluation of the dollar and has often informed his listeners that this would lessen the debtor's burden, although thus far it is rather difficult to see that this result has occurred.

The Representative from New York [Mr. WADSWORTH], in his very able address has expressed the thought of the conservative element in this Nation. One would ordinarily expect that the views of Father Coughlin, who is considered as rather radical in his political philosophies, would be contrary. Yet in this instance the two seem to be somewhat in accord. I quote from Father Coughlin's pamphlet.

Mr. O'CONNOR. Mr. Chairman, I make the point of order that the gentleman cannot read from any paper without unanimous consent.

Mr. GIFFORD. Mr. Chairman, I ask unanimous consent to read this article.

Mr. O'CONNOR. I object.

Mr. GIFFORD. Mr. Chairman, I am sorry that I did not try to commit this article to memory, but I think that every Member of the House has had the book from which these excerpts are taken. I assume that it was sent to each of us. If you care to see what the Reverend Father says regarding the killing of hogs, and his quotations of Biblical injunctions concerning the destruction of foodstuff, you can do so. I regret, however, that I am not to be permitted to read it.

Mr. Chairman, I am wondering, as a matter of parliamentary procedure, whether under permission to revise and extend my remarks I would be allowed to incorporate the matter to which the gentleman from New York objects. Does the gentleman still object?

Mr. O'CONNOR. Mr. Chairman, the parliamentary rules are one thing and the gentleman from Massachusetts would not be entitled to incorporate it, and I have no need to object.

The CHAIRMAN. The Chair would say that unless the gentleman from Massachusetts obtains consent to incorporate the article, he would not be permitted to incorporate it.

Mr. GIFFORD. Then I ask unanimous consent that I may be permitted to incorporate these words of advice in the extension of my remarks.

The CHAIRMAN. Is there objection?

Mr. O'CONNOR. I object.

Mr. GIFFORD. Mr. Chairman, I have already called attention to the fact that Members may read this if they desire, and so I shall merely close my remarks by expressing my great surprise that a BANKHEAD from the State of Alabama and the gentlemen from other Southern States, which have heretofore produced the leading champions of the doctrine of State rights, should now in this day come forward with a bill like this one. It will be the first time that the Federal Government will have been permitted to enter the gentleman's State with police power and dictate to the farmers what and how much they may produce. The boll weevil and the weather man should now be placed under control, so that they may at least grow the amount permitted under this law. Coming from this source particularly, the measure is indeed a startling one.

The CHAIRMAN. The time of the gentleman from Massachusetts has expired.

Permission having been later granted, the quotation to which reference has above been made is here inserted:

Now, if our Treasury Department is determined to borrow this Nation out of debt, our Agricultural Department has invented a new theory of starving us into prosperity. We have too much cotton. We are surfeited with wheat. There is more pork than we can eat. Therefore, plow up the cotton. Destroy the wheat and slaughter the pigs without even "dehairing" them so that 6,000,000 or more of their carcasses will be used not for food but for fertilizer.

When did we discover that there was too much cotton when other millions of children, of women, and of unemployed men will be tramping through the snows of this winter half clad?

From Malthus to Wallace is a far cry. In the year 1798 this Anglican clergyman feared that England and Europe would be overrun with population. Therefore, he suggested birth control to avert starvation.

But in the year 1933 his disciple in the Agricultural Department has advocated pig control and bread control because there is too much production.

How counter to the teachings of Almighty God is this destructive, deflationary policy.

"Increase and multiply" spoke the Creator to our first parents as opposed to the Malthusian concept of decrease and decimate. Destructionism as a suitable policy for agriculture stands indicted before God and before man.

Mr. JONES. Mr. Chairman, I yield 10 minutes to the gentleman from Ohio [Mr. TRUAX].

Mr. TRUAX. Mr. Chairman and members of the Committee, I intended to talk strictly of cotton. First, I want to say to the gentleman from Massachusetts [Mr. GIFFORD], who has just preceded me, in respect to his observations on the issues advocated by the fighting radio priest, Father Coughlin—and I presume that is the personage to whom the gentleman refers—that were this Congress to adopt all of the issues and policies that Father Coughlin has advocated, we would at least take away a debt burden of $1,000,000,000 every year, interest charges, paid now to the bond grabbers of Wall Street, because this distinguished radio priest has advocated the payment of $13,000,000,000 in war bonds and the payment of the soldiers' bonus with new currency, and I am heartily in accord with these policies.

I think a perfectly fair and frank discussion of this bill that we are considering can be best obtained by Members who have no sectional, no district, or financial interest in the subject involved. This is nothing new that these gentlemen are proposing. Eleven years ago, in 1923, in the great wheat conference held in Chicago, called by eight Governors of the Wheat Belt, this very same principle was proposed, to control the production and the price of wheat, and wheat was then selling for $1.25 a bushel.

I, as well as other gentlemen on this side, sometimes caustically criticize the policies of the Secretary of Agriculture, Mr. Wallace, and of his various administrators. I was glad to know, as I said awhile ago, that this bill did not have the entire approval of Mr. Wallace. This bill proposes the very fundamentals and elements that many of us in the Middle West and Northwest have fought strenuously for for the past 10 years.

We recognized long ago that no one but the great Creator can control the production of farm commodities. You may reduce your acreage a fourth or a half, but if nature smiles upon you, you will have an abundance of bountiful crops. The only mechanism that can ever be devised to control that surplus, which is a natural, normal surplus, is to control it at its source of distribution, and not down at the grass roots of production. That is exactly what this bill seeks to do. Government does not seek to tell the cotton farmer how many acres he may seed, how many acres he may harvest. Government merely seeks to tell him how many bales he may move into interstate and world commerce.

The problem of cotton is dissimilar to the problem that we in the Corn Belt have. In the case of our wheat and our corn, through hogs, we seldom export more than 15 percent of our crop. In the case of cotton the normal export is 55 percent.

As a matter of course and of common sense, it naturally follows that the foreign trade, the world trade must be kept open. This bill does not seek to reduce or restrict that foreign market. We are faced with a condition and not a theory. I think every gentleman will agree with me that in the case of wheat, if we had a carry-over every year of 800,000,000 bushels of wheat, then we might as well cease all of our efforts to attempt to stabilize and raise the price of that wheat. That is what is true of the cotton situation today. There is a carry-over of 11 or 12 million bales, as much as a normal crop.

Some apprehension has been expressed by Members as to the regimentation of farmers. I prefer to use a much more fitting, a much more appropriate word, and I would use the word "coordination." Freedom and liberty, it is true, have been the proud boast for decades. The so-called "freedom and sovereignty" of the American farmer as compared with the peasant farmer of Europe has been the vaunted hope of this country, but where is this freedom taking him, my friends? Today he has freedom to starve and he has liberty to let the sheriff sell out his home and his farm.

Someone has said if this bill is adopted the farmers will be in revolution. I say that unless you give the farmers decent prices, and that soon, you will have armed revolution, and not in the cotton-producing South, but in the great Corn Belt, of which I am a part and of which my colleague from Ohio is a part.

Mr. MARSHALL. Will the gentleman yield?

Mr. TRUAX. I yield.

Mr. MARSHALL. The gentleman represents the great State of Ohio at large, which includes the farmers of Ohio, and I know the gentleman's record as having favored all legislation that he feels is beneficial to the farmers of Ohio, and I give him credit, and I know he is sincere in that. The question I want to ask is whether the gentleman is willing to try to sell the people of Ohio, and the farmers of Ohio, an the idea of compulsory control of wheat and corn and hogs?

Mr. TRUAX. I will reply to the gentleman by asking him a question. If I were willing to do that, would my friend be willing to sell the farmers of his district on the merits of the Frazier bill for refinancing mortgages?

Mr. MARSHALL. Now, Mr. Chairman, in answer to that question, I do not know that the Frazier bill is under discussion today. That may lead us too far afield.

Mr. TRUAX. The gentleman does not answer my question.

Mr. MARSHALL. And the gentleman did not answer mine.

Mr. TRUAX. I will answer it now. I will say that in southwestern Ohio we have tobacco growers who have benefited by the plan that is in effect now. We have no cotton growers, but I want to tell my friend in this Congress that back in the prosperous days when the cotton growers were getting 30 and 35 cents a pound for cotton the purebred livestock breeders in every section of the great Corn Belt found the most profitable and the most lucrative market for their purebred horses and cattle and hogs in the South. Again I would say I would not be an advocate of sectionalism in farming or in anything else.

[Here the gavel fell.]

Mr. JONES. I yield the gentleman, Mr. Chairman, 2 additional minutes.

Mr. MARSHALL. Will the gentleman yield?

Mr. TRUAX. Not now.

Mr. MARSHALL. I am still waiting for the gentleman to answer my question.

Mr. TRUAX. Will the gentleman get me time from his side to answer the question?

Mr. MARSHALL. I am not controlling the time. I yielded about one third of my time to the gentleman because he was from the State of Ohio.

Mr. TRUAX. The gentleman had about 25 minutes as against my 10 minutes.

Mr. MARSHALL. The gentleman refuses to answer the question?

Mr. TRUAX. I will answer the question. I should say that in the case of wheat it will work just as well as with this plan, provided 75 percent or 95 percent of our farmers ask for such a plan. If a farmer has on his farm 1,000 bushels of wheat, and you pay him $750 under this plan for 750 bushels and leave 250 bushels on his farm for him to feed to his livestock, he will be 100 percent for such a plan. If you give the farmers, by any means whatsoever, a price that means the difference between bankruptcy and prosperity, you can regiment him, you can command him just the same as you are doing with industry today. I should say that I am not alone for the farmer in the Corn Belt, who goes out in the winter blasts and feeds the livestock that the cities may have meat; I am not alone for the farmer in the Northwest, who harvests grain that fills the bread baskets of this country; but I am as well for all of our great farming population, including those splendid planters in the magnolia-bedecked Southland of ours. [Applause.]

I should say in answer to the question of the gentleman from Ohio that the large majority of cotton producers them-

selves are advocating this plan, that they are determined on some method of control that will be effective.

Many meetings were held in practically all of the cotton-growing States. They were held in cooperation with farm organizations such as the State farm bureau federations. The consensus of opinion in practically all of these meetings was for a compulsory control system that would compel the noncooperators under the present plan and the chiselers to observe the rules of the game, and cut down their production instead of increasing it to the highest point possible by the installation of new equipment, a more liberal use of fertilizers, and the bringing into production of thousands of acres that have been out of cotton production for the past several years.

If Members will read the testimony before the Committee on Agriculture in the House of Representatives and the Committee on Agriculture and Forestry in the Senate, they will be forced to the conclusion that from 75 to 95 percent of the producers in the cotton-growing States want this kind of legislation, are willing to try it at least as an experiment, and willing to abide by the consequences thereof.

For the first time in a number of years these cotton growers are now selling cotton at a price that enables them to at least live and pay their taxes, an unheard-of phenomenon for the past 4 years. They are willing to concede that the present plan of voluntary reduction, together with loans of 10 cents a pound on cotton, has established that desirable price level, which now ranges from 10 to 12 cents a pound.

Unfortunately, however, because of the liberal policy of the Department of Agriculture in permitting cotton farmers, even though they reduced their acreage, to go ahead and use more liberal applications of fertilizer, to use better grades of fertilizer, and to more intensively cultivate and till the growing crop, the total combined yield in 1930 to 1933 was little lower than any over the preceding year.

They are not condemning the acreage-reduction plan. They want to fortify and strengthen that plan with the Bankhead bill, which controls the distribution of the surplus at the fountainhead of distribution—the cotton gin.

So, further answering the question of my colleague from Ohio, I would say this: If the voluntary reduction plan in wheat and in hogs had been as successful in Ohio as the cotton plan has been in the South, if we had elevated the price of our wheat to $1.25, our hogs to 7½ cents a pound, and corn to 75 cents a bushel, then I should unhesitatingly go into the gentleman's district and into every agricultural county in Ohio and advocate such measures as would hold those price levels to the living basis that had been established, and particularly so if from 75 to 95 percent of the farmers in the gentleman's district, in my own district, and in the entire State of Ohio had voluntarily given their endorsement to the proposed plan.

From 1923 to 1929 it was my privilege to serve as the Director of Agriculture for the State of Ohio. During this term of office it was my pleasure to meet once each year, either in Chicago or here in Washington, with the National Association of Commissioners, Secretaries, and Directors of Agriculture of the various States. At each of these meetings the discussion of the agricultural problem, which was then in its infancy, occupied a considerable portion of the time. I found that those officials from the cotton-growing States were not as much interested in legislative proposals for the price stabilizing of agricultural commodities as were we officials from the Corn Belt, because cotton was still selling at prices ranging from 13 to 23 cents a pound.

But in the year 1926 the price received by cotton producers dropped to less than 11 cents a pound. Then it was that cotton producers of the South became vitally interested in proposed legislation that would enhance the selling prices of agricultural commodities, including cotton. The majority of these officials supported the McNary-Haugen bill in 1926, when it was first passed by Congress and vetoed by Coolidge. They again supported it in 1927, when it was again passed by Congress and vetoed by Coolidge.

Knowing their experience and difficulties with attempting to combat a constantly increasing reduction in price levels of their basic commodity, and considering their sincerity and honesty of purpose as well, I feel that the repetition of the testimony of some of these gentlemen might be informative and illuminative at this time.

The record of the hearings before the Committee on Agriculture and Forestry in the United States Senate discloses that such prominent agricultural officials as Harry D. Wilson, State Commissioner of Agriculture for the State of Louisiana, said that "90 percent of the real producers of cotton want an honest-to-goodness control of production of cotton and want something other than the acreage-control plan"; I for one shall believe that statement.

When the honorable C. C. Adams, commissioner of agriculture for the State of Georgia, says that, "the consensus of opinion of farmers from all over the State is the only safe way to control cotton production to the extent of giving prestige to the reductions is to make reduction by bales instead of acres", I shall not contest his statement.

When Commissioner of Agriculture the Honorable J. D. Holton, of the State of Mississippi, declares that, "in Mississippi about 26 percent of the cotton acreage was taken out of production, yet 23 percent of the farmers failed to cooperate, and that the Bankhead bill is the only measure that will force cooperation and restore parity prices of cotton", I have no inclination to question the accuracy of his statement.

When the commissioner of agriculture for the State of North Carolina, Mr. William B. Graham, whom I have known intimately for a number of years, asserts that heretofore he "was opposed to this bill" because he thought "production could be regulated by education and by diversification" but he has found "that such measures have failed miserably", and he now is "heartily in favor of the Bankhead bill" and is behind the sponsors of this measure, I know, because of his long experience, his unquestioned integrity and honesty, that he is reflecting the views of the cotton growers of the State of North Carolina.

When the officials of the Alabama State Department of Agriculture come before the committee and recite that 8,000 farmers met at Birmingham and passed a resolution endorsing the principles of this bill; that the Alabama Farm Bureau Federation, with a membership of 6,000 farmers, is on record favoring the gin or compulsory control method; the Alabama Farm Bureau Cotton Association, which has a membership of about 46,000, are for the compulsory control principles embodied in this bill; and when we hear the statements of the Members of this House who are most familiar with the cotton problem—the Honorable WILLIAM BANKHEAD, Acting Chairman of the Committee on Rules; the Honorable MARVIN JONES, our distinguished Chairman of the Committee on Agriculture; the Honorable WILLIAM J. DRIVER, of Arkansas; the Honorable MILES C. ALLGOOD; the Honorable WALL DOXEY, of Mississippi—and many others who have most capably explained the features and principles of this bill today; and since the President of the United States, Franklin D. Roosevelt, has given his approval to the bill, there can be no doubt in my mind but that the bill should be passed. [Applause.]

The CHAIRMAN. The time of the gentleman from Ohio [Mr. TRUAX] has again expired.

Mr. GIFFORD. Mr. Chairman, I ask unanimous consent that I may revise and extend my remarks and insert the matter that was objected to earlier this afternoon. I understand the objection has been withdrawn.

The CHAIRMAN. Is there objection to the request of the gentleman from Massachusetts [Mr. GIFFORD]?

There was no objection.

Mr. JONES. Mr. Chairman, I yield 2 minutes to the gentleman from West Virginia [Mr. RANDOLPH].

Mr. RANDOLPH. Mr. Chairman, I realize that if my answer to the distinguished gentleman from New York were based upon experience in this body or upon years, that I should not rise to speak.

I believe, however, that when a Member of this House declares upon this floor, as did the distinguished gentleman from New York this afternoon, that the present administra-

tion has destroyed the liberties of the American people, that I, as a Representative of some 290,000 people, should reply.

I do not believe that the present administration has destroyed the liberties of the common man during its year in power. But I do believe that some liberties have been taken away from certain people in these United States, which liberties should have been taken away. I refer particularly to the liberty of certain gentlemen to foist worthless securities off upon the American public as they have done throughout the years. This liberty has been taken away by this administration.

I believe also that the liberty has been taken away from certain gentlemen to exploit in sweatshops child labor. The boys and girls of America have been forever liberated from sweatshop conditions in industry. This is a liberty that should have been taken away from unscrupulous manufacturers years ago.

I believe the man who now is President of the United States has been kind to the American people. I do not believe they look upon him as a dictator in any sense of the word. He has done his best to lighten the burdens of the American people. Millions of citizens in this country regard Franklin D. Roosevelt, President of the United States, in the guise of a saviour and not that of a dictator. [Applause.]

Mr. JONES. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. HILL of Alabama, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee having had under consideration the bill H.R. 8402, the cotton-control bill, had come to no resolution thereon.

Mr. JONES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the pending bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

MESSAGE FROM THE PRESIDENT—CONSOLIDATION OF EXECUTIVE AGENCIES ENGAGED IN ENFORCEMENT OF INTERNAL-REVENUE LAWS (H.DOC. NO. 281)

The SPEAKER laid before the House the following communication from the President of the United States, which was read and, together with the accompanying papers, referred to the Committee on Expenditures in the Executive Departments and ordered to be printed.

To the Congress of the United States:

Pursuant to the provisions of section 1 of title III of the act of March 20, 1933 (ch. 3, 48 Stat. 8, 16), I am transmitting herewith an Executive order consolidating the executive agencies which are engaged in the enforcement of the internal-revenue laws.

The need for such a consolidation at this time springs primarily from the repeal of the eighteenth amendment. The tax and enforcement agencies of the Government should be reorganized in harmony with the changes which have occurred in the laws relating to the manufacture, transportation, and sale of intoxicating liquors. The changes made by this order will permit a more efficient administration of the internal-revenue laws as well as the laws carrying out the protective features of the twenty-first amendment.

Because of the obvious desirability of accomplishing the proposed changes at the earliest possible moment, I recommend that the order be given consideration by Congress with a view to the enactment of a joint resolution making its provisions immediately effective.

FRANKLIN D. ROOSEVELT.

THE WHITE HOUSE, *March 10, 1934.*

1934—A NATIONAL PARK YEAR

Mr. TAYLOR of Colorado. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the National Parks.

Mr. Speaker, a large number of public-spirited citizens throughout the entire country are joining in a Nation-wide movement to make 1934 a national park year. It is a most laudable and patriotic effort to attract the attention of the American people to our wonderful national parks and to encourage the sentiment of "See America First", to inculcate and encourage the disposition of our own people to see and learn about the marvelous and sublime grandeur of the scenery of our own country. There is no country or place on this planet where the scenery equals that under our flag. I trust all good citizens will join in this splendid American sentiment of inducing our people to visit our American attractions and learn of the wonders that are within our borders. I hope to have something further to say on this subject hereafter.

I ask to include in my remarks the most admirable address of Hon. Harold L. Ickes, the Secretary of the Interior, on the 3d of this month. This is the first of a series of nine weekly radio addresses on national park subjects. This address was broadcast by N.B.C. and the others will likewise be broadcast throughout the country.

Mr. MOTT. Mr. Speaker, reserving the right to object, will not the gentleman in preparing his statement include what the Secretary of the Interior left out of his speech last Saturday? He failed to mention Crater Lake National Park in Oregon.

Mr. TAYLOR of Colorado. I shall be very glad to see that Crater Lake is suitably mentioned hereafter, because it is a wonderful park. The Secretary expressly said that he could not possibly mention all the parks. I can well appreciate the feeling of the gentleman from Oregon. The Secretary did not mention the Rocky Mountain National Park, which next to the Yosemite, has more visitors each year than any other park on this hemisphere. That park has always been my special pride. It took me 2 years to pass through the House the bill creating it, and President Wilson personally presented me the pen he used in signing it, in January 1915. It is on the very crest of this continent and is the highest of any of the parks.

The SPEAKER. Is there objection to the request of the gentleman from Colorado?

There was no objection.

Mr. TAYLOR of Colorado. Mr. Speaker, under leave to extend my remarks in the RECORD, I include a radio address of Hon. Harold L. Ickes, Secretary of the Interior, broadcast throughout the United States, March 3, 1934, on the subject of Our National Parks. It is a patriotic and inspiring address that I feel should be preserved in permanent form for the instruction and edification of the American people.

Our national parks are Uncle Sam's great outdoor recreation playgrounds. They are peculiar to our country. They have grown enormously in popularity during recent years. It was only a few years ago when the number of visitors to our national parks was only twenty-five or thirty thousand a year. Today it is between three and four million. Our people meet in these parks from every State in the Union, and become better acquainted. The parks are great Americanizers. People go away from them reinvigorated in health and better and prouder American citizens. There is no possibility of estimating the value and far-reaching benefit that these parks render to our people.

It was eloquently said by former Secretary of the Interior, Ray Lyman Wilbur, that future generations will not revere this generation so much for our marvelous industrial development, or mass production of goods, or many other things that we now look upon as our most prominent achievements; but will take supreme pride in the fact that this generation had the foresight, patriotism, and the inspiration to set aside and preserve these marvelous wonderlands, the most beautiful areas in the world, in their primitive prehistoric condition for the enjoyment and edification of all future generations. Secretary Ickes has inaugurated a great movement to call the attention of the American people to our parks, and to popularize them, and to urge

our citizens to visit our own sublime scenery, rather than travel abroad every summer to see the less attractive beauties of nature in foreign countries. I hope it may be possible for the American people to have the opportunity of reading not only his address, but the succeeding eight weekly radio broadcasts upon this subject by other prominent citizens.

The Secretary's address is as follows:

We are all acquainted with those boastful Americans who, happily, seem to be growing fewer, who love to wander over foreign lands, chiefly, it would seem, for the pleasure of satisfying themselves how superior their own homeland is. They find fault with the food, they rail at the plumbing, they turn up their noses at the railroad trains, they laugh, none too politely, at manners and customs that have survived a thousand years. Beautiful and historic buildings cannot compare with those back home. Cologne Cathedral is all right in its way but it isn't in it with the Empire State Building. The House of Parliament may be historic but it didn't cost nearly as much as the State capitol at Harrisburg. And as for the Colosseum, that is an old ruin occupying a site that would be valuable for apartment buildings.

Curiously enough those Americans who regard with a jaundiced eye the historic monuments of Europe and who find only amusement in the manners and customs of Europeans stand spellbound before the Alps and exclaim enthusiastically that there is nothing so wonderful anywhere in the world. Scotland, with its lochs and burns, and Norway and Sweden, with their mountains and fjords, attract thousands of American visitors year after year who come home feeling that their time and money have after all been well spent.

The simple truth is that, without in any way attempting to detract from the charming and picturesque scenery of Europe, that continent cannot begin to compare with America in this matter. Take, for example, our national parks. Year after year many folk who have already visited the parks turn as naturally to them during their vacation periods as others embark for Europe. These park enthusiasts love the parks with the love of knowledge. They know from experience that no American who delights in the great outdoors, who would climb precipitous mountains, who glories in tumbling waterfalls or in the shades of blue in alpine lakes, needs to go outside of the confines of his own country to indulge himself.

National parks are a typical American institution. No other country has set aside in perpetuity such areas of great natural beauty, of archeological or historical interest. Always man has reverenced the beautiful in nature. He has stood in superstitious awe of the unusual. In the Middle Ages the ruling classes appropriated to themselves great groves of trees and wide expanses of sylvan glade. One of the reasons for the strong stand of the English barons when they forced King John to sign Magna Carta was because the King had disregarded one of their most cherished prerogatives—that of establishing great forests in order to enjoy the pleasures of the chase. In the old times kings or nobles or churchmen might set apart for their own enjoyment areas of natural beauty. It was left to the United States to consecrate to the use and enjoyment of the people thousands of acres of the most beautiful and awe-inspiring scenery that, in the aggregate, can be found anywhere in the world.

In 1916 I had a letter from a friend in Boston suggesting that if I was going West again that summer, he would like to join me on a trip to Glacier Park. This friend had never been west of Chicago. Year after year he had taken a ship for Europe, but the Great War was on, and his thoughts turned to his own hinterland. This proposed expedition into the uncharted wilderness west of the Mississippi River was a matter of deep concern to my friend's family. His dear old mother wrote that she had never worried about her son's journeys abroad but she was concerned about his proposed trip to Glacier Park. She expressed anxiety lest her son should encounter unfriendly Indians. She was assured that on previous occasions I had ventured into the West and had always returned with my scalp intact.

So to Glacier Park my friend and I went. There we hired horses, engaged a guide, and the three of us on horseback, with an extra horse to carry our gear, spent 15 days of as wonderful a trip as I have ever had. I love nature. I love it in practically every form—flowers, birds, wild animals, running streams, gem-like lakes, and towering snow-clad mountains. All of these Glacier Park has and much more besides.

Imagine a great valley literally massed with lovely flowers in full bloom. A riot of color. No formal garden this, meticulously planted with an iris here, a phlox there, and a peony yonder, but such a planting as only nature itself could plan or afford. As we went higher and higher into the mountains, the flowers, while of the same variety as those in the valleys, became smaller and smaller until way above the tree line, where bitter winds blew constantly even in the bright sun and frost formed every night, we found some of these same flowers blooming on plants of alpine size. But the coloring! The higher up on the mountains the flowers grew the more vivid and deeply colored were the flowers, until one drew one's breath at their marvelous beauty.

And those lakes in Glacier Park! They are incapable of word description. I doubt if the most consummate artist in the world could reproduce them on canvas. All shades of blue, depending upon altitude, location, and proximity to glaciers. The mountains themselves were marvelous, beautifully wooded at their bases and gently sloping, becoming steeper, more precipitous and rugged as we climbed higher until well above the line beyond which trees could no longer grow, we came across glaciers whose ice resisted the warmth of the hottest summer sun.

But I have almost forgotten the point of my story. I have said that my friend had made many trips to Europe. Summer after summer he had journeyed to Switzerland to see the Alps. Then one day he said to me: "The Alps do not compare in beauty and grandeur with the scenery that I have seen in Glacier Park and I shall never go to the Alps again." And he never did.

If you prefer a different type of out-door interest than that offered by Glacier you have a wide choice. Our national-park system is coextensive with the United States itself. Acadia National Park, in Maine, offers a combination of mountain and rugged, picturesque seacoast. Farther south in New Jersey is a park that came into the system less than a year ago, Morristown National Historical Park, a stretch of beautiful woods where Washington and his troops during the Revolutionary War spent much of their time. Down in Virginia is the Shenandoah National Park which will be transferred to the Government by the State of Virginia within a few weeks. This park lies along the beautiful and historic Blue Ridge Mountains.

Farther south the Great Smoky Mountains National Park will, within a short time, be dedicated to the Government. This park will be joined by a broad scenic highway to the Shenandoah National Park, a highway 400 miles long and 200 feet wide, running along the mountains. This road is already being surveyed and work will start as soon as the route has been decided upon. I may say also that there is every reasonable prospect that within a comparatively few years this same highway will be extended north to sweep across intervening States, through the Adirondacks and White Mountains, to the Vermont-Canadian line.

I will not attempt to catalog all of the national parks. Yellowstone, created in 1872 by act of Congress "as a pleasuring ground for the benefit and enjoyment of the people", is perhaps the best known of all of our great playgrounds because it is the oldest and has been visited by more people. It is the natural phenomena here, not equaled in any other area in the world, that constitute one of its chief attractions. But to me the waterfalls of the Yellowstone River, the canyon through which it runs, the charming bits of water and woods and mountains everywhere, are more satisfying even than the play of Old Faithful. Yosemite has its outstanding charm. This park gives pleasure and spiritual uplift to thousands of people every year. North of Yosemite is beautiful Mount Rainier, whose towering head, covered with snow, reflects the rays of the sun and is visible from great distances in all directions. Not far from the Yosemite, also in California, are found the Sequoia and General Grant National Parks, where one may see the big trees, the largest and oldest of living things. A scientific study of one old giant, which had finally fallen, disclosed that it was over 3,000 years old when it died. It is estimated that several of the living ancients are more than 3,500 years, perhaps even 4,000 years, old. In Sequoia Park there are 22 distinct groves of big trees, from sapling to patriarch of the forest.

Well at the head of any list of our national parks stands that of the Grand Canyon of the Colorado. I have heard visitors from foreign lands who had traveled widely in every part of the globe declare that the Grand Canyon was the most wonderful natural object they had ever seen. There is nothing like it anywhere in the world. Imagine if you can a great gash in the earth, 13 miles across at Bright Angel Trail and a mile straight down, requiring 8 or 9 miles of circuitous, breath-taking travel on muleback to reach the bottom where the turbulent, rushing Colorado River goes on with its self-imposed task of cutting deeper and deeper into the crust of the earth. Here is an example of what running water can do. The busy Colorado River, for no one knows how many years, has been industriously working at its self-imposed task. Never has it ceased in its toil. It is estimated that the river carries on an average of 700,000 tons of silt each day to the sea. Serving as both architect and builder of this project, the Colorado River, has erected a masterpiece of nature, one of the most breath-taking, awe-inspiring, and stimulating works to be found in the world anywhere.

If you still are of the opinion that beautiful and glorious scenery cannot be found except by going down to the sea in ships, I direct your attention to Alaska, where Mount McKinley rises more than 20,000 feet into the air in another national park. This mountain looms higher above its immediate base than any other in the world. When I say this I have not overlooked the Himalayas. The mighty Himalayas tower higher above sea level than any other mountains, but Mount McKinley holds the record for height above its base. Then there are the Hawaiian Islands where great mountains lie within the boundaries of the Hawaiian National Park. Here you may have an opportunity to see other snow-covered mountains as well as some promising volcanic upheavals of a spectacular but harmless type.

I have not nearly begun to enumerate all of the park attractions offered in this country of ours. If your bent is archeology and prehistoric life I direct your attention to the Southwest, where, in Canyon de Chelly, in northeastern Arizona, and in the Mesa Verde National Park, on the extreme southern edge of Colorado, you may investigate great community houses, long antedating our modern apartments, carved into the cliffs, where the predecessors of the aborigines found on this continent when our ancestors landed, lived centuries ago. These have stood unused now for hundreds of years. Only within a comparatively recent period of time have they been rediscovered. One such dwelling, abandoned approxi-

mately a thousand years ago, is believed at one time to have housed 1,200 people. Also of historic interest are such objects as Monument Rock, in southwestern New Mexico, where the adventurous Spanish conquistadors, pushing their way north from Mexico City in 1606 across the burning desert in search of gold, carved their names.

Historical objects connected with our own American history are being preserved on the eastern edge of the continent for the benefit of ourselves and of our children. The site of Jamestown, where, in 1607 the first English settlement on these shores was effected, is now within the guardianship of the United States Government. A few miles east, Mr. John D. Rockefeller, Jr., by restoring Williamsburg, the first capital of Virginia, is indelibly etching out an outstanding feature of early American history, while incidentally erecting an everlasting monument to his own vision and generosity. A short distance away is a new national park, Yorktown, where the defeat of Cornwallis assured American independence. Farther north lies Wakefield, the restored birthplace of George Washington. Then, there is Monticello, the interesting home of Thomas Jefferson, the great humanitarian and philosopher. North and east is found Mount Vernon, a shrine offering inspiration to every American patriot.

I am not a salesman. I am not trying to sell national parks to the people of the United States. I think the word "sell" is overworked. I am not even urging you to "see Americ a first." Generally speaking, I do not care for slogans. They connote too much the idea of beating the will to a pulp by constant and unreasoning repetition. I am talking to you about the national parks and monuments because I love nature and the great outdoors, and because the national parks and monuments contain the loveliest and most inspiring scenery that this country possesses. Nothing in the world excels this scenery. Not only do I personally love the national parks, I am officially interested because they are within the jurisdiction of the Department of the Interior. It would give me a feeling of great pleasure and satisfaction if larger numbers of the people of the United States would visit their parks. They were established and are being maintained for the people, and it would be an encouragement to the Department of the Interior if there were greater appreciation and use of the parks by the people.

So we have made this year of 1934 a national park year. It is our purpose, in a series of talks over the radio, to tell you about the parks, leaving it to you to decide whether you shall visit any of them this next summer. I hope you will. Of one thing I am certain and that is that if you start to visit the national parks you will want to visit more of them and see them oftener. They are within the reach of all. Good roads lead to and through them. The railroads this year will offer attractive rates. There is another consideration. The foreign exchange situation is an encouragment to spend your money at home. It bids fair to cost you relatively more to go to Europe this summer. You can make your money go further in the United States. And by spending your money in the United States you will be making a very real contribution toward the success of President Roosevelt's recovery program.

The parks are yours for your enjoyment and inspiration.

COINAGE COMMITTEE ACTS TO RESTORE MONETARY CONTROL TO UNITED STATES GOVERNMENT

Mr. FIESINGER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks on the action of the Committee on Coinage, Weights, and Measures to restore monetary control to the United States.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. FIESINGER. Mr. Speaker, this statement is made concerning H.R. 1577, which was reported favorably today by the Committee on Coinage, Weights, and Measures.

This bill is designed to restore monetary control to the United States Government. This is the most important forward step ever taken in our monetary legislation because it offers assurance that the United States is interested in permanent prosperity and stable conditions for business activities. In this law we are correcting conditions which in the past have led to depressions.

Under the monetary laws which have existed in the United States in the past, this power of control has been left in the hands of Europe, and European governments have not used this power in the interest of stability. This Committee of Congress in its study of depressions has ascertained their cause. We have found depressions always associated with a certain type of legislation. This legislation has had its effect upon silver. Silver has been used as a weapon of greatest economic force of all known to civilized nations.

For example, in 1928 and 1929 the Bank of India took the responsibility of destroying over $3,000,000,000 in the value of the world's monetary metals. This placed an additional strain on the remaining 14 billions. This they did under the recommendations of the Hilton-Young Commission, which sat in London in 1926. Just as was predicted by Montagu Norman, the then Governor of the Bank of England, this resulted in the inflation of gold values. This rise in gold values was sufficient to create an effect in both Europe and America, seriously lowering securities and all property values, which values were expressed in gold equivalents. This upset the credit structure in Europe and America.

Had the United States Government taken appropriate action at that time in accordance with the provisions of this bill, this primary cause of this depression could have been obviated. This abnormal demand for gold equivalents which came from Asia was an undeniable factor in upsetting the monetary reserve in European countries and the consequent collapse of credits and destruction of property values. This took four steps; first, the demonetization and sale of India's silver; second, the melting and sale of silver coins in England, France, and Germany; third, the speculations from China and Japan, where silver was converted into gold equivalents, and fourth, the crash of stock markets in Europe and America, following the necessary forced liquidation.

The effect of this was the withdrawal of credits, the destruction of foreign trade, the accumulation of surpluses of production, the closing down of factories, the slump in real estate, withdrawal of bank deposits, and a general cessation of business activities, due to the lack of capital and absence of markets.

Wherever property could be converted into money it became profitable to do so because of the continued increase in money values and the corresponding decrease in property values.

This bill, by providing a method for the correction of these ills, stands as the first declaration of economic independence ever made by the United States Congress. This is an ambitious claim, but it will be abundantly justified when the bill is debated.

AMERICAN MONETARY POLICY

This bill formulates a monetary policy by Congress under the provisions of the Constitution that Congress shall "coin money and regulate the value thereof." This bill represents the supreme effort of this committee of Congress which holds jurisdiction over the subject of regulating money values and other standards. It is the first bill this committee has ever recommended to the American Congress which provides a way to regulate the purchasing power of gold. It takes into account the fact that the value of gold is represented by the purchasing power of gold, and not by the weight in coins. The value of gold is not determined by how many fractional parts an ounce of gold is divided into in making a franc, or a dollar, or other monetary unit.

We speak then of the value of gold in the sense of the amount which a given weight of gold will buy. The value of gold is a matter of great importance to the people of gold-standard countries. A given weight of gold being the yardstick of measure of values, its value must be held constant, or else all the property in the Nation which is measured by it must contract or expand. In this sense the value of gold is little understood. Its stability is the cause of world happiness and contentment and brings wide-spread prosperity. Sorrow and depression always follow whenever its buying power increases. Boom periods, with stock-exchange gambling and wild speculation always follow whenever gold-buying power continues to be steadily lessened.

By this small silver purchase we can prove that America acting alone can regulate the buying power of gold so as to control these things, and such a demonstration of our power of control is the purpose of this bill.

FORMER SILVER PROPOSALS

This bill must not be confused with the various silver proposals that have been before the American people which have failed to deal with this question from the standpoint of curing depressions. Generally they have been advocated from the standpoint of helping silver, and they have been a source of confusion. It has been assumed that by helping

silver we would help business. A definite reason, therefore, has generally been denied. But no one before this committee has denied that this bill will help business.

This bill is not a measure that has been advocated by the silver miners. It was first fostered by Congressmen from nonsilver States and until recently has been opposed by western mining interests.

This bill is to aid business by maintaining a stable-money system and to aid world commerce. This bill aims to establish a sound basis for the reserves of central banks of the world which will make possible a world-wide distribution of world goods. It thus will reinstate a world-wide demand for all kinds of commodities, to restore business to a basis where capital and credits are available to meet the requirements for increasing business activities. It aims to reinstate a basis for higher wages flowing out of increased profits and hence increase buying power.

This act will open the banks of all gold-standard countries to a normal and healthy expansion of credits, which invariably happens whenever property gradually rises to normal price levels.

FIXED RATIO, 16 TO 1

This bill does not use silver at a fixed ratio nor at any artificial price. The value of silver is not fixed by law. Silver is used for what it is worth in the markets of the world—no more, no less. The agitation of silver at a fixed ratio, which was the use formerly employed for silver in the monetary system of the United States, has led to a great deal of confusion. This bill recognizes the impracticability of maintaining a fixed ratio, but it goes further and employs a use for silver which does away with the objections urged against the fixed ratio.

This bill adopts the recommendation made to the committee in April in 1932 by John Janney, of the American Society of Practical Economists. Silver is placed in circulation by a certificate of deposit, exactly the equivalent of the gold certificate. Silver is the metal of ultimate redemption, but it is paid out by value in gold equivalents. This obviates the need of maintaining a fixed ratio or a fixed value in gold for any given weight of silver. Under the use of silver it is assured that the face value of this form of silver certificate cannot depreciate or appreciate. Its value will be the same at all times, regardless of the price of any given weight of silver. This method of circulating silver values has been used by certain of the leading European countries since the World War. It is a tried and accepted method.

PRESENT SILVER MONEY

The silver money now in circulation in the United States, including the silver certificates in common use, is an artificial form of money. It is maintained at its face value by a law which calls upon the Secretary of the Treasury to redeem the silver with gold. The silver dollar had as well be a lead dollar or a tin dollar, as its value is based upon its gold redemption and not upon the value of the silver. This bill relieves the strain upon gold by giving silver a basic use as money. The value is in the silver, and it carries full value, of equal value as if it were gold money. It follows, therefore, that this bill gives to the United States Government the power to control the demand upon gold and, therefore, the purchasing power of gold in compliance with the direction of mandate given to Congress under the Constitution to regulate the value of coined money.

This bill places silver in actual competition with gold as a part of the monetary system of the United States. This gives to us the control of the gold value of the world's monetary basic metals, which constitute the total current wealth of the world. This has always determined price levels and is the key to control of stable prosperity. Our committee is convinced that this is a mathematical fact, demonstrated by past experiences, and not a theory.

KEY TO THE PROGRESS OF CIVILIZATION

This committee in its study of depressions has considered evidence tending to show that all the great collapses of former civilizations involve this vital problem, a solution for which is provided in this bill.

The history of the decline and fall of former civilization is a history of those nations' losing control over the value of their money base. Judea had lost the gold and silver of the Tribes of Israel to Egypt and Babylon, and the power of their empire had immediately faded.

The destruction of Egyptian civilization had followed the loss of this money supply through importation of silks and other luxuries from Asia. Babylon, Persia, and Greece have a similar history. In the reign of Justinian the Roman Empire had lost its money base down to $600,000,000 by a similar process of so increasing money value that farm lands went out of cultivation, taxes could not be collected, and armies could no longer be maintained. Stable money values would no doubt have progressively continued these periods of civilization.

It is doubtful if our present civilization can be continued unless the American Congress takes control of this important matter. There is no other power on earth free to perform, and at the same time capable of performing this service to the world. America's vital interest is involved, and America has the power to do this thing.

This committee has already waited too long in bringing out this bill, but it had to wait until the public was in some small measure prepared to receive it. We have been deterred by propaganda in the United States which has confused the public's mind almost hopelessly on this simple matter.

Civilization cannot function without business. The one indispensable instrument of business is basic money, in the form of current wealth. This money must be of world-recognized soundness in value, and its quantity must be under control. This gives a way to demonstrate beyond doubt how that control may be exercised. It costs nothing to make this demonstration; it cannot possibly do any harm to any constructive and legitimate business. No sound or plausible argument has been advanced to this committee against it; and we believe Congress should at once enact this bill into law, and by seting up a control of full-value money, obviate the necessity of any further monetary artifices, the dangers of which are apparent and the benefits of which are doubtful.

ST. LAWRENCE SEAWAY—VAST WASTE OF PUBLIC FUNDS

Mr. BEITER. Mr. Speaker, I ask unanimous consent to revise and extend my remarks with reference to the St. Lawrence Waterway.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BEITER. Mr. Speaker, I wish to speak about the controversial question of the St. Lawrence waterway which, according to a recent news release, will be voted on in the Senate on March 14. I recognize that there are two sides to the question, and certainly every Member of Congress has a right to take any position which his judgment causes him to assume.

I have been an opponent of the proposed waterway, and, of course, what I shall have to say will be in opposition to the treaty.

I am informed through articles published in the press within the past few weeks that the Presidential support of the treaty obviously comes from his agreement with Chairman WALSH of the power authority, an agreement probably dating back to the days when he was governor of my own great State, the State of New York, that only through the treaty can New York State get its chance to develop a great power project on the St. Lawrence.

Franklin D. Roosevelt, the man, has achieved an extraordinary popularity; he holds a high place in the affections of his countrymen. His courage and earnestness, his sincerity and sympathy for the common man are unexampled; and he has, insofar as the large powers of his office are concerned, displayed these admirable traits in matters of public interest, but in spite of his deserved popularity the treaty should not be ratified by the Senate. The waterway project is, to a certain extent, in the line of progress,

but it must be considered that it will be controlled by Canada where the St. Lawrence empties itself into the sea. At any moment, if any crisis should arise between the two countries, the canal could be closed to American shipping.

Most of the construction work will be done in Canada. All the construction work on the national section will, of course, be done there, but there is more than that. Though the United States is to provide the $54,718,000 for works situated on the Canadian side in the International Rapids section, Canadian engineers, Canadian labor, and Canadian materials are to be used. All the labor and materials employed in the Canadian power development at Chrysler Island and Barnhart Island power plants are to be paid for by the Ontario government and will, of course, be Canadian. As indicated by the maps published in connection with the treaty, the international section, which reaches from a little below Prescott to a little below Cornwall, is 115 miles in length. Most of the development occurs in Canadian waters.

There are national programs which for a similar expenditure of money will give many more Americans work and will result in far more benefits to northwestern farmers and lake manufacturers than the St. Lawrence seaway.

Why should our Government appropriate $543,429,000 to destroy the business and break down their value?

More particularly, why should this Government appropriate $543,429,000 to divert commerce by way of the St. Lawrence River from lines established throughout the length of the United States?

Is there any reason why we should invest $543,429,000 to build up Montreal, Quebec, or some other Canadian port at the expense of Buffalo, New York City, Philadelphia, Baltimore, Detroit, and Chicago?

Certainly, the project, which at earliest will not bring in a return until 1942, will not facilitate our already difficult fiscal task. And this for two reasons: First, the direct costs will be a drain on the Treasury; and if the Panama Canal and Muscle Shoals are any precedent, the actual costs will be $903,829,000, or more than double the estimates. Second, the threatened Government competition with private transportation and power may seriously affect the return of investor confidence so essential to new private financing which alone can relieve the Treasury of emergency-relief expenditures.

Never has there been a survey to steady the economic effects of this project on American trade nor a study as to the ability of New York State to absorb the power created. Without this knowledge it would be folly to plunge into a costly experiment with an international canal, and one of the most dangerous elements that enters into the improvement of this canal is the great volume of electricity that it is intended to generate by water power by that enterprise. That will take business from the coal mines and employment from the needy.

According to James D. Francis, president of the Island Creek Coal Co., the construction of this waterway would permit European coal to be shipped into the Great Lakes territory and sold at prices under the present level. The Department of Commerce reports there is about a half million men employed in the bituminous-coal industry in Pennsylvania, Illinois, Virginia, West Virginia, and many other States throughout the Union. A large proportion of this half million men work part time, and it would be a very fine thing for all these bituminous-coal localities if their labor, both skilled and unskilled, could be put on a more uniform time basis. Such uniformity or continuity, let me say, if achieved, would reduce the unit price of mining coal, increase the annual earnings of the laborers and operators alike, and benefit everyone who is directly or indirectly affected by the bituminous-coal industry.

It is to be remembered also that wheat is only one item where empire preference is operating to the detriment of the United States. There are dozens of other items where the export trade from this country to Great Britain has also been virtually extinguished by the action of the Ottawa conference. Great Britain, of course, and her Dominions are clearly within their rights in establishing the preferences referred to; but when it comes to opening a waterway for ocean steamships extending all the way to Duluth and having the United States itself pay for a large part of the cost, there ought to be insistence that the United States and Canada be once more placed upon equal terms in competing in the British market.

Opposition to the St. Lawrence project by economists is well typified by a report published in 1929 by the Brookings Institution of Washington, D.C. The Brookings report held that the larger and more modern ocean-going steamers would not use the St. Lawrence route because it was open for less than one half the year. It would be difficult for such vessels to find profitable employment elsewhere for the remainder of the year. Also studies indicated that export traffic of grain from the Great Lakes area was economically destined to disappear.

When the Duluth boosters first got together in 1919 and decided to be salt-water sailors, the Middle West was fast in the grip of the delusion that the European market for wheat, which the war had created, was to be a permanent thing. So they wanted a seaway from the Lakes to the Atlantic in order that ocean freighters might sail inland to the great wheat elevators and load with grain for Liverpool. It was obvious, of course, to all who wished to see, that Europe's market for wheat would dwindle as soon as Russia and Central Europe returned to normal activity in their wheat fields. The wheat quotas under the London wheat agreement of 1933 show that the foresight of such observers was clear. In virtually all shipments except wheat lake traffic increased last year, but in wheat it decreased. Outside the circles of seaway boosters, students of wheat and shipping say it will continue to decrease.

In 1910 Canada planted 8,000,000 acres to wheat and exported 56,000,000 bushels. By 1928 she planted 25,000,000 acres and exported 422,000,000 bushels. In 1931 she exported 50 percent more wheat than the United States. She is rapidly outstripping us in wheat growing and exportation. The Dominion has 80,000,000 acres of the best wheat land on earth ready for wheat when there is a demand for it. She now has 27,000,000 acres of wheat against our 55,000,000. In spite of our increase in population, there has been a steady decline in our acreage of wheat, while at the same time there has been a trebling of the production of wheat and the number of acres in wheat in Canada. With cheaper lands and labor and greater productivity in Canada, we are in real danger.

Contrast the figures I have given with conditions in the United States. In 1910 we had 45,000,000 acres in wheat, jumped to 75,000,000 in the one year 1919, and have settled back year by year, until at present we have only about 55,000,000 in wheat acreage.

In short, our increase in wheat production is practically nil, in spite of the great increase in population, while Canada has trebled her acreage and products in less than 20 years.

With the increasing production of wheat in Russia, the Argentine, and Australia, as well as in Canada, how can we hope to maintain our former position as an exporter of wheat? Long before the St. Lawrence project could be finished we will have found other uses for our land and for the wheat we produce. Australia has doubled her production in 10 years, South America is increasing rapidly, and nobody knows what Russia may produce. The domestic market must be depended on for the absorption of our wheat crop.

With the well-known fact that we never lost a war and never won a conference with Canada, they are gracious enough to tell us that this treaty is more in their favor than any other that they have ever had before. Mr. Speaker, permit me to read from an editorial appearing in the Toronto Mail and Empire of July 19, 1932.

COST TO CANADIAN TREASURY ONLY $38,000,000

No feature of the treaty is more surprising or more satisfactory than the low cost to Canada at which the undertaking is to be carried out. Because of want of information, the press has carried

all sorts of extravagant statements as to the heavy financial burden with which the taxpayers were to be saddled in a time of depression. As late as last Saturday a Montreal newspaper estimated that the Canadian people would be mulcted to the tune of $570,000,000. All such erratic predictions have been relegated to the realm of the absurd and sublimely ridiculous. The treaty provides that the cost of the deep waterways to the Dominion Treasury will be $38,071,000. This total is reached by adding the $22,320,000 to be spent in the International Rapids section for property damages, rehabilitation work, and the Chrysler Island canal to the $82,954,000 to be spent for locks and canals on the Canadian section, and by subtracting from the total $67,202,500 to be paid by Ontario to the Dominion on account of power works in the international section. This total cost of $38,071,000 may be cut to $33,638,500 if a proposed guard lock at Beauharnois is found unnecessary, which is altogether probable.

These figures are based upon the 1926 estimates made by the International Board of Engineers on the project and since revised by that board. It is not to be forgotten that general construction costs are now down about 30 percent. The reasonableness of this remark is based on the fact that the Livingston Channel in the Detroit River was estimated to cost $7,000,000 and is now actually being built under contract for $3,400,000. If the cost of construction were to remain as low as it is today during the years of construction, the outlay by the Dominion Treasury might not amount to more than $25,000,000. Canada is given credit for $128,000,000 spent on the new Welland Canal and for other construction work.

Senate endorsement of the venture has been asked on a basis of national judgment, with sectional objections put aside. If the project is to be considered from that angle alone, one prime point on which to judge it is the question of whether the Nation with its present debt load and the Nation's people with the burden they are going to carry for a generation to come in paying off that debt, can afford any half-billion-dollar venture such as this, or one costing even half that sum.

If there are at present a sufficient number of votes in the Senate to prevent that ratification of this treaty, it cannot be submitted too soon. Knowledge that this vast waste of public funds had been prevented would be encouraging to the overburdened taxpayers of the State and of the Nation.

In commenting on the January 31 issue of the Ogdensburg Journal, which is devoted primarily to the St. Lawrence question, the whole second section of the edition being given up to that subject, and also about a half of the front page of the first section, I will be as brief as possible.

The cartoons and drawings can be dismissed in a few words. Aside from the maps on pages 1 and 24, the other drawings are cartoons, and the artist has taken a cartoonist's attitude in all respects.

In regard to the text: Congressman BERTRAND H. SNELL, whose home is in Potsdam, St. Lawrence County, must be for this project; former Mayor Julius Frank, of Ogdensburg, and Franklin R. Little, president of the Ogdensburg Chamber of Commerce, are naturally proponents of this work which would bring the expenditure of hundreds of millions of dollars almost to the doorstep of their city. Every man loves his home town and neighbors, and these gentlemen cannot do otherwise than see the benefits far outweighing the disadvantages in this proposed scheme.

Aside from the three gentlemen above mentioned who contributed to the said issue of the Journal, I find Mayor Daniel Hoan, of Milwaukee, Senator George W. Norris, former Governor William N. Brucker, of Michigan, Senator Arthur H. Vandenberg, Senator Pittman, of Nevada, Congressman Culkins, of Oswego, and Senator Robert M. La Follette, of Wisconsin.

These gentlemen have not the reasons for advocating the St. Lawrence improvement that those gentlemen have who live in the immediate district. Therefore we must look for other reasons for their support of this project. Senator NORRIS is from Nebraska. Aside from the fact that the Senator may have a desire to see a tremendous Public Works project instituted, I cannot understand his attitude excepting on the basis that he has been sold, as have so many others, by the false propaganda put out, primarily, by the Great Lakes-St. Lawrence Tidewater Association.

I have before me a copy of Seaway News, dated Washington, D.C., April 18, 1931, and issued by the Great Lakes-St. Lawrence Tidewater Association, Hon. J. Allen, president, and Charles P. Craig, executive director. This copy of the News contains a map of the United States, entitled "An Ocean Base for the Midwest." Upon this map is a line drawn from the northerly boundary of the State of New York southerly, westerly, and northerly to the northerly boundary of the eastern portion of the State of Washington. This line is called "Outlining the marooned area." A note on the map states that the "territory within this line stands today demoted because of the Panama Canal and remoteness from any sea base." Within this area is included, wholly or in part, 25 States of the Union; and undoubtedly the idea in drawing this map with this line upon it was to convince the people that the opening of the St. Lawrence River to ocean-going vessels would benefit, through ocean transportation, all the areas included within this line; but like other propaganda which has been put forward, no such condition could arise.

The said line extends west of the main range of the Rocky Mountains and south into the States of Oklahoma and Arkansas, and to assume that these localities would send freight to any lake port for ocean transportation is perfectly absurd. The value of such freight would be destroyed by the railroad rate necessary to pay thereon before it had reached any lake port; moreover, it could be shipped to other ocean ports for much less than to any lake port.

Senator VANDENBERG seems to think only of the automobile industry of Michigan in his desire for treaty ratification, regardless of what such ratification might do, if they did have ocean transportation, to the other industries of his State, and regardless of what it would cost the rest of the country. Unless Senator VANDENBERG believes thoroughly in a tariff for protection and also believes that such tariff could be quickly placed upon articles affected by foreign competition, he would, undoubtedly, find his State affected adversely by the laying-down of foreign products directly at the Michigan ports.

It is difficult to approach the arguments of Senator LA FOLLETTE calmly. He is so unfair and so biased that one naturally would seem biased in opposing his statements; moreover, I am further handicapped, possibly, in analyzing his statements. He brings up the old bogy of J. P. Morgan and what he calls the "Power Trust monopoly." The question in my mind is, Does he know anything first-hand about the Power Trust monopoly, and, if so, what? Aside from his waving of the black flag of monopoly, there is nothing in his statements which are not included in the statements of the others.

Mayor Hoan, of Milwaukee, is in the same class for benefits as the mayor of any other city along the upper Great Lakes. At the present time Chicago, Milwaukee, and Duluth-Superior are in the same category, so far as the grain trade on the Lakes is concerned, namely, they do such shipping as can reach their ports either because of preferential freight rates or because of the selling ability of their agents. As has been frequently pointed out to them, the farmers in the hinterland which supply the grain trade are not penalized because of the lack of a developed St. Lawrence, but because of subsidized railroads in their competitive territory, namely, northwestern Canada. Although this truth relative to freight rates on the railroads has been frequently brought to the attention of proponents of the St. Lawrence residing in the West and Middle West, they seem to be deaf thereto and determined to chase the will-o'-the-wisp down the St. Lawrence River rather than reality along their own railroad lines.

Congressman CULKIN, of Oswego, is quoted as follows:

The fiction persists that we will pay a greater portion of this construction than is our due share and that American construction is done with Canadian labor and Canadian materials. This is simply false, irresponsible, and founded on baseless propaganda. * * *

The naked fact is that the American portion of this canal will be built by American labor and American material. The Canadian end of it will be done by our Canadian neighbors. The treaty mirrors on both sides international good will and international accommodation. The attempt to create international ill will in connection with this discussion and to twist the lion's tail is an attempt to befog the issues. It is unfair and irrelevant.

If Mr. CULKIN believes what he is above quoted as saying, then he should either again read the treaty or have it explained to him. It is one of the most unfair statements that has been published about the treaty. The treaty does not say, and so far I have never seen it stated, that American construction would be done with Canadian labor and Canadian materials. What the treaty provides is that Canadian labor and Canadian materials will be paid for by United States money for work done on Canadian soil. It is a "naked fact" that the American portion will be built by American labor and American materials, and it is also a further fact that a large portion of the Canadian part will be built by American money. There has been no attempt to create international ill will between the United States and Canada, but the Canadians are wondering what is the nigger in the woodpile in this treaty, and so are many of us wondering the same thing. The Canadians cannot understand why we should be willing to spend $60,000,000 or $80,000,000 in their territory unless we have some ulterior motive therefor; not only spending it in their territory but spending it upon a project 90 percent belonging to Canada, which will carry 90 percent of Canadian products and which will produce power, 80 percent of which goes to Canada. Can we blame our Canadian neighbors for wondering what it is all about? Can we wonder that when this treaty was signed in Washington, the Canadian newspapers said that Premier Bennett had consummated one of the greatest deals that was ever consummated for the Dominion? Mr. CULKIN should study the treaty.

In regard to the question of power which is mentioned several times in the articles contained in the Ogdensburg Journal of January 31, little need be said at this time, except that in my recent statements before Congress, as published in the CONGRESSIONAL RECORD, I have answered them. The power portion of this project occupies a peculiar position, with particular reference to the State of New York. As long as the question of the ownership of this power was in doubt, New York was responsible for its share of the total cost of this project only insofar as its portion of Federal taxation is concerned. After Congress passed a resolution that they would sell the power generated on our side of the international section to the State of New York for $80,500,000, more or less, it put New York State in the position of being the sugar daddy to the rest of the United States. It simply means that in order to provide problematical navigation benefits to the Great Lakes, the State of New York, through taxation and direct payments, will pay about one half the total cost of the job. With the mental attitude which now seems to be extant, namely, soak the other fellow, it can readily be assumed that this whole project has developed into a Donnybrook Fair.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. DEEN, for 1 week, on account of illness.

To Mr. WILLIAMS, indefinitely, on account of illness.

BILLS PRESENTED TO THE PRESIDENT

Mr. Parsons, from the Committee on Enrolled Bills, reported that that committee did on March 9, 1934, present to the President, for his approval, bills of the House of the following titles:

H.R. 5632. An act to supplement and support the Migratory Bird Conservation Act by providing funds for the acquisition of areas for use as migratory-bird sanctuaries, refuges, and breeding grounds, for developing and administering such areas, for the protection of certain migratory birds, for the enforcement of the Migratory Bird Treaty Act and regulations thereunder, and for other purposes.

H.R. 7295. An act making appropriations for the Treasury and Post Office Departments for the fiscal year ending June 30, 1935, and for other purposes.

ADJOURNMENT

Mr. JONES. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 43 minutes p.m.) the House adjourned until Monday, March 12, 1934, at 12 o'clock noon.

COMMITTEE HEARINGS

COMMITTEE ON THE POST OFFICE AND POST ROADS

(Monday, Mar. 12, 10 a.m.)

Air-mail hearings on H.R. 8578.

COMMITTEE ON THE PUBLIC LANDS

(Monday, Mar. 12, 10:30 a.m.)

Room 328, House Office Building.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

377. A letter from the Chairman of the Reconstruction Finance Corporation, transmitting report of its activities and expenditures for December 1933, together with a statement of loans authorized during that month, showing the name, amount, and rate of interest in each case (H.Doc. No. 280); to the Committee on Banking and Currency, and ordered to be printed.

378. A letter from the Secretary of State, transmitting copy of a despatch from the American Embassy at Brussels and its enclosure, a letter from the Secretary General of the International Parliamentary Conference on Commerce extending to the Congress of the United States an invitation to be represented at the Nineteenth Plenary Assembly of said organization to convene at Belgrade on September 16, 1934; to the Committee on Foreign Affairs.

379. A letter from the Secretary of the American Academy of Arts and Letters, transmitting the official report of the academy for the year 1933; to the Committee on the Library.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. PERKINS: Committee on Elections No 3. House Resolution 296. Resolution declaring that William C. Fox is not entitled to a seat in the House of Representatives; without amendment (Rept. No. 894). Referred to the House Calender.

Mr. PALMISANO: Committee on the District of Columbia. S. 194. An act to change the name of B Street SW., in the District of Columbia; without amendment (Rept. No. 895). Referred to the House Calendar.

Mr. PALMISANO: Committee on the District of Columbia. S. 2509. An act to readjust the boundaries of Whitehaven Parkway at Huidekoper Place in the District of Columbia, provide for an exchange of land, and for other purposes; without amendment (Rept. No. 896). Referred to the House Calendar.

Mr. PALMISANO: Committee on the District of Columbia. H.R. 1607. A bill to prevent professional prize fighting and to authorize amateur boxing in the District of Columbia, and for other purposes; with amendment (Rept. No. 897). Referred to the House Calendar.

Mr. PALMISANO: Committee on the District of Columbia. H.R. 4942. A bill to establish an athletic commission to regulate boxing, sparring, and wrestling exhibitions; without amendment (Rept. No. 898). Referred to the Committee of the Whole House on the state of the Union.

Mr. PALMISANO: Committee on the District of Columbia. H.R. 8472. A bill to authorize steam railroads to electrify their lines within the District of Columbia, and for other purposes; without amendment (Rept. No. 899). Referred to the House Calendar.

Mr. WEIDEMAN: Committee on Immigration and Naturalization. H.R. 3675. A bill to clarify the application of the contract-labor provisions of the immigration laws to singers and choristers; without amendment (Rept. No. 902). Referred to the House Calendar.

Mr. DEROUEN: Committee on the Public Lands. H.R. 6462. A bill to stop injury to the public grazing lands by preventing overgrazing and soil deterioration, to provide for their orderly use, improvement, and development, to stabilize the livestock industry dependent upon the public range, and for other purposes; with amendment (Rept. No. 903). Referred to the Committee of the Whole House on the state of the Union.

Mr. GREEN: Committee on the Territories. H.R. 3843. A bill to repeal an act of Congress entitled "An act to modify and amend the mining laws in their application to the Territory of Alaska, and for other purposes", approved August 1, 1912; with amendment (Rept. No. 904). Referred to the House Calendar.

Mr. GREEN: Committee on the Territories. S. 2728. An act to repeal Federal liquor prohibition laws to the extent they are in force in the Territory of Hawaii; with amendment (Rept. No. 905). Referred to the House Calendar.

Mr. GREEN: Committee on the Territories. S. 2729. An act to repeal an act of Congress entitled "An act to prohibit the manufacture or sale of alcoholic liquors in the Territory of Alaska, and for other purposes", approved February 14, 1917, and for other purposes; with amendment (Rept. No. 906). Referred to the House Calendar.

Mr. MALONEY of Louisiana: Committee on Interstate and Foreign Commerce. S. 2445. An act to authorize the Secretary of the Navy and the Secretary of Commerce to exchange a portion of the naval station and a portion of the lighthouse reservation at Key West, Fla.; without amendment (Rept. No. 917). Referred to the House Calendar.

Mr. MALONEY of Louisiana: Committee on Interstate and Foreign Commerce. H.R. 29. A bill authorizing the Secretary of Commerce to dispose of certain lighthouse reservations, and for other purposes; without amendment (Rept. No. 918). Referred to the Committee of the Whole House on the state of the Union.

Mr. MALONEY of Louisiana: Committee on Interstate and Foreign Commerce. H.R. 7551. A bill authorizing the Secretary of Commerce to dispose of the Pass A'Loutre Lighthouse Reservation, La.; without amendment (Rept. No. 920). Referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. PALMISANO: Committee on the District of Columbia. S. 2006. An act for the relief of Della D. Ledendecker; without amendment (Rept. No. 900). Referred to the Committee of the Whole House.

Mr. PALMISANO: Committee on the District of Columbia. H.R. 2035. A bill for the relief of Jennie Bruce Gallahan; without amendment (Rept. No. 901). Referred to the Committee of the Whole House.

Mr. YOUNG: Committee on War Claims. S. 1192. An act for the relief of the Union Shipping & Trading Co., Ltd.; without amendment (Rept. No. 907). Referred to the Committee of the Whole House.

Mr. YOUNG: Committee on War Claims. H.R. 3595. A bill for the relief of St. Ludgers Catholic Church of Germantown, Henry County, Mo.; without amendment (Rept. No. 908). Referred to the Committee of the Whole House.

Mr. YOUNG: Committee on War Claims. H.R. 4175. A bill for the relief of Oscar C. Olson; without amendment (Rept. No. 909). Referred to the Committee of the Whole House.

Mr. YOUNG: Committee on War Claims. H.R. 4180. A bill for the relief of Guy Goodin; without amendment (Rept. No. 910). Referred to the Committee of the Whole House.

Mr. YOUNG: Committee on War Claims. H.R. 6245. A bill conferring jurisdiction upon the Court of Claims to hear and determine the claim of the Mack Copper Co.; without amendment (Rept. No. 911). Referred to the Committee of the Whole House.

Mr. YOUNG: Committee on War Claims. H.R. 6349. A bill to confer jurisdiction upon the Court of Claims to hear, determine, and render judgment upon the claim of the Velie Motors Corporation; without amendment (Rept. No. 912). Referred to the Committee of the Whole House.

Mr. YOUNG: Committee on War Claims. H.R. 7389. A bill granting jurisdiction to the Court of Claims to hear the case of David A. Wright; without amendment (Rept. No. 913). Referred to the Committee of the Whole House.

Mr. THOMASON: Committee on Military Affairs. H.R. 387. A bill donating bronze trophy guns to the Cohoes Historical Society, Cohoes, N.Y.; without amendment (Rept. No. 914). Referred to the Committee of the Whole House.

Mr. MALONEY of Louisiana: Committee on Interstate and Foreign Commerce. H.R. 5312. A bill to provide for the conveyance of the abandoned lighthouse reservation and buildings, including detached tower, situate within the city limits of Erie, Pa., to the city for public-park purposes; without amendment (Rept. No. 915). Referred to the Committee of the Whole House.

Mr. MERRITT: Committee on Interstate and Foreign Commerce. H.R. 7744. A bill to authorize the Secretary of Commerce to transfer to the city of Bridgeport, Conn., a certain unused light-station reservation; without amendment (Rept. No. 916). Referred to the Committee of the Whole House.

Mr. MALONEY of Louisiana: Committee on Interstate and Foreign Commerce. H.R. 2828. A bill to authorize the city of Fernandina, Fla., under certain conditions, to dispose of a portion of the Amelia Island Lighthouse Reservation; without amendment (Rept. No. 919). Referred to the Committee of the Whole House.

Mr. MALONEY of Louisiana: Committee on Interstate and Foreign Commerce. H.R. 7863. A bill authorizing the Secretary of Commerce to dispose of part of the Grosse Point Lighthouse Reservation, Ill.; without amendment (Rept. No. 921). Referred to the Committee of the Whole House.

Mr. PLUMLEY: Committee on Military Affairs. H.R. 6497. A bill for the relief of James Henry Green; without amendment (Rept. No. 923). Referred to the Committee of the Whole House.

Mr. HARLAN: Committee on the District of Columbia. H.R. 7090. A bill to amend an act to incorporate the Mutual Fire Insurance Co. of the District of Columbia, as amended; with amendment (Rept. No. 924). Referred to the Committee of the Whole House.

ADVERSE REPORTS

Under clause 2 of rule XIII,

Mr. PLUMLEY: Committee on Military Affairs. H.R. 2924. A bill for the relief of Caleb Kase (Rept. No. 922). Laid on the table.

CHANGE OF REFERENCE

Under clause 2 of rule XXII, the Committee on World War Veterans' Legislation was discharged from the consideration of the bill (H.R. 8547) for the relief of Florence Byvank, and the same was referred to the Committee on Claims.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. SPENCE: A bill (H.R. 8567) to amend the laws relating to the length of tours of duty in the Tropics and certain foreign stations in the case of officers and enlisted men of the Army, Navy, and Marine Corps, and for other purposes; to the Committee on Military Affairs.

By Mr. DIRKSEN: A bill (H.R. 8568) to amend section 11 (i) of the District of Columbia Alcoholic Beverage Act (Public, 85, 73d Cong.); to the Committee on the District of Columbia.

By Mrs. JENCKES of Indiana: A bill (H.R. 8569) to provide for the establishment of a fire department trial board in

the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

Also, a bill (H.R. 8570) to amend sections 552, 558, and 559 of title 20 of the Code of the District of Columbia; to the Committee on the District of Columbia.

By Mrs. NORTON: A bill (H.R. 8571) to authorize the widening of Thirteenth Street NW., in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

By Mr. STRONG of Texas: A bill (H.R. 8572) to amend paragraph (8) of section 1 of the Interstate Commerce Act, as amended; to the Committee on Interstate and Foreign Commerce.

By Mr. McDUFFIE: A bill (H.R. 8573) to provide for the complete independence of the Philippine Islands, to provide for the adoption of a constitution and a form of government for the Philippine Islands, and for other purposes; to the Committee on Insular Affairs.

By Mr. McSWAIN: A bill (H.R. 8574) to amend Public Law No. 2, Seventy-third Congress, entitled "An act to maintain the credit of the United States Government"; to the Committee on World War Veterans' Legislation.

By Mr. BULWINKLE: A bill (H.R. 8575) to establish a Federal Stock Exchange Commission, to provide for the licensing of stock exchanges, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. STRONG of Texas: A bill (H.R. 8576) to amend section 18 of chapter 1 of title 15 (Committee and Trade) of the United States Code; to the Committee on the Judiciary.

By Mr. WOLCOTT: A bill (H.R. 8577) to extend the times for commencing and completing the construction of a bridge across the St. Clair River at or near Port Huron, Mich.; to the Committee on Interstate and Foreign Commerce.

By Mr. MEAD: A bill (H.R. 8578) to revise air-mail laws; to the Committee on the Post Office and Post Roads.

By Mr. ELLENBOGEN: A bill (H.R. 8579) to release veterans from the liability to pay interest on loans secured by adjusted-service certificates, and for other purposes; to the Committee on Ways and Means.

By Mr. MARTIN of Oregon: A bill (H.R. 8580) for the relief of contract veterans of the Spanish-American War, including the Philippine insurrection and the Chinese Boxer rebellion; to the Comittee on Military Affairs.

Also, a bill (H.R. 8581) establishing a fund for the propagation of salmon in the Columbia River district; to the Committee on Merchant Marine, Radio, and Fisheries.

By Mr. BLOOM: A bill (H.R. 8582) to amend the naturalization laws in respect of residence requirements, and for other purposes; to the Committee on Immigration and Naturalization.

By Mr. MARTIN of Oregon: A bill (H.R. 8583) authorizing an appropriation for the further development of the submarine and destroyer base at Tongue Point, Oreg.; to the Committee on Naval Affairs.

By Mrs. NORTON: A bill (H.R. 8584) to extend certain benefits of the Public Health Service to certain seamen, and for other purposes; to the Committee on Merchant Marine, Radio, and Fisheries.

Also, a bill (H.R. 8585) to amend sections 416 and 417 of the Revised Statutes relating to the District of Columbia; to the Committee on the District of Columbia.

By Mr. FISH: Resolution (H.Res. 297) authorizing the appointment of a committee of five Members of the House of Representatives to investigate the Army Air Corps operations; to the Committee on Rules.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of Illinois, memorializing Congress to reopen the Great Lakes Naval Training Station near Waukegan, Ill.; to the Committee on Naval Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BEITER: A bill (H.R. 8586) granting an increase of pension to Harry E. Pangborn; to the Committee on Pensions.

By Mr. BURKE of Nebraska: A bill (H.R. 8587) to extend the benefits of the Employees' Compensation Act of September 7, 1916, to William Thomas; to the Committee on Claims.

By Mr. BYRNS: A bill (H.R. 8588) for the relief of the George R. Jones Co., a corporation organized under the laws of the State of New Hampshire; to the Committee on Claims.

By Mr. CASTELLOW: A bill (H.R. 8589) for the relief of Lucy Stewart; to the Committee on Foreign Affairs.

By Mr. CUMMINGS: A bill (H.R. 8590) for the relief of William F. Lively; to the Committee on Claims.

By Mr. DIRKSEN: A bill (H.R. 8591) for the relief of Herbert E. Zook; to the Committee on Claims.

Also, a bill (H.R. 8592) for the relief of Clyde W. Zuckweiler; to the Committee on Naval Affairs.

By Mr. LUNDEEN: A bill (H.R. 8593) granting additional war-risk insurance to Anna Christine Jones; to the Committee on War Claims.

By Mr. McLEOD: A bill (H.R. 8594) for the relief of the Otto Misch Co.; to the Committee on Claims.

By Mr. TRAEGER: A bill (H.R. 8595) for the relief of Nicholas Luke Leutza; to the Committee on Naval Affairs.

Also, a bill (H.R. 8596) for the relief of Frank A. Pauley, deceased; to the Committee on Military Affairs.

By Mr. UTTERBACK: A bill (H.R. 8597) for the relief of Nellie R. Farley; to the Committee on Pensions.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

2876. By Mr. ARENS: Petition regarding the removal of the territory specified in the treaty of 1855 from the present Indian reservation; to the Committee on Indian Affairs.

2877. Also, petition of the Minnesota Council for National Defense, requesting the adoption of a resolution to add sufficient amounts to the War Department appropriations; to the Committee on Appropriations.

2878. Also, petition of the Cooperative Council of Becker County, opposing the importation of foreign fats and oils; to the Committee on Ways and Means.

2879. Also, petition of the Minnesota Council for National Defense, opposing the passage of the Griffin bill; to the Committee on Immigration and Naturalization.

2880. Also, petition regarding the construction of power dams on sites located on the Pigeon River; to the Committee on Military Affairs.

2881. By Mr. BEAM: Resolution of the General Assembly of the State of Illinois, memorializing Congress to enact necessary legislation to make possible loans to school districts now in distress; to the Committee on Education.

2882. By Mr. CADY: Petition signed by Ray Dehoff, Fenton, Mich., and some 2,700 other residents of the Sixth District of Michigan, urging restoration of all benefits as of March 19, 1933, to disabled veterans with service-connected disabilities; to the Committee on World War Veterans' Legislation.

2883. By Mr. EDMONDS: Petition of the Philadelphia Board of Trade, regarding establishment of foreign trade zones; to the Committee on Ways and Means.

2884. By Mr. HOWARD: Petition by the Pender Woman's Club, of Pender, Nebr., urging passage of House bill 6098, and requesting the enactment of legislation to correct the evils of book blocking of films in sale to small theaters; to the Committee on Education.

2885. By Mr. JAMES: Resolution from Emil Formala, secretary of Lake Superior Fisherman's Association of Chassell, Mich., approving House bill 6973; to the Committee on Rivers and Harbors.

2886. By Mr. KENNEY: Petition in the nature of a resolution of Big Six Post, No. 1522, Veterans of Foreign Wars, Post Headquarters 143 West Forty-fourth Street, New York City, that we, Big Six Post, No. 1522, Veterans of Foreign Wars, go on record in favor of bill 7316, sponsored by Congressman EDWARD A. KENNEY, of New Jersey, which provides for the conduct of a national lottery under auspices of the Federal Government; to the Committee on Ways and Means.

2887. By Mr. KVALE: Resolution adopted at the regular meeting of the Independent Union of All Workers of Albert Lea, Minn., urging support of President Roosevelt's monetary policy; to the Committee on Coinage, Weights, and Measures.

2888. Also, petition of numerous taxpayers and voters of Freeborn County, Minn., urging support of President Roosevelt's monetary policy; to the Committee on Coinage, Weights, and Measures.

2889. Also, resolution of the Central Council of District Clubs, St. Paul, Minn., relating to the curbing of the present system of private control of money and credits; to the Committee on Banking and Currency.

2890. Also, petition of certain citizens of St. Paul, Minn., urging adequate issuance of currency, restoration of silver, and suggestions for use of new currency; to the Committee on Coinage, Weights, and Measures.

2891. Also, petition of members of Zenith Branch, No. 114, National Association of Letter Carriers of Duluth, Minn., urging restoration of salaries reduced under the Economy Act; to the Committee on Appropriations.

2892. Also, petition of numerous citizens of Minneapolis, Minn., urging support of President Roosevelt's monetary policy; to the Committee on Coinage, Weights, and Measures.

2893. Also, resolution adopted by the Journeymen Plumbers Local Union, No. 34, of St. Paul, Minn., urging support of President Roosevelt's monetary policy; to the Committee on Coinage, Weights, and Measures.

2894. Also, petition of sugar-beet growers of Lake Lillian, Minn., urging that protection be given them to raise sugar beets under the crop contract reduction plan; to the Committee on Agriculture.

2895. Also, petition of group of farmers and unemployed citizens of Becker County, Minn., urging extension of the Civil Works Administration projects in northwestern Minnesota to provide work in drought-stricken areas; to the Committee on Appropriations.

2896. Also, petition of numerous citizens of St. Paul, Minn., urging support of President Roosevelt's monetary policy; to the Committee on Coinage, Weights, and Measures.

2897. Also, petition of the Voters Protective League of Minneapolis, Minn., urging support of President Roosevelt's program for stabilizing the currency; to the Committee on Coinage, Weights, and Measures.

2898. Also, petition of Minnesota Council for National Defense, urging increase in appropriations for national defense; to the Committee on Appropriations.

2899. Also, petition of the Civic and Commerce Association, Montevideo, Minn., urging continuation of the Civil Works Administration work in the drought-stricken area until harvest time; to the Committee on Appropriations.

2900. By Mr. LEHR: Petition of the Senate and House of Representatives of the State of Michigan to the Hon. Franklin D. Roosevelt, President of the United States of America, not to place any limit whatsoever on the acreage for sugar-beet production and beet-sugar production in the State of Michigan; to the Committee on Agriculture.

2901. By Mr. LINDSAY: Petition of the National Woman's Party, New York City committee, urging the passage of House bill 3673; to the Committee on Immigration and Naturalization.

2902. By Mr. LUCE: Resolution of the Boston Central Labor Union, calling attention to the failure of the Civil Works Administration, urging its discontinuance; to the Committee on Appropriations.

2903. By Mr. MEAD: Petition of the Brotherhood of Railway Carmen of America, New Deal Lodge, No. 380, Buffalo, N.Y., urging favorable action on railroad legislation; to the Committee on Interstate and Foreign Commerce.

2904. Also, petition of the Railway Labor Executives Association, Buffalo, N.Y., urging favorable action on railroad-labor legislation; to the Committee on Labor.

2905. Also, petition of the Buffalo Chamber of Commerce, Buffalo, N.Y., expressing opposition to sections of Senate bill 2693; to the Committee on Interstate and Foreign Commerce.

2906. By Mr. KVALE: Petition of the Minnesota Council for National Defense, opposing the Griffin bill, giving privileges of citizenship to aliens who refuse to bear arms in defense of the United States in time of emergency; to the Committee on Immigration and Naturalization.

2907. By Mr. MEAD: Petition of the Brotherhood of Railroad Trainmen, Niagara Frontier Lodge, No. 220, Buffalo, N.Y., urging favorable action on House bill 7401; to the Committee on Interstate and Foreign Commerce.

2908. By Mr. MILLARD: Petition signed by members of the James Daley Post of the Veterans of Foreign Wars, urging immediate payment of the veterans' adjusted-compensation certificates; to the Committee on World War Veterans' Legislation.

2909. Also (by request), petition signed by members of the James Daley Post, Veterans of Foreign Wars, Hastings-on-Hudson, N.Y., urging immediate payment of the bonus; to the Committee on World War Veterans' Legislation.

2910. By Mr. SABATH: Petition of the Eighty-eighth General Assembly of the State of Illinois, urging the passage of legislation by the Congress of the United States to make possible Federal loans to school districts situate in the State of Illinois; to the Committee on Banking and Currency.

2911. By Mr. SADOWSKI: Petition of the West Side Democratic Club, No. 1, endorsing the 30-hour week bill; to the Committee on Labor.

2912. Also, petition by an unemployed council of 50 men in Detroit, Mich., endorsing and demanding the immediate enactment of the workers unemployment and social insurance bill (H.R. 7598); to the Committee on Labor.

2913. Also, petition of the common council, city of Detroit, Mich.; to the Committee on the Judiciary.

2914. By Mr. SUTPHIN: Petition of the Monmouth County Branch, American Association of University Women, opposing block booking and blind selling in the motion-picture industry; to the Committee on Interstate and Foreign Commerce.

2915. Also, petition of the New Jersey State Senate, urging the discontinuance of the Federal tax on gasoline; to the Committee on Ways and Means.

2916. By Mr. WOLVERTON: Petition of Charles Cushing Post, No. 14, Veterans of Foreign Wars, requesting favorable Consideration of House bill 1, providing for immediate payment of adjusted-service certificates; to the Committee on World War Veterans' Legislation.

2917. By the SPEAKER: Petition of W. J. Dearth, Washington representative, National Live Stock Exchange; to the Committee on Agriculture.

2918. Also, petition of the Wyoming & Southern Railroad Co., regarding the price of coal; to the Committee on Ways and Means.

2919. Also, petition of the United Mine Workers of America, Local No. 498, regarding the competition by laborless fuels with the coal industry; to the Committee on Ways and Means.

2920. Also, petition of the World Trade League of the United States, urging passage of House bill 8430; to the Committee on Ways and Means.

2921. Also, petition of the borough of Little Ferry, N.J., approving passage of National Lottery Act; to the Committee on Ways and Means.

SENATE

MONDAY, MARCH 12, 1934

(Legislative day of Wednesday, Feb. 28, 1934)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

THE JOURNAL

On motion of Mr. ROBINSON of Arkansas, and by unanimous consent, the reading of the Journal for the calendar day Saturday, March 10, was dispensed with, and the Journal was approved.

CALL OF THE ROLL

Mr. ROBINSON of Arkansas. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Cutting	King	Robinson, Ark.
Ashurst	Davis	La Follette	Robinson, Ind.
Austin	Dickinson	Lewis	Russell
Bailey	Dieterich	Logan	Schall
Bankhead	Dill	Lonergan	Sheppard
Barbour	Duffy	Long	Shipstead
Barkley	Erickson	McAdoo	Smith
Black	Fess	McCarran	Steiwer
Bone	Fletcher	McGill	Stephens
Borah	Frazier	McKellar	Thomas, Okla.
Bulkley	George	McNary	Thomas, Utah
Byrd	Gibson	Metcalf	Thompson
Byrnes	Glass	Neely	Townsend
Capper	Goldsborough	Norris	Trammell
Caraway	Gore	Nye	Tydings
Carey	Hale	O'Mahoney	Vandenberg
Clark	Harrison	Overton	Van Nuys
Connally	Hatch	Patterson	Wagner
Coolidge	Hayden	Pittman	Walcott
Copeland	Johnson	Pope	Walsh
Costigan	Kean	Reed	Wheeler
Couzens	Keyes	Reynolds	White

Mr. LEWIS. I beg to announce that the Senator from Tennessee [Mr. BACHMAN], the Senator from South Dakota [Mr. BULOW], and the Senator from New Hampshire [Mr. BROWN] are unavoidably detained from the Senate, and that the Senator from Iowa [Mr. MURPHY] is absent on account of a severe cold.

Mr. FESS. I desire to announce that the Senator from Delaware [Mr. HASTINGS], the Senator from West Virginia [Mr. HATFIELD], the Senator from Rhode Island [Mr. HEBERT], and the Senator from South Dakota [Mr. NORBECK] are necessarily absent.

The VICE PRESIDENT. Eighty-eight Senators have answered to their names. A quorum is present.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate the following concurrent resolution of the Legislature of the State of New York, which was referred to the Committee on Appropriations:

STATE OF NEW YORK,
IN SENATE,
Albany, March 6, 1934.

By Mr. Kernan

Whereas many citizens of the State of New York in the region of the Mohawk River and its various tributaries and in the area of the Hudson River Valley, north of the Federal lock at Troy, N.Y., are in grave danger of suffering from the increasing high water due to incessant rains and the seasonal spring thaws; and

Whereas a large number of our citizens in such regions are not receiving proper protection to their homes and property because of a lack of adequate flood control and river regulation; and

Whereas a part of the waterways aforesaid is included in the barge canal system through which pass many cargoes of interstate commerce; and

Whereas the adequate protection to these waterways and the citizens residing in the areas adjacent to them should be a matter of deep concern to the Federal Government as well as to the government of New York State: Now, therefore, be it

Resolved (if the assembly concur), That the Congress of the United States be, and it is hereby, respectfully memorialized to provide funds of the Federal Government to supplement the appropriations of the State of New York for the proper river regulation and flood control of the waterways as aforesaid and enact the necessary legislation in carrying into effect such work; and be it further

Resolved (if the assembly concur), That a copy of this resolution be transmitted to the Clerk of the House of Representatives, the Secretary of the United States Senate, and to each Member of Congress elected from the State of New York.

By order of the senate.

MARGUERITE O'CONNELL, *Clerk.*

IN ASSEMBLY,
March 7, 1934.

Concurred in without amendment. By order of the assembly.

FRED W. HAMMOND, *Clerk.*

The VICE PRESIDENT also laid before the Senate a letter in the nature of a petition from Mrs. Robert G. Donecker, of McCracken, Kans., praying for the passage of old-age pension legislation, which was referred to the Committee on Education and Labor.

He also laid before the Senate a resolution adopted by the municipal council of Sarrat, Province of Ilocos Norte, P.I., favoring the passage of the so-called "King Philippine independence bill", which was referred to the Committee on Territories and Insular Affairs.

He also laid before the Senate a resolution adopted by the municipal council of Nasugbu, Province of Batangas, P.I., favoring the passage of the so-called "King Philippine independence bill", which was referred to the Committee on Territories and Insular Affairs.

He also laid before the Senate a resolution adopted by the municipal council of Nasugbu, Province of Batangas, P.I., protesting against the passage of the so-called "Tydings Philippine independence bill", providing, among other things, an extension of time for the acceptance of Philippine independence, which was referred to the Committee on Territories and Insular Affairs.

He also laid before the Senate a telegram from W. Ingle Leitch, of Cleveland, Ohio, calling attention to certain aspects of article 8 of the proposed treaty between the United States and Canada on the Great Lakes-St. Lawrence deep waterway project, and favoring the taking of additional time to consider all phases of the matter, which was ordered to lie on the table.

PRODUCTION OF SUGAR BEETS

Mr. O'MAHONEY presented a telegram from H. H. Graham, president of the Huntley Project Development Association, which was referred to the Committee on Finance and ordered to be printed in the RECORD, as follows:

WORDEN, MONT., *March 12, 1934.*

Senator O'MAHONEY,
United States Senate.

DEAR SIR: We, the farmers of the Huntley Project Development Association, are opposed to any curtailment in production of sugar beets on our Huntley project and we are opposed to any quotas set for our beet industry in the United States. We are with you 100 percent in the amendments you are offering to the sugar question. We, the farmers on the Huntley project, came here in good faith, with the understanding that our major crop would be sugar beets, which has proved to be a fact. Without sugar beets raised on our farms here we would have to move out. We have spent approximately 25 years of our lives and all of our earnings on the Huntley project. We have built up our farms, our homes, and made improvements, improved the value of the land, paid taxes, and built our schools. Our business men have built their business houses around the beet industry with the idea that our future business would be sugar beets. Our children have been reared here, grown up, and have become permanent fixtures and adapted to the sugar-beet raising. There is no other industry that has offered so much for the benefit of our land and country in general, especially the laboring class. When we located on this western project we did so with the idea that the Government would be back of us in any curtailing that might show up in the production of sugar beets, especially surrendering our sugar-beet industry to some foreign nation. We, the farmers of the Huntley project, do urge that you do all within your power to keep such curtailment out of the sugar legislation.

H. H. GRAHAM, *President.*

REPORTS OF COMMITTEES

Mr. GLASS, from the Committee on Banking and Currency, to which was referred the bill (S. 2788) to amend section 5219 of the Revised Statutes, as amended (relating to State taxation of national banking associations), reported it without amendment.

Mr. BULKLEY, from the Committee on Banking and Currency, to which was referred the bill (S. 2999) to guarantee

the bonds of the Home Owners' Loan Corporation, to amend the Home Owners' Loan Act of 1933, and for other purposes, reported it without amendment and submitted a report (No. 466) thereon.

Mr. CONNALLY, from the Committee on Public Buildings and Grounds, to which was referred the bill (H.R. 5745) granting abandoned public buildings and grounds at Sitka, Alaska, to the Territory of Alaska, and for other purposes, reported it without amendment and submitted a report (No. 465) thereon.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of several postmasters, which were ordered to be placed on the calendar.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. GLASS:

A bill (S. 3025) to amend section 12B of the Federal Reserve Act so as to extend for 1 year the temporary plan for deposit insurance, and for other purposes; to the Committee on Banking and Currency.

By Mr. GEORGE:

A bill (S. 3026) for the relief of Lucy Cobb Stewart; to the Committee on Foreign Relations.

A bill (S. 3027) granting an increase of pension to James A. Walker; to the Committee on Pensions.

By Mr. STEIWER:

A bill (S. 3028) for the relief of Walter S. Chiene and Annie H. Chiene (widow, guardian of minors, and administratrix of estate of Lyon Playfair Chiene); to the Committee on Claims.

By Mr. DAVIS:

A bill (S. 3029) for the relief of Albert A. Taney; to the Committee on Military Affairs.

A bill (S. 3030) granting a pension to Samuel Johnson; and

A bill (S. 3031) granting a pension to Henrietta V. W. Owen; to the Committee on Pensions.

By Mr. McCARRAN (by request):

A bill (S. 3032) to require financial responsibility of owners and operators of vehicles for hire in the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

A bill (S. 3033) to reserve certain public-domain lands in Nevada and Oregon as a grazing reserve for Indians of Fort McDermitt, Nev.; to the Committee on Public Lands and Surveys.

By Mr. NEELY:

A bill (S. 3034) granting a pension to Rebecca Swisher Boyd; to the Committee on Pensions.

By Mr. HATCH:

A bill (S. 3035) granting compensation to Reuben R. Hunter; to the Committee on Claims.

By Mr. McKELLAR:

A bill (S. 3036) for the relief of the George R. Jones Co., a corporation, organized under the laws of the State of New Hampshire; to the Committee on Claims.

A bill (S. 3037) granting a pension to Ben Harrison Martin; to the Committee on Pensions.

By Mr. JOHNSON:

A bill (S. 3038) to amend sections 116 and 22 of the Revenue Act of 1932; to the Committee on Finance.

(Mr. WHEELER introduced Senate bill 3039, which appears under a separate heading.)

By Mr. ASHURST (by request):

A bill (S. 3040) to give the Supreme Court of the United States authority to make and publish rules in actions at law; to the Committee on the Judiciary.

By Mr. COPELAND, Mr. VANDENBERG, and Mr. MURPHY:

A bill (S. 3041) to effectuate the purpose of certain statutes concerning rates of pay for labor, by making it unlawful to prevent anyone from receiving the compensation contracted for thereunder, and for other purposes; to the Committee on the Judiciary.

By Mr. BLACK:

A bill (S. 3042) for the relief of Warren F. Avery; to the Committee on Military Affairs.

A bill (S. 3043) to amend section 25 (b) of the Federal Reserve Act, as amended (relating to jurisdiction of Federal courts over suits involving Federal Reserve banks); to the Committee on Banking and Currency.

By Mr. FRAZIER:

A joint resolution (S.J.Res. 86) for the adjustment and settlement of losses sustained by the cooperative marketing associations; to the Committee on Agriculture and Forestry.

PURCHASE OF SILVER

Mr. WHEELER introduced a bill (S. 3039) for the relief of agriculture, the producers of livestock, and the producers of raw materials generally, and for other purposes, which was read twice by its title, referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

Be it enacted, etc., That in order to provide necessary relief for agriculture, the producers of livestock, and the producers of raw materials generally, it is herein declared to be necessary:

(a) To raise the general price level sufficiently to enable such producers to secure the cost of production plus a reasonable profit.

(b) In order to raise the general price level it is further declared to be necessary to increase the number of monetary units in circulation.

(c) In order to secure a sound and controlled increase in the number of monetary units in circulation it is herein declared to be necessary to make a wider use of silver as money and as the base for the issuance of money.

SEC. 2. The Secretary of the Treasury is hereby authorized and directed to purchase silver bullion at the rate of not less than 50,000,000 ounces per month, until there shall be added to the monetary resources of the United States 1,000,000,000 ounces of silver, except that whenever 371¼ grains of pure silver equals in purchasing power 23.22 grains of pure gold the purchase of silver under this section shall be suspended. Such silver shall be purchased at home or abroad, wherever silver shall be procurable at or under the value specified above, with any direct obligations, coin, or currency of the United States authorized by law, or with any funds in the Treasury not otherwise appropriated, at such rates and upon such terms and conditions as the Secretary of the Treasury may deem most advantageous to the public interest; and the silver so purchased shall be held in reserve in the Treasury against the issue of certificates of deposit payable to bearer on demand in silver bullion as hereinafter provided. Such silver certificates shall be issued by the Treasury in an amount which, in the aggregate, shall equal the cost of such silver to the Treasury. Upon presentation of any such silver certificates the Treasurer of the United States shall redeem the same by the delivery of the face value thereof in silver bullion of the gold equivalent value at the time of demand, to the end that the silver delivered shall be measured by value rather than by weight. The silver certificates issued under the provisions of this section shall be legal tender for all debts, public and private, public charges, taxes, duties, and dues.

SEC. 3. All acts and parts of acts in conflict herewith are hereby repealed.

USE OF PULPWOOD, PULP, AND PAPER

Mr. HALE submitted a resolution (S.Res. 205), which was ordered to lie over under the rule, as follows:

Resolved, That the Secretary of Agriculture be, and he is hereby, requested to submit to the Senate at his early convenience a report based on information already available covering—

(a) The extent to which the United States now depends upon imports of pulpwood, pulp, and paper to meet national requirements.

(b) Whether and the extent to which it is now possible with known pulp and paper processes to supply from the forest lands of the United States all of the pulpwood needed to meet the national pulp and paper requirements.

(c) What adjustments are feasible and necessary and what program of forest conservation is recommended for the immediate and more distant future by the Federal Government, the States, the pulp and paper industry, and private owners of forest lands to make the United States self-supporting in its pulpwood, pulp, and paper requirements.

(d) Whether it would advance or retard the program of forest conservation to make the United States self-supporting as to pulpwood, pulp, and paper requirements from American forests.

MANUFACTURE OF MUNITIONS OF WAR

Mr. NYE. Mr. President, early in February two resolutions bearing upon the subject of the manufacture of munitions of war were submitted—Senate Resolution 179, by

myself, and Senate Concurrent Resolution 9 by the junior Senator from Michigan [Mr. VANDENBERG].

These resolutions have now been referred to the Committee on Military Affairs. A subcommittee has been appointed to consider them. The chairman of that subcommittee has indicated a desire that the authors of the two resolutions be heard upon a resolution that would accomplish the purposes both were seeking. To that end the Senator from Michigan and I have prepared a resolution which we believe does accomplish what each of us is seeking.

I ask unanimous consent at this time, on behalf of the Senator from Michigan and myself, to submit this resolution and have it referred to the Committee on Military Affairs; also, that it may be printed in the RECORD.

There being no objection, the resolution (S.Res. 206) was received, referred to the Committee on Military Affairs, and ordered to be printed in the RECORD, as follows:

Whereas the influence of the commercial motive is an inevitable factor in considerations involving the maintenance of the national defense; and

Whereas the influence of the commercial motive is one of the inevitable factors often believed to stimulate and sustain wars; and

Whereas the Seventy-first Congress, by Public Resolution No. 98, approved June 27, 1930, responding to the long-standing demands of American war veterans, speaking through the American Legion, for legislation to take the profit out of war, created a War Policies Commission, which reported recommendations on December 7, 1931, and on March 7, 1932, to decommercialize war and to equalize the burdens thereof; and

Whereas these recommendations never have been translated into the statutes: Therefore be it

Resolved, That a special committee of the Senate shall be appointed by the Vice President to consist of five Senators, and that said committee be, and is hereby, authorized and directed—

(a) To investigate the activities of individuals and of corporations in the United States engaged in the manufacture, sale, distribution, import, or export of arms, munitions, or other implements of war; the nature of the industrial and commercial organizations engaged in the manufacture of or traffic in arms, munitions, or other implements of war; the methods used in promoting or effecting the sale of arms, munitions, or other implements of war; the quantities of arms, munitions, or other implements of war imported into the United States and the countries of origin thereof, and the quantities exported from the United States and the countries of destination thereof; and

(b) To investigate and report upon the adequacy or inadequacy of existing legislation, and of the treaties to which the United States is a party for the regulation and control of the manufacture of and traffic in arms, munitions, or other implements of war within the United States, and of the traffic therein between the United States and other countries; and

(c) To review the findings of the War Policies Commission and to recommend such specific legislation as may be deemed desirable to accomplish the purposes set forth in such findings and in the preamble to this resolution; and

(d) To inquire into the desirability of creating a Government monopoly in respect to the manufacture of armaments and munitions and other implements of war, and to submit recommendations thereon.

For the purposes of this resolution the committee is authorized to hold hearings, to sit and act at such times and places during the sessions and recesses of the Congress until the final report is submitted, to require by subpena or otherwise the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, and to make such expenditures as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The expenses of the Commission, which shall not exceed $50,000, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman.

CARRIAGE OF AIR MAIL BY THE ARMY—AMENDMENT

Mr. McADOO submitted an amendment intended to be proposed by him to the bill (H.R. 7966) to authorize the Postmaster General to accept and to use landing fields, men, and material of the War Department for carrying the mails by air, and for other purposes, which was ordered to lie on the table and to be printed.

EXTENSION OF TEMPORARY PLAN FOR DEPOSIT INSURANCE

Mr. GLASS. Mr. President, I ask unanimous consent to report back from the Committee on Banking and Currency, without amendment, the bill (S. 3025) to amend section 12B of the Federal Reserve Act so as to extend for 1 year the temporary plan for deposit insurance, and for other purposes. I also ask unanimous consent for the immediate consideration of the bill.

The PRESIDING OFFICER (Mr. GEORGE in the chair). Is there objection?

Mr. McNARY. Mr. President, the request is rather unusual, and it has been my practice to request that reported bills go over for a day. However, in view of the emergency situation, being somewhat familiar with this proposed legislation and its importance, and knowing that the bill is unanimously reported from the committee, I shall offer no objection.

There being no objection, the bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 12B of the Federal Reserve Act is amended—

(1) By striking out "July 1, 1934" wherever it appears in subsections (e), (l), and (y) and inserting in lieu thereof "July 1, 1935";

(2) By striking out "June 15, 1934" where it appears in the last sentence of the third paragraph of subsection (y) and inserting in lieu thereof "December 15, 1934";

(3) By striking out "June 30, 1934" where it appears in the first sentence of the fifth paragraph of subsection (y) and inserting in lieu thereof "June 30, 1935";

(4) By amending the second sentence of the fifth paragraph of subsection (y) to comprise two sentences reading as follows: "The provisions of such subsection (l) relating to State member banks shall be extended for the purposes of this subsection to members of the fund which are not members of the Federal Reserve System, and the provisions of such subsection (l) relating to the appointment of the Corporation as receiver shall be applicable to all the members of the fund. The provisions of this subsection shall apply only to deposits of members of the fund which have been made available since March 10, 1933, for withdrawal in the usual course of the banking business."; and

(5) By adding at the end of the sixth paragraph of subsection (y) the following new sentences: "The Corporation shall prescribe by regulations the manner of exercise of the right of termination of membership in the fund on July 1, 1934, and may require members of the fund to give 30 days' notice prior to July 1, 1934, of election as a condition to withdrawal. Banks which withdraw from the fund on July 1, 1934, shall be entitled to a refund of their proportionate share of any estimated balance in the fund on the same basis as if the fund had terminated on July 1, 1934."

SEC. 2. The first paragraph of section 9 of the Federal Reserve Act, as amended (U.S.C., title 12, sec. 321), is amended by adding after the second sentence thereof a new sentence to read as follows: "For the purposes of membership of any such bank the terms 'capital' and 'capital stock' shall include the amount of outstanding capital notes and debentures legally issued by the applying bank and purchased by the Reconstruction Finance Corporation."

COMPANY UNIONS—ARTICLE BY SENATOR WAGNER

Mr. COPELAND. Mr. President, I ask unanimous consent that an article by my colleague [Mr. WAGNER] on company unions, appearing in the New York Times of Sunday, March 11, may be included in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Mar. 11, 1934]

COMPANY UNIONS: A VAST INDUSTRIAL ISSUE—SENATOR WAGNER SETS FORTH THE GROWTH OF EMPLOYER-DOMINATED ORGANIZATIONS, TELLS OF THEIR EFFECT ON COLLECTIVE BARGAINING, AND DISCUSSES HIS BILL, WHICH IS DESIGNED TO PREVENT ECONOMIC WARFARE

(The company union has become a focal point in the industrial-relations problem that confronts the Nation. It was under vigorous debate during the N.R.A. hearings last week and it is dealt with in a bill designed to eliminate strife between labor and industry, introduced in Congress by Senator WAGNER, who has served as Chairman of the National Labor Board since that body came into existence. The subject, together with other phases of the problem, is discussed in the following article.)

By ROBERT F. WAGNER, Senator from New York

Despite the emergency language in which it is cloaked, the recovery program embodies principles of reform as well as revival. The statistical indicia of revival are not to be denied, but the need for reform is still acute. And there is substantial agreement as to the path that reform must take if we are to achieve any approximation to social justice and avoid the recurrence of cataclysmic depressions. The fruits of industry must be distributed more bounteously among the masses of wage earners, who create the bulk of consumer demand.

This central problem has been envisaged broadly by the National Recovery Administration, led by General Johnson and ever subject to the dynamic personality and brilliant intelligence of President Roosevelt. But, despite their best efforts, the major portion of the problem remains unsolved. While reemployment has swelled the total volume of wage payments, the real earnings of the individual working full time are slightly less than they were last March.

Some of the minimum-wage provisions under the codes are lower than the standards actually prevailing in industry and in most of the upper wage brackets there have been reductions in hours without corresponding rises in hourly rates of pay. Despite the ameliorative features of a share-the-work movement, it is hardly the road to prosperity.

NEED OF EQUALITY

The reasons for the present difficulty are not hidden. The constant readjustments necessary to strike a fair balance between industry and labor cannot be accomplished simply by code revisions or by general exhortations. They can be accomplished only by cooperation between employers and employees, which rests upon equality of bargaining power and the freedom of either party from restraints imposed by the other.

Congress recognized this when it enacted section 7 (a) of the Recovery Act, restating the right of employees to deal collectively through representatives of their own choosing. But ambiguities of language and the absence of enforcement powers have enabled a minority of employers to deviate from the clear intent of the law and to threaten our entire program with destruction. Therefore I have introduced a bill to clarify and fortify the provisions of section 7 (a), and I am sure that it will meet with the support of the vast majority of people interested in economic welfare.

COMPANY UNIONS

At the present time genuine collective bargaining is being thwarted immeasurably by the proliferation of company unions. Let me state at the outset that by the term "company union" I do not refer to all independent labor organizations whose membership lists embrace only the employees of a single employer. I allude rather to the employer-dominated union, generally initiated by the employer, which arbitrarily restricts employee cooperation to a single employer unit, and which habitually allows workers to deal with their employer only through representatives chosen from among his employees.

In the fall of 1933 a thoroughly reliable study was made which covered more than one fourth of the total number of wage earners engaged in mining and manufacturing. An inquiry of this magnitude may be accepted as a fair sample of conditions in industry at large. It showed that only 9.3 percent of employees are dealing with employers through trade-unions, while 45.7 percent are bargaining on an individual basis and 45 percent are enlisted in company unions. Less than 14 percent of the employers embraced by the study are recognized trade-unions.

HAMPERING CONDITIONS

It is worthy of note that company unions are most prevalent in the largest plants. This means that in the very cases where the bargaining power of the employer is strongest the worker is least free to improve his own position by unhampered affiliation with others of his kind.

It is also true that these unions have multiplied most rapidly since the enactment of the law which was intended to guarantee to the worker the fullest freedom of organization. The number of employees covered by company unions rose from 432,000 in 1932 to 1,164,000 in 1933, representing a gain of 169 percent. More than 69 percent of the company-union schemes now in existence have been inaugurated in the brief period since the passage of the Recovery Act.

The company union, as I have defined it, runs antithetical to the very core of the new-deal philosophy. Business men are being allowed to pool their information and experience in vast trade associations in order to make a concerted drive against the evil features of modern industrialism. They have been permitted to recognize the values of unity and the destructive tendencies of discrete activities and to act accordingly. If employees are denied similar privileges, they not only are unable to uphold their end of the labor bargain; in addition they cannot cope with any problems that transcend the boundaries of a single business.

BENEFITS AND FAILINGS

The company union has improved personal relations, group-welfare activities, discipline, and the other matters which may be handled on a local basis. But it has failed dismally to standardize or improve wage levels, for the wage question is a general one whose sweep embraces whole industries, or States, or even the Nation. Without wider areas of cooperation among employees there can be no protection against the nibbling tactics of the unfair employer or of the worker who is willing to degrade standards by serving for a pittance.

The inability of employees to unite in larger groups has not only limited their efforts to secure a just share of the national wealth. It has interfered with their attempts to provide insurance against sickness and old age and to exert an effective influence upon salutary labor legislation. It has hampered the efforts of labor to preserve order within its own ranks or to restrain the untimely and wayward acts of irresponsible groups. In this latter aspect its unfavorable effect upon employers as well as workers stands clearly forth.

Even when dealing with problems that may without injury be delimited to the single company, the worker under company unionism suffers two fatal handicaps. In the first place, he has only slight knowledge of the labor market or of general business conditions. His trade is tending a machine. If forbidden to hire an expert in industrial relationships, he is entirely ineffectual in his attempts to take advantage of legitimate opportunities.

Secondly, only representatives who are not subservient to the employer with whom they deal can act freely in the interest of employees. Simple common sense tells us that a man does not possess this freedom when he bargains with those who control his source of livelihood.

I am well aware that many employer-dominated organizations now permit their employees to choose outside representatives, and the National Labor Board has affirmed this policy in a recent case. But this right is a mockery when the presence of a company union firmly entrenched in a plant enables an employer to exercise a compelling force over the collective activities of his workers. Freedom must begin with the removal of obstacles to its exercise.

MAJOR QUESTIONS INVOLVED

Major questions of self-expression and democracy are involved. At a time when politics is becoming impersonalized and when the average worker is remote from the processes of government, it is more imperative than ever before that industry should afford him real opportunities to participate in the determination of economic issues.

The company union is generally initiated by the employer; it exists by his sufferance; its decisions are subject to his unimpeachable veto. Most impartial students of industrial problems agree that the highest degree of cooperation between industry and labor is possible only when either side is free to act or to withdraw, and that the best records of mutual respect and mutual accomplishment have been made by employers dealing with independent labor organizations.

THE COMPANY'S CASE

The principal argument advanced by the proponents of company unionism is that it promotes industrial harmony and peace without subjecting the individual company to the intrusion of outside labor groups who have no interest in the company's practices. Of course, in our complicated economy the interests of all employers and all employees are inextricably intertwined, and the assumption that outside workers have no valid interest in the labor standards prevailing within a plant is demonstrably false. Besides, a tranquil relationship between employer and employee, while eminently desirable, is not a sole desideratum. It all depends upon the basis of tranquillity. The slave system of the old South was as tranquil as a summer's day, but that is no reason for perpetuating in modern industry any of the aspects of a master-servant relationship.

As a matter of fact, the company union cannot sustain even the claim that it tends to insure industrial peace. Men versed in the tenets of freedom become restive when not allowed to be free. The sharp outbreaks of economic warfare in various parts of the country at the present time have been caused more by the failure of employers to observe the spirit of section 7 (a) of the Recovery Act than by any other single factor. It has been my observation that industrial strife is most violent when company unionism enters into the situation, and that the company union line of organization is least likely to bring forth the restraint of irresponsible employees by others of their own group.

The implications of what I have just said are clear. If the employer-dominated union is not checked, there are only two likely results. One is that the employer will have to maintain his dominance by force, and thus swing us directly into industrial fascism and the destruction of our most-cherished American ideals; the other is that employees will revolt, with wide-spread violence and unpredictable conclusions.

The final argument advanced for company unionism is that it should be allowed to compete against trade unionism in an open field. If by company unionism one means simply the right of employees to confine their activities to a single employer unit when they wish to do so, I do not object to that principle in the slightest, and there is nothing contrary to it in the bill which I have introduced. But if by company unionism one includes the right of employers to obstruct the development of a more wide-spread employee cooperation, such a policy cannot be allowed to continue if we intend to pursue the philosophy of the new era.

THE NEW BILL

The new bill forbids any employer to influence any organization which deals with problems such as wages, grievances, and hours. They should be covered by a genuine labor union. At the same time, the bill does not prevent employers from forming or assisting associations which exist to promote the health and general welfare of workers or to provide group insurance, or for similar purposes. Employer-controlled organizations should be allowed to serve their proper functions of supplementing trade unionism, but they should not be allowed to supplant or destroy it.

Failure to meet the company-union challenge has not been the only defect of section 7 (a) of the Recovery Act. This section provides that employees shall be free to choose their own representatives. It has been interpreted repeatedly to mean that any employee at any time may elect to deal individually with his employer, even if the overwhelming majority of his coworkers desire a collective agreement covering all. Such an interpretation is detrimental to the practice and contrary to the theory of collective bargaining. It permits an unscrupulous employer to divide his employees against themselves by dealing with innumerable small groups or with individuals.

In my opinion, Congress certainly did not intend that the law should operate to place employees in a more unfavorable position than they were before the Recovery Act was passed.

The proposed legislation does not resolve the question of the closed-union shop. Such issues should be worked out by labor and industry in the course of experience. But the bill, if enacted, would make it clear that Congress has not intended to foreclose

the issue by illegalizing the closed-union shop or by placing any other obstacles in the way of making collective bargaining a working reality.

QUESTION OF RECOGNITION

The third major defect of section 7 (a) is that while it guarantees to employees the right to organize, it does not state explicitly the right to receive recognition through their representatives. This explains why company unionism has increased so rapidly despite the fact that other labor organizations have added 2,000,000 to their membership during the past year. Employees have been assured of their right to join whatever unions they prefer, but they have been forced to bargain either individually or through company unions.

This refusal of employers to deal with properly chosen representatives has been the cause of more than 70 percent of the disputes coming before the National Labor Board. The new bill is designed to remedy this evil. It is modeled upon the successful experience of the Railway Labor Act, which provides that employers shall actually recognize duly chosen representatives and make a reasonable effort to deal with them and to reach satisfactory collective agreements.

ATTITUDE OF EMPLOYERS

When the factual situation that confronts us is analyzed carefully and comprehended fully, I am sure that employers as well as employees will favor the proposed measure. Fair-minded employers who are now allowed to band together in huge trade associations do not desire to deny analogous rights to their workers. Fair-minded employers do not relish the pretense that industry and labor are upon an equal footing, when, in fact, industry controls both sides by dominating the strategic points in the areas of controversy.

Most important of all, far-sighted and broad-visioned employers who recognize the certainty of economic discord and the threat to our entire economic program that is implicit in the present status of labor relations will join whole-heartedly in this proposal for improvement.

There always will be an unfair minority who are amenable only to coercion. For this reason the National Labor Board, under the new bill, would be vested with statutory sanctions and given actual powers of investigation and restraint similar to those exercised by the Federal Trade Commission in cases of unfair competition. It would be composed of 7 members, including 2 representatives of employers, 2 of employees, and 3 of the general public, and it would be empowered to set up regional or local boards.

FUNCTIONS OF THE BOARD

The present National Labor Board, set up by Executive order, has carried on its activities for half a year. In that short time it has helped 650,000 employees, who were engaged in disputes, to return to work or to remain at work, upon terms satisfactory to all interested parties and promising durable peace. The chief function of the new board would not be to act as policeman or judge but to mediate and conciliate industrial disputes and to offer its services as arbitrator when the parties so desired. Aside from its power to prevent the specific unfair practices that would be forbidden by the law, it would not have the slightest flavor of compulsion. It would have no kinship to compulsory arbitration. It would continue to promote peace rather than strife and to appeal to the better judgment and good intentions of industry and labor.

When this board is established and bolstered by adequate sanctions and a clarification of the substantive law, it will help to solve the thorniest problem confronting us today and be one of the chief bulwarks of our future economic prosperity and social justice.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

Mr. NORRIS obtained the floor.

Mr. LEWIS. Mr. President, will the Senator yield to me to make an announcement?

Mr. NORRIS. I yield to the Senator.

Mr. LEWIS. With the kindness of the Senator, I should like to state the program as it seems to be understood. The Senator from Nebraska [Mr. NORRIS] will speak first. I take the liberty to say I will follow him, and after I shall have concluded and speakers on the other side of the Chamber shall also have concluded, then the Senator from Missouri [Mr. CLARK] and the Senator from New York [Mr. WAGNER] ask to be heard for the remainder of the day, if there shall be time, and also the Senator from Rhode Island [Mr. METCALF]. I thank the Senator from Nebraska.

Mr. NORRIS. Mr. President, in the few remarks I shall offer upon the pending treaty I wish to express myself, to begin with, as being satisfied that those who oppose the treaty are moved by the same high conscientious motives that move those who favor it. I say this because I cannot understand, from my viewpoint of the situation, how any American citizen can be against the treaty.

For a great many years the great Middle West has looked forward to the time when the St. Lawrence River would be made navigable for ocean-carrying vessels. In that great Mississippi Valley there are millions of people who for years have, by the sweat of their faces, produced the food that fed the Nation. We have seen many millions of public money appropriated and used in the improvement of harbors along the Atlantic coast and along the Pacific coast. We have seen other millions expended in the building and improvement of the Panama Canal, knowing that the benefits would in the main go to the coast States of our country, and that to some extent it might hamper the activities and the prosperity of the people of the great Mississippi Valley.

I have taken for granted, as I think most of the people in that section of the country have, that the time would come when we would improve the St. Lawrence River. I had assumed, perhaps wrongly, but I had assumed nevertheless, that there would be little or no opposition to a treaty such as we have before us now. I think most of the people in my section of the country have felt that way.

I have been dumbfounded at the opposition, not because the opposition has done anything wrong but I have been dumbfounded to see the strength of the opposition that has developed to the treaty on the part of honest people who do not look upon the question from the same viewpoint that I do. I am somewhat embarrassed to know how to solve the question in the face of that opposition sentiment when I see how it has grown and spread.

As I have said, I think it has been the universal sentiment of the great Middle West that the St. Lawrence River would be developed as a matter of course. To us in the Middle West it means a great deal. To the farmers of the great Mississippi Valley and the Missouri River Valley it is an important question upon which, so far as I know, there is no division of sentiment. I supposed all the people in that great valley were unanimous in favor of this development. For years we have been helping other sections of the country, doing it without any complaint because we believed it was our duty.

The question now presented, it seems to me, is national in its scope. I do not believe that the citizens of the great Middle West are moved by any jealous motives. I have lived nearly all of my adult life in that great valley. It will be only a few years until my bones will be laid to eternal rest in that soil. I approach this subject from the viewpoint of one who believes from the bottom of his heart that it is only justice to the people of the Middle West that the treaty be ratified. I am not asking for mercy; I am pleading for justice.

One of the great drawbacks to the great Middle West is the high cost of transportation. The farmers of that great agricultural section of the country, bread basket of the Nation, which produces much of what we eat and much of what we wear, are handicapped by the high cost of transportation, a handicap that does not affect the Pacific coast and does not affect the Atlantic coast. We in the Middle West lack water transportation. Cheaper transportation than we now have is necessary if we are to be prosperous and be happy. We have lived for years with the idea that the time would come when such a treaty as the one now pending would be made and ratified.

The men who pay transportation both ways, one way on what they sell and one way on what they buy, the men who pay the freight on everything they buy and have the freight deducted from what they receive for everything they sell, are asking nothing but justice at the hands of the United States Senate. We have stood by while the Congress built up the harbors and improved the rivers and built canals; and we have paid our share of the expense and subjected ourselves in some cases to a great handicap on account of it. We are now asking not as a matter of mercy but as a matter of right and as a matter of justice that we be given in a national way relief and help such as we have aided in giving to the rest of the Nation.

The question is national. It ought not to be decided on the basis of some local objection. It ought not to be decided on the basis of some trivial consideration even though there may be some justice in the viewpoint of those interested from such a standpoint. The question ought to be

decided on the broad ground of what is good for the Nation as a whole.

Cost of transportation enters into everything we eat and wear and use from the cradle forward to the coffin. It enters into everything connected with our civilization. This great treaty will lower the cost of transportation for those people who are overburdened because they are producing at a financial loss much of the food we eat and much of that which we wear. Transportation is one of the chief items of cost involved in those products. Now the Senate has an opportunity to lower the cost of transportation.

By ratifying this treaty we would bring the Atlantic Ocean a thousand or so miles nearer the Mississippi Valley. We would increase the prices the farmer would get for practically all the farm products of the Nation. We would by this treaty do what we have been trying to do for several years by various acts of Congress, most of which have at least partially failed. As a nation in this civilized day are we not entitled, not only the farmer, but everybody else, to the lowest possible cost of transportation that enters into the cost of living, that enters into everything with which we have to do?

Are we going to say that the world shall stand still? Are we going to say that we will not take this step in advance? Are we going to deny to the farmers of the West the cheapening of their transportation to the seaboard, and the cheapening of the freight from the seaboard to the interior of the country? Are we going to turn our backs upon the sun of civilization and go backward? Are we going to say that improvement must end? Are we going to continue to increase the burdens of these millions of people simply because of some selfish objection or because of some local interest or local prejudice that exists somewhere?

It does not seem to me possible. It does not seem to me that the Senate can turn its back upon the demand of these people, who for so many years have been crying aloud for the right to live, the right to get cost for what they produce, that we must have in order to live.

What are some of the objections to this treaty, Mr. President?

It is said that the construction of this seaway will injure men who are employed upon our railroads. It is objected to by the coal men because some water power will be developed. It is objected to by some men on railroads—short-sighted men, I think—because they say it will interfere with transportation from the Great Lakes to the Atlantic Ocean. After all, I think that is a narrow, narrow viewpoint. The world never would have taken a step in advance if our forefathers had always adhered to that rule. We would have been cutting wheat today with a sickle, as they did in the days of Abraham. The history of civilization is the story, in the main, of improved machinery and improved methods of transportation.

If our forefathers had adhered to that rule years ago there would have been no railroads. You can go back and look up history and you will find that many men condemned the advent of the railroad. There would not have been any roads; there would not have been any wagons; there would not have been any automobiles, because somewhere someone said, "I am going to be thrown out of employment if this new thing goes into operation."

I wish I could say to every laboring man in the United States, "If you take the view that we must not improve our transportation system because it is going to throw somebody out of a job, you take a position that not only will prevent advancement but that in the end will kill every labor organization in existence." Labor cannot afford to stand against the advance of civilization. It cannot afford to condemn new types of machinery or improved methods of transportation.

But, Mr. President, the construction of this seaway will not injure men on the railroads. This great improvement will not be completed, if it is commenced, for 10 years. Every man who loses a job, if there be any, will probably find a better one in its stead. I cannot tell what it is going to be, or when it is going to be; but God in His wisdom, in the development of our advancing civilization, has found a niche somewhere for every man who has had to give way when, for the public good, some improvement went into operation. Things will adjust themselves before the 10 years are up if we advance as everybody has a reasonable right to anticipate we will. There will be a necessity for additional railroads over what we have now in order to do the business of the country.

Everything of that kind always has righted itself in the past. It will in the future. In other words, we must not try to prevent, in the name of labor, the introduction of improved machinery and the advance of civilization. We can dam up a river if we want to, and hold back the flood waters for a while; but, if we continue, the time will come when the embankment made by man will be unable to withstand nature's demands, and the damage will be all the greater, the flood all the more destructive, on account of the artificial obstruction.

If I may be permitted to refer to a personal incident, I remember, when I was a grown boy, working out by the day on the farms of our neighbors, that the time in the year when we received greater pay than any other was during the wheat harvest, when it was necessary to have men to bind the wheat. I remember when the self-binder came in, and when I had a job, with other boys like me, binding wheat in the neighborhood it was noised about that Jim Mook, a wealthy farmer, had bought a self-binder, and that it would bind by machinery. Generally it was not believed among men who were doing the work that I was doing. We thought it was impossible for a machine to be invented that would ever tie a knot; but it did work, and I remember the field where it was first put in operation, the largest wheat field in that community, the largest one that I had ever known at that time—40 acres. The self-binder worked 1 day, and that night somebody took some of the sheaves of wheat and piled them around the binder and set fire to them, and Jim Mook's binder disappeared.

When I went home that Saturday night I knew that sitting by a tallow candle, either reading the Bible or knitting a stocking, would be an aged mother waiting for her only living son's return; and I will never forget, when I entered, the first word that mother said was, "William, have you heard about Jim Mook's self-binder?" I said, "Yes, mother; I have heard about it." As quick as a flash came the next question: "Wasn't that awful?" I said, "Yes; I think it was awful." Then, as quickly as one thought could follow another, came the next question: "But what are we poor people going to do?"

There it was in a nutshell. We saw our jobs disappearing because of the self-binder. "What are we going to do?" We could not see into the future.

That, however, was all taken care of. The self-binder has come. It has given way in many parts of the country to still further improved wheat machinery; and the men who bound wheat with me in those days, years ago, all found other jobs. They all found the niche where they would fit. Nature has made no mistake in that respect. The argument I desire to make, however, is that, even if there were no other jobs, no man can justify himself in standing in the way of human advancement. As I look at it, no man can justify his position in being against this treaty.

I know it is said by some along the Mississippi River that the construction of this waterway will interfere with the development of that country; that it will interfere with the development of the Mississippi River.

Mr. President, I have lived in the Mississippi Valley nearly all my life. One of the last things I should ever want to do would be to hinder or interfere with the development of that great valley. The people who live in that valley and who want this treaty ratified are in no sense, under no circumstances, against the development of the Mississippi River. We want to have it developed to its highest extent. But, Mr. President, if there are two ways of shipping the produce of that great country to market, we want them both. The ratification of this treaty will in no way interfere with the development of the Mississippi River.

Mr. BARKLEY. Mr. President——

The PRESIDING OFFICER (Mr. THOMPSON in the chair). Does the Senator from Nebraska yield to the Senator from Kentucky?

Mr. NORRIS. I yield.

Mr. BARKLEY. Looking at this matter from a long-view standpoint, assuming that some day the Mississippi River will be connected with Lake Michigan, which has been a project under discussion for many years, I wonder whether the Senator would be willing or is prepared to discuss the possibility that the St. Lawrence Canal might ultimately contribute to the further development of the Mississippi River as a navigable stream, and as giving an outlet, both north and south, to the products of the Mississippi Valley.

Mr. NORRIS. I think it will contribute to that possibility. If we crawl into a hole out there and say we want all the produce of that great section of the country to go down the Mississippi River, and none of it to go through the St. Lawrence Canal, we will only be standing in the way of progress, we will only be blocking the road; we will be in the way. One development will help the other.

Mr. President, I desire to discuss briefly some of the contentions made about taking water out of the Lakes. If some of the contentions made by those against this treaty are well founded, we have a right to drain the Great Lakes, we have a right to take the waters of Lake Michigan, Lake Huron, and Lake Superior, and turn them all into the Mississippi River. I cannot agree with that.

First, there is an international question. We could not do that because such action would be a violation of international law. We have no right, under international law, to take any water out of Lake Michigan. We have no right to take that water out because such action would not only violate international law, but it would violate the rights and the privileges of those using the harbors of Lake Michigan, Lake Erie, Lake Huron, and Lake Superior.

Mr. LONG. Mr. President, will the Senator yield to me?

Mr. NORRIS. I yield.

Mr. LONG. I have understood the proponents of the treaty, particularly the Senator from Wisconsin and others, not to question that America could do what she wanted to do with Lake Michigan.

Mr. NORRIS. I question it. I will say to the Senator, the leader of the opposition to the ratification of the treaty, that I believe if he will consider the matter fairly he will be compelled to reach the conclusion that we have no lawful right and have no moral right to take the waters out of Lake Michigan and put them into the Mississippi River.

Mr. LEWIS. Mr. President, if I may interrupt, if the Senator referred to me as the leader of the opposition, both by national law and international law we have the right to the American waters and the right to deny the privilege of other countries under any law to take these waters to a foreign country in opposition to American sovereign rights.

Mr. NORRIS. Mr. President, I do not expect all the Senators will agree with me in this matter; but if we can take 15,000 cubic feet of water per second out of Lake Michigan, we can take 30,000. If we have a right to take 30,000, we can take it all out. If we did have a right, under international law, to do that, I would not be in favor of doing it. I think it would be morally wrong, even if not legally wrong.

Mr. LONG. Mr. President, cannot the Senator concede, inasmuch as there is such a difference of opinion, that there will come a time when we will need the water of Lake Michigan, or some of it?

Mr. NORRIS. No; I do not think the time will ever come, I will say to the leader of the opposition. But I would have to admit that we could not do it even if I believed that time was coming. If it is wrong to take that water out, if it is illegal, no matter how badly we wanted it, we would not have any legal right to take it.

Mr. LONG. What are we to do about the amount they are taking there now?

Mr. NORRIS. We have an agreement about taking it.

Mr. LONG. With whom?

Mr. NORRIS. There is a Supreme Court decree about what they shall take. We have given Canada some additional power in order to compensate for her loss at the Chicago diversion.

Mr. LONG. I will not ask the Senator any further questions in regard to that. I had understood that there was no question whatever about our owning Lake Michigan and having the power to do whatever we wanted to do with Lake Michigan.

Mr. NORRIS. We cannot take the water out of Lake Michigan without taking it out of Lake Superior and Lake Huron.

Mr. LONG. It might be said we cannot take it out of that lake without taking it out of the Arctic Ocean.

Mr. NORRIS. In the first place, I think it would be illegal. If it were not illegal, it would be wrong morally and we would not want to do it. All the cities located along the lake shore on the American side would have a moral right to object. I think it is as old as the common law that, under the law, we could not do that. Whether we could or whether we could not, we would not want to do it, as I look at it, and even if we wanted to do it we could not because it would be illegal.

For the various reasons I have stated I cannot agree that there will be a time in the future when we will want to take such action. But even if my vision were as great as that of the eminent leader of the opposition, I would have to admit that it would be wrong, that we would have no right to take that viewpoint. It seems to me I would be compelled to admit that. If there were no law applicable whatever, would anybody say that we should drain the Great Lakes without Wisconsin and Michigan and Ohio and the other States as well as Canada being taken into consideration and consulted? Would we have a right to do it if there were no law on the subject?

In the first place, in a general way, as I understand the treaty, it provides for the payment of the expenses incident to the construction of the waterway, one half by the United States and one half by Canada. Is there anything wrong about that? Is not that fair?

Mr. LEWIS. Mr. President, since the able Senator asks the question for reply, I must say there is something wrong about it. It is that Canada would pay about one fourth or one third, and we would pay about three fourths or two thirds.

Mr. NORRIS. I will say there is something wrong about the answer. One half is charged to Canada, one half is charged to the United States. If there were to be any difference in the costs to the two countries one could make a very good argument to the effect that the United States should pay the greater part of the cost. I think we will get much more benefit out of the waterway than will Canada. While Canada has a few cities along the Canadian shores of these Lakes which would be benefited, we have dozens of them. We have 10 or 12 times as many people living in the vicinity of the shores on this side as live on the other side.

I anticipate that if this treaty shall be approved, and shall go to the Canadian Parliament, there will be those there who will argue that it is unfair to Canada because Canada is to pay one half of the expense and the United States is to get more than one half of the benefit.

Mr. BONE. Mr. President, will the Senator yield?

Mr. NORRIS. I yield.

Mr. BONE. Is it not a rather interesting fact that Canada, which is to pay one half, as the Senator indicates, is a country with only 10,000,000 population, as against 123,000,000 in this country?

Mr. NORRIS. I think that is a very good point. Yet it is argued that we are going to employ Canadian labor and use Canadian materials at a certain place. Do the Senators so contending realize that something of that kind is necessary where we are building a canal or building a dam along the border? We have our laws in reference to labor; we have our tariff laws in reference to materials. We could not concede that Canada should come over here and bring

Canadian laborers or Canadian materials into this country. Nor could we go over there. The work is to be done by an international commission the treaty sets up. When the work takes us to the Canadian side, the commission will necessarily have to use Canadian material. Our tariff laws do not apply in Canada. When they are on our side, it will be different. Is not that right? Could we do anything different in drawing a treaty? Could it be said that our people were unfair when they conceded that such a thing could be possible?

It is claimed that those who negotiated the treaty in our behalf were fooled all the way through. I have heard that so much that to me it is almost nauseating. We know who our representatives were. Have we any reason to question their honesty? Do we not all admit their ability? Is there any question about these negotiations from beginning to end that makes it look as though our representatives were fools and the Canadian representatives were wise men?

I take it that each side was moved by the incentive to be fair to the other side. We did not want any advantage of Canada, and Canada did not want any advantage of us. So far as I am able to see, when one looks at it candidly, he will find that there is nothing unfair, that there is nothing unnatural, connected with this treaty from its beginning to its ending.

Mr. President, so much has been said during the debate about the politics involved in connection with the treaty that I desire to discuss the matter just a little from the party standpoint.

Let me say to the Senators who do me the honor of listening that I am now going to discuss the question from the viewpoint of the party man, not from my viewpoint. I concede that I am entirely moved in my vote upon the treaty by my own convictions, and not in any degree by the platform of any political party, and I think such conviction ought to decide the question. But there are many men more able than I, and just as honest, who do not agree with me as to that, but who believe in the party system of settling such questions as this.

Let me read from the Democratic platform. As I am discussing this question now, as I said before, I am not discussing it with the idea that the views of the people who want to follow party in a matter like this are correct. I think the only thing in the Democratic platform pertaining to this question, by any possible construction, is the following:

> We advocate the extension of Federal credit to the States to provide unemployment relief wherever the diminishing resources of the States make it impossible for them to provide for the needy; expansion of the Federal program of necessary and useful construction affected with a public interest such as adequate flood control and waterways.

I am not finding fault with any Democrat who says that he is not bound by his party platform to support the treaty. A Senator can easily bind himself by reading into the platform something that he says is implied, if he wants to be bound by it, and excluding it if he does not want to be bound by it.

This quotation from the Democratic platform will let Senators in or let them out, just as they want to be. It covers everything and it does not touch anything. They can give it as a defense for their vote for the treaty, and they can give it as an excuse for their vote against the treaty.

Whatever may be said about the Democratic platform, nothing of that kind can be said about the Democratic candidate for President. He announced his construction of the platform. He announced his support of the treaty early in the campaign. He deceived nobody. He took an advanced position in favor of the treaty, he held it during the campaign, and he let everybody know the position he took. There was not anyone who wanted to know how the Democratic candidate stood but could easily have found out where he stood on the proposition. While I do not believe the position taken by the candidate binds a man to vote for the treaty in the Senate, it did put everybody on notice that the Democratic candidate for President was in favor of the treaty. It put everybody on notice that he believed that a conclusion justifying such a position could be drawn from the Democratic platform. He was for it. So that no complaint could be made by the voter on account of any equivocation or lack of decision on the part of the Democratic candidate for President.

Let us see about the Republican platform. The Republican national platform said:

> The Republican Party stands committed to the development of the Great Lakes-St. Lawrence seaway. Under the direction of President Hoover negotiations of a treaty with Canada for its development is now at a favorable point. Recognizing the inestimable benefits which will accrue to the Nation from placing the ports of the Great Lakes on an ocean base, the party reaffirms allegiance to this great project and pledges its best efforts to secure its early completion.

There is nothing deceptive about that platform. There is nothing about that language that can be misunderstood. Every man who can read must reach the conclusion that the Republican platform made a pledge in favor of the treaty.

But it might be said by some Republicans that the treaty at that time had not been completed. It had been completed, as a matter of fact, but had not been published. It was completed by the Republican candidate for President, Mr. Hoover. There was not any doubt where he stood on it. He negotiated the treaty. The Republican platform endorsed it.

Are Republican Senators bound to support the treaty? From my viewpoint I concede they would not have to be for it. From a party viewpoint, if there ever was a provision in a platform that bound anyone, this one does so. If there ever was a platform that undertook to bind its party adherents this one does it.

I will read a little more from the Republican platform, showing how the makers of that platform felt it ought to be construed:

> The delays and differences which recently hampered efforts to obtain legislation imperatively demanded by prevailing critical conditions strikingly illustrate the menace to self-government brought about by the weakening of party ties and party fealty.

That is in the Republican platform. Those are grave words. They mean that it is the duty of a member of the party to stand by the platform to the end. Says this platform:

> Experience has demonstrated that coherent political parties are indispensable agencies for the prompt and effective operation of the functions of our Government under the Constitution. Only by united party action can consistent, well-planned, and wholesome legislative programs be enacted.

How do the Republicans like that? It says—and this is the Republican platform—that this is the only way in which we can get action for the benefit of our common country.

Let me read it again:

> Only by united party action can consistent, well-planned, and wholesome legislative programs be enacted.

Further on it says:

> We earnestly request that Republicans through the Union demand that their representatives in the Congress pledge themselves to these principles, to the end that the insidious influences of party disintegration may not undermine the very foundations of the Republic.

What does that mean? How can a Republican, a party man, excuse himself for not writing to Senators and asking them to back up the treaty that was agreed to in the Republican platform?—

> We earnestly request that Republicans through the Union demand that their representatives in Congress pledge themselves to these principles—

What are they? The building of the St. Lawrence Seaway Canal is one of the principles to which Republican Senators are pledged.

Mr. LONG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nebraska yield to the Senator from Louisiana?

Mr. NORRIS. I yield.

Mr. LONG. Who is pledged? All the Republicans? Does that mean that everybody in the Republican Party, some of whom did not go to the Republican convention, are pledged to that platform?

Mr. NORRIS. Mr. President, will the Senator repeat his question?

Mr. LONG. Does that mean, Mr. President, that all Republicans are pledged to the Republican platform?

Mr. NORRIS. I said from the viewpoint of the party man every Senator on the Republican side is pledged to vote for the ratification of the treaty.

Mr. LONG. I do not exactly understand, Mr. President. I thought the Senator and myself had been telling the people to throw off the party pledge.

Mr. NORRIS. That is what I said a while ago.

Mr. LONG. I did not hear that.

Mr. NORRIS. Yes; that is what I said a while ago. I am arguing now from the standpoint of the party man, calling attention to the viewpoint that he has to take to be consistent. There is no escape from it.

Mr. LONG. This might be one of the times when it is well to see the wisdom of following the course of the Senator from Nebraska in not always following the party platform.

Mr. NORRIS. This is one of the times when the Senator from Nebraska is pleading that the party observe its promise. This is one of the times when he is pleading with those who make platforms and those who swear by them to stand by them; in other words, to do what they agreed to do, to keep their word.

I do not know how much effect this plea of mine is going to have. I have become an outcast in the main because I have refused to let party platforms and party men control me. That is what party men have against me. So far as I know, that is all they have against me. I want to see how many Republicans on this side of the aisle are going to be in my class, and how many are going to stand by their platform, as I am advocating they should do.

Mr. LONG. Mr. President, may I ask the Senator how long he has been in Congress refusing to be bound by the party platform?

Mr. NORRIS. Oh, so long that the memory of man runneth not to the contrary. [Laughter.]

Mr. LONG. Would it not be a good thing for those who wish to stay in the Senate to follow the course of the Senator from Nebraska and refuse to be bound by party platforms?

Mr. NORRIS. I do not know. They will have to decide that question for themselves. I am not arguing that point. I am making the argument that they ought to keep their word. I do not know whether they want to stay in Congress, but whether they stay or not, I ask them to keep their word. I ask them not to violate their pledge. They have pledged their honor to be for the treaty, and they ought, from my standpoint, to vote for its ratification. There is no escape from that conclusion. Some of the men like me in the Senate are condemned, and if the question is asked as to why we are condemned the answer is because we do not abide by our caucus rule, we do not support candidates sometimes, we do not stand by platforms sometimes. The very reasons that such men as I have been condemned make it imperative now to keep the record straight, in order that Republican Senators may now vote for ratification of this treaty.

I have here a copy of a speech delivered over the radio by the Senator from Iowa [Mr. DICKINSON]. He delivered it on the 30th day of July 1932. That was after both conventions had been held. He delivered it in the afternoon—remember that, because I am going to refer to another speech delivered on the evening of the same day over the radio—and the principal object of this speech, I think, was to convince the hearers that the Republican Party had stood by the farmer; and he did a very nice job of it, as will be seen by anyone who reads the speech. For my purposes I want to quote one portion of the speech. After he had enumerated a number of things the Republican Party had done for the farmer, the Senator from Iowa said:

> Another subject of vast concern to American agriculture, and particularly to this industry in the great Northwestern States, is the Great Lakes-St. Lawrence Seaway. Favoring this route from the first, President Hoover has succeeded in negotiating a treaty with Canada by which this waterway will be built and a cheap transportation outlet to the Atlantic will be given to the farmers of the Middle Western and Northwestern States.
>
> Just where the Democratic Party stands on this seaway is questionable. It failed to make any mention of it in the party platform. The story goes that a declaration in favor of it was proposed and rejected. Upon learning this, Senator Walsh, of Montana, permanent Chairman of the Democratic Convention, raised a fog, but without success in having a declaration written into the platform.

That was on the 30th day of July. He was at Chicago when he delivered that speech at 1 o'clock in the afternoon. On the same evening——

Mr. VANDENBERG. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. POPE in the chair). Does the Senator from Nebraska yield to the Senator from Michigan?

Mr. NORRIS. I yield.

Mr. VANDENBERG. I wish the Senator would call attention to the fact that the speech to which he has referred was delivered 2 weeks after the treaty was published, so that there is no question about any generalities in the endorsement.

Mr. NORRIS. I thank the Senator for the suggestion. The treaty was published on the 18th of July and the speech was delivered on the 30th.

That same evening the Democratic candidate for President made a speech over the radio, and in that speech he stated that he was for this great seaway. Mr. Roosevelt, at that time candidate on the Democratic ticket, undertook to say that, as he looked at it, the St. Lawrence project was included in the public improvement or the unemployment plank of the Democratic platform; at least, he was for it and advocated it. The next morning the Senator from Iowa [Mr. DICKINSON] sent a telegram to the Democratic candidate for the Presidency, Mr. Roosevelt, from which letter I desire to read an extract:

> FRANKLIN D. ROOSEVELT,
> *Executive Mansion, Albany, N.Y.:*
>
> In your radio address last night while reading what you informed your national audience to be the Democratic platform you made use of the phrase, "including the St. Lawrence-Great Lakes deep waterways", in what you called the Democratic unemployment plank. I am constrained to believe that in so doing you have, knowingly or otherwise, committed an amazing deceit upon the American people. It is unfortunate that you should begin your campaign for the Presidency so inauspiciously.
>
> I have before me the official copy of the Democratic platform, issued at Washington following the Democratic convention by the Democratic National Committee, in which there is no reference to the Great Lakes-St. Lawrence deep waterway.

He discusses several questions, and finally says:

> Can it be the intention of your managers to foist this rewritten platform, together with your comments thereon, upon the American people as the original and genuine article? If so, it is significant that it will be done only after President Hoover had successfully concluded the St. Lawrence Seaway Treaty, and after you undoubtedly had learned of the immense popularity of that project with the farmers of the Middle West.
>
> I have taken it upon myself to direct this inquiry to you because only a few hours prior to your speech I addressed myself over the radio to the American farmer on this very subject. I stated:
>
> "Just where the Democratic Party stands on this seaway is questionable. It failed to make any mention of it in the party platform."

Going to show, Mr. President, that the leaders of the Republican Party were making a claim, which I think they were justified in making, that the Republican Party stood for this seaway and that the Democratic Party had not stated whether it was for it or not, and criticizing Candidate Roosevelt because he was for it and because he was trying to convince his hearers that he could be for it under the Democratic platform, criticizing him in language hardly courteous, and in the same breath saying to the farmers of America, "Here is this great seaway that we are going to build. The Republican platform is for it; the Republican President is for it." Now, however, some of the Republican Senators are against it. It is more than I can understand.

Mr. President, I had expected to discuss the question of power, but, on account of my physical condition, I will not be able to do that today. Perhaps sometime during the consideration of the treaty, in connection with some of the

amendments which may be proposed to it, I shall offer some remarks on that subject.

Mr. LEWIS. Mr. President, may I ask the Senator from Nebraska if he has yielded the floor?

Mr. NORRIS. I have.

Mr. LEWIS. I ask to be recognized.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. LEWIS. Mr. President, may I say that one of the Senators asked me if I would yield to him for some matter he desires to present. I inquire if that Senator is on the floor. [A pause.] I understand the Senator who made the request has been called to one of the departments.

Mr. THOMAS of Oklahoma. Mr. President, will the Senator yield to me to suggest the absence of a quorum?

The PRESIDING OFFICER. Does the Senator from Illinois yield to the Senator from Oklahoma?

Mr. LEWIS. I yield.

Mr. THOMAS of Oklahoma. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Cutting	King	Robinson, Ark.
Ashurst	Davis	La Follette	Robinson, Ind.
Austin	Dickinson	Lewis	Russell
Bailey	Dieterich	Logan	Schall
Bankhead	Dill	Lonergan	Sheppard
Barbour	Duffy	Long	Shipstead
Barkley	Erickson	McAdoo	Smith
Black	Fess	McCarran	Steiwer
Bone	Fletcher	McGill	Stephens
Borah	Frazier	McKellar	Thomas, Okla.
Bulkley	George	McNary	Thomas, Utah
Byrd	Gibson	Metcalf	Thompson
Byrnes	Glass	Neely	Townsend
Capper	Goldsborough	Norris	Trammell
Caraway	Gore	Nye	Tydings
Carey	Hale	O'Mahoney	Vandenberg
Clark	Harrison	Overton	Van Nuys
Connally	Hatch	Patterson	Wagner
Coolidge	Hayden	Pittman	Walcott
Copeland	Johnson	Pope	Walsh
Costigan	Kean	Reed	Wheeler
Couzens	Keyes	Reynolds	White

Mr. LEWIS. I beg to repeat the announcement that the Senator from Tennessee [Mr. BACHMAN], the Senator from South Dakota [Mr. BULOW], and the Senator from New Hampshire [Mr. BROWN] are unavoidably detained from the Senate, and that the Senator from Iowa [Mr. MURPHY] is absent on account of a severe cold. I ask that this announcement may stand for the day.

The PRESIDING OFFICER. Eighty-eight Senators have answered to their names. A quorum is present.

IN OPPOSITION TO RATIFICATION OF ST. LAWRENCE TREATY

Mr. LEWIS. Mr. President, I desire the indulgence of the Senate by recalling to them that on all occasions at any time when I have been honored with the floor and their attention I have never declined to yield for interruption at the request of one of my colleagues on either side of the Chamber. Today, sir, in view of the fact that I, as leader, so termed, of debates in opposition to the treaty, have assigned Senators for and opposed, on both sides of the aisle, time for their addresses today, I regard it would be most unfair on my part if, yielding to interruptions of interrogatories and answering them as their merits would call for, I would consume such length of time as would practically cut away the opportunities and privileges of others on both sides of the aisle who expect to speak today.

It is for that reason that I ask my eminent colleagues on either side of the Chamber to defer interruptions until at such point in my address as I may be permitted to yield to them without embarrassment to other Senators awaiting their opportunity to deliver their views.

Mr. President, obeying directions of my colleagues, I open the debate against the treaty at this time. Here I make brave to touch upon a subject of a delicate nature. Information has drifted to this honorable body intimating that the President of the United States has interested himself in soliciting support for ratification of the treaty at the hands of Senators, and these solicitations of the President being by him based on personal sentiment or some prospective political favor. It is also intimated and brought into this Chamber that members of the Cabinet of the President have assumed to address Senators individually, demanding of them the support of the ratification of the treaty as something of an obligation or duty they owe to the President of the United States.

Mr. President, in behalf of the President of the United States I must challenge the accusation, and, knowing him as I do, I must denounce the intimation that he, scholar of the Constitution, faithful public servant of America, would assume to influence his co-colleague body to separate itself from its constitutional duty either as a consideration of sentiment or as compensation for political reward. I deny that any member of his Cabinet would assume to control or intimate influence based on patronage to secure votes of a Senator.

It is a thing to which the distinguished President would not descend, and I here inform my able colleagues that I know no man in all the political life of America or of the world who would hold in contempt more completely the man who would surrender his duty owed to his constituents or constitutional oath as Senator for any form of sentiment or favor than this President of the United States, Franklin D. Roosevelt.

Sirs, it is this President who says to his colleagues of the Senate, "I could not love you so, did I not love honor more."

Mr. President, under the Constitution of the United States the Senate of the United States is the maker of a treaty. Let us have no misunderstanding or misconstruction on this constitutional duty. When a person is named for office—and I am speaking now of constitutional offices—that person is subject to confirmation by the Senate; but if not confirmed by being not acted upon by the Senate he may still take his office and perform its duties. Subsequently the action of the Senate may change his position.

But when it comes to a treaty the Constitution of the United States, by the designation of the people in the creation of the Government, has prescribed and described that it is the States who, with the President, make a treaty; that before such proposed treaty can be said to have been made and executed it shall have had two thirds of the States of the Union in some voice approving it; thus the provision of the Constitution requiring the approving votes of two thirds of this body. Therefore, Mr. President, the Senators and the President are conjunctive forces through which a treaty is made.

If a Senator should abrogate his duty as a Senator and violate his conscience or surrender the rights of his constituents in consideration for any form of favor, political or personal, such a one would violate his oath, he would violate the Constitution, he would desecrate the office, he would pollute the Chamber, and would be unworthy of the name of Senator, and must go out in the air branded by all of honor as a traitor to his trust.

I cannot conceive that any Member now of this body could ever come within that pale or ever be subject to that category. This more I add before concluding this phase: That the history of this body will restore to the mind of any Senator of memory that certain Senators of both political parties in the past—I refer now specifically to the treaty known as the "Hay-Pauncefote Treaty", negotiated between England and the United States, and that other treaty designated as the treaty for the Panama Canal, previously known as the "Nicaragua Treaty"—Senators who for mere accommodation sacrificed a principle and abandoned their constituents or in cowardice shrunk from duty due interests as constitutional officers of this Government—far from being rewarded by the Presidents then in power for this contumely—not only were ignored, but, as they ran for office afterward, not one word of approval, far less of advocacy, of either one of these certain-remembered Senators ever came from the then President of the United States.

So little did he hold such servants as worthy, and so greatly within his heart must he have held them as unworthy, that they not only failed to receive reward, if it had been expected, but they received the silent condemnation of an honorable official serving as President of the United States. We have the fulfillment of the Tarquin text, in the

days the Romans, after the surrender by an officer of his post for reward. Turning in disgust from his presence, the commander hissed, "Oh, ye gods, how we love the traitor while betraying—but, oh, how we hate him when he has betrayed."

Mr. President, I make this allusion that it may not be forgotten that there is a very high sense of honor on the part of the American public, and it is that public to which every Senator at some time or other will be called on to respond for his action, and there he will be met and adjudged, based on how he discharged his duty.

I now, Mr. President, proceed upon the prerogative of an independent Senator, and as a compatriot of my distinguished colleague [Mr. DIETERICH], representing the State of Illinois, we present the reasons for our opposition to the ratification of this treaty and, speaking on my own right, tender to the Senate justification, pledged, sir, not upon a mere local demand of either the waters of the Lakes, or that of a prospective waterway, or that of transportation in behalf of railroads, or that of what is called hydroelectric power, but upon the larger and greater basis of the national preservation, of the sovereignty of the United States, and the dignity and honor of the Republic of the United States of America.

Mr. President, what is that we are asked to ratify? It is a treaty which assumes in its spirit to deliver a part of the sovereignty of the United States, a portion of its land, and much of the sovereignty of its water and land to a foreign country. It is land in part of 3 States; it is land and water in 1 State. I have asked this honorable body in a previous speech to consider the opinion of the Supreme Court of the United States which I read to this body in One Hundred and Thirty-third United States Reports, where the Supreme Court has decided that it is not within the power of the Federal Government to bargain away under treaty the sovereign right of a State, neither as to its property or the rights, privileges, or sovereignty. At the time I read that opinion I had not in investigation revealed a subsequent opinion of the Supreme Court of the United States which I beg now to invite the Senate to consider. It is the concurring opinion of Mr. Justice White as a member of the Supreme Court of the United States in what are known as the Insular Cases, found in One Hundred and Eighty-second United States Reports. There the Supreme Court of the United States again announces that while "in a great war crisis", or as the result of one, or where "a new boundary has been provided for in some new adjustment", the Federal Government may dispose by treaty of certain sections of a State that lie necessarily along the boundary or within the territory of this new adjustment, but that territory forming part of the United States cannot for the object of transfer be alienated by the treaty-making power. In the language of Mr. Justice White, it can only be done—I may read the exact expression—

> From the exigency of a calamitous war or the necessity of a settlement of boundaries.

Mr. President, this treaty has no consent of any State whose property, land or water, is ceded by it or through it.

Mr. LONG. Mr. President——

The PRESIDING OFFICER (Mr. POPE in the chair). Does the Senator from Illinois yield to the Senator from Louisiana?

Mr. LEWIS. In a moment.

I beseech you to note that so cautious on this theme was Britain that under the Ashburton Treaty in 1842 she, recognizing what was essential when she sought a favor of transfer of United States territory looking toward her own interest, forced this Government to adopt that point of view I define. Certain territories from the States of Maine and Massachusetts had been by our Government ceded by an arrangement to New Brunswick, a Province, later a section of the Dominion of Canada. Britain, before she would accept the arrangement as completed, had a provision inserted in the treaty of 1842, known as the "Ashburton-Webster Treaty", calling upon the States to ratify the privilege of Canada to occupy this territory passed to New Brunswick. I describe the portion ceded that had been previously the property of the State of Maine and the State of Massachusetts.

I therefore, sir, invite the attention of the Senate to this situation—the parallel that when Canada sought to obtain possession for her benefit of territory that was American she saw that it was necessary to have the consent of the States involved, and obtained it. This, if you please, sir, was under the conception of our Constitution and the right of the States. But now, sir, she has gradually grown to where she finds it agreeable to accept the surrender by this Government of the privilege of the States and their sovereign rights without seeking from them their consent and to pursue the course of appropriating both the water and the territory of the United States from the different sovereign States of the Union without seeking either their consent or approval or consulting them in conference.

I yield at this moment to the Senator from Louisiana.

Mr. LONG. I did not know the Senator was going to explain the matter so clearly. I was just wondering what the difference would be between giving this water power and this waterway, this part of Illinois and part of other States, to another country, and giving them a part of the territory of the State itself—some of the land. I am just wondering, if this thing can go through, why they could not be given a piece of Louisiana or a piece of Illinois, and let us ratify it here in the Senate.

Mr. LEWIS. The pertinent query of the Senator awakens that interest which would arise from any Senator: If a part, why not the whole? And I may here pay tribute to an excellent treatise upon this very question of international law, where may be found a chapter addressing itself to the query of the Senator from Louisiana. The treatise I allude to is by Prof. Quincy Wright, an eminent author and commentator on international law, now a professor and director of that particular branch of learning in the University of Chicago.

Mr. LOGAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Illinois yield to the Senator from Kentucky?

Mr. LEWIS. I yield to my able friend from Kentucky.

Mr. LOGAN. I always grow a little suspicious of an answer when, instead of a distinguished lawyer such as the Senator from Illinois answering himself, he quotes from some other authority without approval.

Does the Senator from Illinois undertake to state to this body that there is no distinction between the rights in water and in land under the laws of all nations and all States, so far as I know?

Mr. LEWIS. I answer my able friend by saying that subject has not been touched by me. I will, however, assume it and answer this:

The rights to land, if ceded within a State or from a State, in my opinion cannot be had without that State assenting. The right to water is not to the water as a title, but to the mere use of the water for the purpose either of navigation or sometimes for sanitation. The difference arises in this, that one may grant the privilege of the uses without granting the right of title to water, and thus by that arrangement may carry with it the privilege of enjoying it.

That is my answer.

Mr. LOGAN. That is a correct answer.

Mr. LEWIS. Then, having the approval of my eminent friend, lately distinguished chief justice of the Kentucky Supreme Court, I find a great consolation in his reply.

Mr. LONG. Does that mean that we get his vote, too? [Laughter.]

Mr. LEWIS. I am not so much interested in votes by voice as I am in conviction of the mind.

I must proceed. I have asked the able Senators to defer interruption of me, not because I would not be glad to yield but because there are many Senators whom we have pledged the time today in which they may address themselves to the Senate; and I do not feel that it is exactly fair to consume

that time by the amount that I should have to take in responding to many interrogatories that would be addressed.

Now, sir, having projected the proposition, as I insist I have, I assert that there is no legal treaty before this body for ratification. I come then to what is the situation and what is that which is offered. It is the gift by the United States to Britain of the privileges granted under this treaty.

My eminent friend the Senator from Nebraska [Mr. NORRIS], together with the Senator from Wisconsin [Mr. LA FOLLETTE] and the Senators from both the Dakotas, have called attention to what they feel is a justification for this treaty in what they term "cheap transportation by water."

Cheap transportation? Pardon me; let me ask a question. Cheap to whom? It is intimated that it will be 10 years before this project, if it could be entered upon at once, could be completed. Add to that 10 years the time we know always follows in point of general change of events, and we must reflect that hardly will anyone serving here today survive to enjoy the privilege of using the canal, and if there should be anyone—where are those who assume that in a new era, 10 and 20 years from now, considering the events which have so changed the world in the last 10 years—in our own country, and the events of the world business conditions will be the same as now?

Upon what basis is it assumed that transportation at that time will have a capacity to meet the demands of the generation then living?

Transportation! What is meant by these honorable gentlemen? I call the attention of my able friend from Michigan [Mr. VANDENBERG], who referred to the matter in previous discussions, to the fact that in my previous speech I charged that there will be such regulations along the St. Lawrence, either a municipal regulation fixed by Montreal or a regulation by Canada as a dominion, that will so enhance the costs to any American ship going through the waters and docking at the ports as will make it impossible for an American ship to pass through the waters with American cargoes in such manner as to compete with a British ship in British waters on the way to Liverpool to dispose of a cargo to the profit of the American shipper or the shipment.

My friend from Michigan, and his colleagues speaking with him for the treaty, said I must be wholly in error, that it was not conceivable that such would be or could be done by Canada.

I now answer that it is not for Canada to say. I here assert that out of that prudence that was ever the motivating action of Britain she has provided that when it comes to navigable waters, conscious that it may be used at any time as an agency of self-defense, it shall not be in the privilege of any local government to make contracts or arrangements concerning such that may take from Britain the sole privilege of adjusting it according to the lines of future conflict or commerce that she may find necessary.

I shall read an extract taken from the political science proceedings at Philadelphia, from a speech by the president of the Melbourne University, of Australia, when, speaking of this situation, he produced a copy of the constitution of the Dominion of Canada. I read the quotation:

> The river and harbor questions of the Dominion of Canada are referable to the Imperial Traffic Board of London.

Surely Senators must see what that means. It means that Britain, with a fine sense of self-preservation and due regard of her interest as it may arise in the future, has denied to the local governments the privileges of the control of water which has a connecting relation to the sea, and might at any time be used for defense or for military preparation or for commercial preservation. Therefore, sir, these different burdens upon the transportation passing from America through American territory into Canadian waters, from the Canadian waters to the sea, and from the sea to the ports of Britain, would be controlled by London, and be controlled by London by her traffic board, which is a part, as every Senator here knows, of what England calls her board of trade.

Therefore will it be conceived for a moment that Canada, out of due regard for herself and Britain in the preservation of her natural interests, is going to allow America to come into her waters with an American ship and take such course of privilege as will send it to Liverpool with an advantage over a Canadian ship, the competitor, carrying Canadian wheat from the northwest competing with the wheat from the United States from our Northwest?

Where is the study on the part of these honorable gentlemen who have confided so much and reposed such confidence in the theme that in the hereafter, somewhere, after the generation of the present has passed away, in some new performance upon the theater of life, they will obtain benefits from a competing land that will give to America a superior advantage, when there is vested in the rival the constitutional right, within the treaty, to defeat us at any point and anywhere that suits advantage to do so?

Senators will again gather what was the meaning of these gentlemen, the mayors of the cities, who visited the President of the United States but a short while ago, looking to giving their approval to this canal, leading into the St. Lawrence, and therefore to the waterway. These eminent mayors of the cities were merely conceiving the hope, as they had read from the papers and public prints, that some advantage could come somewhere at sometime. With little knowledge of the facts, they were seeking what? They were presenting, in behalf of their cities, an opportunity for a British ship to come from Britain territory and the Dominion of Canada waters into the United States, to the ports of Chicago, Detroit, Milwaukee, all, anywhere, and unload the merchandise they would bring from the foreign land at the doors of the American interests, and overcome the factories and the merchandise of America by their competition in such manner as to completely bankrupt the hopes and the prospects of American mills and American industry.

Again, sir, these eminent gentlemen, the mayors of the cities, seemed to be unconscious of the fact that they were likewise asking to have that done which would make impossible the building of American ships. There would be the lack of reward or compensation to construct them—their whole business being taken by the foreign ships which, carrying cargo to Europe, would bring foreign goods to the very doors of our great cities, and, unloading them, undo the prospect of an American merchant marine. Even more than that, it would make unnecessary the building of an American waterway in American territory, for that Canadian waterway would supply the necessity by converting the waterway to Canadian uses and surrendering it to Britain, the opponent of America. That is the fate these mayors of cities would have brought to America in their commendation of the project, as it was given us by the press report. It was these city mayors who were quoted by Senators from the western grain States as being the voice of the interests of these States. I make mention of it that we may see what little opportunity these eminent leaders of civic development—the mayors—have had to examine this subject, and how little information they have on such a vital question, which, had they had it, would have converted every mind in an opposite direction from that which it seems to have taken.

Let us say that there is such a thing as these eminent Senators contend, a prospect of cheap water transportation to be born of the project, I, sir, in presenting my opposition to this treaty, would have it known that I present the opposition on the basis that I concede every premise which every Senator advocating the treaty presents as reason and profit. I adopt every theory he suggests as a premise, and, adopting it for this argument, I assume and present the disadvantages to his country, the loss to his countrymen, the destruction of the sovereignty of his own Nation, which he would reap as a result of that which demands.

Where is this extra cost or expense for transportation which he says will be saved? I will concede that the railroads may charge more than may be charged today by certain ships upon certain waters. I am not acquainted, in completeness, with the relative charges either makes, but if the grain is to come from the far Northwest, it must be brought, as I have asserted, by the railroads down to the point where it touches the water. The railroad must then

be paid for that particular haul, or there must be paid the cost of railroad motor transportation. There is no way to overcome that. Then, when it gets to the water of the canal, it must be transferred to some small vessel and be taken to the larger area, where it is to be transferred again to a larger vessel, the larger vessel moving out, let us assume, to the Atlantic. The amount of cost to the owner of that grain for movement has already consumed all of his profits, all that he would hope for.

Now, Mr. President, one other word upon this question of transportation rates. I wonder whether my eminent colleagues have paused to consider that we, the United States, have loaned to the railroads what within a very short while will approximate $4,000,000,000. Will my brother Senators not realize that none of us living by the grace of God and the saving statute of divine limitation can ever hope to see that debt paid? Is it not plain to view that in the meantime that which came to us in the news yesterday, Mr. President, from the Coordinator of Transportation, Mr. Eastman—that it is to be essential for this Government to take possession of the railroads? That this is inevitable?

Is it not plain, sirs, that we take the possession in two ways? In the temporary hour we take the possession of the control of the railroads by either direct or indirect action, in order that we might preserve the security from which we hope some payment of the loan, or later it may be, as seems to be on the road of eventualities, that we become the possessor and owner by foreclosing the debt.

Is it not plain to Senators that between now and then all the shipments on the railroads of the grain of the West will be at the price the farmer himself directs? The railroads will not seek profit from the farmer. The Government controlling the roads will seek just enough to pay the expense, for they are anxious to keep their roads going. If profit at all there be, it will be exceedingly insignificant. And since the public now owns the roads, it is the votes of that farmer and his fellow shipper that will direct the amount of rates. It is his voice that will direct the rates.

If the farmer then will pause he will realize, and if the honorable Senators who represent him will consider they will realize, that there never was a time in all the history of the Republic, nor of the Government, where the farmer has written his own rates in the way he will now, as the result of which he will have the cheapest rates that could possibly be given him, because the railroads, owing the Government so much money, will have been taken possession of by the Government, as they must be, the Government must arrange the rates to take that farmer's product at the very cheapest form and phase to whatever market he can reach, national or international; and he, being in control by votes, will be able to name himself the rates on the railroads, because they are then the property of the people—the Government.

Shall we hope to collect this debt by any other form? The railroads cannot pay it. We will be in possession of the railroads, as was on yesterday announced by the Public Coordinator of Transportation that we shall take possession of them. Therefore, far from benefiting the farmer in this presumed canal, the farmer will have done—what? First, he will have paid $500,000,000 up to a billion dollars which must be paid as the expense. When he has paid this, by taxes, and then whatever rate may be given him, he stands—how? He is out of pocket an overwhelming sum of money levied upon his land and his property as the taxation necessary to maintain the expense of the waterway construction.

Then to find, if in the meantime we begin funding—if the treaty shall be passed—the money necessary to carry on this undertaking, he not only pays the $500,000,000 as the lowest estimate, running up to $1,000,000,000, but in the meantime he confronts an indebtedness in the Treasury of his own country, as said by able Senators from the floor of the Senate, of from thirty billion to forty billion dollars. With the Treasury in that condition, with the heavy taxation yet to be levied upon our people to meet the needs of the Treasury and the conditions of the country, we add to that this extra burden to be put upon all the taxpayers of the land in behalf of this undertaking, a burden that none of the present generation, I sadly assert, will ever live to see lifted.

Mr. President, note that under this treaty not one dollar—I speak literally, eminent Senators; not figuratively—not one dollar is provided to be paid the United States by Canada. The vast millions and hundreds of millions we are to give Canada is the one thing, but not 100 cents of Canada's is to be given to the United States. Therefore, when we contemplate this expense to be put on the taxpayer, and see the burdens that are to be levied upon the shipper, and add to that the heavy extra burden of taxes to meet the deficits which we now understand are imminent, is it any wonder we have from the Saturday Evening Post, that very conservative and safe journal, the following editorial that this morning I am able to present, headed:

DUBIOUS ECONOMICS

This is from an editorial in the Post, published in Philadelphia:

DUBIOUS ECONOMICS

No one denies that in the course of time some such development as the St. Lawrence seaway and power project may become desirable. But whatever merit it may have in the distant future, there is the utmost haziness regarding any present necessity for undertaking an expenditure the exact total of which is in dispute, but which is certain to prove impressively large, for a purpose that is so indefinite.

Unfortunately this project has been urged and opposed with equal vehemence by those whose interests are local and sectional. The ability of politicians to keep on making promises, which they cannot possibly deliver, to wheat farmers, the ambition of certain lake ports to welcome ocean-going steamers, and the fear of certain Atlantic ports that they might lose freight—all these considerations seem less important to us than sound principles of planning and expenditures.

To a large extent the St. Lawrence project has been sold on the theory that it would mean a great saving to the wheat farmer. It is by no means certain that such a large proportion of the wheat would be shipped this way, and there are authorities who hold that the saving on the portion so shipped would be exceedingly small indeed. But aside from this, the whole effort of the present administration is to reduce the production of wheat and other staples to the limits of domestic use. But even beyond the effect of depression and the resulting reduction in acreage program, the whole long-term tendency in this country is toward a reduction in wheat exports. We fail to see the point of making a huge expenditure to effect a questionable saving on a type of commerce which is dwindling away.

Of course, there is much other tonnage whose movement might conceivably be affected by such a development.

But when the origin, destination, and seasonal character of every commodity are analyzed it is a very complicated question how substantial a portion of the total commerce within the possible sphere of influence will actually be affected and with what results in economies realized.

Since the St. Lawrence project was first suggested there has been a steady increase in efficiency and decline in cost of steam-generated power. How the huge new block of power could be absorbed at all except by local St. Lawrence Valley metallurgical and other industrial developments on an extremely extensive scale has not been explained. All this may come in time, but it will take time. No reason for a forced and artificially costly project of the sort has been shown.

It may engage the imagination to look at a map of North America and indulge in large, rosy visions of vague and uncertain improvements. But it might be well to remember also that all pocketbooks have a limit and that this country is going to have plenty of trouble to pay its pressing, its absolutely necessary bills for a great many years to come.

Mr. President, I have read this in order that Senators may have the views of a very conservative journal for a safe course.

Mr. President, I behold my friend the Senator from Michigan [Mr. VANDENBERG], to whom I alluded, has returned to his chair. He has been quite the leading voice on one feature of the advocacy of the treaty, and that in such power of presentation as fright us who are the opponents of his reasoning.

I now come to the point of bringing to the attention of the Senate the question of power, having pointed out how, as I see it, that all the hope of transportation is but a dream, and if it shall be fulfilled in the years hereafter, in coming days, it is offset in such a way as to leave bankrupt every emotion that it could present in the hope of the realization.

It is said by my learned friend from Nebraska, Senator NORRIS, that there is to this waterway a great prospect of

power. Yes; there is such a question. We will take that up now, and in a few words we will link it to the question of transportation. Under the provision of the treaty concerning power the United States is supposed to get one quota and that of Canada four times the amount. The United States is to pay for it four times more than Canada, and when we have paid for it, it is provided in the treaty that Canada shall do the work with Canadian workmen, by Canadian engineers. All of that shall be done, and it is specifically to be done by Canadian engineers and Canadian workmen—then all owned by Canada completely.

Mr. President, what do we think was the object of writing such words in a treaty as work to be done only by Canadian workmen? What do the Senators think was the purpose of placing those phrases in the treaty? I answer it was to give Canada the right to denounce an attempt on the part of American workmen who might cross over from Detroit by the way of Windsor, from New York by the way of the north end of the State, or from the western country into British Columbia, by raising the point that Canada had the right to eject them, remove them, decline them, resist them, because under the treaty it provided that none but Canadians should have the right to enjoy the American money.

Without that provision in the treaty the United States could have insisted that her people would have had as much right to pass into Canada and enjoy the right of labor as the Canadian now enjoys, upon the permission by which he crosses every morning into the State of Michigan and the neighboring State of New York and enjoys the right of earning American money in different forms of American undertaking.

I admire the very shrewd adjustment by Canada, I express my approbation of its ingeniousness, I approve of the capacity of intellect that can so befuddle the mind of an American who would yield himself to such a surrender as has been cajoled into this treaty.

We are at loss to understand how an American, representing this country, which country is to pay hundreds and hundreds of millions of dollars to Canada, could have deliberately allowed himself to be written down as being unworthy of enjoying a dollar of the money of his own people, and write out a contract in a sovereign treaty that prohibited an American from crossing the line of the other country, and by toil enjoying the benefits of the very money his people were paying to this land across the border and over the rivulet.

Mr. President, I then come to the question after we pay this vast sum of money, and started this power undertaking to ask, do you realize what it means? I answer for you. The power may be projected, but the lines of transmission and the construction that will communicate the power to the States along New England and the border of America are owned by private companies. They will have a right to contract with Canada for the power. The transmission lines and all the construction being built, already, sir, by private owners, they it is who will have the right to dispense it; but since the power is owned by Canada, I beseech you, sir, to turn to my eminent comrades of the Senate who cry forth for Government ownership of power. Where is that American Government ownership of power when Canada is the Government that owns it by our consent, paid for with our money? Such is the position of our honorable friends who have been the advocates of Government ownership. In this particular project they would turn this great undertaking into the hands of a government, friendly it may be, but which has no interest in turning over to us the control of their property for our uses and for our dispensation for our profit.

But, Mr. President, let us say the treaty, as proposed, is in existence—and, Senators from New England, the able Senator from Maine [Mr. HALE] and the able Senator from New Hampshire [Mr. KEYES], I beseech you that you heed me, note in all attention—let us assume that a power construction in Canada will be created and that the New England States, as is presented, would get some benefit by it, however high the price they pay to the private companies who own the transmission, and however just a price, will it be assumed when this treaty is made that Canada will equally divide the power and its privilege merely because it is stated in the treaty?

I invite Senators from New England to remember what happened to their section under the treaty of 1871, when there was provided in the exact clause that is now injected into this treaty the right of our people to enjoy the waters by our ships in shipments. In that treaty there were also certain other privileges. I invite you that from 1871 to 1887 Canada found it agreeable, under the order from London I have just read, because of the power of Britain to control Canadian waters under the constitution of Canada, to decline to allow American ships to enjoy those waters unless the American ships were carrying the products of Canada.

It was then, sir, under that treaty, when this wrong to States of New England became so manifest, that the eminent statesmen who represented those States made complaint of the wrong being done in the construction and operation of the treaty and the methods of the Governments of Great Britain and Canada in violating it by refusing to give the American ships the same privileges for American goods, by insisting on the qualification that though American ships had a right by treaty to come into that land and into those waters upon equal privileges this could only be enjoyed provided they were carrying Canadian goods. Of course, under this provision we would never have American goods compete with those of Britain.

I invite the attention of my eminent friends, the distinguished Senators from New England, who must have heard something of this matter, and, being learned men, probably will recall the incident that then it was that Mr. Cleveland, as President of the United States, on August 23, 1888, sent a message to this body in which he advised retaliatory legislation against the governments that had produced this wrong and committed this unfair adjustment and this proposed division based only upon the proviso of American ships carrying Canadian produce. There in that message it is that President Cleveland says:

> To promise equality and then in practice make it conditional upon our vessels doing "Canadian business" instead of their own, is to fulfill a promise with but a shadow of performance.

I acknowledge this treaty copy and message of President Cleveland as coming to me from that eminent New York statesman—officer of government—Hon. Lewis Nixon, of New York.

Will my able friends from New England not realize that there will be the exact repetition under this treaty with the exact clause? What manner under this treaty, I beseech you, have you of enforcing this treaty. You cannot proceed against Canada for the treaty is made by Great Britain; you cannot proceed against Great Britain, because Great Britain will announce, "While I am a party to the treaty the provisions of it, gentlemen of the United States, are your own making." Mr. President, I am calling attention to these provisions that you may realize, sir, that this promise on which the honorable advocates for the treaty dwell and rely, has for performance, to use the words of President Cleveland, "a mere shadow upon which to rest."

Mr. President, I then call attention that, under this peculiar treaty, there is no provision of penalty. My distinguished friend from North Dakota [Mr. FRAZIER] than whom there is no more diligent or abler representative of the farmers in any legislative body advocated this treaty as a boon to the Dakota farmers, I beseech him and you all to see for the first time of legislative experience a treaty proposed that does not contain one single phrase of forfeiture.

In this treaty only can be found the absence of any statement authorizing the forfeiture or the ending of the clauses in the event of their disobedience or evading. How skillful were these eminent advocates of the British Empire! How splendidly guardful they were of their interests as against American welfare! Mr. President, if the plain and profane prayers of a Senator of the United States could be heard in the great celestial portals of the Divine, I would register mine that American representatives at some time could dis-

close the same form of patriotism and devotion to the interests of their country that the eminent representatives of Great Britain always display to theirs.

Now, Mr. President, if it be—the eminent Senator from Nebraska [Mr. NORRIS] and the Senator from Wisconsin [Mr. LA FOLLETTE] are interested in the question of power—on this phase they base their insistence upon the treaty, may I not say to those able Senators and also to my eminent friend the Senator from Michigan [Mr. VANDENBERG], whose treatises upon this treaty generally will not be excelled by any speech, however complete, which may be delivered by any Senator, I recall to all Senators intrigued by the word "power" that I asserted when the Senator from Michigan and I were exchanging views upon this question in previous debates that if this were a power question and one wherein our distinguished President's interest lay, then, sir, I asserted that it was not necessary there be a treaty as a treaty, but in preserving what he feels his locality should enjoy in the distribution of power from the water which is the mutual water of their geography. All could be assured by a contract agreement.

I assert now that if this power privilege were the only interest, that could be arranged by an ordinary agreement between Ontario and New York. But, sir, here I invite you to attend that while my able friend from Michigan, the able Senator from Wisconsin, and others have asserted that a treaty was necessary, and that it had to be brought about by a treaty, I respond and rejoin that the reason of the sovereign treaty was for other reasons and not the question of power. Why? Because there was something more serious, more sovereign of which Britain had to be assured in the protection of an ultimate interest she saw likely to arise by which in this profound document she creates a responsibility of my country that sacrifices her sovereignty to the uses and benefits that will come to the British Empire of the things she dreams upon.

Now, sir, to demonstrate that I am justified that these measures of power could have been brought about if it were mere power as issue by a mere agreement, I call your attention, sir, that this is what Canada did herself, and this is what Britain did herself when Britain reversed the situation, sir, and gave to the United States a portion of the land in the Niagara River and conceded it to the United States for the purpose of commerce and the construction of a lighthouse. In that instance did Britain demand a treaty, sir, when she was obtaining a benefit from us?

Not at all. She promptly proceeded by a protocol of 1850 and thus by that ordinary contract she ceded the Niagara River and the island locations to the United States, and made a condition that the United States when in possession should build a lighthouse in the form as described. It was recognized by this Government that such conduct should only call for a mere ordinary agreement, and Congress proceeded to make an appropriation carrying out the agreement between Canada and Ontario, and the United States and New York. Therefore, by this precedent of Canada and Great Britain herself, it is sufficient to see that if it was only an arrangement of power, an ordinary agreement between the parties, long adhered to as a custom, could have been but duplicated.

The present President of the United States well understood that to be the custom and saw that to be the custom, for he wrote a letter while Governor of the State of New York to the then distinguished President of the United States touching this advance treaty. He wrote a letter to the then President of the United States, Herbert Hoover, in which he said, on July 11, 1931:

> MY DEAR MR. PRESIDENT: While I have no official advices, I hear that you have assumed to appoint the American plenipotentiaries, etc., to negotiate with Canada a St. Lawrence Waterway Treaty.

I beseech you to note that the now President of the United States said "I note you are about to negotiate a treaty." The then Governor of New York called attention to the suggestion of the waterways and the potentiality of power. Then he said in this letter, though he had previously called attention of the then President, that he knew he was on the eve of negotiating a treaty, and does he ask to have in the treaty a provision respecting this power? Does he ask to have such written into this sovereign document as if it were a consideration of great eternity in the sublime creation of God? No; the then Governor, conscious of what had transpired between New York and Canada often, and between Canada and this neighboring country frequently, said:

> I am certain that there are no problems relating to the development of this great project in the interest of commerce and domestic welfare which cannot easily be solved by the mutual cooperation of the Governments of the United States and of the State of New York working in conjunction with our Canadian neighbors.

Does our distinguished official see a new treaty to be provided? Does he intimate it need go in a treaty? With the Empire of Great Britain? Not a word to that effect. To the contrary he concludes by calling attention that there are no problems on this question that cannot be settled by mere mutual cooperation and adjustment—between whom? The Empire of Great Britain? Not at all. Between the Governments of the United States and the State of New York and the Canadian neighbor, not the British Empire.

When, sir, has it become necessary that a sovereign treaty, with all the implications of a grave and serious document, fraught with undescribed possibilities and possible imagined dangers, should be necessary merely to divide the respective power running along a transmission line, so many kilowatts to one and so many kilowatts to another?

Therefore, I repeat, had there been only power it could have been done by arrangement; but there were beneath all of this maneuver for treaty obligation some serious, undisclosed design harbored in the brain and in the heart and in the hope of our honorable rivals; it was for something other than electric power that our rivals could enjoy, as I have heretofore pointed out.

Am I not right in this conclusion, I ask our able friend from North Dakota [Mr. NYE]? I ask him to recall that in a speech he delivered, unconscious of its effect as he was, he quoted from what I have cited that this whole adjustment could be done by an arrangement, and while he quoted in his very able speech he in some manner surrendered all contention of necessity of treaty as the needed method of compact for power or transportation.

I now come to ask the question, Why all the peculiar superimposed gravity of this treaty, and why is it written in such terms that it cannot be corrected, as if there were some necessity that exacted it? We remember that text in Hamlet, do we not, when the eminent one said to Horatio:

> There are more things in heaven and earth, Horatio,
> Than are dreamt of in your philosophy.

I therefore bring the discussion of the eminent Senator of Canada, Senator Casgrain. As the eminent Senator from Michigan [Mr. VANDENBERG] correctly stated the other day, he had heretofore opposed the treaty in the Canadian Senate. He is now, at this later date, making a speech to the Kiwanis Club at Montreal, and proceeds to urge ratification of the treaty, and proceeds to give his reasons why now he is supporting a treaty which heretofore he denounced while on the floor as a Canadian Senator. He was addressing himself, mark you, sir, to that which we were discussing in the American Senate at the same time, the ratification of the treaty. Keep in mind, Senators, that Canada has never ratified this treaty. With that shrewdness that ever accompanies a movement of the masters of the British Empire, Canada does not approve the treaty. She postpones its consideration. She is conscious of the possibility of this body refusing to ratify, and she is prepared, by her situation, to submit, of course, a substitute treaty, as was done seven times in the Hay-Pauncefote discussion in this body. So Canada does not approve the treaty. If she had, and we then disapproved it by withholding our approval, it would be the end; by withholding her approval she leaves it open for her, when we had defeated it because of its injustice to us, that she may, by eliminating one or two phrases which were

made the basis of our repudiation, submit it again as another treaty.

Mr. LONG. Mr. President——

The PRESIDING OFFICER (Mr. DAVIS in the chair). Does the Senator from Illinois yield to the Senator from Louisiana?

Mr. LEWIS. I yield.

Mr. LONG. I hope the Senator from Illinois will not suggest the possibility or feasibility, that through a defeat of this treaty the emissaries of Great Britain and Canada will come back to negotiate another treaty with us, because if they do they will probably get the better of Chicago. Every time they come back they get more.

I invite the attention of the Senator from Illinois to the fact that when they came here to negotiate this treaty we were given no consideration—and my friend, the junior Senator from Illinois [Mr. DIETERICH], will bear me out. They were not expected to get anything like as much as they got as the result of the negotiations; but when they went back home, as the Senator from Missouri [Mr. CLARK] read the other day, they were heralded through the Canadian and British press as having received many times more than they were sent to get, and it was said that they had "brought home the bacon." I hope the senior Senator from Illinois will not suggest the possibility of them ever coming back again, because there is no telling what they might get on another occasion.

Mr. LEWIS. Mr. President, I am anxious to yield to my eminent colleagues on both sides of the Chamber, but I am in honor bound, in faith to my friends who are for the treaty, not to consume all the time of the allotted day and since I must yield to others if I yield to one, though I would welcome interruptions gladly otherwise and would give them the proper attention they deserve, yet I fear it would consume so much time that I would be most unfair in my arrangement that I myself proposed to our honorable opponents in discussion of the pending treaty.

I now read, and ask the attention of the Senator from Louisiana. I reply to him that it is not at all unlikely that Canada or the British Empire will produce and present some other treaty; but I wish to say that in my opinion there is very little hope that, under the present administration, a treaty containing such provisions as sacrifice the sovereignty of this our Republic of America as was agreed upon by previous administration will ever be adopted by a successive one.

But, I now return and make connection of this speech of the eminent Senator delivering this address at Canada; and I hope the Senator from Louisiana will find it agreeable to listen attentively. I have some information for him.

Mr. LONG. I will.

Mr. LEWIS. Senator Casgrain, who has made his address in the Canadian Senate opposing this treaty, is delivering this address I refer to at noontime in Canada. While we are debating this treaty here in the Senate, he delivers this address, in which he says:

> The St. Lawrence seaway project is not only an economic absurdity, but also cloaks, under the terms of the treaty now awaiting ratification by Canadian and United States governing bodies, suspected hidden motives on the part of Uncle Sam, which may have as the end in view, ultimate exercise of American jurisdiction over the Canadian territory through which the planned waterway would run.

Then, continuing, the Senator from Canada added:

> I have always been opposed to this international waterway, but now I must confess I am somewhat in a quandary, for, after reading the almost incredible terms of the treaty, I ask myself: Would I be justified in continuing my opposition to it, seeing that under this treaty, Uncle Sam actually obligates himself——

Obligates himself—

> to the spending of hundreds of millions of his good dollars on works in Canadian territory, in which Canadian labor and Canadian materials are to be solely employed.

Mr. LONG. Mr. President, may we have the attention of the Senator from Michigan? I am going to ask my colleague to reread that statement to the Senator from Michigan [Mr. VANDENBERG].

Mr. VANDENBERG. Mr. President, it will be entirely unnecessary. I have heard it; and if, between the two Senators on the other side, the entire afternoon is used up, I shall not even be able to answer.

Mr. LEWIS. I have sought, myself, to prevent that consumption.

Mr. VANDENBERG. The Senator is correct; he has; but he has had no cooperation.

Mr. LEWIS. I may say to the Senator from Louisiana that a few days ago I called the attention of the able Senator from Michigan to the fact that there was something of this kind that I intended to present to the Senate; and, knowing his assiduity, his diligence, and his industry on this great question, he no doubt sought the information and acquainted himself with the contents.

I, however, desire to read one further feature.

Says this Canadian Senator:

> I do not know, but I say frankly I cannot understand why he (Uncle Sam) is so ready to shovel dollars by the hundreds of millions into Canada, as is now proposed, if he is not planning to hold possession in some way of the works those dollars will represent.

And then, after speaking of the vast sum we are giving away to Canada, and of the reasons for changing his opinion, he says the St. Lawrence River seaway is a much greater proposition than the Panama Canal.

Ask any shipowner—

He says—

> if it would be worth while for sea-going vessels to ply inland. They have far less accommodation and far greater weight than lake vessels, and, as competent shipping authorities estimated that it would take 52 days for a ship to come over from any European port, steam up the waterway and through inland waters to Chicago, or Duluth, and to go back to the European port again, it is easy to see that it could never pay. * * * The idea might go over all right with a public body or with a government, but it never could with any sane people.

This, sir, is the expression of the Senator from Canada.

My able friend, the Senator from Michigan, whose leadership in behalf of this treaty has in many respects led the discussion, called attention the other day to the fact that the Premier of Canada, Premier Bennett, had remarked upon the disadvantages of this treaty as a reason why he was not quite sure whether he was quite for it. I beg to call attention to what the eminent Premier of Canada really did say. I depart to say "eminent", as Premier Bennett is the peer and superior to his predecessors in all statesmanship. I read a part of his speech.

First he calls attention, sir, to the fact that we are to pay all these funds for the International Rapids section, that the joint board of our Army engineers pledges $215,492,000, and, then, sir, that the treaty provides further—and, hark you, sir, listen to this, the gleeful speech of the conquering Canadian Premier, through his astute representative, Minister Herridge:

> Insofar as is possible in respect to the works to be constructed by the Commission, the parts thereof within Canadian territory, or an equivalent portion of the total of the works, shall be executed by Canadian engineers and Canadian labor and with Canadian material.

And then, sir, may I read to you what the eminent Premier Bennett has further to say upon the subject. I quote his speech:

On July 18, 1932, this eminent representative speaks of the subject, and says:

> The United States will meet the entire cost of these river works. But in respect to the river works lying on the Canadian side of the boundary Canadian engineers, Canadian workmen, and Canadian materials alone will be employed.

Upon completion—

Says he—

> all river works on the Canadian side of the international boundary will be owned, maintained, and controlled by Canada.

First, sir, behold, he calls attention to the fact that we pay for everything, and then everything is to be owned by Canada. Then, continues the eminent Premier:

> Compatible with the paramount obligation to safeguard our (Canada's) sovereign rights, the treaty insures a minimum of

financial outlay by Canada. The estimated net cost to the Dominion arising out of new capital expenditure will be less than $40,000,000.

How we could cry out, "Oh, that we had had American diplomats in that contest—who remembered, as the Canadian statesmen remembered, the 'paramount obligation to safeguard our sovereign rights.'"

Get that, sir: All of Canada, $40,000,000. We pay $215,500,000 in one item, and it is estimated, sir, from three hundred and fifty to five hundred million in another; and all that Canada is to pay, according to her eminent premier, altogether, if she pays any cent anywhere at any time for her own interest and profit of hundreds of millions will be $40,000,000, to which she is in no wise obligated under the treaty, as her payment is altogether contingent and dependent upon the State of New York paying a certain sum, if she will ever agree to do so. And this compact of America's undoing is the treaty brought to you to be ratified in the name of America!

Mr. President, I must move rapidly on, because I am conscious of the fact that much time has been taken; but it was necessary that I might make clear the position which we take and the reasons for it, apart from all of the questions, I may say, in respect of the lesser matter of the hope of some reduced cost of transportation, the hope of some matter of power in the future that is yet unborn, of generations not yet come to life.

Mr. President, I refer you for a moment, sir, to the home where I live, and its interests. I beseech the Senators to indulge me while I say my eminent colleague [Mr. DIETERICH] has so thoroughly, fully, and wholly presented the whole interests of the drainage district, the waterway, and of Chicago, that it is not necessary for anyone to make further allusion; but I must explain why I have not alluded to the subject. Chicago is my home. The city and State has often honored me beyond all my deserts.

I was one of the counsel for the State and the drainage district before the Supreme Court of the United States in the litigation alluded to by the able Senator from New Hampshire [Mr. BROWN] and the Senator from Wisconsin [Mr. LA FOLLETTE]. Part of that opinion I regard as adverse to my contention and opposed to justice. It is contrary to my arguments and, like any other defeated lawyer, I do not take it easily; yet I would not leave the impression upon my honorable colleagues that I was still contesting for my own legal position, and warring against the treaty as something of resentment against a defeat in court, and that I am still arguing my lawsuit here in this body, and seeking to have it repair my wrong and heal my wound by defeating a treaty that reenacts the legal court opinion part of which was adverse to my contention.

It was for that reason that I would refuse to allude to the subject; and therefore at this time I only make this observation—I do not refer to the opinion other than this: It specifically provides that it only decides the question of the diversion under the circumstances presented. It refuses to pass upon the question of the amount of water necessary to go forward for the purpose of making the American waterway by way of the Mississippi. It calls attention to that question as one for Congress, and it does not assume to pass upon it.

But, sir, there is a phase about the matter that ought not to be overlooked. The city of Chicago is not petitioning this honorable body to give it some special advantage in allowing it an extra volume of water for the drainage of its own lawful uses. It presents to this body that which it presented to history. If its waters should be so contaminated that typhoid fever will result, as has been shown in the past, it is not only in the great city of approaching 5,000,000 people where lives are desolated, babies strangled in their birth, and mankind strewn throughout the sidewalks in a plague; but passenger trains passing through that part of the continent from coast to coast—motors of travel and private touring cars passing through and over—become infected, necessarily, and become carriers of the typhoid. Through the very water they drink, the very life they lead, the food they feed upon, from coast to coast of our country, our citizens become subject to the transmission of this dire malady.

It cannot be said to be, as eminent Senators have alluded to it, "purely local", any more than cholera at the Pacific coast, or yellow fever in the home of our friend from Louisiana [Senator LONG], or on the Atlantic coast, could be said to be wholly local, when transmitted, as we know, by every method understood by science. It is to avoid this result, and to secure the protection of the whole land and the whole people, that our people are asking consideration in behalf of this water temporarily, while the other greater matters are under consideration, and we hope construction. I make that allusion at this time so that it may be seen that it is not upon that that we rest.

I now ask my fellow Senators from the agricultural States to hear me. If the construction of the treaty by the able Senators from the wheat States be the correct one, it would provide an outlet for three States described by my able friend from Nebraska, but for all of these States bordering the Lakes, the intermediate States, those producing corn and wheat and rye, the States manufacturing production—where would they be? So very far away that they would have no recourse at all. These particular States would have as their outlet the American waterway, which we insist must be built from the Great Lakes to the sea, but which this enterprise of Canada now proposed would completely choke to its end and slay to its eternal death.

I then call attention to the other fact. I come to that which was hidden beneath all this discussion. The American route sends all of these benefits sought under the Canadian treaty to all our people, and all through the continent of America. We do not touch any foreign country or awaken to ourselves the danger of a conflict arising, first, from disputed construction and then, sir, from conflict leading to enmity.

Nothing is so dangerous to this land as a conflict over a boundary or concerning a boundary or between those who live on the boundary. What do we mean by this daring we approach? We see nations go to war, sacrifice their children in millions, their treasure in billions, over the mere matter of a line that divides one nation from the other, and we are on the eve again of projecting a dispute between our Nation and the British Empire over a boundary when we build a waterway in Canada and Canada is allowed to take sovereignty over our property in the United States. Have we forgotten? Is our memory so short? Do we not recall how near to war we were over the boundary of Maine? That is not without the memory of the eminent Senators from New England. I say to those from the far West, can they forget how near to conflict we were over the mere boundary line of Oregon? Are we going to permit this situation now before us to drive us into the torturing uncertainty of a conflict every time any question arises as to the construction and application or enforcement of this treaty?

I could show that with previous treaties we had a similar situation. But I may come nearer home. If Senators will pardon a personal reference, I participated, in an insignificant way, let us say, when there was the boundary dispute between Alaska and Great Britain, when I participated in an incidental place with the eminent men who were the commissioners; but we came very near to conflict, and with great difficulty composed that dispute in the commission at London, after danger was lighting the horizon. I invite the attention of Senators to these matters in order that they may realize how unnecessary it is for us to duplicate this course in a process of a treaty swelling with the portent of just such similar dangers.

Mr. President, as I bring this phase of the discussion to a conclusion, I ask, what is the reason why these eminent interests are seeking to possess the canal, and from the canal down to the Lakes, and to own the Lakes? I invite attention to the fact that the University of Toronto has, through its eminent dean of the law, been sending out communications to the different heads of governments and heads of people and heads of institutions of the United States, pointing out how Lake Michigan, while, it is true, an American lake now, is, nevertheless, connected with and is a part of a

general waterway which makes it as much the property of Canada as of the United States; and for that reason, as submitted by the Senator from Nebraska [Mr. NORRIS], that it draws its water from a watershed which may be connected, one way or another, by Lake Huron and Lake Erie and other lakes, out into the St. Lawrence and different districts of rain precipitation.

Therefore, by this interlocking connection in some form or other, either by the waters beneath or the waters above or the atmosphere surrounding it all, Canada should own the Lakes. I ask why not the Mississippi River; also, by that same bewildering logic, and why not the Atlantic Ocean?

Therefore, Mr. President, I will have the argument of the learned officer of the Canadian law institute printed—along the arguments on the reservation proposed as to Lake Michigan—as an American water, solely American.

Mr. President, there must be some reason for this great interest in Lake Michigan, as contended for by the advocates of British procedure. Therefore, I come to the final thing which has excited so much interest. The Senator from North Dakota and the Senator from Nebraska, and some Senators on my side of the Chamber, have gurgled gutturals of amusement in the intimation that I in a previous speech offered attacking this treaty, pointed out how the fact our honorable rivals when they own land in America, and own the streams by which we claim the ownership of the lake, in the event of trouble between our country and any other country would result in our being in the serious position of having the commercial ships of Britain, lying in American waters, quickly converted into war vessels which could stay the power of America as a neutral and prevent her shipment of her products to any one of the conflicting powers, or any one of the contesting combatants, whoever they might be. We could at once be blockaded from the full shipment of American commerce, providing Britain should happen to be an ally of one of those in conflict, or in sympathy with them.

Is this unusual? Does this strike my friends as being remarkable? Where is their history? Is that not what Britain absolutely did when we undertook to send out American vessels from New York during the World War? Did they not, our ships, have to be piloted and convoyed by British vessels and examined, and did it not bring this country very near to war with England before we had declared any war with Germany? It was because of that that we were in war with Germany, for when these ships were taken in this position, they were then treated as being English ships carrying supplies, and Germany regarded it as a violation of the laws of neutrality, and a direct violation of her rights. Germany's action toward our ships was because of the action Great Britain took—which she could take again within what she felt were her rights—particularly equipped to do so if she has the privilege on our soil—she has pledged for in this treaty.

Eminent Senators regarded that observation of mine as drawing on an imagined prospect—impossible of experience. They forgot that in the days before we entered the war a few of us, if I may include myself, stood on the floor of this body advising this body that we were drifting to war by doing just such things casually, without considering the seriousness of our undertaking.

I invite my opponents to consider what was the final result of this conduct which led us to war—a result that only regret and sympathy can condone. A short while ago, while we were debating here on this floor, my eminent compatriots found it amusing that I should have suggested that there was danger in our allowing an enemy, not of us, but of some other country that is at war with us, or with some other country with which they had connection, to embarrass us by having possession of our waters, with our consent. Since our fellow Senators did not note that they would have their ships within our waters, as within their rights; whereas as to these others who might approach American waters through American streams could be regarded as opponents, and we could withhold them from entering the United States from the Atlantic.

While we are discussing this question, the admirals of Britain met over in Britain, and we gather from a special bit of information that the British admirals on March 4, conferring with Australian and New Zealand naval authorities, have remapped their complete naval strategy. Of course, Mr. President, it will be remember that this was intimated now and then to be because of our new naval construction bill. I will not charge that against Britain. I will charge that her officers were merely looking to the preservation of their own.

The Reynolds' Weekly, a Sunday newspaper, speaks of the conference of the British admirals conferring with Australian and New Zealand naval authorities at the Singapore naval base. It asserts the British Admiralty expects a conflict between the United States and Japan, and asserts that Britain could not be a neutral in view of her alliance and commercial understandings with Japan. She will have to maintain a fleet in the Pacific to protect her interests. As the Panama Canal would be closed, Britain must establish a half-way house.

I ask, sirs, Where is the half-way house? Where is the half-way house if this treaty is ratified by America? I answer, It is Lake Michigan of the United States of America!

The Reynolds' Weekly further says that a British squadron could not be regarded as a menace; that it would only be in a position to rush either to Australia or to Hawaii, or whatever course would be necessary as their interests would dictate.

Ah, Mr. President, is it not Job, of the Holy Scriptures, who says?—

> The thing which I greatly feared is come upon me.

Here, Mr. President, I beg to say that Sir Frederick Whyte, of the Foreign Service of Britain, in a speech in Boston, Mass., of late calls attention to the conflict which is inevitable between the United States and certain other lands. He draws a deduction and warns this country of giving up the Philippines, telling us we are bound to be in a conflict, and invites our attention to the position that Britain will have to take in the event of conflict between this country and one of her friends wherein she will be compelled to be a neutral.

Where are the eminent Senators, Mr. President; where are the scholarly gentlemen, with some precedent in the past to guide their minds, with some affection and love for their country, who do not realize what all this means? It may be said by some that these are fears which are not well founded. My honored colleague, Senator DIETERICH, called attention in a masterly address on this floor how our recent officers of the Government, the representatives of the War Department, in early and later day pointed out why they devised the scheme of interconnecting the waterways of the United States, and proclaimed that such would be necessary for the defense of the United States in the future surely in the event of conflict which they say would be inevitable. But here I ask attention for a moment to what is more inviting as complete proof of their far-sighted vision.

Senators will have before them in a few days, as I read in the press, a proposition from our distinguished President looking to some arrangement as to the reciprocity of treaties respecting the import of goods from foreign countries and the export of our goods to some of those countries. We are informed that the measure is to be brought before us, and we will be called upon for very deep consideration of it.

In the meantime, while we are debating the adoption of this treaty giving to Canada great privileges and the vast sums of billions of money of the United States, territory and sovereignty of America, and while we are doing so there is met in London the representatives who are called the conservative force. I must call the Senate's attention to what it is they proceed to do with more definiteness. They meet in London and prepare a bill which is directed against the United States, and possibly against Japan. This is sponsored by reactionary Tories, those who are not in close sympathy with us. It is significant, because it suggests the policy which the Government may adopt as a protective measure. It is a measure against the currency of the United States.

My eminent friend the able Senator, the Chairman of the Foreign Relations Committee [Mr. PITTMAN], on Saturday before we adjourned was compelled to expose a situation as to our currency in the form which was embarrassing to some of our officials in foreign lands. I invite attention to the proposition that is made, and I read from the editorial section of the New York Times of Sunday, January 21, 1934, under the heading "Tory Dumping Bill Is Aimed at United States", as follows:

It was indicated a month ago that Britain would use the tariff rather than her foreign-exchange machinery if action of any sort became necessary because of the devalued dollar. President Roosevelt's latest announcement concerning the dollar and the setting up of an American stabilization fund has not caused—

Then we will omit the statement as to what it has caused.

But it is quite evident the British fear some sort of economic tussle with the United States and are devising ways of meeting it. Hints to that affect have come this week both from Prime Minister MacDonald and from Minister of Agriculture Maj. Walter Elliott. In the course of a speech at Seaham Harbour, to his constituency, Mr. MacDonald said: "External troubles may still arise."

Yes! And my eminent colleagues here find it difficult to understand when I point out the dangers of allowing them to give away that which they have a duty to hold, and how the very eminent representatives of the Admiralty of England point out the necessity of Britain having a middle ground, a halfway house, which, as I say, would be Lake Michigan, and when I state to your honorable body, quoting the line familiar to us all, when Horatio addresses Hamlet:

There are more things in heaven and earth, Horatio,
Than are dreamt of in your philosophy.

You see what I meant as the real reason for this imperial sovereign treaty, pledging the soil and sovereignty of America to a foreign foe, and that it was a mere pretense to make of power running along a transmission line, while it sputters its little spark of possibility in behalf of New England homes to be lighted and that this light process was the object of a great treaty between the King of Great Britain, Ireland, and so forth, and the United States of America.

Mr. President, the Senate has been very indulgent with me. I have presented reasons why we have opposed the treaty, upon ground other than a mere local consideration.

I have no purpose now of proceeding farther along the lines of merely extending further the premises and conclusions which I have presented here. I propound, as I conclude this discussion, the single inquiry: Where is the reason for this treaty now? Where is the justification for it in the present time? Where is the demand for it?

We are cutting off the volume of production of the American farmers. Reducing them one half. We own the transportation of our own country, and it is by vote that the citizen dictates his own terms of shipment. We have power all over the land by water that comes from every direction. We have everything in the world that could be suggested by this treaty and those who profess to prophesy of benefit in their imagination and dream.

What is the reason for the expenditures under the treaty when there is and will be a Treasury indebtedness of $30,000,000,000 to $40,000,000,000, where heavy taxes are to be laid upon our people, more crushing than the shoulders of mortality can bear, that we should add $500,000,000 more of a burden to our people for a gift to another people, however well we wish them, to whom we owe nothing in the world for which to make such a grant? And in connection with it, to open the portals of our own land to the entrance of those who in an hour of serious embarrassment could involve our whole Nation in its destruction. Yet this sort of thing to be undertaken without reason, without excuse, and hasten as if the very empire of one land was dictating to the republic of another for its salvation instead of its destruction.

Mr. President, this is our country; this is our Republic. This, your country, today as government is the model of all nations of the earth. Her example is the symbol of hope to discouraged government. As friend she guides the perplexed nations of the confused world. She has risen to her splendor by deeds of immortality. This your Nation has repeated the miracle of the Master—from the granary of our generous heart we have fed the hungry of the world lined upon the shores of time. We are the one people of all the earth who sent the children of their land to die that the children of other lands might live.

This Nation has fulfilled every mission demanded of her by all mankind. Then, sir, we ask what is the meaning of our official sons in effort to sacrifice their own Nation and surrender it to what would reduce its power, then destroy its eminence? The issue here is the single question: Are you for your country or against it?

Mr. President, this America is our homeland. We seek to take no rights from any people. We deny the right of any people to take our rights from us. On this we stand. I summon my fellow citizens when I demand:

Breathes there the man with soul so dead
Who never to himself hath said,
This is my own, my native land!

Sirs, in the consideration of this treaty in this fateful hour, we salute the colors of our country and turn to our Nation with a prayer, "God save the State" and guide this honorable United States Senate.

I thank the Senate for its courtesy to me.

Mr. VANDENBERG obtained the floor.

Mr. DICKINSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Michigan yield to the Senator from Iowa?

Mr. VANDENBERG. I yield.

Mr. DICKINSON. I suggest the absence of a quorum.

Mr. VANDENBERG. Mr. President, I ask the Senator from Iowa if he will delay making the suggestion.

Mr. DICKINSON. I withdraw the point.

Mr. VANDENBERG. Mr. President, it would be very unfair for me to take anything more than a few moments of the time of the Senate, because I have heretofore spoken at considerable length on the question of the pending treaty, so I rise only for one or two specific purposes, and I shall speak very briefly.

I wish to say, Mr. President, to the able Senator from Illinois [Mr. LEWIS] that I could conceive of no more complete presentation of the treaty opposition than has been made by my eloquent friend the senior Senator from Illinois. By no further stretch of the imagination could the case be more strongly presented. I say "by no further stretch of the imagination" because it seems to me that my eloquent friend has already stretched imagination to a point where there is no resiliency left.

Mr. President, I rise primarily to present a series of petitions, semi-official in character, more than semi-official in their persuasiveness. I present contemporary petitions in behalf of the pending treaty signed on behalf of the State of California by Hon. James Rolph, Jr., Governor of California; signed on behalf of the State of Colorado by Gov. Edwin C. Johnson, and ex-Gov. Oliver H. Shoup; signed on behalf of the State of Idaho by Gov. C. Ben Ross and former Gov. H. C. Baldridge; signed on behalf of the State of Illinois by former Gov. L. L. Emmerson; signed on behalf of the State of Indiana by former Gov. James P. Goodrich; signed on behalf of the State of Iowa by former Gov. John Hammill; signed on behalf of the State of Kansas by the present Governor, Alf. M. Landon, and by former Govs. Clyde M. Reed and Henry J. Allen; signed on behalf of the State of Michigan by the present Governor, William A. Comstock, and by former Govs. Wilber M. Brucker and Alexander Groesbeck; signed on behalf of the State of Minnesota by Gov. Floyd B. Olson and former Gov. Theodore Christianson; signed on behalf of the State of Montana by Gov. F. H. Cooney; signed on behalf of the State of Nebraska by Gov. Charles W. Bryan and former Gov. Arthur J. Weaver; signed on behalf of the State of North Dakota by Gov. William Langer and former Govs. George F. Shafer and R. A. Nestos; signed on behalf of the State of Ohio by the present Governor, George White, and by former Gov. Harry L. Davis; signed on behalf of the State of South Dakota by former Gov. Warren Green; signed on behalf of the State of Wisconsin by Gov. A. G. Schmedeman and former Gov. Philip La Follette; and signed on behalf of the State

of Wyoming by acting and former Gov. A. M. Clark. There could not be a more important or authoritative spokesmanship in behalf of the people of these Commonwealths.

Mr. President, I ask that these petitions, which are in the form of letters from these executives may be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER (Mr. MCCARRAN in the chair). Without objection, the petitions will be received, lie on the table, and be printed in the RECORD at the conclusion of the remarks of the Senator from Michigan.

Mr. VANDENBERG. Mr. President, I should like to say that, in addition to the Governors who have been listed in this roll call, the Congress has been similarly petitioned by Hon. Clyde L. Herring, Governor of the State of Iowa; Hon. Paul V. McNutt, Governor of the State of Indiana; Hon. I. C. Blackwood, Governor of the State of South Carolina; and by Hon. H. C. Kump, Governor of the State of West Virginia, in the same behalf.

I doubt whether any more formidable challenge ever was laid at the bar of the Senate in behalf of the interest of so large a section of the American Union, and officially in behalf of so many States of the Union. It is a direct expression of the extent and depth of the feeling which exists respecting this great adventure, which, I think it is fair to say, is the greatest adventure which has challenged the imagination and the activity of the American people since another Roosevelt bisected Panama.

Now, Mr. President, I reply only to two suggestions which were submitted by my eloquent friend from Illinois. I reply to those as being typical of the general argument. I reply to them with the feeling that in each of these two instances the case submitted by my able friend from Illinois is so utterly without foundation, so completely without justification, so typical of the entire fallacious argument in opposition to the treaty that it is unnecessary to trespass upon the limited time remaining in this debate to pursue the matter beyond these two exhibits. All of these fictitious objections have been heretofore canvassed at great length and in my view wholly exploded by their impact with truth and fact.

The first exhibit: My able friend says that we are giving billions of our money to Canada. Then he amplifies that general text repeatedly, discussing this project in minimum terms of an American investment of $500,000,000 and in maximum terms of one or more billion dollars; whereas in reality, when we come back to the authenticated facts as they lie at the bar of the Senate—facts authenticated, first, by the Board of Engineers for Rivers and Harbors of the War Department; facts authenticated, in the second place, by the President of the United States, whose word I decline to reject in testimony upon this proposition—we know from these official sources that the net cost over a term of years to the United States in respect to this enterprise will be a maximum of $150,000,000. The grand total of the cost of the entire enterprise will be less than $600,000,000; it will be in the neighborhood of $540,000,000. It seems to me almost futile to repeat and reiterate the arithmetic which has been laid down so frequently. Our share is half; Canada's share is half. Against those halved costs are credited the investments which already have been made by each of these great peoples in respect to this enterprise; for, let it be remembered by the Senate, we are not talking about digging any new canal; we are talking solely about removing the last 40 impassable miles of 1,500 miles of waterway already open except for those 40 miles; and the credit which belongs to Canada, on the one hand, and the credit which belongs to the United States, on the other hand, in respect to the investment which has been made in the remainder of this great 1,500-mile stretch all stand to the credit of each; and our credit, when taken to our advantage, plus our credit for power, reduces the cost to us to $150,000,000 over a term of 7 or 8 years which is required for construction. The President of the United States submits a prospectus. I stand upon the President's prospectus, even though gentlemen of his own party across the aisle may decline to do so. His prospectus says that this proposition has been laid out upon a long-range plan which involves an American expenditure of $9,000,000 a year for every conceivable expense involved in connection with it.

Why should Senators stand upon the floor and still talk about giving Canada half a billion dollars, one billion dollars, two billion dollars of American money, when the President's prospectus is—and I stand by it—that we are committing ourselves to a long-range program involving $9,000,000 a year for the purpose of—what? For the purpose of unleashing 40,000,000 land-locked middle westerners.

The Senator from Illinois says that the condition of the Budget should "give us pause" before we commit ourselves to any such expenditure. Give us pause in respect to an expenditure of $9,000,000 for a great undertaking of this nature, when on last Saturday the Senate never hesitated to appropriate $350,000,000 for a dubious experiment in behalf of cattle and cows in the United States! Fear of throwing the Budget out of balance! Who is responsible for the Budget, Mr. President, primarily? Not the Senator from Illinois or I. The President is primarily responsible for the Budget, and the President of the United States has expressed no fear respecting the final tragedy which may occur if he gets his way and is permitted to proceed to build this great seaway. I yield to none in my fidelity to sound Federal finance. But I decline to permit it to be used as an excuse to stop a great and profitable enterprise which will help to build a new prosperity out of which we can better pay our prodigal bills in other directions.

Now I come to the other point to which I wish to advert. The Senator from Illinois says that we are not only giving our billions to Canada—which I submit we are not doing at all—but he also said we are giving the sovereignty and the soil of our Nation to a foreign foe. Mr. President, in the first place, I do not think when we are dealing with Canada that we are dealing with a foreign foe, by any vagary of the human mind, because anybody who can anticipate a martial conflict involving Canada and the United States can conceive the very end of civilization. However, I do not rest the proposition upon any such metaphysical basis as that. I submit that under the Rush-Bagot agreement, which is 115 years old, neither Canada nor the United States can invade the Great Lakes with a battleship or a cruiser or any other naval craft beyond the narrow limitations of that agreement. Furthermore, I submit that, since that agreement has withstood the assault of every vicissitude, even of a world war, for a century and more, it is, indeed, a late moment to begin worrying about whether or not the King of the British Empire is going to take Chicago.

Under the treaty of 1909 every right in Lake Michigan which Canada and Great Britain would acquire under this new treaty exists today as the result of the terms of the treaty of 1909, and the only difference between those rights is that, in the one instance, they are revocable upon a year's notice, while in the other instance they are irrevocable; and the rights which they possess on Lake Michigan are matched by our equally valuable reciprocal rights in the Welland Canal. Every hazard which is conjured here against this treaty for tomorrow and the day after exists at this moment, if there is any hazard at all, because the terminology in respect to navigation and British rights in Lake Michigan pertaining thereto is precisely the same under the pending treaty as it is under the treaty of 1909. With great respect, I brand this type of criticism as sheer self-serving hysteria.

Mr. President, if there is any agency in this country—speaking now in terms of journalism—which has applied the microscope to every proposition submitted to the Congress which might in any remote degree endanger the sovereignty of the United States, particularly its sovereignty in respect to the British Empire, it is the Hearst press, and when the Hearst press in a great and courageous broadside says what I now read, I submit it confirms the absence of any legitimate fear upon this basis. I am reading from the New York American:

> The St. Lawrence waterway is a noble conception. Its appreciation requires vision—the vision to see not only its immediate advantages, which are sufficient to justify it, but its immeasurable significance to the future greatness of the country and the business of its people.

The President has the right to ask for the ratification of this treaty. He is seconded by intelligent opinion throughout the country.

Mr. President, I want now to submit a brief summary in a comparatively few sentences to bring together into a total the general situation as it appeals to me after 10 years of intensive study and after 10 years of intensive loyalty to this great undertaking.

Mr. President, the Senate's impending decision is of vital importance to 40,000,000 American citizens in the land-locked Middle West.

They ask for the privilege of reaching the sea. They ask for equality of access to the oceans and the markets of the world.

I submit to Senators from the seaboard—Senators from States whose port facilities we of the Midwest have ungrudgingly taxed ourselves to help sustain and develop—that we have earned and that we deserve a parity of opportunity in these respects.

Why do they protect their oecan heritage so jealously? Do they not thereby concede the paramount importance of this facility?

And will they say to 40,000,000 of us in the fertile Great Lakes Basin—we who have cheerfully paid out our unselfish millions to serve their needs—will they say to us that we must never be unleashed to reach the sea?

Do they demand of us that we shall forever be confined in this respect behind some 40 impassable miles of the St. Lawrence River out of 1,500 miles of navigable seaway, which already is developed by the gift of nature and the genius of man?

It is unthinkable!

The farmers of the midcontinent, for whom we solicitously pour out prodigal millions; yes, billions, in dubious relief adventures, speak through the united voice of all the major agricultural organizations of the Nation. In the name of their own intimate knowledge of their own best welfare, they demand this boon.

Shall the Senate keep the word of promise to their ear and break it to their hope?

Twenty-three great States of the Union, voluntarily joining and sustaining an official council of States, and 5 other States, speaking through past or present Governors, 28 in all, petition us in the name of their common welfare to give them justice in this matter of internal developments. They beg of us to give them their maritime rights. They ask for this seaway. They pray for this treaty.

Shall we embrace excuses—excuses as differentiated from reasons—for declining to heed their prayer and to serve their need?

Shall we decline an equal partnership with friendly Canada in the culmination of this greatest adventure since a former Roosevelt bisected Panama? The partnership puts us on even terms with Canada in the joint use of this common benediction. If we spurn the partnership, Canada can build a seaway of her own along this route—as unanswerably pointed out by the present President of the United States. A seaway of her own!

Is it possible that the Senate of the United States intends to leave its own midcontinent to the mercy of this added handicap and hazard? Must we not only be denied justice at the hands of our own statesmanship but also suffer relative jeopardy at the hands of wiser statesmanship elsewhere? I cannot accept prophesies of such an amazing Senate attitude.

Shall Republican Senators desert the treaty in the face of a specific commitment to it in the Republican platform of 1932, a commitment which involves a moral obligation upon every Republican Senator who did not specifically repudiate it, a commitment which was emphasized by the campaign activities of the Republican National Committee in the Middle West, a commitment which has back of it the hearty approval of three Republican Presidents?

Shall Democratic Senators desert the treaty in the face of a specific commitment to it in the campaign pledges of its own present President, and the persistently courageous support which he gives to the project in the precise form in which it now impends?

Is it rational to believe that we have been treacherously delivered to a bad bargain by these high authorities, that we have been flung to the innumerable dangers conjured by hostile domestic interests which know exactly what they want and why?

It seems to me that any such beliefs would overtax credulity.

Have we menaced the essential sovereignty of the Great Lakes and opened the heart of the Nation to alien attack?

It is officially denied by the Department of State under two administrations and by counsels of elementary common sense.

Have we accepted unreliable estimates and thus exposed posterity to the burden of untold debt?

It is officially denied by the Board of Rivers and Harbors Engineers who are no less competent to speak with finality upon this subject than upon all the other kindred matters in which the Senate accepts them as the last and most dependable word.

Does the seaway promise economic utility and justification? Will it be used?

Every official survey ever made in the last 20 years, plus the well-nigh universal testimony of experienced industrialists and agriculturists in the midcontinent, answers in the unequivocal affirmative. Only those respond in the negative who simultaneously answer themselves by the expression of a parallel fear that their seaboard ports will seriously suffer from the vast amount of traffic which this new route will bear.

Is railroad labor entitled to fear this competition after 1942 when the seaway will be completed?

It is not. The Interstate Commerce Commission tells us, upon its high responsibility, that the seaway will take up but a fraction of the increased demand for transportation facilities which will develop in the next 8 years. Meanwhile it is an axiom that any contribution to the economic welfare of any great sector of the Nation is a contribution to the welfare of the whole—and the railroads are the first and ever-present partners in all enhanced prosperity.

Is the power development inimical to the mass advantage of those American citizens in the immediate area concerned?

Let every power authority in the great Empire State reply. From the Governor down, the chorus is unanimous; and even the Senators from New York who oppose this treaty for other reasons join in repudiating the implications raised against this section of the treaty.

Mr. President, the accumulated force of all these contemplations brings an exceedingly solemn challenge to the Senate in this final hour. With great respect I submit that it is a desperately important decision which shall now be made.

America's greatest single natural resource is the stake—and along with it the welfare of 40,000,000 people.

I beg of Senators to respond affirmatively, and to be honored for their courage and their vision.

Mr. President, the midcontinent must reach the sea!

(The letters in the nature of petitions submitted by Mr. VANDENBERG and ordered to lie on the table are as follows:)

STATE OF CALIFORNIA,
GOVERNOR'S OFFICE,
Sacramento, March 2, 1934.

To the President and Members of the United States Senate, greeting:

As Governor of the State of California, it is my pleasure and privilege to join with Governors of other States in earnestly petitioning that the seaway treaty with the Dominion of Canada, now pending ratification of the Senate, be accepted and that the necessary enabling legislation thereunder be enacted, to facilitate the early completion of the waterway between the Great Lakes and the Atlantic Ocean.

The above-mentioned undertaking has been generally accepted for some considerable period of time as a means for transportation of industrial and agricultural products, thereby benefiting both nations.

I have been advised that this project has been accepted and mutually agreed upon by the United States of America and the Dominion of Canada, and is now ready for ratification as a non-

partisan project of national and international benefit, and an early ratification will fill a long-felt need in industrial and agricultural pursuits.

With my compliments and every good wish,

Very sincerely yours,

JAMES ROLPH, Jr.,
Governor of California.

To the President and Members of the United States Senate, greeting:

I, Governor of the sovereign State of California, unite in earnest petition that the seaway treaty with Canada, now pending ratification in the Senate, be immediately accepted, and also that the necessary enabling legislation be thereafter enacted, to make possible the early completion of an ocean road between the Great Lakes and the Atlantic.

For the past 15 years this undertaking has been visualized, discussed, and generally accepted as a major means for permanent industrial and agricultural uplift to the entire Nation. The State represented in this petition has earnestly and officially demanded the seaway as necessary to its agricultural and industrial health and prosperity. The need remains urgent. The now-existing depression but emphasizes that need.

I subscribe to the principle that an undertaking of national and international economic-reconstruction scope instituted in a nonpartisan spirit, studied and accepted without thought of partisanship, and finally written into a mutually fair agreement between two friendly nations, should now be ratified in the same wholesome, nonpartisan manner as a matter of national and international benefit.

I demand the setting-aside of special privilege and sectionalism in the consideration of this great national and international undertaking and in voicing that demand I speak for the homes, for the industries, for the agriculture, for the united common need of a great body of the American electorate, impelled by one great desire—that the doors of transportation opportunity shall be opened to the widest possible extent by bringing the sea base into the heart of the North American Continent.

JAMES ROLPH, Jr.,
Governor of the State of California.

Signed at Sacramento, Calif., 1934.

DENVER, COLO., *March 8, 1934.*

CHARLES P. CRAIG,
Executive Director Great Lakes-St. Lawrence Association, Meridian Mansion:

Joining with others for immediate ratification St. Lawrence Treaty.

ED C. JOHNSON, *Governor.*

To the President and Members of the United States Senate, greeting:

I, Governor of the sovereign State of Colorado, unite in earnest petition that the seaway treaty with Canada, now pending ratification in the Senate, be immediately accepted, and also that the necessary enabling legislation be thereafter enacted to make possible the early completion of an ocean road between the Great Lakes and the Atlantic.

For the past 15 years this undertaking has been visualized, discussed, and generally accepted as a major means for permanent industrial and agricultural uplift to the entire Nation. WILBER M. BRUCKER,
Ex-Governor of the State of Michigan.

Signed at Detroit, Mich., February 26, 1934.

DETROIT, MICH., *March 7, 1934.*

CHARLES P. CRAIG,
Executive Director Great Lakes-St. Lawrence Tidewater Association, Washington, D.C.:

It has been my observation that people of this State have been unanimously in favor of the St. Lawrence Tidewater project ever since its inception. Legislature after legislature has appropriated liberally to the promotion of the enterprise by the different States. When in office I gave it my support, and other governors, including the present one, have done the same. It has always been a conundrum to me why the actual construction of the improvement was not begun; why it took so long to negotiate a treaty acceptable to this country. I do not understand there is any opposition from the Michigan Senators, and cannot conceive why either of them should require any urging, and do not believe that they do. On the contrary, I think that they will assist and promote the ratification of the treaty. You can therefore count on Michigan's support to the limit.

ALEX. J. GROESBECK.

To the President and Members of the United States Senate, greeting:

I, former Governor of the sovereign State of Michigan, unite in earnest petition that the seaway treaty with Canada, now pending ratification in the Senate, be immediately accepted; and, also, that the necessary enabling legislation be thereafter enacted to make possible the early completion of an ocean road between the Great Lakes and the Atlantic.

ALEX. J. GROESBECK,
Former Governor of the State of Michigan.

Signed at Detroit, Mich., 1934.

To the President and Members of the United States Senate, greeting:

I, Governor of the sovereign State of Minnesota, earnestly petition that the seaway treaty with Canada, now pending ratification in the Senate, be immediately accepted, and also that the necessary enabling legislation be thereafter enacted, to make possible the early completion of an ocean road between the Great Lakes and the Atlantic.

For the past 15 years this undertaking has been visualized, discussed, and generally accepted as a major means for permanent industrial and agricultural uplift to the entire Nation. The State represented in this petition has earnestly and officially demanded the seaway as necessary to their agricultural and industrial health and prosperity. The need remains urgent. The now-existing depression but emphasizes that need.

I subscribe to the principle that an undertaking of national and international economic-reconstruction scope instituted in a nonpartisan spirit, studied and accepted without thought of partisanship, and finally written into a mutually fair agreement between two friendly nations, should now be ratified in the same wholesome, nonpartisan manner as a matter of national and international benefit.

I demand the setting-aside of special privilege and sectionalism in the consideration of this great national and international undertaking, and in voicing that demand I speak for the homes, for the industries, for the agriculture, for the united common need of a great body of the American electorate, impelled by one great desire—that the doors of transportations opportunity shall be opened to the widest possible extent by bringing the sea base into the heart of the North American Continent.

FLOYD B. OLSON,
Governor of the State of Minnesota.

Signed at St. Paul, Minn., March 6, 1934.

To the President and Members of the United States Senate, greeting:

I, former Governor of the sovereign State of Minnesota, unite in earnest petition that the seaway treaty with Canada, now pending ratification in the Senate, be immediately accepted, and also that the necessary enabling legislation be thereafter enacted, to make possible the early completion of an ocean road between the Great Lakes and the Atlantic.

For the past 15 years this undertaking has been visualized, discussed, and generally accepted as a major means for permanent industrial and agricultural uplift to the entire Nation. I demand the setting-aside of special privilege and sectionalism in the consideration of this great national and international undertaking, and in voicing that demand I speak for the homes, for the industries, for the agriculture, for the united common need of a great body of the American electorate, impelled by one great desire—that the doors of transportation opportunity shall be opened to the widest possible extent by bringing the sea base into the heart of the North American Continent.

THEODORE CHRISTIANSON,
Former Governor of the State of Minnesota.

Signed at Washington, D.C., February 25, 1934.

HELENA, MONT., *March 10, 1934.*

CHARLES P. CRAIG,
St. Lawrence Waterway Offices, Washington, D.C.:

You are authorized to add my name to governors' memorial to Senate on seaway treaty.

F. H. COONEY, *Governor.*

To the President and Members of the United States Senate, greeting:

I, Governor of the sovereign State of Montana, unite in earnest petition that the seaway treaty with Canada, now pending ratification in the Senate, be immediately accepted, and also that the necessary enabling legislation be thereafter enacted, to make possible the early completion of an ocean road between the Great Lakes and the Atlantic.

For the past 15 years this undertaking has been visualized, discussed, and generally accepted as a major means for permanent industrial and agricultural uplift to the entire Nation. F. H. COONEY,
Governor of the State of Montana.

Signed at Helena, Mont., 1934.

LINCOLN, NEBR., *March 8, 1934.*

CHARLES P. CRAIG,
Director Great Lakes-St. Lawrence Tidewater Association:

You are authorized to sign my name to petition of governors urging the ratification of the Great Lakes-St. Lawrence Treaty. I believe both Nebraska Senators will support it.

CHARLES W. BRYAN,
Governor of Nebraska.

To the President and Members of the United States Senate, greeting:

I, Governor of the sovereign State of Nebraska, unite in earnest petition that the seaway treaty with Canada, now pending ratification in the Senate, be immediately accepted, and also that the necessary enabling legislation be thereafter enacted, to make possible the early completion of an ocean road between the Great Lakes and the Atlantic.

For the past 15 years this undertaking has been visualized, discussed, and generally accepted as a major means for permanent industrial and agricultural uplift to the entire Nation. CHARLES W. BRYAN,
Governor of the State of Nebraska.

Signed at Lincoln, Nebr., 1934.

FALLS CITY, NEBR., *March 10, 1934.*

CHAS. P. CRAIG,
Executive Vice President Great Lakes-St. Lawrence Tidewater Association, Munsey Building, Washington, D.C.:

I endorse governors' petition ratification St. Lawrence Treaty this session. I regard analysis of whole question of water sufficiency by General Markham as sound. I approve leadership President Roosevelt in seeking completion America's two great inland waterway systems. The Great Lakes and Mississippi Valley systems both are indispensable to equality of opportunity for Mississippi Valley. Mississippi River system is now assured and Senate should give us seaway without delay.

ARTHUR J. WEAVER.

To the President and Members of the United States Senate, greeting:

I, former Governor of the sovereign State of Nebraska, unite in earnest petition that the seaway treaty with Canada, now pending ratification in the Senate, be immediately accepted, and also that the necessary enabling legislation be thereafter enacted, to make possible the early completion of an ocean road between the Great Lakes and the Atlantic.

For the past 15 years this undertaking has been visualized, discussed, and generally accepted as a major means for permanent industrial and agricultural uplift to the entire Nation. I demand the setting aside of special privilege and sectionalism in the consideration of this great national and international undertaking, and in voicing that demand I speak for the homes, for the industries, for the agriculture, for the united common need of a great body of the American electorate, impelled by one great desire—that the doors of transportation opportunity shall be opened to the widest possible extent by bringing the sea base into the heart of the North American Continent.

A. M. CLARK,
Acting and Former Governor of the State of Wyoming.

Signed at Cheyenne, Wyo., February 22, 1934.

Mr. WAGNER. Mr. President, it is with great hesitancy and after long deliberation that I have listed myself in opposition to the St. Lawrence Waterway Treaty.

This treaty has been stamped with the approval of President Roosevelt. No President was ever confronted with more serious or difficult problems upon taking office. He has met issues with prompt action, clear vision, and the most generous feeling for the interests of the whole country. The superb statesmanship which he has shown in guiding us from the brink of ruin to the paths leading to prosperity has won our boundless respect.

The other nations of the world, struggling against a world depression, look to our President as their guide in international affairs. With civilization at a crisis, he is the acknowledged counselor. My deep regret over differing with President Roosevelt on the St. Lawrence matter is happily tempered by the feeling that the bone of contention is in no way connected with the sweep of his great recovery program.

Mr. President, in listening to the speeches of many of the advocates of the treaty, I have been reminded constantly of Mr. Justice Holmes' famous warning that "general propositions do not decide concrete cases." These advocates seem to think they have advanced a decisive argument in favor of the treaty when they say that it should be considered on a broad national basis. Everyone in the Senate wants to consider it in that way; but the mere recitation of this truism does not tell where the national interest lies, or whether it would be advanced by the consummation of this project.

Equally fruitless are the charges that the treaty is being opposed by the railroads, the New York Chamber of Commerce, the Mississippi River enthusiasts, or other designated groups. Most of the sentiment either for or against any proposal can be analyzed in terms of various group interests. I should be very glad to hear convincing evidence that some groups would be benefited by the St. Lawrence project as much as they might be helped in some more practical way. Such evidence would incline me toward the treaty. I should also want to know about the particular groups that would be affected adversely by the treaty. Such disclosures would incline me against it.

Our task as legislators, as I see it, is to weigh whether the benefits to certain groups would outweigh the burdens imposed upon others. When we do this candidly and carefully we are considering the treaty as a question of national welfare. But we cannot make any headway by dealing in free assumptions that the treaty must be good because the railways are alleged to oppose it, or that something must be fine for the United States because it is alleged to be bad for New York.

The unwillingness to distinguish between selfish bias and nationally minded opposition is closely paralleled by the confusion of the power with the navigation project. Those who do not see the need for a costly seaway from Duluth-Superior to Montreal are accused of opposition to the public development of water power. I am in favor of such development, as is shown by every vote that I have cast in the Senate or in the State legislature whenever the issue was presented clearly. I am entirely in accord with that part of the intergovernmental report submitted by President Roosevelt on January 10 which dealt with the benefits to be derived from public power. The able Senator from Wisconsin has said that power cannot be developed without a treaty. He has read a letter from the vigorous mayor of New York stating the same position and that New York would benefit by the power development. This letter begs the whole question. Power can be developed without this particular treaty. Power is not worth developing at the cost of an extravagant navigation project which would more than offset the power benefits.

In the minority report which I filed on January 10 I set forth in considerable detail the grounds for my opposition to the waterway program, and therefore to the treaty which embodies it. My intent now is simply to present for the convenience of the Senate the high spots of this report and to discuss the extent to which my conclusions have been affected by the President's subsequent report and by arguments advanced on this floor.

It will be found that a single unifying thesis runs through my entire argument. The St. Lawrence Treaty is founded upon economic conditions and proposals for relief that have become outmoded with the passage of time. It is neither responsive to present-day facts nor in accord with the poli-

cies of the recovery program. Its advocates cite the approval of Presidents Wilson, Harding, and Coolidge, and the only effect of such citation is to remind us that sentiment for the treaty developed during an era quite dissimilar to our own.

The first inquiry that must be made in determining the advisability of the St. Lawrence waterway involves the amount of traffic that would be available for movement over the improved channel. The proponents of the treaty rely largely upon the estimate of from 18,000,000 to 23,000,000 long tons, made by the Department of Commerce in 1927. This study never pretended to be more than a statement of the flow of goods over the waterway if it succeeded in capturing all of the traffic, with a few unsubstantial exceptions, exported from the tributary areas. No effort was made to determine what commodities would continue to move over the railroads, whether because designed for destinations that could not be served effectively by the waterway or because composed of types of traffic not adaptable to water transportation.

Anyone who examines the Department of Commerce book will be convinced of its indefinite and inconclusive nature; and this conviction will be confirmed by the words of the Secretary of Commerce, who wrote:

> No attempt has been made to determine the amount of potential traffic that actually might move by any of the routes, nor has an estimate been made of the total possible saving.

Quite aside from the inadequacies of this survey when made, it took no cognizance of the long-time trends affecting our position in the international grain trade. Disregarding the recent depression, our total exports of wheat declined from 260,996,000 bushels in 1920 to 168,307,000 bushels in 1927. During the years 1919–21 we captured 41 percent of the world trade in wheat, and from 1923 to 1930 we secured only 21 percent. Many countries at the present time have embarked upon domestic preferences, and the competition from other wheat areas is likely to be more serious than it has been in the past. Furthermore, the whole area tributary to the Great Lakes has long been of declining importance as an export area. Its wheat acreage figure declined from 57.7 millions in 1919 to 45.9 millions in 1928.

The new studies, embodied in the report of the Government departments submitted by the President on January 10, and ably presented by the Senator from Nevada 2 days later, in no way correct the errors or the agedness of the Department of Commerce's 1926 estimate. The new report reads—and I now read from this report, which has been presented as a present-day estimate:

> The possible export and import commerce over the proposed St. Lawrence waterway, based on 1929 conditions, is estimated at 23,000,000 tons. Certain corrections, arbitrarily made in an effort to be conservative, reduce the estimate to a more probable figure of 13,000,000 tons.

It is astounding to note that this new report, without attempting to answer the criticisms that have long been leveled against the haphazard nature of the old commerce survey, and without allowing for the changes in our economic life and policies since then, arrives at a total just as high as the one set in 1926. It is not a new estimate at all, in any real sense. While the study may have just been made, it is based upon the old conditions before 1929. Its only novel feature is that it makes an indefinite estimate even more vague by subjecting it to an arbitrary correction. The Senator from Wisconsin has extolled this up-to-date report of January 1934. But his quotation from this very report contains the admission that it is based on conditions in 1929. I refer Senators to the CONGRESSIONAL RECORD, January 31, page 1659.

Several Senators have made earnest pleas that, instead of viewing the treaty in the light of present conditions, we should project our vision ahead to 1942. Yet they have been content to rely upon the intergovernmental report which admittedly based its estimates upon conditions in 1929.

The Senator from Wisconsin has said that my minority report is out of date because I based my conclusion of the economic undesirability of the treaty upon traffic estimates made in 1926 and 1927 (CONGRESSIONAL RECORD, p. 1659, Jan. 31). Surely the Senator realizes that if traffic estimates made during the boom years did not justify the project, it cannot be justified today. Surely my arguments have even more force since I made a concession to the proponents of the treaty by dealing with the years when our foreign trade was at its peak. How can the Senator object to my considering the estimates of 1926 and 1927 when these were as high as those contained in the new report upon which he relies so heavily?

Mr. BAILEY. Mr. President, will the Senator yield?

Mr. WAGNER. Will not the Senator permit me to finish? Then I will be very glad to yield.

Mr. BAILEY. I was merely going to undertake to aid the Senator's argument with another quotation from the very remarkable McNinch report, which the President has submitted. But I will not trouble the Senator; I will do it in my own time.

Mr. WAGNER. Perhaps I myself may refer to it a little later.

Mr. BAILEY. I merely desired to call attention to the fact that the report makes an estimate of railroad traffic in 1929. The report is submitted in January 1934 and says there has been no sign of diminution in railroad traffic in the United States, notwithstanding the events in the intervening years. That is in the message before us.

Mr. WAGNER. I thank the Senator very much.

The new report, and the speeches of the able Senators from Nevada and Montana, are filled with impressive figures concerning the population and the productive capacity of the tributary areas. The able Senator from Wisconsin goes even further. He attaches importance to the statement made in the intergovernmental report of January 10 to the effect that by 1950 the increases in our total national traffic will be 30 times as great as the traffic which he claims will move over the seaway. He quotes the figures of the report showing the increase in railroad tonnage between 1901 and 1930.

I do not question the grandeur and wealth of the great tributary region. Still less do I deny the future progress of the United States. But the potential traffic of the waterway is not determined solely by the population or production, or even by the exports of the tributary area. It is certainly not determined by increases in our total national traffic. It is determined by the capacity of the waterway, by the navigation season, by the types of traffic suitable for waterway carriage, by the routing of goods, and by the quality of service rendered by other agencies. The proponents of the treaty have sought to dazzle the opposition by reciting tremendous totals that have little relevance to the question under consideration, or by creating inferences that closer analysis will not support.

For example, it is claimed that there will be a tremendous flow of domestic commerce over the St. Lawrence because 92 percent of the Great Lakes' tonnage and 82 percent of the Atlantic ports' tonnage is domestic. The mayor of New York, in his letter of February 26 to the Senator from Wisconsin, has taken this position. Analogy of this sort has no validity. In my report I have demonstrated that most of the domestic tonnage moves between areas that could not be served by the waterway.

The agitation for the waterway, as a matter of fact, has been founded less upon figures than upon the fantastic theories of foreign trade that prevailed during the 1920's. During those years it was believed that farm difficulties could be obviated by developing a huge export market and financing the purchase of our own products. In the pursuit of this notion no proposal pretending to increase export facilities was too fanciful for acceptance. Today, on the other hand, we are striving to reduce our wheat acreage by at least 15 percent and to rationalize the production and consumption of farm products upon a national basis. It is difficult

to understand why the proponents of the treaty overlook this new direction of policy and blindly pursue the ancient cure-all for the solution of the agricultural problem.

In my report I have made a careful accounting of the amount of traffic that would be likely to flow over the waterway upon the restoration of normal economic conditions, and the total United States traffic comes to about five and one half million tons. To what extent would the shipper benefit if this traffiic might be moved over the St. Lawrence waterway rather than over some facility which is now available, and how much would the American public have to pay for these benefits?

The claims that the waterway would improve our transportation facilities have become as antiquated as the original estimates of available traffic. The project was designed to remedy the congestion of 1920. It has not been reexamined in the light of our experience from 1922 to 1929, when an unparalleled volume of traffic was handled with complete ease. The project was intended to compete with the railroads. There has been no careful consideration of the very limited amount of competition which could be supplied by a waterway that would be open only 7 months every year, that would be available for only limited classes of traffic, and that would not provide a real inducement to the entry of ocean-going vessels.

Even if it could be shown that the waterway might compete effectively with the railroads, the expenditure of public money simply to provide private competition cannot be justified. For many years we clung to the dogma that services could be improved and costs reduced by perpetuating competition in the public-utility field. As a result facilities were duplicated, costs rose, and the railroads were brought to the verge of disaster. Today we have commenced a great undertaking to unify and coordinate our transportation facilities, and to translate efficiency into public service by a sound rate-making policy. Unless we intend to abandon this promising policy and return to practices that experience has discredited, there can be no valid argument advanced for the St. Lawrence waterway unless it is fundamentally a more economical way of carrying goods than land transportation.

I have not heard a single Senator favoring the treaty deal adequately with this basic question. Instead the whole problem of the relationship between the waterway and the railways has been beclouded by false issues or unwarranted assumptions. The able Senator from Minnesota sought at some length to prove that the railways are opposed to the waterway. Even if we assume this opposition to be purely selfish, it means only that the railroads do not want to be faced with the competitive rates of ships that do not have to bear the cost of the seaway. But such opposition sheds no light upon whether the saving in freight rates to shippers would be great enough to justify the original outlay or annual upkeep charged against the American people. Secondly, the Senator from Minnesota essays to prove that the railways, if they only knew it, would benefit greatly by the improvement in our national system of transportation. Likewise the letter from the mayor of New York states the truism that New York and the east coast would benefit by increasing domestic commerce and the economic revival of the Middle West. These arguments beg the whole question of whether such improvements would follow from the development of the waterway, and whether greater improvements might not be effected in some less costly way.

The Senator from Wisconsin has proved beyond question that all important western railway executives favored the waterway in the 10 years preceding 1931. If the Senator did not place any reliance upon the judgment of these men, he would not quote them in his favor. If he does give weight to their views, the fact that they were for the treaty before 1931 and oppose it today bears out my contention that the permanent trends in our economic development run counter to the waterway.

What would be the actual freight saving on goods that would move over the St. Lawrence waterway? The strongest evidence of the failure to view the treaty in the light of the present is the continued adherence to the claim of an 8-cent freight reduction on each bushel of grain shipped from the tributary area to Europe despite the fact that the total cost of such transportation is now less than 8 cents.

The able Senator from Minnesota is not annoyed by the fact that the claims of freight saving exceed the actual total transportation costs at present. He suggests that the proper yardstick is not the present cost on routes that would compete with the one under consideration, but the costs from the Gulf ports to Europe (CONGRESSIONAL RECORD, p. 923, Jan. 19). I do not catch the significance of this argument. Even if the rate on the new waterway from Duluth to Liverpool could be the same as the rate from the Gulf to Liverpool, it could not be 8 cents cheaper than the present rate from Duluth, when that present rate is as low as 8 cents.

Furthermore, the able Senator from Minnesota says that the total rate from Duluth to Liverpool will be only an extension of the Montreal-Liverpool rate, " made in proportion to the extension of the distance in total sea-miles." This would not be the case. As I have demonstrated in my report, traffic and navigation conditions between the Great Lakes and Liverpool would not permit carriage as cheap as that existing on trans-Atlantic shipments.

Even under normal economic conditions, as I have shown in my report, the case for an 8-cent reduction cannot be established, and the most likely figure is around 4½ cents. To what extent would this benefit the American grain grower? The advocates of the treaty claim that the freight reduction would be translated into enhanced prices for exported grain and that the benefits would extend also to all grain grown for domestic use because all prices are fixed on the world market at Liverpool.

Our attempts during the past decade to solve the agricultural problem have exposed the complete fallacy of the notion that the price of all our foodstuffs is fixed on the European markets, and that we can increase the revenue on all our farm products simply by artificial stimulation to the price of exported goods. We have set forth upon a diametrically opposed policy, to wit, the realinement of agricultural prices on the domestic market by a system of internal control. It is indeed surprising that the proponents of the St. Lawrence project today pay unqualified tribute to a theory of farm aid that was exploded as early as 1927 and completely abandoned in 1933.

As a matter of fact, there is grave doubt as to whether even the American shipper of grain would benefit by the reduced rates. More than 50 percent of the freight saving would very likely serve to reduce prices to consumers abroad, and in addition the wheat farmers outside the tributary areas would find their prices adversely affected by the new competitive conditions.

Now that we have properly delimited the areas to which the benefits of the waterway would extend, let us survey its costs. According to the estimate of the Board of Engineers, who met finally in 1932, the total cost to the United States would be $272,453,000. The Senator from Wisconsin has stated that I ignored the estimate of the Corps of Engineers, submitted with the new report last month. The fact is that this estimate is identical with the 1932 estimate treated in my minority report.

I did not ignore this estimate. Only an engineering expert should dare to question it insofar as it goes. But one need be a specialist to read the report of the engineers and notice the omission of elements of cost which common sense and good business and governmental practice should force one to include. Interest charges during the contemplated 8 years of construction, the likelihood of unanticipated delays which have been the unvarying rule in previous projects of this kind, and the cost of harbor and port improvements to meet the needs of ocean-going vessels have all been neglected. When these necessary items are included, we find that the total cost to the United States would be $573,136,000. Making allowance for the $89,726,000 which the State of New York undertakes to pay to the United States for the water-power development, the cost of the navigation project alone would be $483,410,000, or

$30,170,500 per year. This means a charge of $5.48 for each ton moved, or about 15 cents for every bushel of wheat.

On January 16 the able Senator from Michigan presented figures submitted by General Markham in defense of the cost estimate made by the Board of Engineers. General Markham calls to our attention the fact that the War Department in 1920 estimated the cost of improving the New York Harbor Channel at $10,400,000 and that in 1932 the work was completed at a cost of only $9,696,487. (CONGRESSIONAL RECORD, p. 716.) But we must realize that the index of prices was 154 in 1920, when the estimate was made, and averaged less than 100 during the period of construction. When this correction is made we find that the actual real cost in terms of 1920 prices was over fourteen and one half million dollars, or almost 40 percent more than the estimate. When we make the same necessary corrections in General Markham's other figures, and when we note that most of the Public Works projects which he cites are not as subject as the waterway to unusual difficulties, we realize that the very figures of the Department justify my claim that at least 20 percent should be allowed for unexpected costs.

The Senator from Wisconsin has censured my claim of a 20-percent allowance in "the teeth of the testimony that work on the connecting channels of the Great Lakes has been going forward for more than a year at an actual cost of about 50 cents on the dollar of the original estimate." The Senator, too, has failed to take account of the difference between price levels at the time of the estimate and at the time of the work. Nor has he noted that the difficult, problematical part of the project is not in the connecting channels, but in the International Rapids section.

But that is not the most important thing. My chief criticism of the engineers is not that they miscalculated the costs which they attempted to estimate, but that they deliberately neglected interest charges and harbor improvements. The Senator from Michigan cannot justify this granted omission by introducing figures which are intended to show only that the estimates of the War Department are generally correct as to the items which they do not neglect to consider. Nor can the Senator from Wisconsin justify it by citing the fine records of the Army engineers. Probably the Board could make an estimate of the cost of harbor improvements more accurate than the one I submitted in my report. But no advocate of the treaty has claimed that an attempt was made to do so.

The Senator from Wisconsin objects to my inclusion of harbor costs. He says that I have:

> Completely ignored the fact that * * * much of the expense of developing the harbors will be borne by the local communities. (CONGRESSIONAL RECORD, p. 1660, Jan. 31.)

Of course, I have ignored it. My interest is not limited to the cost to the Federal Government. I am considering the total cost to the taxpayers of the United States, however imposed, in relation to the benefits which they will receive. For this reason the Senator's citation of General Markham's estimate that harbor improvements would cost the Federal Government $7,500,000 is irrelevant.

I have heard the argument that the project could be completed for a far smaller sum than the one stated, because prices are much lower than they were during the 1920's, when the basic estimate of the Board of Engineers was made. But in considering a governmental expenditure for the benefit of the public and paid for by the public, we must deal with real costs in labor and materials. These remain constant despite fluctuations in the purchasing power of money. Any change in price levels which decreases the monetary cost of a project brings a corresponding decrease in benefits to be derived therefrom when measured in monetary terms.

The question, then, is, Should a public expenditure amounting to 15 cents for every bushel of wheat moved over the waterway be undertaken in order to effect a saving to the American shipper, or the European buyer, that would amount to 2 cents today and only 4½ cents with the return of normal price levels? Even if our foreign trade should become twice as great as it was during the 1920's, which is certainly a fanciful expectation, the cost to the American people would be 7½ cents per bushel in order to effectuate a saving to the shipper of a far lesser amount.

In my search for an up-to-date estimate of freight savings, I have reread the exposition of the Senator from Nevada, and I find that he regards the matter as self-evident. If I do not misquote him, he says:

> No one denies that freight can be shipped cheaper through the canal than by rail, because if it could not be shipped cheaper the railroads would not worry about it. I do not need to prove that. (CONGRESSIONAL RECORD, p. 537, Jan. 12.)

Mr. President, am I too critical in asking some proof to rebut the evidence regarding rate reductions that I have presented in my report? Furthermore, need I repeat that the issue is not simply whether freight rates on the waterway would be cheaper than by rail? Everyone admits that they would be somewhat cheaper. But the saving to the shipper would not be great enough to cover the portion of the cost of the waterway that would be borne by the public generally. Thus the total undertaking would involve a loss.

As a last resort, the Panama Canal has been brought forth in support of the St. Lawrence project. The two are transparently different. The waterway would cost two and a half times as much as the canal. It would have 16 or 17 locks, compared with 6 at Panama. It would be open 7 months every year instead of 12. The Panama Canal was cut through a narrow isthmus to connect two oceans, which touch every port, handling every type of goods, going to every destination. The completed waterway would be over 2,000 miles long and would prove advantageous only for the limited trade between the tributary areas and Europe. The advocates of the treaty do not dare to make a careful comparison between the two projects. They are content to say that the opponents of the St. Lawrence must be wicked because the opponents of the Panama Canal were mistaken. If anyone is impressed by their logic, I shall not attempt to dissuade him.

The proponents of the treaty, when confronted with the fact that all their older arguments have been washed away by the current of events, advocate the project as a great public-works undertaking. Certainly, I have not been delinquent in my advocacy of public works. But I am not in favor of a public-works undertaking that is extravagant in conception and foredoomed to constitute an annual drain upon the resources of the country.

I am not in favor of a public-works project designed to employ Canadian workmen with United States money. The treaty provides that although the United States is to supply the funds for most of the work in the International Rapids section of the St. Lawrence River, the portion of this work on the Canadian side of the section is to be performed by Canadian workmen using Canadian materials.

This means that out of the $573,136,000 spent by the United States, $104,200,000, or almost one fifth, will be devoted to Canadian use. Are the American people, straining every nerve and fiber to remedy domestic unemployment, prepared to sanction a proposal which contemplates that for every $5 of American money spent, $1 should be devoted to the employment of Canadian men and the purchase of Canadian materials?

The common belief that Canada and the United States are to spend equal amounts upon the St. Lawrence project cannot be sustained. Proper account should be taken of the fact that Canada has received full credit for over $128,000,000 which she has already expended, while the United States has undertaken work based upon untested estimates subject to all the contingencies of the future. Allowance should also be made for the American money to be spent on Canadian soil to employ Canadian workmen. The actual cost to the United States, as I demonstrated in my report, would be about two and one half times as great as the cost to Canda.

Despite this amazing disparity in costs, the potential Canadian grain traffic for the waterway is over twice as great as that of the United States. Reductions in freight rates would afford the greatest benefits to Canadian farmers,

as the Canadian price of grain is much more delicately adjusted to the export market than is our own. Forty million bushels of grain annually would be diverted from United States ports in their passage from Canada to Europe.

Of the 5,000,000 horsepower, which are the total potential capacity of the St. Lawrence, almost 4,000,000 will eventually devolve upon Canada, including her 50-percent share of the 2,200,000-horsepower development in the St. Lawrence Rapids section and her exclusive rights to the deferred development in the Soulange and Lachine sections.

Finally, I think that serious consideration should be given to the advisability of directing part of our commerce through Montreal. It is inconceivable to me that anything but the most friendly relations should exist between the people of Canada and the people of the United States; but in the eventuality of war between the British Empire and some third power there would be great difficulties involved if American goods were consigned to powers unfriendly to Great Britain and were attempted to be moved through a Canadian port. In view of the ceaseless efforts of land-locked nations to gain access to the sea, it seems strangely ironical that our country, with thousands of miles of seacoast, should seek an outlet to the ocean through a foreign port.

Viewed simply as an isolated economic undertaking, the St. Lawrence project entails costs that are unlikely to be regained. Surely, this in itself should be a serious drawback at a time when public agencies are being strained to the limit by the demands of relief and reconstruction. But the defects of the treaty go even deeper. The treaty embodies a program for agricultural relief that has been found wanting and that has been superseded by a totally different course of action. It seeks to promote a new competitive factor at the very moment when we are attempting to unify and coordinate our transportation facilities and to raise them above the wreckage that unchecked competition has produced in the past. It promulgates a doctrine of foreign trade that we have repudiated by every pertinent act of the new deal.

For these reasons I hope that the Senate will vote against the ratification of the St. Lawrence Treaty with Canada.

Mr. COPELAND. Mr. President, may I call attention to the petitions I hold in my hand, which were sent to my colleague and to me from 4,970 citizens of our State? These petitions have just been signed, the signatures were obtained within a period of 3 days, and all the signers are in opposition to the St. Lawrence Waterway Treaty.

I merely want to call the attention of the Senate to the, so far as I know, almost unanimous opposition in the State of New York to the St. Lawrence Waterway Treaty.

The PRESIDING OFFICER. Without objection, the petitions will be received, noted, and lie on the table.

Mr. PITTMAN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER (Mr. GEORGE in the chair). The Senator will propound his parliamentary inquiry.

Mr. PITTMAN. I should like to ask whether the request was to publish the petitions in the RECORD?

Mr. COPELAND. No; I did not ask that they be published in the RECORD, but that there be noted in the RECORD the fact that my colleague and I had received these petitions, signed by nearly 5,000 citizens of our State, in opposition to the treaty. I do not wish to cumber the RECORD. I have already done that more than I should.

Mr. GIBSON. Mr. President, I shall occupy only a few moments of the time of the Senate. It is not my purpose to discuss the merits of the St. Lawrence project; that I leave to my abler colleagues; but it is my desire to call attention briefly to a supplementary development that I believe will be necessary if the proposed seaway under the pending treaty becomes an accomplished fact. It is a plan in which the people of eastern New York and western Vermont, living in the Champlain Valley—in fact, the people of New England generally—are directly interested. It is not necessary at the present time to discuss this matter to its final analysis or complete explanation. It is not inappropriate, however, that reference should be made to it at this time.

One outstanding criticism of the St. Lawrence ship canal project is the long haul necessary to reach the Atlantic coastal cities, the West Indies, Central and South America. It is fully as important to serve the commercial needs of American countries as it is to get our exports to European markets.

The distance from Montreal to New York by the proposed sea route is between 1,200 and 1,300 miles, through a dangerous sea area in the region of the St. Lawrence Gulf, and one that is closed to navigation at least 4 months of each year.

It has often been stated truly that transportation is the key that controls our future development. The highways, the railways, the water-carrying facilities must expand in order to accommodate an increase of 40,000,000 in our population in the next 20 years. The annual ton-mileage of our railroads at the present time is something like 400,000,000,000. With the increase we may reasonably expect the ton-mileage will reach 800,000,000,000 by 1950.

It is reasonable to assume that our railroads will be wholly unable to absorb this increase, and so the development of waterways becomes a necessity. Railways will carry high-tonnage values over long distances; the highways will carry high-tonnage values over short distances; and the waterways will carry low-tonnage values over long distances.

Coordination of these facilities will be worked out through the demands of transportation in the commercial development of the future.

How can the long haul by way of the Gulf of St. Lawrence be avoided? The answer is obvious. Take a map of lower Canada, northern New York, and Vermont, and it will be seen that the distance from Lake St. Francis, a completed section of the seaway, to the northeast of the site of the contemplated St. Lawrence power development, to Lake Champlain is around 35 miles. Lake Champlain, with its navigable waters, stretches a distance about 140 miles between New York and Vermont. A canal can be constructed from Lake St. Francis to Lake Champlain. The elevation at the height of land between these bodies of water is only 218 feet above mean tide at New York City and 66 feet above low-water stage of Lake St. Francis. If the level of Lake Champlain should be maintained at 100 feet above mean tide at New York City, it would leave a lockage of only 52.4 feet to be taken care of, either by one lock or by two locks. When Lake Champlain is reached there is available a free waterway of 120 miles south to Whitehall, N.Y.

Thence navigation can proceed by an improved canal to Fort Edward, a distance of 23.4 miles; then a canalized river to the mouth of Norman's Kill, 49.6 miles, where tidewater is reached. These existing partial developments can be widened and deepened and the way to New York City opened to ocean-going vessels.

The engineering problem has been studied by private engineers, who report that this route is feasible and that it could be constructed without difficulty, could be used for 9 months of the year, and would reduce the distance from Montreal to New York City from about 1,300 miles to 450 miles. The project has also been given careful study by Army engineers. Their report is set forth in House Document No. 149, Fifty-sixth Congress.

The benefits to New York would be beyond estimate. The three great shipping ports of the Empire State, in the order of their importance, are New York City, Buffalo, and Port Henry. These would be connected by this waterway.

I have stated that this route has been studied by engineers. I quote from an address by Francis C. Shennehon, an eminent engineer and an authority, at a meeting of American engineers held in 1924, in which he said:

> The preferred route from the Great Lake system to the port of New York for deep drafts, ocean-going vessels now appears to be the St. Lawrence-Lake Champlain route; and the aspirations of the citizens of New York for a deep waterway, entering salt water through the Hudson River portal, appears to be in parallel with the aspirations of those seeking a deep waterway following the St. Lawrence River to the Atlantic.

New York City is the great shipping center of the Nation; its port must be protected. This can be done by develop-

ing the Champlain route and a waterway provided for the products of the West quickly to reach the ports of the East, of Central and South America.

Much has been made of the claim that the St. Lawrence seaway would shorten the route from the Middle West to the Old World. If it is worth while to shorten the route to Europe why not shorten the route to the Atlantic seaboard?

If, as the distinguished Senator from Michigan [Mr. VANDENBERG] said, the Midwest must reach the ocean it should be able to reach it by a reasonably short route.

It is obvious that a saving in time and cost would result. Of course, the building of the Champlain Canal must wait on the completion of the St. Lawrence waterway, but I commend the project now to the attention of the Congress as worthy of early consideration.

Mayor LaGuardia in his recent letter to the senior Senator from Wisconsin [Mr. LA FOLLETTE] makes the statement that 80 percent of the water-bound commerce of the United States is domestic rather than foreign trade, and that the extension of our seacoast into the Middle West will inevitably increase the profitable exchange of goods between New York and the other great American cities of the littoral of the Great Lakes.

If the able and forceful mayor of our greatest American city is correct, then how much more advantageous will be the position of the port of New York and the East with a short-cut approach through the Champlain Valley? Then the East will truly benefit from the economic recovery and development of the Middle West.

Three ways of outlet from the Great Lakes to the sea have been proposed. One is the St. Lawrence ship canal project now under consideration; the second is the Oswego-Mohawk Canal by way of Lake Oneida to the Hudson, and the third is the Lake Champlain route.

The Oswego-Mohawk route and the St. Lawrence seaway project are both independent schemes, while the Champlain route is necessarily a supplement to the St. Lawrence seaway. At the beginning it is well to compare the Oswego-Mohawk route with the proposed Champlain route. The St. Lawrence waterway would not be necessary for American commerce if we should develop the Oswego-Mohawk route. The Oswego-Mohawk Canal would not be supplementary to the St. Lawrence route.

The distance from the foot of Lake Ontario to New York by way of Lake Champlain is 414 miles. From Oswego, on Lake Ontario, to New York it is 313 miles, involving the passage of 31 ship locks, while the St. Lawrence-Champlain route, from the division point at the foot of Lake St. Francis, the distance to New York is 363 miles, involving the descent through only 12 ship locks. Engineers estimate that the cost of the Oswego-Mohawk route would be $66,000,000 more than the Champlain route.

Mr. President, my purpose in speaking at this time is not to discuss the treaty, but to call the attention of the Congress and the Nation to the obvious fact that after the St. Lawrence route shall be completed it will be of great benefit to supplement it with another canal way in order for the products of the West to reach the Atlantic coast without traversing an extra 1,500 miles to reach the port of New York.

Mr. DICKINSON. Mr. President, I shall detain the Senate for only a few minutes with reference to my position on the St. Lawrence Treaty. I noted that the distinguished Senator from Nebraska [Mr. NORRIS] referred to a statement I had made over the radio in 1932, in which I said:

> Favoring this route from the first, President Hoover has succeeded in negotiating a treaty with Canada by which this waterway will be built and a cheap transportation outlet to the Atlantic will be given to the farmers of the Middle Western and Northwestern States.

I stand by that proposal now, if the treaty had been as we expected it would be and had provided for connecting up the Missouri and Mississippi Valleys with the St. Lawrence waterway. As stated heretofore, my sole objection to the treaty has been and is that if we bring the benefits of the treaty to the Great Lakes and then cut off the benefits from there to the Mississippi Valley, the Mississippi Valley is being treated just as it was treated by the construction of the Panama Canal. The Panama Canal has been referred to here. Let me refer to the RECORD for a moment with reference to the Panama Canal.

No greater calamity ever was imposed upon the Mississippi Valley than by the passage of the measure providing for the construction of the Panama Canal. Why? Because it permitted a cutting of freight rates so that shipments could be made through the canal to the eastern section of the United States and to the far West at rates lower than applied on shipments from the Mississippi Valley to the far West or to the far East, either way. What happened? It practically destroyed the economic position of the Mississippi Valley with respect to the industries located there.

When that bill was before the House at the time, being H.R. 3110, only two Members of the House voted against it. Who were they? They were Fletcher, of Minnesota, and Lassiter, of Virginia. The full Iowa delegation voted for it. The full Illinois delegation voted for it. We did not know that we were going to have imposed upon us a handicap of that kind, but now we find that, regardless of the good intentions of the men representing our State at that time, it has worked adversely to our economic interest, just as ratification of this treaty will operate adversely unless some assurance shall be provided that the Great Lakes and the Mississippi Valley are to be connected by this waterway.

I know it will be said, in view of this statement, that we are interfering with a great principle. I do not believe anyone of 15 years' service in the Congress has been more faithful to the cause of the inland waterways than have I. I have been one of those who have always insisted that adequate appropriations be provided for them. We have been working for a barge system on the Mississippi River. We have worked to improve the Missouri River. All the great tonnage of the Mississippi Valley comes naturally into the city of Chicago. It is produced in that area. We are not so much interested in wheat. We are not so much interested in some of the other products about which Senators talk, but we are interested in having low rates that will permit us to get our tremendous production of farm produce to market.

The big tonnage from Iowa, the big tonnage from Nebraska, the big tonnage from Missouri all comes to the city of Chicago. The northern tonnage represents wheat, and almost wheat alone. That will come into the Great Lakes at Duluth. But as we go further south we find that we must have access to this whole route, otherwise it will be a handicap rather than a help.

Why a handicap? Just as I have suggested with reference to the Panama Canal, which raised the rates of all our freight from the Mississippi Valley east, and from the Mississippi Valley west.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DICKINSON. I yield.

Mr. LONG. I catch from the Senator's point what I see in the future. If we keep making treaties of this kind we cannot ship from the middle sections of the country to the East, nor from the middle sections to the West. We cannot ship from those sections to the North, nor to the South. We shall just have to rim the coast, or near the coast, with practically everything we have, and create almost a vacuum and a desert in the middle region of this country if we continue to neglect the Mississippi Valley and build up the other projects the Senator is talking about.

Mr. DICKINSON. I agree with the Senator, except that it would not be possible to make a desert out of Iowa. We have too much rain.

Mr. LONG. I meant a desert for trade.

Mr. DICKINSON. The Senator means an economic desert, not a production desert?

Mr. LONG. An economic desert. For instance, as the Senator has demonstrated, from San Francisco to New York, going through the Panama Canal is cheaper than going from Waterloo, Iowa, to either point.

Mr. DICKINSON. That is exactly right.

What will happen if the diversion at Chicago is not sufficient to maintain the Hennepin Canal, and if the flow of the Illinois River cannot be maintained, either by reason of lack of water or by reason of lack of sufficient water for sanitation—because if the water is there but is polluted to a point where it cannot be used, it is useless as a canal. If we do not have that connection, if the connection is not absolutely provided in this treaty, then we are in a position where the freight rates will be lowered from Chicago east, but they will be increased from Chicago west, and the great grain-trade area of the city of Chicago will suffer accordingly. That is the reason why I am intensely interested in this proposal.

Not only that; but I find that public men become interested in these proposals on account of pressure. We find that the idea of the Panama Canal was sold to this country, and, as I have heretofore suggested, in the Senate of the United States at that time there were only 6 votes against it—1 vote from Tennessee, 2 from Missouri, 1 from Virginia, 1 from Idaho, and 1 from Alabama. No one dreamed at that time that the construction of the Panama Canal was going to have an adverse effect upon the economic condition of the Mississippi Valley; but no one who knows anything about our experience under that treaty will for a minute hesitate in giving evidence that the Mississippi Valley has lost industry after industry by reason of the handicap the Panama Canal has imposed upon the Mississippi Valley.

Mr. LEWIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Iowa yield to the Senator from Illinois?

Mr. DICKINSON. I yield.

Mr. LEWIS. Does not my able friend from Iowa concur with me in the thought that if those former representatives from the Mississippi Valley, which he and I and our colleagues now represent, were today called on to vote, with the information they now have, since casting their first vote, they would vote directly adverse to the way they then voted?

Mr. DICKINSON. I think without any question every one of them would vote adversely.

Now, the advocates of the treaty come in here and say, "The treaty has been recommended by the different parties." Oh, yes; but who had examined these treaties with a microscope then to find out whether or not there was any agreement with reference to the diversion, and whether or not we were making Lake Michigan an international lake, and whether or not we were properly protected so far as the future is concerned?

The advocates of the treaty say, "We have written into the treaty the very provision of the Supreme Court decision."

Mr. LONG. Mr. President, in connection with what the Senator is saying, the distinguished Prime Minister of Canada and the Canadian Senator from whom the Senator from Illinois [Mr. LEWIS] quoted this afternoon said they were opposed to the treaty from a Canadian standpoint and had announced against it even after it was signed, perhaps not dreaming that it could have any such things as it has in it; and that was just the viewpoint of some of us here in the United States. We did not know but that this treaty was all right, never once dreaming that there were such provisions in it as these gentlemen from Canada found to be in it, which caused them to turn and favor it, and which consequently would cause us to know that we could not vote for it.

Mr. DICKINSON. That is exactly correct.

The friends of the treaty say that the documents provide ample diversion. Under the diversion rights in the treaty of 1909 Canada, as I understand, would consent to have a diversion of 10,000 cubic second-feet; but at that time our representative, the distinguished Mr. Root, said that he would under no circumstances give Canada the right to control the diversion of our water within our own borders. That principle is still involved here, but on account of the Supreme Court decision Canada negotiated for the purpose of writing into the treaty the terms of that decision.

Mr. President, I try to be law-abiding. I believe that we can settle our own difficulties; and if we find there is not sufficient diversion there in the future, I am willing to see our people take it up with anyone in the United States who is interested in it. I do not, however, want somebody representing a foreign country sitting on that board of diversion; and that is what I object to in this treaty. I do not want to have to go over in Canada and negotiate with someone who has some other interest than the interest I represent; but I am perfectly willing to deal with every American citizen in the United States in working out an adjustment along those lines.

Mr. LONG. I beg the Senator's pardon, but he would not have to go over in Canada. He would have to go to England to deal with His Britannic Majesty. This treaty is made by Great Britain, through the King of England, King George V.

Mr. DICKINSON. I hope they would at least extend us the courtesy of sending someone over here to negotiate with us somewhere near our own border.

Mr. LONG. It is dangerous to let them come over here, because every time they come they get more than they asked for before they came.

Mr. DICKINSON. There is a great deal of truth in that suggestion.

I know it is said here that the diversion at Chicago is sufficient, and the supporters of the treaty talk about lake levels. It is a peculiar thing to me that they talk about lake levels and how much water we have taken from the lakes, and yet, as I understand, there was one of the highest lake levels in Lake Michigan and in the other Great Lakes within the last year or two that there has been in a great many years. All that time we have been taking out more water than it was said we ought to take, and the claim is made that we have been depriving others of their water rights.

Mr. LEWIS. Mr. President, if I may be pardoned——

Mr. DICKINSON. I yield.

Mr. LEWIS. As the question is not unfamiliar to me, as I previously remarked in addressing the Senate, having taken part in the litigation, it may interest the Senator to know that the history of the development discloses that 6 inches to and fro, up and down, however the matter has gone, has been the limit of the change in the lake levels. It has never exceeded 6 inches, regardless of what the diversion was. Something protected it and always restored it.

Mr. DICKINSON. That is my understanding, that regardless of the diversion the minimum has been 4 inches, and that there never has been a maximum of more than 6 inches in the variation of the lake level. The rest of it is what may be called the seasonal variation that comes and goes with excessive rainfall and slack rainfall; and those periods run in cycles of some 7 years, perhaps after the old 7-year cycle of the Bible.

I want to go a little bit further. It is unfortunate for us that there happened to be a Supreme Court decision just about the same time the negotiation of this treaty was begun. That Supreme Court decision was unfortunate; but, growing out of that decision, we ought not to permit to be written into a treaty a hidebound agreement that may absolutely bar any particular benefits, if there are any benefits to be gained from this treaty, accruing to the section from Chicago west.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DICKINSON. I yield.

Mr. LONG. This Supreme Court decree was between two different provinces or sovereignties of the United States.

Mr. DICKINSON. That is correct.

Mr. LONG. To say that because I sue you for something some third party has a right to come in and have himself made a party to that decree is ridiculous. Because the United States says it is going to allow Chicago so much water, Canada has no right to come in and say, "Now, since the United States has decided that it is going to allow Chi-

cago so much water, we will just take the remainder of the water that Chicago does not get."

At New Orleans the Mississippi River flowing down there floods us at one season, while we have not enough water to navigate the river at other seasons. Canada has not any business taking away from us the water we have because Chicago had a lawsuit with the United States. It is a ridiculous proposition to make all parties bound by it.

Mr. DICKINSON. That is my contention.

One of the best arguments against the diversion provision of this treaty is the fact that heretofore, for a great many years, there has been diversion in excess of 7,000 cubic second-feet, and as high as 12,000 cubic second-feet. I never heard anyone say that there was a surplusage of water by reason of that diversion's going down the Hennepin Canal. I do not believe that the Hennepin Canal was ever bothered by any excessive diversion. As a matter of fact, it is on account of the diversion, and the prospect of its being continued, that the whole water supply of the Mississippi Valley was developed. It is an extensive system, but I do not believe we ought to run any danger of its being imperiled on the morrow for lack of water or for lack of sanitation, either one; and, if I read the engineers' reports aright, the point they dwell on is that this whole matter is at least experimental; that it cannot be definitely determined until 1936, and probably until 1942, when the new sanitation works are to be completed.

I do not know how long it will take, but I do know that if we cannot be sure until that time, certainly we ought to try to see that there is sufficient diversion written into this treaty so that we will not run the risk of imperiling the whole Mississippi River improvement system, because Chicago is the natural market for practically all our products in that section.

What we want to do is to have the freight rates from Chicago west influenced by water transportation just the same as all freight rates have been influenced by water transportation in the past. That is what is involved in this whole program so far as the Mississippi River is concerned.

I do not yield to any man in my sincere effort here to protect the interests of the farming population of my State. The farmers are the support, the lifeblood of the whole economic system in that area of the country, and I would not think of casting a vote here that would in any way imperil their rights. But suppose I do unwittingly cast such a vote, and on the morrow, instead of its being for their interest, it should turn out, as was the case in connection with the Panama Canal, to be against their interest. Therefore, I must have this definite assurance before I am going to cast my vote in favor of a treaty of this kind; and we find growing out of this report the conclusion right along that this question cannot be definitely decided until these experimental stages shall have been passed.

Here is the report of the Chief of Engineers to the Secretary of War, dated December 6, 1933, for transmission to Congress under the provisions of the act of July 30, 1930:

> While the district engineer finds that an annual diversion of 1,500 cubic feet per second, increased by domestic pumpage is ample to provide an adequate flow to meet all requirements of lockage, seepage, leakage and evaporation on the waterway, he concludes that the determination whether this flow will provide a flow suitable from a sanitary standpoint for a commercially useful waterway can be made only by experience after the sewage-treatment plants at Chicago are completed.

What is the difference whether there is not enough water or whether there is water that is so contaminated that it cannot be used? There is no reason why we ought to deadlock ourselves, bring the benefits to a certain point and then bar them from the great farming producing area to the west of Chicago, which is to be benefited only in case this canal can be taken to the Mississippi and to its tributaries.

Further he points out that the weight of expert testimony is to the effect that the effluent from the sewage-treatment plants will be inoffensive, but that "the program is on such an unprecedented scale that such predictions must contain an element of uncertainty"; it is that element of uncertainty that enters into this thing—

> And that no reliable process of calculation can predict the effect of raw sewage in storm-water run-off and of accumulated sludge deposits.
>
> These reports have been referred, in accordance with law, to the Board of Engineers for Rivers and Harbors. Attention is invited to its report herewith concurring in general with the views and recommendations of the reporting officers.

This is from the Board of Engineers. The Board report states:

> The indirect needs of such a waterway in the matter of securing satisfactory sanitary conditions for those aboard vessels or employed at terminals cannot be determined until the waterway has been fully completed and the diversion limited to 1,500 cubic feet per second for a sufficient period of time to observe the conditions that may then exist.

Suppose the conditions shall then exist, and shall prove unsatisfactory. We will then have arranged with Canada, will have completed this treaty, and barred the benefits from all of the Mississippi Valley.

As a matter of fact, I do not think we can afford to adopt any such program, and that is why, if there shall not be a reservation attached to this treaty with reference to diversion, I shall vote against its ratification. The Senator from Missouri has presented a diversion reservation, and I shall vote for that reservation. I hope it will be agreed to by the Senate. If it shall be agreed to, then this treaty will, to some extent, protect the interests of the Mississippi Valley.

Mr. President, here is a further reference. These reports, I think, have practically all been put in the RECORD, but I want to call special attention to this point: In another report signed by General Markham he says:

> It does not appear possible to arrive at a conclusive determination whether this flow will afford suitable sanitary conditions on the waterway after the sewage purification plants at Chicago have been completed and placed in operation.

Mr. LONG. Mr. President, will the Senator yield?

Mr. DICKINSON. I yield.

Mr. LONG. I understand that there is a good deal of argument to the effect that they are going to ship automobiles through this canal over to England, and I am reminded of the fact that they are already shipping them from English provinces back over here. That would make it a little simpler to get them to Detroit from Ireland, rather than to build them in Detroit.

Mr. DICKINSON. When we get through with the delegation of tariff power, we will not know whether commodities will be shipped in or are to be shipped out. It is my impression that they will be shipped in most of the time.

Mr. LONG. I was not present when the Senator from New York [Mr. WAGNER] spoke, but I had a part in trying to assemble some figures on the matter, and I have been told that the Senator from New York has pretty well demonstrated that it will cost about 15 cents a bushel of the taxpayers' money to ship wheat through this supposed-to-be canal 6 or 7 months of the year, and they will save 3 or 4 cents. We had better give them a dime a bushel and call the project off, for then we would not have to give away Lake Michigan, and give away our money, and go over to England and trade with them.

Mr. DICKINSON. Let me suggest this with reference to Iowa products. Our principal products are not wheat, they are usually meats, and meats cannot be put on slow, long-time routes. They usually have to be transported quite promptly. Chase & Sanborn may have dated coffee; and if we get these cheap routes, we may have to have dated hams, so that purchasers will know when they were cured; otherwise they may go by slow transportation on water and might not be very good when they reach their destination.

I think there is sufficient uncertainty in this whole program to warrant us in hesitating. It is said that if we adopt a reservation, Canada will not accept it. If we cannot protect our own interests, then let Canada do as she wants to do as to whether or not she should accept it.

I happen to know that this was the most controversial feature of the entire treaty. It was the feature which delayed the negotiations the longest. It was the feature they worked over for months and months, and finally the Canadian representatives took advantage of the fact that there was a decision of our Supreme Court and they wrote that decision into the treaty, and expect us to ratify the treaty because the Supreme Court of our own country rendered that decision.

Mr. CLARK. Mr. President, will the Senator yield?

Mr. DICKINSON. I yield.

Mr. CLARK. Does the Senator have any information as to whether any time was consumed in the consideration of article VI of the treaty, the article which authorizes an alternative route north to the Ottawa River and thence to the St. Lawrence?

Mr. DICKINSON. My understanding is that there is nothing in the treaty which prevents their doing that.

Mr. CLARK. There is a specific authorization in article VI which would permit Canada to do that very thing.

Mr. DICKINSON. Oh, yes. They say the reason why they will not do it is that they will have to dig through some stone. I do not know how hard the stone is, but they say it is impossible because they would have to dig through a bank of stone. We know, however, that we can dig through stone with electric drills.

Mr. CLARK. The President's message contains the prediction that if this treaty shall not be ratified, an all-Canadian route will be established, and that is specifically the all-Canadian route which has always been discussed in Canada.

Mr. DICKINSON. That is correct.

Mr. LONG. Mr. President, that does not mean anything except that America is going to help Canada construct a canal up there. The principle is the same, whatever we do; America is going to contribute six or seven or eight hundred million dollars to build Canada a canal, so it is as broad as it is long. We have just decided that we will have to give Canada six or seven hundred million dollars of American money to build something in Canada with Canadian labor and with Canadian materials and with Canadian engineers, so that it makes no difference. If that is not in the treaty, all they have to do is to come down and get it in.

Mr. DICKINSON. The Senator thinks we are in a frame of mind of absolute surrender?

Mr. LONG. Oh, no; not of absolute surrender. That is not the case. We have been looking for some way to give England something ever since we had the World War and even before that, on the heels of the fact that they came here and told us they were not going to pay the money they borrowed during the war, after we had all the fanfare and big headlines that they owed us several billion dollars. They quit paying; and just about the time they quit paying, we decided that if they would not pay us, we would give them five or six hundred million dollars more of American money in order to show that we were not angry.

Mr. DICKINSON. In other words, the Senator thinks we have gotten into a frame of mind where we are almost ready to admit we owe them something.

Mr. LONG. Absolutely, when they come here and tell us they are not going to pay something back. The fact that they have not paid one debt is why we ought to go in and pledge more money. The next thing will be that they will want a landing site on the Potomac River.

Mr. DICKINSON. Continuing to read from the report of General Markham, the engineer, I quote as follows:

> The situation is one which unquestionably demands a remedy, but the remedy should, in my opinion, be afforded first by the purification of the sewage, and second, if that proves inadequate, by a moderate and reasonable draft of water from Lake Michigan.

Mr. President, that being the case, there is an uncertainty here which involves the whole Mississippi Valley. It is an uncertainty that is very far-reaching. It is an uncertainty that will impose the same type of handicap on us that was imposed on us in the case of the Panama Canal; and I wish to say that I do not believe those of us from the Mississippi Valley can afford to vote to ratify this treaty so long as that uncertainty exists, as it does exist, by the terms of the treaty. They have written it into the treaty. They have said that they want control, that they want to be on the board of arbitration if we ever need any more water. If an emergency exists, we cannot decide it alone—we have to call into conference the authorities from the other countries. That being the case, I believe I should run the same danger in voting to ratify this treaty as did the splendid men in Congress from Iowa when they voted for the Panama Canal.

We had able men in Congress at that time—G. N. Haugen, of the Fourth District, who was here for so many years; Robert G. Cousins; John A. T. Hull; William P. Hepburn; Walter I. Smith; Lot Thomas; David B. Henderson, who was Speaker of the House of Representatives. Those men were just as sincere in their service as anyone could possibly be, but they were deceived as to the benefits of that canal accruing to the Mississippi Valley. As a matter of fact, I believe we would be deceived if we voted for the ratification of this treaty without some definite reservation as to diversion; and therefore it is my hope either that the treaty will be defeated, or, if it shall not be defeated, that the diversion reservation will be agreed to by a vote of the Senate and attached to the treaty.

Mr. President, I have said all I desire to say by way of comment on the treaty at this time.

Mr. LEWIS. Mr. President, before he takes his seat, may I invite my able friend from Iowa to note that under the terms of the treaty the board, the source to which we go for appeal respecting any question of the treaty, is to be comprised of three representing Canada and three of the United States, giving Canada a veto, three against three, with nothing done as far as the United States is concerned, if the decision be adverse to the United States, with no privilege provided as against this tie for the protection of the United States.

Mr. DICKINSON. I am very glad to have the Senator make that statement. I wish to say that it is offensive to me that matters which should be within our own family, matters that may affect the diversified interests of our representative States, matters over which we should not have to consult anyone except those who compose the machinery of our own Government, are by this treaty put into the hands of the body the Senator from Illinois [Mr. LEWIS] has so ably described; and therefore we must, with these divergent interests, consult an outside party, and, as the Senator says, give them equal representation with our representation in the settlement of our own dispute.

Mr. LEWIS. Mr. President, that is why I assert that the able Senator from Iowa and myself, and, I am sure, the other Senators who are discussing the question on the floor, find ourselves greatly mystified as to how any American could ever have voted to send such a paper to the Senate as a representative of American interests.

Mr. PITTMAN. Mr. President, I wish to make a few remarks, but first I will ask if other Senators are desirous of speaking at this moment.

Mr. CLARK. Mr. President, I have a few remarks, but I will make them after the Chairman of the Committee on Foreign Relations shall have concluded his remarks.

Mr. PITTMAN. Mr. President, the matters I am going to discuss now are, I will say, undoubtedly more for the RECORD than they are for the immediate benefit of the Senate. It is possible, however, that some of the Senators who have not studied the question may desire to study it. There has been a vast amount of information furnished to the Senate by the President. Possibly the reason it has not been studied more earnestly is because of its being so voluminous.

I wish to say, however, that the work done in the preparation of the reports that acoompanied the President's messages reflect great credit, in my opinion, upon those who have prepared the data. Every question that has ever been

asked on the floor of the Senate, or through the press, or otherwise, is certainly answered somewhere in some of these reports. I make that statement whether or not Senators agree with the answers given. I have attempted to have some of the statistics which are contained in the reports, and which undoubtedly are official, brought together in the form of exhibits, which I have before me, and which can be reviewed very quickly by any Senator who desires to obtain specific information.

The first proposition I shall take up is the effect that the construction of the seaway will have on the railroads of the United States. It was admitted by practically all the presidents of the western railroads in the hearings in 1930, before the subcommittee of the Committee on Foreign Relations that the construction of the St. Lawrence seaway would be of benefit to the western sections of the country. I will place these data in the RECORD when I come to identifying them.

On the other hand, the railroads in the eastern zone of the United States have always opposed the treaty. Their opposition has been natural. They have contended that it would divert from them to the waterway a certain amount of traffic. They have been supported in their opposition by the large ports on the Atlantic seaboard, particularly New York, Boston, Philadelphia, and Baltimore. Those ports have opposed the building of the St. Lawrence seaway on the ground that it would divert from them traffic which now moves in export trade.

The question is, Do the statistics sustain their opposition and their belief? I sincerely say to the Senators that my study of the statistics, of the movement of trade, of the volume of trade, the points of origin, and the points of destination, convinces me that the railroads of the eastern zone are in error.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Massachusetts?

Mr. PITTMAN. I yield.

Mr. WALSH. Does it not depend upon how much trade is diverted from the railroads through the waterway?

Mr. PITTMAN. It does; and also where it is diverted.

Mr. WALSH. And is it not claimed that the volume of trade that will be carried through the waterway will be very large?

Mr. PITTMAN: Yes; it is so claimed. The volume of trade that will be diverted through the proposed waterway may be 8,000,000 or 10,000,000 tons over what is now carried through the present waterway.

Mr. WALSH. Is that to be taken away from the railroads?

Mr. PITTMAN. In some cases part of that will be taken away from the railroads.

Mr. WALSH. And does the Senator contend that we ought not to be concerned if it means a lowered volume of transport to the railroads?

Mr. PITTMAN. I think it should fairly be said that a part of it will be taken away from the railroads, but the record discloses that 80 percent of the traffic now moving over that waterway, where it has only a 14-foot channel through the canal, moved to the big ports I have just named.

Mr. WALSH. Mostly New York.

Mr. PITTMAN. Naturally, New York being the largest port. It moves to those big ports, and from those big ports it is redistributed throughout the country, only 20 percent of it going into foreign trade. If that trade goes to those ports, then, so far as the ports are concerned, they would only lose 20 percent of the trade. So far as the railroads are concerned, in the redistribution of that trade from Boston, New York, Philadelphia, and Norfolk toward the interior, the line of demarcation as to how far it would go is plainly marked by reason of the freight rates, we will say, from Chicago and St. Louis to the ports. The line of demarcation, as to how far it would be shipped back into the interior of Massachusetts and Maine and New Hampshire and Vermont, and even parts of Pennsylvania, parts of West Virginia and Virginia, is well marked, and I have statements in the exhibits before me showing that if 4 percent of the traffic, for instance, that is now carried all-rail to Boston, New York, Philadelphia, Baltimore, and Norfolk, were taken away from the railroads and carried through the seaway, 80 percent of that which was taken away from the railroads would come back into the seaports and would be carried by the railroads for distribution back to the interior.

Mr. WALSH. Eighty percent of that 4 percent?

Mr. PITTMAN. No; 80 percent of the entire traffic. Eighty percent of the 4 percent means the same thing. Eighty percent of the 4 percent would go by water to the ports, and then from the ports would be distributed by rail to the country in the interior. I have all the statistics in actual tonnage figures so Senators can make their own estimates therefrom. Anyone interested in the matter may find the figures useful.

Mr. WALSH. The Senator will put them in the RECORD, of course?

Mr. PITTMAN. I will put them in the RECORD later, so that they may be examined.

Mr. CLARK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield the Senator from Missouri?

Mr. PITTMAN. I yield.

Mr. CLARK. I should like to suggest that the treaty has now been before the Senate for almost 3 months. The Engineers' report has been before the Senate for some 6 or 8 weeks. While I shall be glad to read the Senator's summary which has been prepared, it seems to me to be very late in the day to put in a summary calculated to influence the votes of Senators on the question.

Mr. PITTMAN. I realize that the Senators have been extremely busy during this session, having been engaged in work on committees and otherwise, and the fact that they did not read the reports themselves was not due to the fact that they were lazy, but realizing how busy they have been I simply had the statistics prepared for their benefit.

Mr. CLARK. I will undertake to say that I have read as much of the report as has the Senator from Nevada, and I also read something in the report which seemed to me to be entirely at variance with the version that the Senator gave thereof the other day.

Mr. PITTMAN. I will admit that the Senator from Missouri has been very active and industrious in his study of the question. Of course, there are a great many other Senators who apparently have not had the time to do so, and for their benefit I am trying in my humble way to abbreviate this big record. Whether I have what the Senator wants——

Mr. CLARK. I am sure that will be very helpful to all Senators, but I regret the Senator did not do it in time to be of more importance in connection with the arguments and the votes to be cast.

Mr. PITTMAN. I am really sorry that I did not realize that Senators would not have time to read the report in full.

Mr. LONG. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Louisiana?

Mr. PITTMAN. I yield.

Mr. LONG. As I understand, the Senator is undertaking to put it in language that Senators can understand?

Mr. PITTMAN. Most Senators can understand it, but I am really asking to place it in the RECORD for the benefit of those who will not try to understand it.

Mr. President, I want to hasten to a conclusion because I know the Senator from Missouri [Mr. CLARK], is going to follow me. I realize that there is not a sufficient number of Senators present at this time for the information to have any effect upon the vote. However, it will be in the RECORD, and I consider it of great value to anyone who may desire to read it.

Mr. WALSH. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Massachusetts?

Mr. PITTMAN. I yield.

Mr. WALSH. I think it is important for the opponents of the treaty to know where they can obtain the informa-

tion as to the large volume of freight to be conveyed through the proposed waterway. If the volume is not to be large, then the alternative is that there will be such a small volume that the expense will not be justified.

Mr. PITTMAN. I think there is no question that a large volume will go through the waterway and that a large portion of it will be diverted from the eastern zone railroads. We might as well be frank about it. That argument has been made against the treaty. I believe, however, that it has not been taken into consideration that 80 percent of the shipments coming through in that way will go to the same ports, and the railroads will still have an opportunity to distribute a great portion of them inland.

Mr. LEWIS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Illinois?

Mr. PITTMAN. I yield.

Mr. LEWIS. With the Senator's consent, I must say that the last statement of my able friend the Chairman of the Committee on Foreign Relations rather mystifies me. Does my able friend contend that it is his belief that the interior of our country will ship its material out of the waterway by way of Montreal and Canadian waters, down the Atlantic to the Atlantic ports; there to be taken up again by the railroads and brought back into the very territory from which it was brought forth?

Mr. PITTMAN. That may sound mysterious to the Senator, but there is a certain portion of the shipments that will be handled in just that way.

Mr. LEWIS. Upon that theory, why not ship direct by railroad to the interior points instead of shipping to the Port of New York and then inland again?

Mr. PITTMAN. Because it happens to be cheaper to go by water to the eastern ports and then ship back a certain distance by rail, perhaps 100 or 200 miles.

Mr. LEWIS. The Senator bases it upon the theory that it will be less expensive to go the more circuitous route by water than to go the direct route by rail?

Mr. PITTMAN. Yes.

Mr. WALSH. In other words, it will develop our coastwise trade?

Mr. PITTMAN. Yes.

Mr. WALSH. That trade is now apparently forgotten. I am glad to have the Senator bring out that point.

Mr. PITTMAN. Mr. President, I have had this report prepared by traffic experts, and everything I have presented is taken from the report.

There are eight prominent ports from Maine to Virginia, inclusive, which might be affected. They are, in the order of their geographical location, Portland, Maine; Boston, Mass.; Providence, R.I.; New York, N.Y.; Philadelphia, Pa.; Baltimore, Md.; Norfolk, Va.; Newport News, Va.

At this point I ask unanimous consent to insert in the RECORD a tabulation marked "Exhibit A", which shows the total tonnage, the foreign tonnage, the intercoastal tonnage, and the coastwise tonnage that has moved to and from these North Atlantic ports for the 10-year period, from 1923 to 1932, inclusive.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit A.)

Mr. PITTMAN. The authority for these figures is the latest commerce report on the Great Lakes-St. Lawrence project, submitted by the President of the United States, and now printed as a Senate document.

The total business to, from, and through these ports, for the years 1923 to 1932, inclusive, amounted to 1,211,000 tons, in round figures. This tonnage classifies as follows, over the 10-year period:

	Thousand tons
Coastwise commerce	699
Intercoastal commerce	78
Foreign commerce (and by foreign commerce is meant export and import traffic)	422

This shows an annual average foreign tonnage for the 8 ports of approximately 42,000,000 tons, or if divided equally amongst the ports, would be an average annual tonnage per port of approximately 5,000,000 tons, in round figures.

Now these figures are very enlightening and they show without question that if these ports lost all of their foreign business that the loss would be ample to justify the unified opposition of their Senators to the ratification of the existing St. Lawrence Treaty. No one has claimed that shippers in this section will lose all of their foreign commerce, but even assuming that they lost half of their foreign commerce, they would still have sufficient cause for anxiety. One half of the foreign commerce of these ports would mean an annual loss of 21,000,000 tons for the eight ports as a group and a loss of approximately two and one half million tons per port. This is a considerable loss, and unless the St. Lawrence project demonstrated that it would afford a compensating gain, no one could criticize these Senators for their opposition.

What is the compensating gain?

In the first place, the completion of the St. Lawrence project, by the ratification of the existing treaty, will open up 3,576 miles of new coastline to the United States. The existing coast shore line of the United States is divided as follows:

	Statute miles
Atlantic Coast	5,565
Gulf Coast	3,641
Pacific Coast	2,730
Total	11,936

Authority for the figures: United States Coastal and Geodetic Survey, Department of Commerce.

Opening up the St. Lawrence project will add at once an additional shore line of 3,576 miles, or increase the present shore line by approximately 30 percent.

The domestic coastwise business of these eight ports on the North Atlantic coast, as shown by the tabulation which I have heretofore inserted in the RECORD, amounts to an average annual tonnage of almost 70,000,000 tons. The intercoastal business amounts to an average annual movement of approximately 8,000,000 tons, an average annual total for the two of 78,000,000 tons.

Now, no one seriously doubts that the controlling reason for this tremendous domestic coastwise and intercoastal tonnage is the fact that the tonnage is handled by water at a low transportation cost. By adding 3,576 miles of additional coastline, is it not reasonable to assume that these cities might possibly gain 30 percent in their domestic water-borne traffic? This would mean a gain in that class of business of 23,000,000 tons. If this was a fact, could not these port cities easily afford to sacrifice somewhat on export and import business? It is a matter of common knowledge that the American market of the United States is the most active and pays the highest price per unit for merchandise of any country on the face of the globe. Is it not perfectly clear that a gain of such an amount in domestic trade would more than offset the most pessimistic prophesy of loss in the foreign trade for these eight cities?

In the second place, the completion of the St. Lawrence project will open up 30 American cities and 30 domestic markets which may be served by the ports of the North Atlantic at much more favorable transportation costs than now exist.

The consuming population of 25 of these cities in 1930 was in excess of 8,000,000 people; the value of the manufactured products of 25 of those cities was in excess of $10,000,000,000.

This compares with 21 ports on the Atlantic coast, Maine to Florida, which in 1930 boasted of 13,000,000 people and almost $12,000,000,000 of manufactured products.

With the Gulf group and its 11 ports, with a population in 1930 of 1,120,000, and a value of manufactured products of $411,000,000.

With the Pacific coast cities, boasting 15 ports, a population of 3,000,000, and a value of manufactured products of $2,000,000,000.

The authority for these figures is the latest commerce report heretofore referred to.

From the foregoing, it can be seen that this new trade territory, which will be opened up by the completion of the St. Lawrence project, is placed under the very nose of these North Atlantic ports, by lower transportation costs, which I will hereinafter show. It opens up a trade territory for the North Atlantic group that is almost as large as the North Atlantic group itself. It is a trade territory that produces 20 times the manufactured products of the Gulf group and 5 times the manufactured products of the Pacific coast group.

These two great areas of production and consumption, the North Atlantic group and the interior Middle West, are today widely separated because of ever-increasing freight rates. To illustrate this point, in 1918 the first-class rate from Boston to Duluth and the Twin Cities, all rail, was $1.15. That rate today is $2.17, an increase of 88 percent. The rate in 1918 from Boston to Chicago and Milwaukee was 75 cents, all rail. That rate today is $1.54, an increase of 105 percent. The rate from New York, in 1918, to Duluth and the Twin Cities, was $1.15. That first-class, all-rail rate today is $2.12, an increase of 84 percent. The rate in 1918 from New York to Chicago was 75 cents, all rail, first class. That rate today is $1.52, an increase of 102 percent. The authority for the rates quoted will be shown on an exhibit which I will hereinafter introduce into the RECORD. Boston and New York are shown as typical of the advances throughout the entire eastern territory. The first-class rate is used because it is the base rate. All other rates carrying manufactured products move on a percentage relation of this base rate and represent the same or larger percents of advance.

With the ratification of the existing treaty, and the completion of the seaway, these two great areas may serve each other—if the existing coast-to-coast rates are to be taken as a criterion—at a transportation cost less than 50 percent of the existing rail transportation cost.

In the third place, in the St. Lawrence tributary area, in excess of 42,000,000 people reside, actual American consumers, the most prolific users of products of every character known on the face of the globe. I say again, in excess of 42,000,000 consumers, 34.6 percent of all the population of the United States, made immediately available to the north Atlantic coast with the completion of the seaway project. Why, in the Atlantic trade area, the oldest section in the United States, there are only 50,000,000 people, or approximately 41 percent of the population.

The value of the manufactured products of the St. Lawrence area is almost $28,000,000,000, or 39.7 percent of the value of all the manufactured products of the United States. Even the Atlantic coast area only boasts of $33,000,000,000 of manufactured products, or approximately 46.9 percent of the total of the United States.

Now, here are these two great areas, boasting of 34.6 and 41 percent, respectively, of the population, and boasting, further, of 39.7 and 46.9 percent, respectively, of all the manufactured products of the United States. I say again, here are these two great areas, that under existing conditions are largely divorced one from the other, which can be wedded to each other industrially with the completion of the St. Lawrence project.

You Senators along the Atlantic coast, by voting against ratification of this treaty, are saying, in fact and in truth, that there shall be a complete divorce of these two great areas in perpetuity. You, by your action, are denying to your constitutents access to the greatest manufacturing area on earth, the right to serve 34.6 percent of the population of this country. To say that your action is astounding is putting it mildly.

The authority for the figures quoted is the same commerce report hereinbefore referred to.

At this time, Mr. President, I should like unanimous consent to insert in the RECORD a tabulation marked "Exhibit B."

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit B.)

Mr. PITTMAN. This is a tabulation showing the first-class all-rail rates at the present time which apply between these 8 North Atlantic ports and 8 interior ports, as follows: Cleveland, Ohio; Toledo, Ohio; Detroit, Mich.; Chicago, Ill.; Milwaukee, Wis.; Ashland, Wis.; Superior, Wis.; and Duluth, Minn. The average of the all-rail first-class rate from the 8 ports on the Atlantic seaboard to the 8 interior ports located on the Great Lakes is $1.66, or $33.20 per ton. As I have stated before, first class has been used because it is the base rate. All other rates moving manufactured products move on a percentage relation of this base rate, and had any of the other classes been used the same relative picture would have been developed.

At this point, Mr. President, I should like to ask unanimous consent to insert in the RECORD a traffic memorandum which shows the extent of territory along the Atlantic seaboard which may use the St. Lawrence project at a lesser transportation cost than now exists via all-rail transportation.

The PRESIDING OFFICER. Without objection, it is so ordered.

The memorandum is as follows:

Traffic memorandum showing extent of territory along Atlantic coast which may utilize St. Lawrence route to and from Middle West at a lesser freight cost than now exists via rail transportation.

Comparative rates, first class, all rail against St. Lawrence

Between Duluth and representative interior points	First-class (per hundredweight)		Port	Saving per hundredweight
	All rail	Via St. Lawrence (estimated)		
Bangor, Maine	235	164	Portland	71
Calais, Maine	245	184	do	61
Manchester, N.H.	217	146	Boston	71
Montpelier, Vt.	217	175	do	42
Worcester, Mass.	217	142	do	75
Providence, R.I.	217	142	do	75
New London, Conn.	217	158	do	59
Utica, N.Y.	191	179	New York	12
Harrisburg, Pa.	203	153	Baltimore	50
Trenton, N.J.	212	139	Philadelphia	73
Frederick, Md.	205	146	Baltimore	59
Washington, D.C.	210	143	do	67
Richmond, Va.	218	153	Norfolk	65
Grafton, W.Va.	187	187	Baltimore	----

Authority for rates: I.C.C. Docket 15879, 164 (I.C.C. 314); I.C.C. Docket 17000-2, (164 I.C.C. 1).

Comparison of first-class rates all rail versus St. Lawrence rates between Duluth, Chicago, and eastern ports

Between—	And Duluth, Minn. (first class)			And Chicago, Ill. (first class)		
	All rail	St. Lawrence (estimated)	Saving	All rail	St. Lawrence (estimated)	Saving
Portland, Maine	$2.22	$1.00	$1.22	$1.59	$1.00	$0.59
Boston, Mass.	2.17	1.00	1.17	1.54	1.00	.54
New York, N.Y.	2.12	1.00	1.12	1.52	1.00	.52
Philadelphia, Pa.	2.12	1.00	1.12	1.45	1.00	.45
Baltimore, Md.	2.10	1.00	1.10	1.40	1.00	.40
Norfolk, Va.	2.26	1.00	1.26	1.51	1.00	.51

The first-class saving range shown above is from Duluth, $1.10 to $1.26; from Chicago, $1.40 to $1.59.

Referring to eastern rail distance, scale shows that these figures permit a range of rail haul as follows:

Distance freight may be hauled under east rail scale (miles):

From Duluth:	*First-class saving*
480	$1.10
500	1.12
540	1.17
580	1.22
620	1.26

Distance freight may be hauled under east rail scale (miles):

From Chicago:	First-class saving
40	$0.40
55	.45
75	.51
80	.52
90	.54
110	.59

(Authority: Rates prescribed by I.C.C. in Docket 17000–2; 164 I.C.C. 1; Docket 15879; 164 I.C.C. 314.)

Statement showing distances in statute miles

TABLE A

Between—	And Portland, Maine	And Boston, Mass.	And New York, N.Y.	And Philadelphia, Pa.	And Baltimore, Md.	And Norfolk, Va.	Total
Seattle	7,201	7,164	6,953	6,921	6,869	6,734	41,842
San Francisco	6,314	6,271	6,059	6,027	5,975	5,847	36,493
Los Angeles	5,932	5,888	5,677	5,645	5,593	5,365	34,100
Total	19,447	19,323	18,689	18,593	18,437	17,946	112,435
Average	6,482	6,441	6,229	6,198	6,145	5,982	6,246

TABLE B

Duluth	2,725	2,773	3,017	3,189	3,380	3,237	18,321
Chicago	2,631	2,680	2,924	3,096	3,287	3,143	17,761
Cleveland	1,915	1,964	2,178	2,380	2,571	2,427	13,435
Detroit	1,999	2,048	2,292	2,464	2,655	2,511	13,969

Average	2,317	2,366	2,603	2,782	2,973	2,829	2,645

Average rate representative, fifth class. Commodities moving between points in table A:	Hundredweight
Average rate, 1927, 1928, 1929	50
Rate as of 1932	45.5

Authority for rates: Thackeray Min. Rate Tariff Nos. 4 and 5. Authority for distances: U.S. Hydrographic Office.

Below is illustrated and translated into a comparative class scale water-transportation rates on the order of package freighters now operating on the Great Lakes on the assumption that joint rates water-rail may be published.

No joint rates have been published intercoastal. These rates are fluctuating contract rates, the measure of which is entirely dependent upon the conditions at the time the contract is made.

The result has been that freight has moved intercoastal at a much lower level than figures herein would indicate. By the same token, if rates via St. Lawrence are made on fluctuating-contract basis, the general level of those rates will be lower on the average than the constructed scale herein indicates, with a wider expanse of territory involved than the maps indicate.

Constructed class-rate scale using 50-cent average fifth-class rate as a base and constructing other classes on class relationship used by Interstate Commerce Commission (164 I.C.C. 1)

	Class 1	Class 2	Class 3	Class 4	Class 5	Class A
Class relationship percentage	100	85	70	55	37.5	45

Constructed scale using 50 cents as fifth class

	Class 1	Class 2	Class 3	Class 4	Class 5	Class A
Rates applying between points in table A	132	112	92	73	50	59

The foregoing translation is for an average distance of 6,246 miles. Average sailing time 22 days.

Obviously with that scale as representative of hauls intercoastal, then for the water service between upper Lakes ports and Atlantic coast points, Portland, Maine, to Norfolk, Va., inclusive (table B) contemplating an average haul of 2,645 miles and 10 days sailing time, a scale not in excess of the following would be a conservative estimate:

	Class 1	Class 2	Class 3	Class 4	Class 5	Class A	Dairy products
Between upper Lakes and Atlantic coast (per hundredweight)	100	85	70	55	37.5	45	*Percent* 60

Authority: Rates, Thackeray Minimum Rate Tariffs Nos. 4 and 5. Distances, Hydrographic Office, U.S. Navy. Class relationships, 164 I.C.C. 1, Docket 17000–2.

Mr. PITTMAN. Only the balance of the memorandum is an estimated scale that I have had prepared, translating into a so-called "railroad-rate scale" the best estimates that can be made of the charges that will become applicable between these eight North Atlantic ports, on the one hand, and the ports on Lake Erie, Lake Huron, Lake Michigan, and Lake Superior.

I direct the attention of the Senate to the fact that the average all-rail rate between the ports of these two great areas today is $1.66 per hundred pounds, first-class, and further to the fact that the best estimates of a water rate, first-class, that might apply between these ports would be $1 per hundred pounds.

I have gone to some pains to verify whether the estimate of $1 per hundred pounds, first-class, ranging to 37.5 cents for fifth-class, is a reasonable estimate; and every test which I have been able to make indicates that the estimates are high, rather than low. To illustrate: Sugar moved in volume, all-water, during the year 1932 from Philadelphia and New York to Lake Michigan and Lake Superior ports. Some of it moved in small-draft boats through the St. Lawrence River. Some of it moved by barge and was transferred to lake boats at Oswego, N.Y. But in any event it was all-water movement and the rate paid for this movement, which involved 133,588 tons in 1932, was 26.5 cents per hundred pounds. Sugar is a fifth-class commodity, and this actual movement, hampered, as it was, either by slight-draft boats or incurring a complete transfer en route, moved at a charge 11 cents per hundred pounds cheaper than the estimates which I am here presenting as to what might be a reasonable charge for the movement of fifth-class commodities between Atlantic coast ports and the Lake ports. There are other tests which I have made which prove to me, beyond all question of doubt, that the estimates herein submitted for a water rate to apply between Atlantic coast ports and the Lakes ports, via the seaway, are high, rather than low, for the service to be performed, in the event the St. Lawrence project is completed.

This reflects an average saving of 66 cents per 100 pounds, first class, or $13.20 a ton less than the existing all-rail rates, a reduction in transportation costs approximately 40 percent in existing rail-transportation charges.

I do not think there is a single business man in the country who would contend that with this reduction in transportation costs as between these two great areas that there would not result immediately a very active interchange of business relations.

I ask hard-headed eastern business men whether it is good business acumen to close their eyes to this new market, involving 42,000,000 people with $32,000,000,000 of manufacturing, using raw materials in manufacturing of $18,000,000,000, paying three and one half million workmen over $11,000,000,000 in salaries in 1929; a section that in 1929 had net sales in the wholesale trade in excess of $23,000,000,000, sales in the retail trade of almost $20,000,000,000; a section showing a construction business in 1930 of $2,000,000,000; a section with assessed property valuation in 1930 of $165,000,000,000; a section boasting of 25.3 percent of all United States minerals, 11.8 percent of all United States copper, 39.9 percent of all United States stone, 9.5 percent of all United States petroleum, 85 percent of all iron ore, 46.3 percent of all United States pig iron shipped, 36.5 percent of all coal mined, 9.4 percent of all natural gas products, 30 percent of all cement shipped, 44.8 percent of all clay products manufactured, 51.7 percent of all crop land in the United States.

I ask the Senators representing Atlantic Seaboard States again whether they can divorce themselves from a section which produced livestock in 1930 in excess of $3,000,000,000, or over 50 percent of the entire production of the United States. Can they divorce themselves from a section that produces 72 percent of all hogs, 65 percent of all butter, 49 percent of all eggs, 75 percent of all corn, 64 percent of all wheat, 83 percent of all oats.

Can it be possible that the Atlantic seaboard Senators will refuse to recognize these facts which are so easily available for them to see?

Suppose their section lost 50 percent of their foreign trade. Do they not recognize that the new avenues and new markets absolutely insure a new domestic trade 10 times more than any possible loss they might incur in export trade? Every figure which I have quoted is available to Senators from the latest reports of the highest and most authentic authority. They are all now printed as a Senate document.

Consider for a moment. Suppose the North Atlantic ports lost 50 percent of their foreign commerce; how much would it amount to? In 10 years those eight ports would have lost 211,000,000 tons. In the same period, the water-borne traffic carried on the Great Lakes, hampered as the shippers are by 14- or 20-foot depths, was almost 2,000,000,000 tons.

Gentlemen do not realize the momentous decision they are required to make. They do not realize that by opening the St. Lawrence project they would be opening up these interior ports to trade at cheaper transportation costs than apply all rail from Chicago to the same territory. To illustrate this, the first-class rate from Chicago to Duluth, all rail, is $1.33. I have shown that the water rate will not exceed $1. Today all kinds of manufactures invade this territory against Chicago competition by absorbing the transportation cost. This absorption comes out of profits. This naturally restricts the invasion of that territory. The ratification of this treaty would mean that the entire picture would be changed. Chicago, St. Louis, Indianapolis, Columbus, would be absorbing carriage costs out of their profits to meet competition for the supply of the largest consuming area in the United States.

Suppose you lost 50 percent of your foreign trade; suppose you lost all of it; it is just a drop in the bucket compared with the possibilities of the new domestic trade at transportation costs the most favorable ever existing between two great trade areas.

Where is all that far-famed business acumen of the Yankee trader? Is it possible that they are permitting the penny at the end of their nose to obscure the vision of the dollar an inch away?

There is not a manufactured unit used in all of this western area that now comes from Illinois, Indiana, and Ohio that is not produced in your section. Do you think, with your reduced transportation costs, coincident with the completion of the St. Lawrence project, that these supplies will not come from your section? Let me hasten to reassure you that the margin of profit in business now is such as to force its transaction with those people and in those sections that can lay equal merchandise down at the lowest delivered cost.

I say, without the slightest qualification, that in my opinion the eastern Senators are making the most egregious blunder. This deep waterway will be built. President Roosevelt has pointed that out in his message. If we do not participate, Canada will build it. And they undoubtedly will assess tolls against our traffic and as a result, the business of your constituents is forever barred from serving this tremendous territory at reasonable rates. I pity you when your business interests wake up to the fact that by your action they are forever excluded from this great consuming territory.

Blind indeed are those who will not see. No longer can any Senator hide behind the screen called lack of information. I challenge every Senator from along the Atlantic seaboard to even casually look at the interdepartmental reports submitted by the President in support of ratification. If they examine those reports, I cannot see how they can vote against the ratification of the treaty.

Mr. LEWIS. Mr. President, may I be pardoned for asking my able friend, if Canada should assume to build a canal along this route as a distinctive Canadian canal, would that not all the more stimulate America to build her own canal, through American country, right from the center to the coast? Where would there be any chance to lose anything if we should take the course Canada would take, building a canal through our own country, controlled by ourselves?

Mr. PITTMAN. Mr. President, there is no doubt that we could build one; there is no question about that at all. There is no doubt that it would cost us as much as if we cooperated with Canada, if not more. There is no question that we would get no power benefits out of it, and that would be quite pleasing to the Power Trust. But, even so, we must not forget that we are not an enemy of the Canadian people. We must not forget that we are on the most friendly terms with them, more friendly than the relations that exist between any other adjoining peoples in the world, so far as my knowledge goes. I do not think there is anything on earth that could disturb the amicable relationship between us, except an egregious error on our own part. I do not believe there are a sufficient number of Senators in this body, or a sufficient number of Members of Congress, or a sufficient number of members of any party, who so fear or so hate Canada that they would disrupt the friendship which has existed for so long a time.

Mr. President, the St. Lawrence River, from the point to be seen on the map on this wall, from the international boundary between Canada and the State of New York, moves entirely through Canadian territory. The Canadians have absolute sovereignty over that river in that territory. Under that absolute sovereignty they would have a right to close it to us, or to charge us reasonable tolls for the use of it. However, by this treaty they have forever given us the use of the St. Lawrence River through that territory under the same conditions and terms applicable to themselves. Was that a surrender of sovereignty? Did Canada surrender her sovereignty when, by treaty, she agreed that we should forever be allowed to use the St. Lawrence River? Certainly she did not surrender her sovereignty, because she reserves the right to enact laws to regulate that district, and laws to enforce the police powers of the country in regard to it.

We have not surrendered our sovereignty over Lake Michigan. Our sovereignty over Lake Michigan is expressly asserted. What we have done is simply to state that the Canadians may utilize Lake Michigan on the same terms on which they have permitted us to utilize the St. Lawrence River. We have reserved every right to pass laws governing the use of Lake Michigan and to enforce those laws. We have granted privileges under our sovereignty to the Canadians, to let them utilize for transportation our waters to Lake Michigan. They have granted privileges under their sovereignty to permit us to use the St. Lawrence River. But both Governments reserved their sovereignty, which meant the power to enact any laws they see fit controlling those privileges and to enforce those laws equally with regard to each side.

True, we could build a separate canal and they could build a separate canal, but when they built their separate canal they could get to the ocean, and when we built our separate canal we could not get to the ocean.

Mr. LONG. Mr. President, the Senator is in error. If he will look at the map he will see there would be no trouble in our building a canal through New York State and reaching the Atlantic Ocean at much less cost than the cost of the proposed canal.

Mr. PITTMAN. The statements of the Senator from Louisiana with regard to costs have not appealed to me very much, at least not as much as the opinions of the experts with regard to that question. I do not want to get into an argument as to whether the cost would be $500,000,000 or $1,500,000,000 for one canal, but I will state once more, as I have stated again and again, that the engineers' figures show that it would be very much more expensive to build what is called the all-American canal.

Mr. CLARK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Missouri?

Mr. PITTMAN. I yield.

Mr. CLARK. I should like to ask the Senator how much it would cost to build the all-Canadian canal through the Ottawa River and down the St. Lawrence.

Mr. PITTMAN. Which canal?

Mr. CLARK. The all-Canadian canal.

Mr. PITTMAN. The all-Canadian waterway, does the Senator mean?

Mr. CLARK. Yes; the all-Canadian waterway.

Mr. PITTMAN. Under the treaty?

Mr. CLARK. No; I mean the all-Canadian waterway. The President said in his message that if we failed to ratify the treaty there would unquestionably be built an all-Canadian waterway. The only project that has ever been proposed is the project from the Georgian Bay to the Ottawa River, and thence to the St. Lawrence.

Mr. PITTMAN. Yes.

Mr. CLARK. What would be the cost to Canada of that project compared with the cost of the all-American canal to the United States?

Mr. PITTMAN. I do not think there is any estimate on it, there is none I have possession of, but I would say at the start that it would be more costly, from what I have heard regarding it. I do not know that there are any figures on it.

Mr. CLARK. The only question on the point, with regard to which I was asking the Senator from Nevada, is this: The Senator stated that the cost of an all-American canal would be prohibitive. At the same time the Canadians have always cherished the thought of an all-Canadian seaway. I was wondering what the comparative cost as between the all-American and the all-Canadian seaways would be.

Mr. LONG. Mr. President, if the Senator will pardon me, I was given to understand that it would cost perhaps as much as $100 per capita for every inhabitant of Canada to build that canal, and I desire to say to the Senator, if he will permit me to do so, that the figures I have received—figures supposed to be from experts—show that the all-American canal would be very much cheaper than the all-Canadian waterway. Of course, we all have experts. I do not know what the Senator calls his experts.

Mr. PITTMAN. I take the Board of Army Engineers as experts.

Mr. LONG. For the Senator's information, they have been proven to be wrong more times than right in their estimates on the Mississippi.

Mr. PITTMAN. I simply will not argue figures with the Senator from Louisiana.

I desire now to say a few words with respect to the opposition of the eastern railroads. I have been dealing with the opposition of the ports. I have attempted to show by the figures that the opposition of the eastern ports was groundless; that 80 percent of the trade will go to those ports, even though the seaway shall be built, and that the railroads will distribute it toward the interior.

With respect to the opposition by the railroads, all the railroad opposition dates from November 1930. At that time all the railroads, acting as a unit, through an association known as the Association of Railway Executives, issued a pamphlet which was called "A Declaration of Policy."

Mr. President, I ask at this time for permission to insert as a part of the RECORD the "Declaration of Policy."

The PRESIDING OFFICER (Mr. CONNALLY in the chair). Without objection it is so ordered.

The matter referred to is as follows:

DECLARATION OF POLICY DEEMED NECESSARY TO THE CONTINUANCE OF ADEQUATE TRANSPORTATION SERVICE TO THE PUBLIC ADOPTED AT A MEETING OF THE ASSOCIATION OF RAILWAY EXECUTIVES HELD AT NEW YORK CITY, NOVEMBER 20, 1930

At a joint meeting of the executive committee and member roads of the Association of Railway Executives, held in New York November 20, 1930, a report of the advisory committee was received in the form of a resolution reading as follows:

"Resolved, That the advisory committee recommends to the joint meeting of the executive committee and member roads the adoption of the program set forth in the attached report, with the qualification that it is not to interfere with the position taken in respect to the bill now pending for regulation of bus lines."

This report was unanimously approved and adopted by the executive committee and member roads as a declaration of their policy.

It is as follows:

Without referring to or including in any way the results of the business depression of 1930, and basing the statement entirely on the period ended with December 31, 1929, the following picture presents itself:

Growth in railway traffic

Years	Revenue ton-miles increased	Passenger-miles increased
	Percent	*Percent*
From 1890 to 1900	85.8	35.4
From 1900 to 1910	80.1	101.6
From 1910 to 1920	62.2	46.5
From 1920 to 1929	8.8	[1] 34.2

[1] Decrease.

WHAT ARE THE CAUSES LEADING TO THIS EXTREME DECLINE IN RAILWAY TRAFFIC IN THE PAST 9 YEARS?

1. Motor vehicles, coupled with improved highways.

Motor-vehicle registrations

Year	Passenger cars (includes motor busses)	Motor trucks	Total motor vehicles
1920	8,225,859	1,006,082	9,231,941
1921	9,346,195	1,118,520	10,464,715
1922	10,864,128	1,375,725	12,239,853
1923	13,479,608	1,612,569	15,092,177
1924	15,460,649	2,134,724	17,595,373
1925	17,512,638	2,441,709	19,954,347
1926	19,237,171	2,764,222	22,001,393
1927	20,219,224	2,914,019	23,133,243
1928	21,379,125	3,113,999	24,493,124
1929	23,121,589	3,379,854	26,501,443
Percent increase 1929 over 1920	181.1	235.9	187.1

Approximate number of busses

1920	10,000
1929	92,500

Percent increase, 1929 over 1920, 825.

2. Transcontinental tonnage handled through the Panama Canal:

Fiscal year:	*Intercoastal tons of cargo*
1921	1,372,388
1922	2,562,527
1923	8,068,553
1924	13,527,378
1925	9,496,259
1926	10,069,604
1927	10,560,505
1928	10,067,392
1929	10,119,028

Percent increase, 1929 over 1921, 637.3.

3. Traffic handled over the inland waterways, excluding the Great Lakes:

Year:	*Tons*
1920	83,150,182
1921	79,901,753
1922	77,872,724
1923	108,026,159
1924	121,713,097
1925	136,372,752
1926	146,907,027
1927	154,575,002
1928	160,927,905

Percent increase, 1928 over 1920, 93.5.

4. Contributing factors to this decline in rail traffic are the pipe lines, high-power electric lines, and the newest development of the piping of natural gas from the wells to large centers, which is going to reduce still further the coal traffic.

Insofar as any form of the above service is legitimate and a natural economic development, the railroads have no right to complain. The public is entitled to the best transportation at the lowest reasonable cost. However, where the rail carriers are prevented through legislation or regulation from fairly competing with new or old forms of transportation, or where the service rendered by the competitor is a subsidized one, such unfair handicaps should be removed.

It is suggested:

(a) That the present lack of adequate regulation of motor bus and truck operation should be remedied by the enactment of appropriate legislation, with no discriminatory provision against the railroads operating in the same field.

(b) That the restrictions on the railroads from competing with the Panama Canal by refusal to grant them fourth-section relief be removed.

(c) That the Government of the United States discontinue competing with the railroads or any other form of transportation either directly or by subsidy.

(d) That pipe-line common carriers be subjected to the same restrictions in respect to the transportation of commodities in which they are interested, directly or indirectly, as the railroads now are.

The above refers to loss of traffic through competitive reasons.

Traffic that remains has produced the following results:

1. The average receipts per ton-mile have been as follows:

Year	Average receipts per ton-mile (cents)	Reduction in freight revenue due to declining average receipts per ton-mile compared with 1921
1921	1.275	
1922	1.177	$332,500,000
1923	1.116	656,236,000
1924	1.116	617,580,000
1925	1.097	736,589,000
1926	1.081	860,868,000
1927	1.080	836,037,000
1928	1.081	839,855,000
1929	1.076	890,170,000
Total reduction in revenue		5,769,835,000
Percent of decline 1929 under 1921		15.6

Figures for average receipts per ton-mile, it is fair to say, represent many factors, such as changes in commodities, distances hauled, and other items, and cannot be taken as a precise guide to rate reductions; but they are conclusive as showing the trend.

2. During this same period the operating expenses have indicated the application of great economy and efficiency, as shown by the following figures:

Operating expenses and traffic units,[1] class I steam roads, United States

	Total operating expenses	Traffic units (millions)	Expenses per 1,000 traffic units
1920	$5,827,591,146	550,852	$10.58
1921	4,562,668,302	418,778	10.90
1922	4,414,522,334	445,695	9.90
1923	4,895,166,819	526,597	9.30
1924	4,507,885,037	496,688	9.08
1925	4,536,880,291	521,665	8.70
1926	4,669,336,736	550,179	8.49
1927	4,574,177,821	529,686	8.64
1928	4,427,995,036	527,719	8.39
1929	4,506,056,262	540,544	8.34
Decreases 1929 under 1920:			
Amount	1,321,534,884	10,308	2.24
Percent	22.7	1.9	21.2

[1] Revenue ton-miles plus equated revenue passenger-miles.

This has been accomplished largely through the expenditure for capital improvements in the 9-year period amounting to $6,855,416,000, which provided improved locomotives and equipment, improvement in the physical structure, improvement in methods, and done in conformity with the program of the railroads entered into in 1923 which, as announced at that time, was based "on an abiding faith in the fairness of the American people and reliance on the continuance of the policy announced in the Transportation Act, 1920, as a measure of reasonable protection to investment in railroad property."

During this same period the decline in the average receipts per ton mile has shown an accumulative amount closely approximating what has been spent for capital expenditure—$5,769,835,000.

3. Notwithstanding this economy and efficiency, rates have never produced the return on property investment contemplated in the Transportation Act, viz, 5¾ percent, for the railroads as a whole.

Rate of return on property investment, class I steam roads, United States

Year:	Rate
1921	2.87
1922	3.59
1923	4.33
1924	4.23
1925	4.74
1926	4.99
1927	4.30
1928	4.65
1929	4.84
8 months ended Aug. 31, 1929	5.43
8 months ended Aug. 31, 1930	3.59

Rate based on property investment of carriers as shown by their books, including material and supplies and cash.

WHAT ARE THE REASONS?

Reductions in rates, beginning with the year 1921, have continued up to the present moment. These reductions were brought about:

First. By action of the Interstate Commerce Commission.

Second. Through reductions made voluntarily by the carriers to meet competition including that of unregulated or subsidized transportation.

Third. Through reductions made voluntarily by the carriers for the development of industrial enterprise and communities.

This is the situation in which the railroads of the country find themselves today.

What the railroads are asking is a new spirit and attitude on the part of legislative and regulative authorities—

(a) Through a recognition that the railroads are engaged in a business subject, as other business is, to the operation of economic laws and should accordingly be permitted to adapt themselves quickly to changes in economic conditions which confront them; and

(b) Through a recognition that railroad operation is a fundamental public necessity and that the maintaining at all times of an efficient national system of transportation, adequate to the business needs of the public, is necessary, if we are to progress as a nation.

The railroads at this time make the following recommendations:

First. A respite from rate reductions and suspensions by regulating bodies, both intra and interstate, and from action that will increase the expenses of the carriers.

Second. A respite from legislative efforts of either the National or the State Legislatures that would adversely affect rates or increase the expenses of the carriers.

Third. A withdrawal of governmental competition both through direct operation of transportation facilities, as well as indirectly through subsidies.

Fourth. A fairly comparable system of regulation for competing transportation service by water and on the highways, involving affirmative legislative action as follows:

As regards water transportation, legislation should cover—

(a) Extending jurisdiction of the Interstate Commerce Commission over port to port rates, to include—

(b) Determination of just and reasonable rates, and prohibition of discriminatory and unduly prejudicial rates.

(c) Publication of and adherence to rate schedules.

(d) Proper service requirements.

(e) Certificates of public convenience and necessity after proper showing.

(f) An opportunity for the railroads to enter this field of transportation under proper supervision, but without handicap as compared with other transportation agencies. The Panama Canal Act should be modified so as to permit railroad operation of waterway service in conjunction with rail service.

(g) And, in addition to affirmative legislative action, the retention of the flexible character of section 4, Interstate Commerce Act, sympathetically administered, with fair opportunity on the part of rail carriers to obtain relief after proper showing and including transcontinental traffic.

As regards commercial highway transportation, by bus or truck, legislation should cover—

(a) Extending jurisdiction of the regulatory authorities over commerce carried by such agencies.

(b) Certificates of public convenience and necessity, after proper showing.

(c) Proper protective requirements for financial responsibility and surety bonds or insurance.

(d) Adequate requirements for just and reasonable rates, both maximum and minimum, with provision for publication thereof and adherence thereto and proper inhibition against undue and unjust discrimination.

(e) Proper service requirements.

(f) Adequate authority for rail carriers to operate such facilities, without discrimination in favor of other transportation agencies in the same field.

(g) Adequate provision for privilege or license fee imposed on all motor vehicles for hire or profit using highways, so as to properly participate in construction and maintenance costs of highways.

As regards pipe-line transportation—

That pipe-line common carriers be subjected to the same restrictions as to the transportation of commodities in which they are interested, directly or indirectly, as the railroads now are.

All basic figures given in this statement are derived from the reports of the Interstate Commerce Commission or from other governmental sources and are open for inspection and verification.

For the policies recommended herein by the Association of Railway Executives they bespeak the earnest and thoughtful consideration of the public, from the standpoint of the national interest, in maintaining in the highest degree adequate and efficient transportation in every modern form, with equal opportunity for all.

Mr. PITTMAN. I call attention to the fact that in this declaration of policy, decided opposition is indicated against all classes of water transportation, which includes not only the St. Lawrence project but the Mississippi River project, the Illinois River project, the Warrior River project, and the Hudson River project. In fact, the unified declaration of policy of the railroads is against the spending of any public moneys in waterway or port development.

Prior to this declaration of policy on the part of the railroads, acting as a unit, through the Association of Railway Executives, practically all of the western railroads were openly on record in favor of the St. Lawrence project.

Mr. President, to save time, I ask unanimous consent to have printed in the RECORD letters from Fred W. Sargent,

president of the Chicago & North Western Railway; Charles Donnelly, president of the Northern Pacific Railroad; Ralph Budd, formerly president of the Great Northern Railroad, now president of the Chicago, Burlington & Quincy Railroad, and Hale Holden, at one time president of the Chicago, Burlington & Quincy Railroad.

The PRESIDING OFFICER. Without objection, it is so ordered.

The letters referred to are as follows:

CHICAGO & NORTH WESTERN RAILWAY CO.,
Chicago, September 17, 1925.

MR. CHARLES P. CRAIG,
Vice President and Executive Director,
Great Lakes-St. Lawrence Tidewater Association,
521 Munsey Building, Washington, D.C.

MY DEAR MR. CRAIG: If you desire to do so, you may quote me as follows with relation to the Panama Canal-Great Lakes-St. Lawrence Waterway competition:

The people of the Middle West are unfairly discriminated against as the result of the Panama Canal. The Middle West is paying directly for the Canal, not only because of its competition with the railroads, but also because the Canal is not paying its own way, if return on capital investment and loss of taxes are given consideration, as they should be.

The Panama Canal does not serve the Middle West, but affords uncontrolled, unrestricted, and unrestrained competition through means of public subsidy for the purpose of taking industries out of the Middle West and planting them on either coast.

The country as a whole, in the end, will not prosper by this discrimination against the Middle West. There may be a temporary advantage. In the end, however, any such sectional preferential treatment will not succeed. The Middle West right now is entitled to have tolls through the Panama Canal placed on such a basis as to make the Canal self-supporting, not only as to operating costs but with reference to a fair return on capital investment plus an allowance for taxes equal to the average taxes on equal capital invested paid by the railroads.

The people of the Middle West are also entitled to have boat lines operating through the Canal subject to the jurisdiction of the Interstate Commerce Commission, just as the railroads are, and required to file and publish tariffs so that the transcontinental railroads may know what all rates, including tramp-steamer rates, are through the Canal. At the present time the boat lines know the rates of the railroads and can underbid them at will. The railroads have no way of knowing what any fixed form of competitive water rates are or will be.

The Great Lakes-St. Lawrence waterway will help the Middle West. Anything that will help promote the prosperity of the inland empire lying between the Alleghenies and the Rockies will help the railroads and will be of inestimable value to the entire country.

Very truly yours,

FRED W. SARGENT, *President.*

NORTHERN PACIFIC RAILWAY CO.,
St. Paul, Minn., May 15, 1925.

MR. CHARLES P. CRAIG,
Executive Director Great Lakes-
St. Lawrence Tidewater Association,
Duluth, Minn.

DEAR MR. CRAIG: You have asked me to describe, with particular reference to railroads, the changes which would follow the proposed St. Lawrence Waterway improvement, permitting continuous transport by vessel from Duluth to the ocean. It is impossible to anticipate and correctly measure these changes, but without any question they would be extensive and important, and it is also certain that the Northwestern States served by our railroad would largely share in the benefits.

It is a peculiarity of our situation that most of our surplus products find their best, if not their only market on the seaboard or in foreign countries. This is particularly true of wheat, our most important product, which, generally speaking, is sold on basis of the Liverpool price. The prices for lead, copper, and other mine products are subject to the same measure and because of these conditions it may be said that the people served by this railroad are peculiarly interested in anything which will lessen the cost of transportation to the eastern centers of population and to foreign countries, particularly the European countries who are large buyers of our products.

The northwestern railroads have always recognized the advantage of transportation via the Lakes in connection with the eastbound movement of grain, lumber, copper, and other products of their territory. The necessary breaking of bulk at the Lake port permits prompt release and return of cars to loading points and to the extent the Lake route is utilized we have an independent railroad operation and thus scape the losses which often attend the delayed return of cars by connecting railroads.

It seems to me that you have fully described these benefits in the statements which you have already issued.

Yours very truly,

CHARLES DONNELLY, *President.*

GREAT NORTHERN RAILWAY CO.,
St. Paul, Minn., December 7, 1920.

MR. CHARLES P. CRAIG,
Executive Director Great Lakes-
St. Lawrence Tidewater Association,
Duluth, Minn.

DEAR SIR: Your letter November 26, enclosing statements regarding the Great Lakes-St. Lawrence Tidewater project, is received.

The benefits accruing to the middle and northwestern sections of the United States as a result of the Great Lakes-St. Lawrence Tidewater project cannot help being apparent to anyone who has given the subject consideration.

The success with which lake-and-rail movement of ore and coal is carried on serves as a splendid illustration of what could be done in a larger way with the tidewater project carried out so that exporting could be carried on freely from this great middle and northwestern territory directly from the termini of the rail lines which serve the territory. It would mean much for an improved car supply in times such as those recently experienced in that cars, instead of being lost to the western lines and in that way to the shippers of the Northwest, would be unloaded at lake ports and returned immediately to the territory for other loads.

I cannot express anything but best wishes for the success of the undertaking.

Yours very truly,

RALPH BUDD.

ON LINE, *November 18, 1920.*

MR. CHAS. P. CRAIG,
Director Great Lakes-St. Lawrence Tidewater Association,
Duluth, Minn.

DEAR SIR: I am in receipt of your letter of the 15th instant. I have no hesitation in again saying, as I have in several ways already, that I view the Great Lakes-St. Lawrence tidewater project as a matter of the highest interest and importance to the development of the middle and northwestern territory, comparable only to the Panama Canal in its widespread and beneficial results.

To make the project successful, the engineering plans must be and I understand are commensurate with the object in view; with plans adequate for present and future expansion, direct deep-water access to the Atlantic Ocean must necessarily operate as a great spur to the growth of the territory, furnishing as well an important and needed ally to the existing rail transportation facilities. Past experience with rail and Lakes movement offers a guide and encouragement to this greater development toward rail, lake, and tidewater movement and not the least important result will be the increased protection in times of heavy demand to the equipment of the large grain-carrying roads in western territory. This will save many car days and insure better continuity of car supply to the farmers and producers of bulk and manufactured products in this growing territory.

With best wishes for the success of the association, I am,

Yours very truly,

HALE HOLDEN,
President of Chicago, Burlington & Quincy Railroad Co.

Mr. PITTMAN. Mr. President, all these letters endorse the project as being of great benefit to the western section of the country.

I call attention to the fact that all these gentlemen, prior to the declaration of policy as of November 1930, openly and without qualification advocated the completion of the St. Lawrence project, claiming that it would be of material benefit not only to the railroads of the West but to industry of the West, and mention is made of the fact that it would go a long way toward neutralizing the advantages afforded the east and west coasts over the interior by the completion of the Panama Canal.

It seems to me that the Senator from Iowa did not understand that. He realized the fact that the very section of the country from which he comes was put to a disadvantage by the Panama Canal, but he could not, apparently, see that this very seaway neutralizes that disadvantage.

The letters which I have introduced are representative of letters in testimony from any number of large western railroads, notably the Chicago, Milwaukee, St. Paul & Pacific, the Soo Line, the Union Pacific, and others.

Since November 1930, however, not a single railroad east or west has uttered one word in favor of any water development. On the contrary, this country has been flooded with misleading propaganda against all waterway projects. Every avenue possible has been utilized for the dissemination of this propaganda.

Mr. President, I ask permission to have printed in the RECORD at this time copies of page 109 of the annual re-

ports of the following companies to the Interstate Commerce Commission for the year 1932:

The Atchison, Topeka & Santa Fe Railway Co.
Baltimore & Ohio Railroad Co.
Chesapeake & Ohio Railway Co.
Chicago & North Western Railway Co.
Chicago, Burlington & Quincy Railroad Co.
Chicago, Milwaukee, St. Paul & Pacific Railroad Co.
Chicago, Rock Island & Pacific Railway Co.
Great Northern Railway Co.
New York Central Railroad Co.
New York, Chicago & St. Louis Railroad Co.
Northern Pacific Railway Co.
Pennsylvania Railroad Co.
Union Pacific Railroad Co.
Wabash Railway Co.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit D.)

Mr. PITTMAN. Mr. President, these pages cover, in part, a list of the largest stockholders of the respective railroad companies. To illustrate: These reports show that the largest single stockholder of the Baltimore & Ohio Railroad Co. is the Union Pacific Railroad Co. The largest single stockholder of the Chicago & North Western Railway is the Oregon Short Line Railroad Co., which is part of the Union Pacific system. This same railroad is a large shareholder of the Chicago, Milwaukee, St. Paul & Pacific Railway Co. The largest single stockholder of the Chicago, Rock Island & Pacific Railway is the St. Louis-San Francisco Railway Co. The largest single stockholder of the Pennsylvania Railroad Co. is the Union Pacific Railroad Co., holding 100,000 shares. One of the largest single stockholders of the Union Pacific Railroad Co. is the Chicago & North Western Railway Co. The largest single stockholder of the Wabash Railway Co. is the Pennsylvania. The Burlington Railroad is owned more than 95 percent by the Great Northern and Northern Pacific, equally and jointly.

Mr. President, I ask at this time unanimous consent to file a short statement showing the interlocking stock ownership as between these railroads. The figures are taken from the pages of their annual reports hereinbefore introduced. This statement will constitute "Exhibit E."

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit E.)

Mr. PITTMAN. Mr. President, I submit, in view of the closely woven interlocking of stock ownershinps between there railroads that it would be absolutely impossible for one road to take individual action on any problem without almost unanimous consent.

In addition to this, these reports furnish evidence of interlocking ownerships of stock in large amounts by private interests, which would absolutely preclude, in my opinion, any road taking individual action or exercising its individual right on projects that might be beneficial to it.

For example, Sigler Co., New York, own large blocks of stock in the following railroads: Santa Fe, Baltimore & Ohio, Burlington, Rock Island, Great Northern, Northern Pacific, Pennsylvania, and Union Pacific. Morgan, Turner Co., New York, own large blocks of stock in the following railroads: Santa Fe, New York Central, Pennsylvania, Union Pacific. The Curtiss Southwestern Co., New York, own the largest block of stock in the Great Northern and Northern Pacific. Barnes & Co., New York, own large blocks of stock in the Santa Fe and Baltimore & Ohio.

In other words, on an examination of this proposition, it will be found that the control of these railroads all goes back to a few bankers in Wall Street, and they decided for the western roads and for the southern roads what they thought about this waterway after they had already favored it. Since that time they have not been able to say anything.

Mr. LEWIS. Mr. President, at this point let me say I have been laboring under the impression, and I think I have freely charged, that the dominating power in the railroads, which really controls the railroads, is the insurance companies which hold their securities, not the banks.

Mr. PITTMAN. Then I shall go a little further and trace back——

Mr. LEWIS. Mr. President, does the Senator agree with me that that can be so?

Mr. PITTMAN. I think that is largely true, and I think the insurance companies are in turn controlled by a great group in Wall Street. In fact, I remember that at one time some great Wall Street manipulators paid about ten times the value of certain insurance stock so as to control the insurance companies. But I must hurry through. The reports from these railroads clearly show that the control of all of them is in only one place, and I do not need to mention it. It only illustrates what I mean that when the western railroad presidents came out in favor of this project and said it would be a great benefit to the West and to the western railroads, they were shut up instantly. We have never heard a peep out of them since. When Mr. Thom came before the committee after that he said he represented all the railroads, and so he did, because all the railroads were represented by not more than three or four men.

Now, as to the eastern railroads, I have checked this information very carefully, and, in the light of past experience, I am firmly of the opinion that these railroads who, by the direction of Wall Street, are opposing the completion of this project by the dissemination of vicious propaganda, as I have heretofore shown, will be benefited rather than harmed by the completion of the project. Fortunately for the United States Senate this very question has been thoroughly investigated by the various agencies of the Government and their reports are incorporated, for the ready reference of the Senate, in Senate Document No. 116 of the Seventy-third Congress, second session. To anyone reading carefully this detailed analysis, it is perfectly clear that the completion of the St. Lawrence project will so rehabilitate industry in the Middle West and so reinfuse the veins of manufacturing in that section as to afford a much larger compensating tonnage and tonnage of a higher grade for these eastern railroads that their net result will be beneficial rather than harmful.

We have distinct precedents from which to judge whether the opening up of the natural waterways is detrimental or helpful to competing railroads. One distinct instance of this was the opening up of the Panama Canal. The completion of this project was opposed by the western railroads on exactly the same grounds as the St. Lawrence project is now being opposed by the railroads as a unit. The project was authorized and completed in spite of the opposition of the railroads.

Mr. President, at this time I would like to have permission to insert in the RECORD an exhibit marked "Exhibit B–1." This is a statement of tonnage in cargo tons handled through the Panama Canal from the years 1915 to 1929, inclusive. It shows a growth in total tonnage of from 4,888,000 tons in 1915 to 30,663,000 tons in 1929. An increase in 15 years of almost 26,000,000 tons. This was tonnage which in large part might have gone to the railroads had not the Panama Canal been completed.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit B–1.)

Mr. PITTMAN. Now, what were the western railroads doing while this tonnage was being diverted from them through the Panama Canal? At this point I would like to submit for the RECORD exhibit B–2. This is a statement showing the revenue-tons transported for the same period, i.e., 1915 to 1929, inclusive, by class I railroads in the western district. I ask that it be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit B–2.)

Mr. PITTMAN. From this exhibit it will be seen that the revenue-tons transported by the western carriers in 1915 were, in round figures, 449 million tons, and in 1929 this had grown (in spite of the Panama Canal and the tonnage that

it carried) to 727 million tons, or an increase of 278 million tons.

Please note that in the 15 years, 1915 to 1929, the traffic of the Panama Canal increased 26 million tons. The tonnage of the competing railroads in the western district increased more than 10 times as much during the same period—278,000,000 tons.

The conclusion is obvious that while the Panama Canal has taken some traffic which might have ordinarily gone to the railroads, in so doing it rehabilitated industry on the east and west coasts of the United States to such an extent as to furnish a compensating tonnage to the competing western railroads far in excess of the total tonnage handled by the Panama Canal.

Now we have an illustration closer home, which I would like to draw to the attention of the Senate, and that is the competition afforded by the Great Lakes and the St. Lawrence River, with its limited draft at the present time, with the eastern railroads. It is a matter of common knowledge that a tremendous volume of tonnage is handled annually down the Great Lakes. This has been a fact since the Government has deepened the channels on the Great Lakes. Now, has this tonnage been the means of stifling traffic for the railroads and putting the eastern railroads out of business?

Mr. President, I would like at this time to have permission to make a part of the RECORD exhibit B–3, which is a statement showing the water-borne traffic handled on the Great Lakes from the years 1920 to 1929.

The PRESIDING OFFICER. Without objection it is so ordered.

(See exhibit B–3.)

Mr. PITTMAN. This exhibit shows that in 1920 the tonnage handled on the Great Lakes amounted, in round figures, to 99 million tons; that in 1929, 10 years later, it had increased to 141 million tons, in round figures, an increase in 10 years of 42 million tons.

Now what were the competing eastern railroads doing during that period, and how much business do their reports show that they lost?

At this point, Mr. President, I would like to introduce and make a part of the RECORD, exhibit B–4, which shows the revenue tons transported by the class I railroads in the eastern district from 1920 to 1929, inclusive.

The PRESIDING OFFICER. Without objection it is so ordered.

(See exhibit B–4.)

Mr. PITTMAN. From this exhibit it will be seen that the eastern railroads carried 1,253,468,027 revenues tons in 1920; that this increased to 1,294,927,000 in 1929. Thus it can be seen that the eastern railroads, in spite of the heavy tonnage on the Great Lakes, show a growth in tonnage during this period of an amount almost equal to the growth of tonnage on the Great Lakes.

Further analysis, as shown by the report which is now identified as Senate Document No. 116, discloses that the tonnage carried by the eastern railroads is of a higher grade and pays a greater ton-mile earning than was earned prior to 1920. I quote in full a paragraph from page 308 of Senate Document No. 116.

> As has already been pointed out, the consummation of the proposed St. Lawrence waterway would only serve to accelerate this tendency. Low-grade, bulk commodities—the products of mines, farms, and forests—would naturally gravitate towards the waterway where rates would be cheaper, and there were no elements of time or perishability involved in their transportation, but, on the other hand, the products existing from expansion of existing industrial undertakings, or from the newly created factories and mills promoted by cheaper raw materials and power, would constitute a new and profitable source of railway tonnage. The new result would be a financial gain to the railroads arising from the construction of the proposed waterway. As time went on, and the industrial and commercial activities of the tributary area of the waterway increased, the railroads would profit commensurately, and would find the proposed waterway an advantage rather than a source of loss.

To correct the misimpression that the eastern railroads are in such bad financial condition, Mr. President, at this time I desire to submit exhibit B–5. This exhibit shows the dividends declared by railroads in classes I, II, and III, in the eastern district, from 1920 to 1929.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit B–5.)

Mr. PITTMAN. It will be seen from this exhibit that the railroads in the eastern district paid dividends in 1920 of almost 129 million dollars, in 1929 almost 274 million dollars, a total dividend in the 10 years of almost 2 billion dollars, an average annual dividend of 192 million dollars.

From this it can be seen that it is fairly presumptive that up until the depression commenced in 1930 there was nothing to be alarmed about in the financial condition of the railroads.

From the foregoing, it is perfectly clear that past experience does not indicate that the opening up of any legitimate waterway has had anything but a helpful effect upon the railroads generally, and even upon the railroads that are directly competing with such waterway.

Then, too, it should not be lost sight of that this seaway, if built, cannot possibly be in operation before 1940–43, approximately 7 to 10 years from now. If the traffic of the United States in the next 10 years shall increase in the same ratio that it increased for the 10 years prior to the depression, there will be more business to be handled than can possibly be handled with the waterway operating at full blast and the competing railroads carrying capacity tonnage. This is amply demonstrated by the reports which the President submitted in support of the completion of this project, and which are easily available to the Senators because they are now in the process of printing as Senate documents.

There is no Member of the Senate who recognizes any more clearly than I do the necessity for the railroads in our economic life. There is no man in the Senate who will go any farther than I will to see them in a healthy condition, and I should be the last man to advocate the completion of any project that would have the effect of demoralizing our railroads.

While I concede the necessity of the railroads, I am opposed to the idea that they shall dominate the economic life of the United States, and I am opposed to their domination of the policy of our Government.

At this point, Mr. President, I ask unanimous consent to introduce a tabulation, marked "Exhibit C", of a few representative first-class rates, all rail, as of 1918, compared with these rates at the present time. There are only a few presented, but they are typical of the general situation. The tabulation shows beyond any question that the rates of these railroads have gone far beyond the point at which business may be freely transacted.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit C.)

Mr. PITTMAN. I say again, are the railroads going to be permitted so to dominate this body as to be able to use taxpayers' money to defeat the completion of projects which contemplate cheaper and more flexible avenues of transportation, which can only result in benefits to the consumers and producers of this country?

Are the railroads so omnipotent as to be allowed to maintain in perpetuity the monopoly which has permitted the development of an organization which I have heretofore characterized as the most antiquated business organization in the United States?

Let me say without qualification, and with all the power at my command, that when the railroads put their own house in order I am for them. When the banks and the security holders can demonstrate to our satisfaction their ability to manage their own business, then, and then only, will be time enough for them to attempt to run the railroad business.

I say in conclusion that the opposition of the eastern railroads is not because they fear a diversion of traffic. It is not particularly directed against the St. Lawrence Treaty. The opposition of the eastern railroads, and the western railroads as well, comes from their master's voice, which barks its orders from a little street in New York called "Wall."

Mr. President, as a part of my remarks I wish to have printed in the RECORD a list of allotments to the Mississippi River and its tributaries under the Public Works Administration; also a statement prepared by the State Department, which has been approved by them, dealing with the Great Lakes-St. Lawrence Deep Waterway Treaty. It is more of an analysis of each section of the treaty than anything else, and it will save time to put it in as a part of my remarks.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

List of allotments to Mississippi River and tributaries under Public Works Administration

NAVIGATION

Project	Allotment	Additional amount to complete
Mississippi River between Illinois River and Minneapolis	$33,500,000	$92,000,000
Missouri River between Kansas City and Sioux City	14,153,108	45,000,000
Missouri River between Kansas City and the mouth	4,980,000	3,184,000
Missouri River—Fort Peck	25,000,000	41,500,000
Wolf River, Tenn	603,000	
Mississippi River between Ohio River and Illinois River	3,000,000	1,690,000
Ohio River:		
Lock and dam construction	3,150,000	1,289,000
Open channel work	930,000	1,708,500
Cumberland River, Tenn. and Ky	868,000	0
Green and Barren Rivers	60,000	0
Kanawha River, W.Va	6,015,000	8,200,000
Allegheny River, Pa	900,000	580,000
Illinois River, Ill	910,000	4,087,000
Total	94,049,108	199,238,500

FLOOD CONTROL

Mississippi River	$44,000,000	$96,846,576
Tygart Reservoir	3,000,000	9,000,000
Muskingum Reservoirs	22,590,000	0
Total	69,590,000	105,846,576
Cost of improvement of St. Lawrence under treaty		33,085,152
Total United States cost	257,992,000	
Less agreed amount to be paid for power by New York Power Authority	89,726,250	
Net Federal expenditures	168,265,750	

THE GREAT LAKES-ST. LAWRENCE DEEP WATERWAY TREATY

The Great Lakes-St. Lawrence Deep Waterway Treaty, signed in Washington on July 18, 1932, was the culmination of many years of nonpartisan activity in the United States and in Canada to extend ocean navigation into the heart of this continent. The St. Lawrence project has for many years had supporters, as well as opponents, in both of our political parties. The first official step of an American Government looking toward a St. Lawrence development was taken by President Wilson's administration when on January 21, 1920, in association with the Government of Canada, the International Joint Committee was requested to investigate the project and to submit a report to the two Governments on its feasibility and practicability. The present treaty was negotiated and signed during the preceding administration.

The salient facts in regard to the treaty, the various investigations of the project, and the history of the negotiations are fully set forth in the hearings before a subcommittee of the Committee on Foreign Relations of the Senate (72d Cong., 2d sess.) and in the report of the Committee on Foreign Relations (Executive Rept. No. 1, 72d Cong., 2d sess.).

It seems desirable, however, at this point briefly to describe the treaty and to explain the meaning and significance of the various sections of it.

The treaty consists of a preamble, 10 articles, and a separate schedule, the last named relating to the St. Lawrence International Rapids Section Commission, provided for under article 3. The preamble of the treaty notes the declaration of the Canadian Government of its intention to provide, not later than the date of the completion of the deep waterway in the international section of the St. Lawrence, for the completion of the New Welland Ship Canal and of canals in the Soulanges and Lachine areas of the Canadian section of the St. Lawrence River, which will provide essential links in the deep waterway to the sea; the preamble also notes the declaration of the Government of the United States of its intention to provide, not later than the date of the completion of the works in the international section, for the completion of the recommended works in the Great Lakes system above Lake Erie.

Under article I Canada agrees, in accordance with the project described in the final report of the joint board of engineers, to construct, operate, and maintain the works in the Thousand Islands section of the St. Lawrence River below Oak Point; to construct, operate, and maintain a side canal with lock opposite Crysler Island; and to construct the works required for rehabilitation on the Canadian side of the international boundary.

In article II the United States similarly agrees to construct, operate, and maintain the works in the Thousand Islands section above Oak Point; to construct, operate, and maintain a side canal, with locks, opposite Barnhart Island; and to construct the rehabilitation works on the United States side of the international boundary. Practically all of the works, both in the American and in the Canadian section of the Thousand Islands sector, have already been completed.

Article III provides for the establishment and maintenance of a temporary St. Lawrence International Rapids Section Commission consisting of 10 members, five to be appointed by each country, to construct the works in the International Rapids section of the river included in the project described in the final report of the joint board of engineers, not included in the works provided for in articles I and II and excluding power-house superstructures, machinery, and equipment. The two Governments expressly reserve the right to modify the plans by mutual agreement. In this article, the United States agrees to provide the funds for the construction of the works in the International Rapids section by the Commission estimated to cost about $150,000,000. Article III stipulates that the parts of the works within Canadian territory, or an equivalent proportion of the total of the works, shall, insofar as is possible, be executed by Canadian engineers and Canadian labor and with Canadian material; and insofar as is possible the remaining works shall be executed by American engineers and American labor, and with American material. Approximately two thirds of the works to be constructed by the Commission are in United States territory and one third in Canadian territory. Article III also provides that the parties may arrange for construction in their own territory of such power-house superstructures, machinery, and equipment as may be desired for the development of power. This provision, of course, leaves each of the Governments free to settle the purely domestic question of the utilization of water power.

Article IV provides for the equal division as between the United States and Canada of the water utilized for power purposes in the International Rapids section of the St. Lawrence River and for the regulation of the flow of the river to protect the down-river shipping facilities.

Article V stipulates that the construction of works under the treaty shall not confer upon either of the parties thereto proprietary rights or legislative, administrative, or other jurisdiction in the territory of the other, and that the works constructed shall constitute a part of the territory of the country in which they are situated.

Article VI provides that either country may, within its own territory, proceed at any time to construct alternative canal and channel facilities for navigation in the international section of the St. Lawrence River or in waters connecting the Great Lakes.

Article VII stipulates that the rights of navigation accorded under the provisions of existing treaties between the two countries shall be maintained notwithstanding the provisions for termination contained in any of such treaties. This provision will make perpetual our right to use the Welland Canal and other Canadian canals, which could now be terminated on a year's notice.

Article VIII relates to the preservation of the levels of the Great Lakes system. This article provides that the diversion of water from the Great Lakes system through the Chicago Drainage Canal shall conform to the quantity provided under the decree of the Supreme Court of the United States of April 21, 1930. The article further provides that in the event of the Government of the United States proposing, in order to meet an emergency, an increase in the permitted diversion, and in the event of the Government of Canada taking exception to the proposed increase, the matter shall be submitted for final decision to an arbitral tribunal which shall be empowered to authorize, for such time and to such an extent as is necessary to meet the emergency, an increase in the diversion of water beyond the limits of the above-mentioned decree and to stipulate such compensatory provisions as the tribunal shall deem just and equitable. The arbitral tribunal, it is provided, shall consist of 3 members, 1 to be appointed by each of the Governments and the third, who will be the chairman, to be selected by the two Governments jointly.

The United States Army Engineers have formally reported to Congress that the quantity of water which the Supreme Court decree authorizes the Chicago Sanitary District to divert from the Great Lakes Watershed is sufficient for the 9-foot canal from Chicago to the Mississippi River through the Illinois River and adequate for a commercially useful waterway.

Article VIII also provides that no diversion of water, other than that referred to in the preceding paragraph, from the Great Lakes system or from the international section of the St. Lawrence River to another watershed shall hereafter be made except by authorization of the International Joint Commission, on which the United States and Canada have equal representation.

Under article IX, both countries are released from responsibility for any damage or injury to persons or property in the territory of the other which may be caused by any action authorized or provided for by the treaty. This article also stipulates that the two countries will severally assume responsibility and expenses for the acquisition of any lands or interests in land in their respective territories which may be necessary to give effect to the provisions of the treaty.

Article X is the usual article relating to ratification and exchange of ratifications.

Schedule A provides details in regard to the organization, capacities, powers, and liabilities of the St. Lawrence International Rapids Section Commission.

The Joint Board of Engineers estimates that the entire waterway from the Great Lakes to Montreal will cost a total of $543,429,000, including fully installed power works in the international section of the St. Lawrence River. Of this amount it is estimated that the United States will spend $272,453,000 and that Canada will spend $270,976,000, a considerable portion of both of which sums have already been expended by the two countries. In approaching the question of the division of the cost of a great joint undertaking of this sort as between the United States and Canada, there are, of course, various factors which might be taken into consideration. Many people in Canada have felt that since the United States has a much greater population in its territory immediately tributary to the Great Lakes system than has Canada in her territory, the United States should pay a very much larger share of the cost of the project than should Canada. It has been alleged that since the United States has a number of large cities on the Great Lakes and a more highly developed industry in the Great Lakes territory, the waterway and power development in connection therewith will be of more benefit to the United States than to Canada, and that we should pay the bulk of the cost. In the negotiations with Canada which led to the signing of the treaty, it was agreed that the United States and Canada should share the cost of this project equally and insofar as possible an equal division as between the two countries was determined upon in allotting costs for the various sections of the waterway. Insofar as past expenditures are concerned, the formula was adopted of including in the balance sheet only those expenditures which would not have been made except in contemplation of the completed deep waterway. The American expenditures include $56,500,000 for deepening channels in the upper Lakes, providing a new lock in the St. Marys River, and constructing the compensation works which the United States has agreed to build. Of this sum approximately $14,000,000 has been appropriated and expended, and $42,500,000 of new funds will be required. The cost to the United States in the Thousand Islands section of the river is $461,000, which has been appropriated and the work has been completed. The expenditures of the United States in the International Rapids section of the St. Lawrence will reach a total of $215,492,000, all of which will be new funds. The total amount of new funds which the United States will be called upon to spend is $257,992,000 for navigation and power works. From this total should be deducted the sum which may be realized from the disposal of the American share of water power. During the special session of Congress last spring, the House passed a resolution under the terms of which the American share of the power would be turned over to the State of New York upon the payment by that State of $89,726,000. An identical resolution was introduced in the Senate but was not finally acted upon during the special session. The passage of this resolution, which has the President's support, would bring the net cost of the waterway to the Federal Government down to a total of $168,266,000.

The foregoing estimates are based on the report of the joint board of engineers of November 16, 1926, and include unit prices as of that time. Should contracts for the recommended works be let at lower price levels than those of 1926, the engineers are of the opinion that an appreciable saving in construction costs would result.

Certain specific objections which have been raised to the treaty will now be dealt with.

It has been asserted that under article 8 the sovereignty of the United States over Lake Michigan has been surrendered to Canada and Great Britain. This charge is utterly and completely without foundation. Lake Michigan lies entirely within the territorial limits of the United States and our sovereignty over it is fully maintained. Under article VIII we do agree to limit the diversion of water through the Chicago Drainage Canal to the quantity permitted as of that date by the decree of the Supreme Court of the United States of April 21, 1930, namely, 1,500 cubic feet per second, plus domestic pumpage. By this action we recognize the well-known fact that since Lake Michigan forms a part of the St. Lawrence Drainage Basin, and since abstractions from that drainage system to a completely different watershed cause losses in Canada the Canadian Government has an interest in the extent of abstractions from a purely American lake. Sovereignty does not, and should not, include the right to use a nation's property in such a manner as to constitute an invasion of the vested rights of another country. The net result of article VIII is to establish for the diversion of water of Lake Michigan at Chicago restrictions similar in effect to those already provided for in the boundary waters treaty of 1909 in the case of future diversions from Lake Michigan.

It has been asserted that the permitted diversion is insufficient to meet the needs of a commercially useful waterway through the sanitary drainage canal and the Illinois River to the Mississippi River. It has been maintained that there would be foreclosed the right of the Secretary of War to report in accordance with the River and Harbor Act of July 3, 1930, following the completion of the Illinois waterway, on the minimum amount of water which would have to be abstracted from Lake Michigan in order to maintain a commercially useful channel 9 feet in depth. The Secretary of War has transmitted to the Congress, in compliance with the above-mentioned act of July 3, 1930, a report of the Chief of Engineers dated December 6, 1933, which completely disposes of this objection.

It has been asserted that, notwithstanding the fact that the Supreme Court decree of April 21, 1930, provides sufficient water for navigation purposes in the Illinois waterway, a reduction of the diversion from Lake Michigan to the quantity permitted by that decree would bring about an unsanitary condition in the water which might become a menace to public health. General Markham's report, which has already been referred to, deals with this and makes it clear that the weight of evidence is to the effect that there is nothing to be feared on this point. Our engineers are definitely of the opinion that by budgeting the amount of diversion permitted under the Supreme Court decree and making intelligent use of the water diverted, any situation which might arise in connection with the sanitary condition of the water can adequately be dealt with. If, in spite of this, due to circumstances which cannot now be predicted, additional water should be required for sanitary purposes, this need would definitely be an emergency within the meaning of article 8 (a) 2. This emergency clause was carefully drafted to meet precisely that possibility. In such an event, if the Supreme Court should recognize that additional water was needed, the Government of the United States would propose an increase in the permitted diversion to meet this emergency. If the Government of Canada took no exception to the proposed increase—and it is inconceivable that the Canadian Government would object in such circumstances—the additional diversion would take place without further formality. Should the Canadian Government for some reason object, the matter would be arbitrated before a board on which a neutral would sit along with representatives of the United States and Canada. The United States as a world leader in the settlement of international disputes by arbitration can scarcely find fault with such simple, direct machinery to assist in removing an ancient source of irritation between us and our nearest neighbor. The long, unbroken record of friendly intercourse between this country and the Dominion of Canada impels us to hope that such an arbitral tribunal, while a useful safeguard to both countries in a treaty of this kind, would never be called upon to adjudicate any disagreement over the diversion of water from Lake Michigan.

The St. Lawrence waterway has been referred to as "an all-British canal." I am constrained to believe that such references are merely an illustration of loose speaking, to which most of us are occasionally prone. Surely no one is so ignorant of geography as not to know that three fourths of the Great Lakes-St. Lawrence seaway route (from the head of Lake Superior to the high seas) lies in international waters.

It has been asserted that the St. Lawrence waterway, upon its completion, would result in a loss of traffic to ports along our Atlantic seaboard because of the fact that ocean shipping could go direct to our ports on the Great Lakes. We cannot believe that such a consideration should be allowed to prevent the carrying out of a great national project. The ports along our Atlantic seaboard have been developed by the expenditure of more than $200,000,000 of Federal funds, and surely this should weigh against the sectional argument. And the great impetus to coastwise navigation which would benefit all American ports that must reasonably be expected to follow the St. Lawrence development should not be overlooked. Little need be said about the objection which the railway interests are supposed to urge. The railroads have an unbroken history of objection to any waterway project. They opposed the construction of the Panama Canal and they have fought every inland-waterway improvement in the United States. But the construction of the St. Lawrence waterway cannot properly be termed an inland-waterway improvement in that it involves extending effectively an arm of the ocean into the heart of our country. It is a well-known fact that every dollar unnecessarily spent on transportation is an economic loss to the producer. Improving the economic status of our producers in the area adjacent to the Great Lakes will unquestionably result in the development of rail traffic which will far more than compensate the railroads in the eastern part of the United States for any traffic losses they may sustain. The railroads in the Middle West have frankly admitted in the past that the construction of the seaway would be of great benefit to them.

The Government of the United States has well under way a vast public-construction program, the funds for which were appropriated during the recent special session of Congress. The primary purpose of this program is to provide employment for a large number of workmen and thus to start cycles of activity which it is hoped and believed will immediately be reflected in wide-spread economic improvement throughout the country. In these circumstances, it is pertinent to consider the effect which the St. Lawrence project will have upon the unemployment situation when this treaty is ratified. General Markham, Chief of Engineers of the War Department, has submitted the following information in this regard:

"The statement of American labor which follows is founded upon records, texts, and direct information from manufacturers, superposed by judgments pertinent to the character and volume of construction work concerned, and to the classes and capabilities of machines likely to be employed.

"It is thus reckoned that the prosecution of the St. Lawrence River project, including excavations and construction in the channels of the upper Lakes, under the treaty proposed, will require American labor of something like 30,000,000 man-days.

"Neglecting engineering, clerical, supervisory, and incidental employment over the ice period of the St. Lawrence and the upper Lakes, and assuming that labor would be applied for 200 days per year over a construction period of 7 years, there would be employed on the average day about 21,000 men.

"If it were found possible to prosecute the work more rapidly than applies to a 7-year construction period, the average number

of laborers might be somewhat increased. It is thought to be a fair statement, however, for instant considerations, that under a vigorous prosecution of the treaty project there could be, and should be, employed something like twenty-odd thousand men for 200 workdays per year for 7 years."

It is to be noted that General Markham's estimate that the project will provide employment for 21,000 men 200 days per year over a construction period of 7 years includes only direct employment on the project itself and on the manufacture of the necessary machinery and equipment, and does not include the vast amount of indirect employment which will necessarily follow.

The waterway project upon its completion will provide a 27-foot channel from the Great Lakes to Montreal. A channel of 30 feet in depth is available from Montreal to the sea. Its completion will therefore admit ocean shipping from the Atlantic Ocean to the Great Lakes and will permit vessels drawing 25 feet to reach our ports on the Great Lakes. This will lessen the economic handicaps of adverse transportation costs to a vast area in the interior of the United States. This area produces a great surplus, both from agriculture and manufacturers, much of which requires long transportation and has for many years been under great transportation advantages in the shipment of commodities. In times of abnormally low commodity prices, the necessity of transporting products to consuming centers at the lowest cost possible becomes a matter of vital importance. Lower transportation costs to consuming centers should be reflected in higher price levels to producers. This increased purchasing power as a result of readjustment in price levels, would be of great benefit to the entire country. The tremendous economic advantage which will accrue to the State of New York and adjacent territory from the development of 1,100,000 horsepower of low-cost hydroelectric energy is clearly apparent.

It seems unnecessary at this time again to refer to the large number of specific instances of great savings in transportation costs which will result from the construction of this waterway as brought out by traffic experts in the hearings before the Senate subcommittee. The record fairly bristles with detailed and fully documented cases of this kind and if there are those who are skeptical on this point, it is earnestly suggested that they read some of these statements in the hearings before the subcommittee.

EXHIBIT A

Statement showing foreign, intercoastal, and coastwise commerce to, from, and through North Atlantic coast ports for 10-year period 1923 to 1932, inclusive

[Commerce in gross tons of 2,240 pounds per ton]

Authority for old rates: I.C.C. files.

Authority for new rates: prescribed by I.C.C. in docket 15879, 164 I.C.C. 314 and in docket 17000-2, 164 I.C.C. 1.

EXHIBIT D

THE ATCHISON, TOPEKA & SANTA FE RAILWAY CO.

(Report for the year ended Dec. 31, 1932)

109. Voting powers and elections

1. State the par value of each share of stock: Common, $100 per share; first preferred, $100 per share; second preferred, $— per share; debenture stock, $— per share.

2. State whether or not each share of stock has the right to 1 vote; if not, give full particulars in a footnote. Each share has a right to 1 vote.

3. Are voting rights proportional to holdings? Yes. If not, state in a footnote the relation between holdings and corresponding voting rights.

4. Are voting rights attached to any securities other than stock? No. If so, name in a footnote each security, other than stock, to which voting rights are attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, stating whether voting rights are actual or contingent, and, if contingent, showing the contingency.

5. Has any class or issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method? No. If so, describe fully in a footnote each such class or issue and give a succinct statement showing clearly the character and extent of such privileges.

6. Give the date of the latest closing of the stock book prior to the actual filing of this report, and state the purposes of such closing. March 28, 1932; for annual meeting of the stockholders held at Topeka, Kans., April 28, 1932.

7. State the total voting power of all security holders of the respondent at the date of such closing, if within 1 year of the date of such filing; if not, state as of the close of the year: 3,668,788 votes, as of December 31, 1932.

8. State the total number of stockholders of record, corresponding to the answer to inquiry no. 7: 59,630 stockholders.

9. Give the names of the 20 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of list of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his address, the number of votes which he would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he was entitled, with respect to securities held by him, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities, stating in a footnote the names of such other securities (if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. If the stock book was not closed or the list of stockholders compiled within such year, show such 20 security holders as of the close of the year.

The above is a transcript from our records, but as a matter of fact, the holdings of a number of the registered holders above really cover holdings of many individuals and firms.

10. State the total number of votes cast at the latest general meeting for the election of directors of the respondent: 2,153,219 votes cast.

11. Give the date and place of such meeting: April 28, 1932, Topeka, Kans.

BALTIMORE & OHIO RAILROAD CO.

(Report for the year ended Dec. 31, 1932)

109. Voting powers and elections

1. State the par value of each share of stock: Common, $100 per share; preferred, $100 per share; second preferred, $— per share; debenture stock, $— per share.

2. State whether or not each share of stock has the right to 1 vote; if not, give full particulars in a footnote. Yes.

3. Are voting rights proportional to holdings? Yes. If not, state in a footnote the relation between holdings and corresponding voting rights.

4. Are voting rights attached to any securities other than stock? No. If so, name in a footnote each security, other than stock, to which voting rights are attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, stating whether voting rights are actual or contingent; and if contingent, showing the contingency.

5. Has any class or issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method? No. If so, describe fully in a footnote each such class or issue and give a succinct statement showing clearly the character and extent of such privileges.

6. Give the date of the latest closing of the stock book prior to the actual filing of this report, and state the purpose of such closing. Record date, October 15, 1932. Books do not close.

7. State the total voting power of all security holders of the respondent at the date of such closing, if within 1 year of the date of such filing; if not, state as of the close of the year: 3,151,585 votes, as of October 15, 1932.

8. State the total number of stockholders of record corresponding to the answer to inquiry no. 7: 48,064 stockholders.

9. Give the names of the 20 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of list of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his address, the number of votes which he would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he was entitled, with respect to securities held by him, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities, stating in a footnote the names of such other securities (if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. If the stock book was not closed or the list of stockholders compiled within such year, show such 20 security holders as of the close of the year.

[1] Trustee under agreement with Pierre S. du Pont, dated Apr. 2, 1930.

10. State the total number of votes cast at the latest general meeting for the election of directors of the respondent: 1,511,617 votes cast.

11. Give the date and place of such meeting: November 21, 1932, Baltimore, Md.

THE CHESAPEAKE & OHIO RAILWAY CO.

(Report for the year ended Dec. 31, 1932)

109. Voting powers and elections

1. State the par value of each share of stock: Common, $25 per share; first preferred, $100 per share; second preferred, $100 per share; debenture stock, none; 6½-percent cumulative convertible preferred, series A, $100 per share. (See note 1.)

2. State whether or not each share of stock has the right to one vote; if not, give full particulars in a footnote. Yes. (See note 2.)

3. Are voting rights proportional to holdings? Yes. If not, state in a footnote the relation between holdings and corresponding voting rights.

4. Are voting rights attached to any securities other than stock? No. If so, name in a footnote each security, other than stock, to which voting rights are attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, stating whether voting rights are actual or contingent, and if contingent showing the contingency.

5. Has any class or issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method? No. If so, describe fully in a footnote each such class or issue and give a succinct statement showing clearly the character and extent of such privileges.

6. Give the date of the latest closing of the stock book prior to the actual filing of this report, and state the purpose of such closing. (See note 3.)

7. State the total voting power of all security holders of the respondent at the date of such closing if within 1 year of the date of such filing; if not, state as of the close of the year: 7,654,077 votes as of December 31, 1932.

8. State the total number of stockholders of record, corresponding to the answer to inquiry no. 7: 18,432 stockholders.

9. Give the names of the 20 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of list of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his address, the number of votes which he would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he was entitled, with respect to securities held by him, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities, stating in a footnote the names of such other securities (if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. If the stock book was not closed or the list of stockholders compiled within such year, show such 20 security holders as of the close of the year.

NOTE 1.—During 1930 the par value of this company's common stock was changed from $100 per share to $25 per share. As of Dec. 31, 1932, there were certificates representing 19,594 shares of $100 par value common stock still outstanding and not exchanged.

NOTE 2.—Shares of common stock of the par value of $100 each were changed into four shares of the par value of $25 each, and by stockholders' and directors' actions, shares evidenced by certificates representing $100 par common stock are not entitled to vote until exchanged for certificates representing the equivalent number of shares of common stock of the par value of $25.

NOTE 3.—Stock books were not closed during 1932, but a list was compiled of the stockholders of record at the close of business Dec. 8, 1932, for dividends on 6½-percent cumulative convertible preferred stock, series A, and on common stock, both payable Jan. 1, 1933.

10. State the total number of votes cast at the latest general meeting for the election of directors of the respondent: 5,898,160 votes cast.

11. Give the date and place of such meeting: April 19, 1932, at Richmond, Va.

CHICAGO & NORTH WESTERN RAILWAY CO.

(Report for the year ended Dec. 31, 1932)

109. Voting powers and elections

1. State the par value of each share of stock: Common, $100 per share; first preferred, $100 per share; second preferred, none; debenture stock, none.

2. State whether or not each share of stock has the right to one vote; if not, give full particulars in a footnote. Each share has right to one vote.

3. Are voting rights proportional to holdings? Yes. If not, state in a footnote the relation between holdings and corresponding voting rights.

4. Are voting rights attached to any securities other than stock? No. If so, name in a footnote each security, other than stock, to which voting rights are attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, stating whether voting rights are actual or contingent, and if contingent showing the contingency.

5. Has any class of issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method? No. If so, describe fully in a footnote each such class or issue and give a succinct statement showing clearly the character and extent of such privileges.

6. Give the date of the latest closing of the stock book prior to the actual filing of this report, and state the purpose of such closing: March 9, 1933, for the purpose of annual meeting of stockholders, April 11, 1933.

7. State the total voting power of all security holders of the respondent at the date of such closing, if within 1 year of the date of such filing; if not, state as of the close of the year: 1,808,347 votes, as of March 9, 1933.

8. State the total number of stockholders of record, corresponding to the answer to inquiry no. 7: 18,527 stockholders.

9. Give the names of the 20 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of list of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his address, the number of votes which he would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he was entitled, with respect to securities held by him, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities, stating in a footnote the names of such other securities (if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. If the stock book was not closed or the list of stockholders compiled within such year, show such 20 security holders as of the close of the year.

10. State the total number of votes cast at the latest general meeting for the election of directors of the respondent: 1,693,391 votes cast.

11. Give the date and place of such meeting: May 4, 1932, Chicago, Ill.

CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO.

(Report for the year ended Dec. 31, 1932)

109. Voting powers and elections

1. State the par value of each share of stock: Common, no par; first preferred, $100 per share; second preferred, ——— per share; debenture stock, ——— per share.

2. State whether or not each share of stock has the right to 1 vote; if not, give full particulars in a footnote. Yes.

3. Are voting rights proportional to holdings? Yes. If not, state in a footnote the relation between holdings and corresponding voting rights.

4. Are voting rights attached to any securities other than stock? No. If so, name in a footnote each security, other than stock, to which voting rights are attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, stating whether voting rights are actual or contingent, and if contingent, showing the contingency: Not applicable.

5. Has any class or issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method? No. If so, describe fully in a footnote each such class or issue and give a succinct statement showing clearly the character and extent of such privileges. Not applicable.

6. Give the date of the latest closing of the stock book prior to the actual filing of this report, and state the purpose of such closing: Closed April 9, 1932, for annual meeting of stockholders held May 10, 1932.

7. State the total voting power of all security holders of the respondent at the date of such closing, if within 1 year of the date of such filing; if not, state as of the close of the year: 2,366,999 votes, as of April 9, 1932.

8. State the total number of stockholders of record, corresponding to the answer to inquiry no. 7: 16,021 stockholders.

9. Give the names of the 20 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of list of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his address, the number of votes which he would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he was entitled, with respect to securities held by him, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities, stating in a footnote the names of such other securities (if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. If the stock book was not closed or the list of stockholders compiled within such year, show such 20 security holders as of the close of the year.

10. State the total number of votes cast at the latest general meeting for the election of directors of the respondent: 257,867 votes cast.

11. Give the date and place of such meeting: May 4, 1932, Cleveland, Ohio.

NORTHERN PACIFIC RAILWAY CO.

(Report for the year ended Dec. 31, 1932)

109. Voting powers and elections

1. State the par value of each share of stock: Common, $100 per share; first preferred, none; second preferred, none; debenture stock, none.

2. State whether or not each share of stock has the right to one vote; if not, give full particulars in a footnote. Yes.

3. Are voting rights proportional to holdings? Yes. If not, state in a footnote the relation between holdings and corresponding voting rights.

4. Are voting rights attached to any securities other than stock? No. If so, name in a footnote each security, other than stock, to which voting rights are attached (as of the close of the year), and state in detail the relation between holdings and corresponding voting rights, stating whether voting rights are actual or contingent, and if contingent showing the contingency.

5. Has any class or issue of securities any special privileges in the election of directors, trustees, or managers, or in the determination of corporate action by any method? No. If so, describe fully in a footnote each such class or issue and give a succinct statement showing clearly the character and extent of such privileges.

6. Give the date of the latest closing of the stock book prior to the actual filing of this report, and state the purpose of such closing. March 11, 1932; for annual meeting of stockholders, April 12, 1932.

7. State the total voting power of all security holders of the respondent at the date of such closing, if within 1 year of the date of such filing; if not, state as of the close of the year. 2,479,984 votes, as of December 31, 1932.

8. State the total number of stockholders of record, corresponding to the answer to inquiry no. 7. 36,409 stockholders.

9. Give the names of the 20 security holders of the respondent who, at the date of the latest closing of the stock book or compilation of list of stockholders of the respondent (if within 1 year prior to the actual filing of this report), had the highest voting powers in the respondent, showing for each his address, the number of votes which he would have had a right to cast on that date had a meeting then been in order, and the classification of the number of votes to which he was entitled, with respect to securities held by him, such securities being classified as common stock, second preferred stock, first preferred stock, and other securities, stating in a footnote the names of such other securities (if any). If any such holder held in trust, give (in a footnote) the particulars of the trust. If the stock book was not closed or the list of stockholders compiled within such year, show such 20 security holders as of the close of the year.

Authority: Page 109 to RRs. individual reports of railroads shown in column A to Interstate Commerce Commission for 1932.

Mr. CLARK obtained the floor.

Mr. PITTMAN. Mr. President, does the Senator from Missouri desire to proceed tonight?

Mr. CLARK. I prefer not to go on tonight, but I shall be glad to do so unless it is planned to take a recess or an adjournment at this time.

ADJUSTED COMPENSATION OF WORLD WAR VETERANS

Mr. LONG. Mr. President, will the Senator from Missouri yield to me for a moment?

The PRESIDING OFFICER (Mr. O'MAHONEY in the chair). Does the Senator from Missouri yield to the Senator from Louisiana?

Mr. CLARK. I yield to the Senator from Louisiana.

Mr. LONG. The House has this afternoon passed the bill providing for the immediate payment of the soldiers' bonus. A number of Senators have indicated their desire to vote for the bonus this time who did not vote for it as an amendment when I offered it the other day.

In order that the record may show just what our financial status would be if the bonus were paid at this time, and how sound and solvent it would leave the Treasury, and how much better it would make the financial condition of the country, I desire to place in the RECORD the following figures:

When Mr. Hoover was President we had at one time a circulating currency of around $7,000,000,000. We had a gold

reserve at the most of something around $4,000,000,000 as against that circulating currency of seven billion. We have in gold in the United States Treasury today $7,654,000,000, and we have outstanding as against that only $5,000,000,000 of currency. If the bonus should cost the estimated amount of around $2,000,000,000, or the high figure which was given of $2,400,000,000, we should have a circulating currency of only approximately $7,000,000,000, the same amount of currency we had when Mr. Hoover was President, whereas we should have in gold to back up that currency $7,654,000,000, while Mr. Hoover had to back up the same amount of currency something around $4,000,000,000.

In other words, Mr. President, we should have $3,000,000,000 more in gold in the Treasury of the United States to back up the same amount of currency under the present administration than we had under the Hoover administration, the only difference being that there would be $7,000,000,000 in currency outstanding under the Roosevelt administration, and there was $7,000,000,000 outstanding under the Hoover administration, whereas under the Roosevelt administration the $7,000,000,000 would have back of it $7,654,000,000 in gold, while the $7,000,000,000 under Mr. Hoover had back of it something around $4,000,000,000 of gold.

The soundness of the proposal is so apparent that to my mind it is inconceivable that we who are trying to provide sufficient money in this country, a sound money, a money backed up by the gold reserve of the country, should fail to do it. We who are trying to bring back prosperity now have the opportunity to spread $2,000,000,000 among the soldiers to pay an obligation that the Government is going to have to pay anyway, rather than to venture upon expedients some of which are less than half baked, some of which are untried, many of which have proved unsuccessful, and some have even proved harmful.

So, Mr. President, I am placing these figures in the RECORD knowing that there are many Senators who have expressed themselves as intending to vote for the bonus bill when it comes up here, believing that upon verifying the calculations I have given there should be given sufficient votes in the Senate to enact this bonus bill, and I hope it will secure the favorable action of the Executive; or, if it shall not be favorably acted on by him, that even then it may become the law.

BUSINESS AND THE N.R.A.

Mr. DICKINSON. Mr. President, I ask unanimous consent to have printed in the RECORD a radio address by William Randolph Hearst on Saturday evening.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Our honored President and General Johnson, his able assistant, declare with the deepest sincerity and the highest purpose that industry ought to put 1,000,000 more men to work at once and pay higher wages and give shorter hours.

This is unquestionably what industry ought to do if it can.

Industrialists are exceedingly anxious to do everything possible to end the depression.

But the administration must not forget that the economic situation has been very largely an industrial depression.

The reason that there has been so much unemployment has not been because industry was unwilling to employ, but because it was unable to employ.

As industry gradually emerges from the depression it will be able to employ more, and will proceed, even without urging and in the natural course of development, to employ more and pay more.

Industry always has done exactly this on previous similar occasions. And there have been a number of such occasions.

This is not the first panic the United States has had.

There have been several of them, and industry has always employed more men and paid higher wages after it came out of these depressions than before it went into them.

It has done this even without Government suggestion or solicitation or compulsion.

It has done it even without alleged altruistic motive.

It has done it in obedience to basic economic laws.

It has done it in response to the human, if not humanitarian, impulse to make greater product and greater profit through mass production.

There is strong possibility that no government domination and dictation over business could ever equal in force and effect these urgent economic laws.

There is an absolute certainty that industry and the whole country have in the past positively recovered from previous panics without the operation of an N.R.A. or any similar method of dominating and dragooning business.

In plain fact, there is much and convincing evidence that the country has recovered from previous depressions more speedily than it is recovering from the present one.

And there is an increasing probability that the disturbing interference with business by the N.R.A. and consequent uncertainty and lack of confidence which this frequently unscientific interference creates, has positively delayed recovery instead of hastening it.

This opinion is not confined to the industrialists, who believe, as Henry Ford has so well expressed it—

"That anyone who assumes to say how a business should be run ought to know something about it."

It is shared by many scientific economists.

Columbia University's assemblage of economic experts made the following definite declaration in regard to the activities of the N.R.A.:

"Insofar as they are designed to prevent undercutting in wages and prices, and other competitive practices incompatible with a decent minimum standard of living for the worker, they have a humanitarian justification. But they should be viewed in that regard.

"There should be no attempt to impose such regulations on a broader scale with the idea that they are measures of recovery.

"There should be no illusion with regard to the fact that a general rise in prices through such measures is not a sign of increasing prosperity."

And recently a survey made by the National Industrial Conference Board indicates that the recovery process during 1933 was more effective before the N.R.A. got under way than afterward.

The board reported:

"After March 1933" (when Mr. Roosevelt became President) "production increased sharply until July.

"After July" [when the N.R.A. went into effect] "production fell off abruptly.

"The high-wage rates imposed by Government policy increased labor cost per man-hour. Curtailment of hours lessened the efficiency of plant operation, and introduction of new employees lowered the average efficiency of the working force."

These are the scientific aspects of the situation.

There is in addition a very serious practical difficulty in trying to force additional burdens on industry when industry as a whole is not in a condition to bear them.

It is like requiring an individual to carry heavy loads when he is just recovering from a severe illness and has not the strength to carry them.

The spirit may be willing but the flesh is weak.

Consequently, the insistence by Government on greater employment and shorter hours and higher wages often definitely defeats its own object, and by creating less prosperity in industry, creates conditions which compel less employment.

It would appear indeed that whenever business in the present emergency has succeeded in getting its head above water, the N.R.A., with the best intentions in the world, has alertly thrown it a millstone or a coil of lead pipe as a life preserver, and has promptly sunk it again.

Indeed the plight of business has been not unlike that of the young woman in the comedy act of Savoy and Brennan.

Said Brennan:

"Sam took his sweetheart out in a rowboat and they quarreled, and Sam threw her overboard, and every time she came up he hit her on the head with an oar. Wasn't it awful?"

"Sure", said Savoy. "But wasn't she the fool to come up?"

Every time business gets its head above water the Government whacks it and down it goes again.

Perhaps after awhile business will not be fool enough to come up.

Mr. Roosevelt, in his very admirable speech before the N.R.A. code authorities, further says:

"As between profits first and humanity afterward and humanity first and profits afterward, we have no room for hesitation."

This is indubitably true; but the question with industry is not always between humanity and prosperity. It is frequently a matter of humanity and bankruptcy.

With that I believe that the average fine, honest, patriotic American business man would often run the risk of bankruptcy in the cause of humanity and civic loyalty.

He would do this notwithstanding the fact that he is abused like a pickpocket for daring to be in a constructive and productive occupation.

Notwithstanding the fact that it is considered criminal these days to make a decent profit on an honest investment.

Notwithstanding the fact that if he should make a profit, the political bureaucracy of tax collectors and tax eaters will immediately descend upon him like harpies and gleefully take it away from him.

Notwithstanding the fact that he could, with much less risk and effort, get a safe and substantial income from tax-exempt securities which the Government has thoughtfully provided for the benefit of tax dodgers.

Notwithstanding the fact that if he should become such a tax dodger, he would not only escape heavy taxation but escape the odium and contumely which apparently now attach to the once

honorable occupation of building the wealth of the Nation and creating the employment of the Nation.

Honest business is always anxious to be humanitarian, eager to be patriotic.

Barring a few conspicuous rascals, it always has been patriotic—and the percentage of rascality is certainly not greater in business than it always is in politics.

But let us remember that industry, with all the willingness in the world, cannot spend when it cannot pay.

A man who spends more than his income goes broke, and is unceremoniously told that "a fool and his money are soon parted."

A business which spends more than its income goes broke, and is treated with the same brutal lack of consideration.

Many businesses have been harassed into insolvency, burdened into bankruptcy by Government impositions.

Many businesses like the great air-mail industry have been recklessly wrecked by Government strong-arm interference.

But if the Government will only let business get safely on its feet, business on its own account, and for its own account will spend and will hire and will grow and will build and will make this Nation the greatest and the richest and the strongest and the happiest in the world.

There are some of us who do not believe that the years of 1919 to 1929 were crazy years.

There are some of us who believe that prosperity is normalcy in the United States, and that the prosperity of 1919 to 1929 can be made permanent and typical.

There are some of us who believe that this high degree of prosperity can be achieved, and permanently preserved for our people, not by the swindlers and speculators of high finance, but by the conscientious, conservative, constructive business men of our Nation.

The main duty, the immediate duty of government is not to restrict business, but to restore business confidence and stimulate business creativeness.

There is no need for government to interfere with business except to protect the 99 percent of honest business men in the United States from the 1 percent of wreckers and racketeers.

This is a business Nation—a business-built Nation.

In the fur trade of the Nation's founders—

In the cotton gins of the South—

In the Yankee notions of New England, which our clipper ships carried 'round the world—

In the engines and machines of transportation and communication—

In the fisheries and canneries—

In the oil wells and refineries—

In the mines, and mills, and factories throughout the broad land—

In the impounded power of the torrent and the electric current—

In the whir of the press and the flicker of the film, and even in the vibration of the tenuous ether—

The genius of American business men has developed the wealth of the Nation and created the highest standard of employment in the world.

All that need be done now by government is to protect business from the plunderers and from the parasites and from the politicians, and business will again take care of itself and of the Nation, too.

CROP CONTROL BY A.A.A.

Mr. DICKINSON. Mr. President, I ask unanimous consent to have printed in the RECORD an article appearing in the New York Herald Tribune today by Mark Sullivan, entitled "Crop Control Feature of A.A.A. Held Failing in Desired Results."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Herald Tribune, Mar. 12, 1834]

CROP-CONTROL FEATURE OF A.A.A. HELD FAILING IN DESIRED RESULTS—MARK SULLIVAN SHOWS HOW ORIGINAL BASIC CROPS HAVE BEEN ADDED TO UNTIL AMERICA IS NOW FACING TRANSITION TO A NEW ORDER

By Mark Sullivan

WASHINGTON, March 11.—On Saturday the Senate passed a measure adding peanuts, cattle, and some other farm crops to the list of basic commodities. The incident, esoteric to the public generally, and apparently trivial, is in fact a landmark. It illustrates the inherent rule by which revolution, once started, goes on to complete overturn of the former social and economic system.

One dislikes to use the term "revolution" because it sounds provocative, but no other term describes the process accurately. The word is used habitually and with pride by the radicals within the administration. Whatever it be called, the fundamental rule of it is that the first step away from any established system makes the second inevitable, the second compels the third, and so on until the overturn is complete and a new social and economic order arrives. This is under way in America. If not arrested soon, the transition to a new order is certain.

PEANUTS ILLUSTRATES OPERATION

The peanut incident is comparatively trivial yet fully illustrative. At the beginning of A.A.A. nearly a year ago, Secretary of Agriculture Henry A. Wallace designated certain farm crops as "basic." At first the basic crops were to be wheat and cotton only. Through operation of the familiar rule and also through political pressure, several others were added, including tobacco.

Mr. Wallace undertook to limit production of these crops and to bring about higher prices to farmers producing them. The method adopted was to levy a processing tax on purchasers of these crops—millers of wheat, spinners of cotton, manufacturers of tobacco, and so on. The money thus collected by the Government is turned over as a bonus to farmers raising these crops. The farmers are required to sign contracts with the Government agreeing to reduce the number of acres upon which they plant these crops.

INCLUDE SPINACH, LONG SUGGESTS

Under this system, farmers in North Carolina reduced the acreage they had been planting in cotton and tobacco. But the acreage thus released they at once planted in peanuts. The peanut producing area of North Carolina, normally 17 counties, expanded to 58. Thereupon, as it is put by Senator BAILEY, "the farmer-producers of peanuts are under the necessity of self-preservation to demand of the Government that it shall throw around them the same protection it throws around farmers produring other crops."

The North Carolina Senator is joined by Senator BYRD on behalf of the peanut raisers of Virginia and Senator GEORGE, of Georgia. What they ask must logically be done. For similar reasons, similar demands are made in behalf of rye, flax, cattle, and some other farm commodities. Ultimately every farm crop must be taken in. The facetious suggestion of Senator HUEY LONG, of Louisiana, about including sassafras roots and spinach is not too extreme.

HOW TAX WAS EXTENDED TO CORN

The same rule of revolution has worked in an additional way. A processing tax was put on wheat. Necessarily, that made wheat flour dearer. Thereupon the State purchasing agents of Illinois and Kansas, for example, directed the wardens of State institutions to use corn meal as a partial substitute. Countless private purchasers did the same. Consequently, to protect wheat it became necessary to put a processing tax on corn, and this was done. Corn led to hogs, hogs led to beef cattle, and so on.

The same rule is operating in a broader way. The present method of crop reduction is voluntary. That is, the administration pays the farmer to reduce his acreage. No farmer needs to make the contract unless he chooses. This voluntary method is just now breaking down. Some farmers see that the purpose of reducing acreage is to increase prices. They therefore prefer to increase their acreage so as to get advantage of the higher prices. Other farmers sign the contracts and reduce their acreage, but put added fertilizer and cultivation on the remaining acreage. The net of all is that the total country-wide crop is not decreased, but rather increased. This means that the system which is the very heart of A.A.A. voluntary agreements by farmers in return for payments by the Government is a failure.

COMPULSION IS NEXT STEP

Thereupon the second step, legal compulsion upon the farmer, is brought forward. Right now Congress is enacting a compulsory measure, endorsed by President Roosevelt. Under this the Government dictates to each cotton farmer a quota, tells each farmer how much cotton he is permitted to raise and penalizes the raising of more by a confiscatory tax. (In the first draft of the measure the recalcitrant farmer was made punishable by fine and imprisonment.)

It is fully understood that the compulsory method will be extended to wheat, corn, and other crops. Senator SIMEON D. FESS, of Ohio, is, of course, a Republican, but there need be nothing partisan in his prediction that "if we proceed along this line the time will arrive when no farmer will put a plow in his field without first getting permission from a bureau here in Washington. * * * The American people will not stand for it 24 hours when they realize what it involves."

HOPED-FOR RESULTS NOT ATTAINED

It is not only a rule of nature that the first step leads to the second. It is a rule of human nature also. When President Roosevelt sent to Congress the bill creating A.A.A. March 16, last year, he said:

"If a fair administrative trial of it is made and it does not produce the hoped-for results, I shall be the first to acknowledge it and advise you."

If Mr. Roosevelt desires literally to be the first to acknowledge that A.A.A. has not produced the hoped-for results, he will need to speak soon. The hoped-for results were set out in the preamble of the bill. They were to raise prices of farm crops to "a level * * * equivalent to the period of 1909-14." That this result has not been attained everyone knows. In other respects, not feasible to describe here, A.A.A. as a whole is breaking down. It will be contrary to human nature, however, for Mr. Roosevelt to say this. The rule is that the first step leads never to abandonment of the course but always to the second step.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

The PRESIDING OFFICER. The Senator from Missouri [Mr. CLARK] is entitled to the floor.

RECESS

Mr. ROBINSON of Arkansas. Mr. President——

Mr. CLARK. I yield to the Senator from Arkansas.

Mr. ROBINSON of Arkansas. I move that the Senate take a recess until 11 o'clock tomorrow morning.

The PRESIDING OFFICER. The question is on the motion of the Senator from Arkansas.

The motion was agreed to; and (at 6 o'clock p.m.) the Senate took a recess until tomorrow, Tuesday, March 13, 1934, at 11 o'clock a.m.

HOUSE OF REPRESENTATIVES

MONDAY, MARCH 12, 1934

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D.D., offered the following prayer:

All the paths of the Lord are mercy and truth unto such as keep his covenant and his testimonies. For Thy name's sake, our Father, pardon our iniquities and remember them against us no more forever. In the circumstances of difficulty, of arduous duty and severe temptation, give us strength to fulfill our obligations, revealing mastery, action, and sympathy. Heavenly Father, redeem all perverted things—life distorted, pleasure beguiled, time wasted. These are so vital to the efficiency of character. O bring them back as they were in the golden age when God walked in the garden. Because we are what we are, because we love Thee and are enraptured by the thought of Thy glory, O may we just be good in ten thousand ways. We pray that all our public acts may be penetrated by one spirit, connected by one aim, and ruled by one reigning purpose, namely, love for our country and our fellow men, and praises be unto Thee forever. Amen.

The Journal of the proceedings of Saturday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Horne, its enrolling clerk, announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 7199) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1935, and for other purposes.

The message also announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 13, 18, and 23 to the foregoing bill.

The message also announced that the Senate had passed, with amendments, in which the concurrence of the House is requested, the bill (H.R. 7478) entitled "An act to amend the Agricultural Adjustment Act so as to include cattle as a basic agricultural commodity, and for other purposes."

The message also announced that the Senate insists upon its amendments to the foregoing bill, requests a conference with the House thereon, and appoints Mr. SMITH, Mr. THOMAS of Oklahoma, Mr. MCGILL, Mr. NORRIS, and Mr. MCNARY to be the conferees on the part of the Senate.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H.R. 7513. An act making appropriations for the Departments of State and Justice and for the judiciary, and for the Departments of Commerce and Labor, for the fiscal year ending June 30, 1935, and for other purposes; and

H.R. 7808. An act to authorize annual appropriations to meet losses sustained by officers and employees of the United States in foreign countries due to appreciation of foreign currencies in their relation to the American dollar, and for other purposes.

VETERANS' ADJUSTED-SERVICE CERTIFICATES

Mr. PATMAN. Mr. Speaker, on behalf of the gentleman from Minnesota [Mr. LUNDEEN] and myself, I move to discharge the Committee on Ways and Means from further consideration of the bill (H.R. 1) to provide for controlled expansion of the currency and the immediate payment to veterans of the face value of their adjusted-service certificates.

The Clerk read the title of the bill.

Mr. BLANTON. Mr. Speaker, the bill should be reported in full so that it will be printed in the RECORD.

The SPEAKER. The rule provides that the bill shall be reported by title only.

Mr. BLANTON. Mr. Speaker, I ask unanimous consent that the bill be printed in full in the RECORD at this point, so that the 120,000,000 people of the United States will know what is it about and know all of its provisions.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read as follows:

H.R. 1

A bill to provide for controlled expansion of the currency and the immediate payment to veterans of the face value of their adjusted-service certificates

Be it enacted, etc., That title V of the World War Adjusted Compensation Act, as amended, is amended by adding at the end thereof three new sections, to read as follows:

"PAYMENT OF CERTIFICATES BEFORE MATURITY

"SEC. 509. (a) The Administrator of Veterans' Affairs is authorized and directed to pay to any veteran to whom an adjusted-service certificate has been issued, upon application by him and surrender of the certificate and all rights thereunder (with or without the consent of the beneficiary thereof), the amount of the face value of the certificate as computed in accordance with section 501.

"(b) No payment shall be made under this section until the certificate is in the possession of the Veterans' Administration, nor until all obligations for which the certificate was held as security have been paid or otherwise discharged.

"(c) If at the time of application to the Administrator of Veterans' Affairs for payment under this section the principal and interest on or in respect of any loan upon the certificate have not been paid in full by the veterans (whether or not the loan has matured), then, on request of the veteran, the Administrator shall (1) pay or otherwise discharge such unpaid principal and and so much of such unpaid interest (accrued or to accrue) as is necessary to make the certificate available for payment under this section, and (2) deduct from the amount of the face value of the certificate the amount of such principal and so much of such interest, if any, as accrued prior to October 1, 1931.

"(d) Upon payment under this section the certificate and all rights thereunder shall be canceled.

"(e) A veteran may receive the benefits of this section by application therefor, filed with the Administrator of Veterans' Affairs. Such application may be made and filed at any time before the maturity of the certificate, (1) personally by the veteran, or (2) in case physical or mental incapacity prevents the making or filing of a personal application, then by such representative of the veteran and in such manner as may be by regulations prescribed. An application made by a person other than a representative authorized by such regulations, or not filed on or before the maturity of the certificate, shall be held void.

"(f) If the veteran dies after the application is made and before it is filed it may be filed by any person. If the veteran dies after the application is made it shall be valid if the Administrator of Veterans' Affairs finds that it bears the bona fide signature of the applicant, discloses an intention to claim the benefit of this section on behalf of the veteran, and is filed before the maturity of the certificate, whether or not the veteran is alive at the time it is filed. If the death occurs after the application is made but before the negotiation of the check in payment, payment shall be made to the estate of the veteran irrespective of any beneficiary designation, if the application is filed (1) before the death occurs, or (2) after the death occurs, but before the mailing of the check in payment to the beneficiary under section 501.

"(g) Where the records of the Veterans' Administration show that an application, disclosing an intention to claim the benefits of this section, has been filed before the maturity of the certificate, and the application cannot be found, such application shall be presumed, in the absence of affirmative evidence to the contrary, to have been valid when originally filed.

"SEC. 510. If, at the time this section takes effect, a veteran entitled to receive an adjusted-service certificate has not made application therefor he shall be entitled, upon application made under section 302, to receive at his option either the certificate under section 501 or payment of the amount of the face value thereof under section 509.

"SEC. 511. The Administrator of Veterans' Affairs, in the exercise of his powers to make regulations for payment under section 509 shall to the fullest extent practicable provide a method by which veterans may present their applications and receive payment in close proximity to the places of their residence."

SEC. 2. (a) Payment of the face value of adjusted-service certificates under section 509 or 510 of the World War Adjusted Compensation Act, as amended, shall be made in United States

notes not bearing interest. The Secretary of the Treasury is hereby authorized and directed to issue such notes in such amount as may be required to make such payment, and of the same wording, form, size, and denominations as United States notes issued under existing law, except that the wording thereon shall conform to the provisions of this act. The Administrator of Veterans' Affairs and the Secretary of the Treasury are hereby authorized and directed jointly to prescribe rules and regulations for the delivery of such notes in payment under section 509 or 510 of the World War Adjusted Compensation Act, as amended.

(b) United States notes issued pursuant to the provisions of this act shall be lawful money of the United States and shall be maintained at a parity of value with the standard unit of value fixed by law. Such notes shall be legal tender in payment of all debts and dues, public and private, and shall be receivable for customs, taxes, and all public dues, and when so received shall be reissued. Such notes, when held by any national banking association or Federal Reserve bank, may be counted as a part of its lawful reserve. The provisions of sections 1 and 2 of the act of March 14, 1900, as amended (U.S.C., title 31, secs. 314 and 408), and section 26 of the Federal Reserve Act, as amended (U.S.C., title 31, sec. 409), are hereby made applicable to such notes in the same manner and to the same extent as such provisions apply to United States notes.

SEC. 3 (a) Whenever the index number of the wholesale all-commodity prices rise above the index number of such prices for the years 1921 to 1929, as computed by the Bureau of Labor Statistics of the Department of Labor, notwithstanding any provisions of law to the contrary, the following methods for contracting the issues of currency in the United States shall be in force and effect, in the manner and to the extent prescribed in subsection (b) of this section:

(1) Abolishment of the circulation privilege extended to certain bonds of the United States under the provisions of section 29 of the Federal Home Loan Bank Act, and retirement of such bonds as security for circulating notes as rapidly as practicable.

(2) Termination of the issuance and reissuance of national-bank circulating notes, and the retirement of such notes from circulation as rapidly as practicable.

(3) Termination of the issuance and reissuance of Federal Reserve notes secured by direct obligations of the United States.

(4) Termination of the issuance and reissuance of Federal Reserve notes secured only by gold or gold certificates.

(5) Termination of the issuance and reissuance of Federal Reserve notes secured by notes, drafts, bills of exchange, acceptances, or bankers' acceptances which are not issued in direct benefit of commerce, industry, or agriculture.

(b) Any such method of contracting currency issues shall be applicable when the Secretary of the Treasury finds that its application is necessary in order to maintain the index number of wholesale all commodity prices at the approximate level of the index number of such prices for the years 1921 to 1929 and issues an order setting forth such finding. Each such order shall prescribe such rules and regulations as are necessary and appropriate to carry out the provisions of this section with respect to the method of contraction made applicable in the order. The Secretary shall make such methods applicable only in the order in which they are set forth in subsection (a) of this section, but he shall make such methods applicable as rapidly as may be necessary to carry out the purposes of this section. When any such order is issued with respect to Federal Reserve notes, the Federal Reserve Board shall take such action as may be necessary to facilitate the enforcement of the order.

SEC. 4. Section 505 (authorizing annual appropriations ending with the year 1946 for the payment of adjusted-service certificates of the World War Adjusted Compensation Act, as amended, except the first sentence thereof, is hereby repealed. Amounts in the adjusted-service certificate fund are hereby authorized to be made available for the expenses of printing and engraving United States notes issued under this act, for paying fractional parts of a dollar which cannot be paid in United States notes issued under the provisions of this act, and for paying the principal and interest on or in respect of loans pursuant to the provisions of subsection (c) of section 509 of the World War Adjusted Compensation Act, as amended.

SEC. 5. This act may be cited as the "Controlled Expansion Act, 1933."

Mr. PATMAN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. PATMAN. I understand I have 10 minutes. Who will be recognized on behalf of the opposition?

The SPEAKER. Any member of the Committee on Ways and Means, preferably a Republican.

Mr. DOUGHTON. Mr. Speaker, I have control of the time.

The SPEAKER. The chairman of the committee has the prior right. Is the gentleman from North Carolina opposed to the motion?

Mr. DOUGHTON. I am not.

Mr. TREADWAY. Mr. Speaker, I have assumed that the chairman of the committee would use this time in opposition to the motion to discharge the Ways and Means Committee from further consideration of this measure. If the chairman of the committee does not wish to assume the responsibility of opposing the motion, I will take the time.

Mr. DOUGHTON. Mr. Speaker, I will only explain the position of the Ways and Means Committee. I will not assume the responsibility of opposing the motion.

The SPEAKER. Is the gentleman from Massachusetts opposed to the bill?

Mr. TREADWAY. I am.

CONSIDERATION OF H.R. 1 ASKED

Mr. PATMAN. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, we are asking now for a vote on this motion to discharge the Committee on Ways and Means from further consideration of H.R. 1, which is a bill to pay 3,550,000 World War veterans the remainder due them on their adjusted-service certificates. We feel that we are right in asking that this committee be discharged, since the bill is well known to all the Members of the House. They are familiar with this bill. The committee had extensive hearings on it in 1932, and I do not know that much would be gained by having additional hearings at this time. We ask that you vote to discharge the committee and bring the bill before the House today for consideration.

PAYMENT NOT TO BE MADE WITH BANKERS' MONEY

This bill carries out the constitutional mandate that Congress shall coin money and regulate its value. If this bill becomes a law we will pay these veterans in Government money; we will use the Government's credit to do it, and not bankers' money to pay the veterans.

BANKS I REFER TO

Banks should be encouraged. They are indispensable. Bankers are usually the leading men in every community. What I shall say about banks and bankers applies particularly to the large banks that have gone out of their way to crush the small banks, deny proper credit, and enrich themselves.

The House has passed all but two of the supply bills, and we are at least a month ahead of the Senate. Furthermore, if this bill is taken up we will be able to convince anyone that the full amount of each service certificate is due and that we should carry out the intent of Congress that was expressed at the time.

MELLON FIGURED VETERANS OUT OF 7 YEARS' INTEREST

It so happens that Mr. Andrew Mellon, former Secretary of the Treasury, in making the calculation, overlooked 7 years' interest for each veteran in determining the amount due on his adjusted-service certificate; so if you will take into consideration the 7 years' interest and pay the veterans in the same way, and interest, that everyone else was paid in connection with war contracts, the full amount is due, and this debt we will be able to show can be paid without a bond issue, without an increase in taxes, and without additional interest payments.

CAN SAVE BILLION DOLLARS

We will also be able to show you that we will save the Government more than one and one quarter billion dollars between now and 1945, in addition to more than $10,000,000 it will cost to administer the act if it remains on the statute books as it is today. No new principle of issuing money is involved in this bill. Therefore I ask you to vote to discharge the committee and allow us to bring this legislation before the House at this time. [Applause.]

GOVERNMENT'S MONEY PLANT

We have in Washington, D.C., a modern, up-to-date manufacturing plant employing 4,500 people. That is the Bureau of Engraving and Printing. Each day the Bureau of Engraving and Printing turns out about 3,000,000 new bills—paper money, the same kind of money you are using. Eighty percent of all the money is paper money. The Bureau of Engraving and Printing turns out each year between three and five billion dollars of new, crisp greenback money.

It is true that a large amount of this money is for replacement, to replace old worn-out bills, but a substantial part of it is new additional money that is being printed

for the national banks when they deposit Government bonds with which to get that money.

Now allow me to explain the difference between the two plans—the payment of the certificates and the plan that the bankers have to get money from the United States.

HOW NATIONAL BANKS GET MONEY

The last night that Congress was in session in July 1932 we passed the home loan bank bill. It said that the national banks of this country in purchasing stock could deposit with the Secretary of the Treasury Government bonds, Government obligations drawing 3⅜-percent interest, and that the Secretary of the Treasury would return to those banks new money in return for those obligations. The banks use the money, except 5 percent kept on deposit as a reserve and in addition the banks pay interest on the bonds placed on deposit to secure this money that the banks have received.

I wish somebody in this House would explain to me how it is safe and sound, and you are not jeopardizing the gold standard or the sound-money system for the banks to take Government bonds, deposit them with the Secretary of the Treasury and get money in return for them, and yet it would be unsound and unsafe for other people holding Government obligations to do the same thing.

Let us compare the two plans. In each case the bonds due in 1945, or later than 1945, are deposited by the banks to get this money. In each case the Government's non-circulating obligations are converted into circulating obligations without increasing the national indebtedness one penny. The Gold Standard Act of 1900 requires that all money shall be on a parity with gold.

Therefore, all the gold in the Treasury is back of this money, and we have sufficient idle gold today to back up at least $8,000,000,000 more of currency. By backing it up I mean that we will have at least 40 percent of gold reserve behind every dollar that is issued.

QUESTIONS AND ANSWERS WHICH I HAVE PREPARED ON THE PAYMENT OF THE ADJUSTED-SERVICE CERTIFICATES

1. Q. What is an adjusted-service certificate?—A. It is a Government bond payable to an honorably discharged veteran of the World War, who served longer than 110 days, payable in 1945, or 20 years from date of issuance, in return for services rendered.

2. Q. Why did the veterans who served less than 110 days not receive such a certificate?—A. When each veteran was discharged he received $60 cash bonus to purchase civilian clothing, shoes, etc. The veteran had given his civilian outfit to the Red Cross when he entered the service. All veterans entitled to receive $50 or less were paid in cash and not given a certificate. In arriving at the amount of an adjusted-service certificate, the first 60 days were deducted on account of the $60 payment.

3. Q. How did the Government arrive at the amount of an adjusted-service certificate?—A. Each veteran was allowed $1 a day extra for each day he served in the United States, and $1.25 a day extra for each day he served overseas. John Doe, a veteran, was entitled to a credit of $460; $210 for 210 days' home service and $250 for 200 days' service overseas. The first $60 was deducted, reducing his credit to $400. Since he was being given a certificate due in the future, 20 years from date, the Government increased the amount of his credit by 25 percent for waiting, making the credit $500. He was then given a certificate for an amount equal to the $500 credit with 4-percent interest, compounded annually, for the 20 years, which amounted to $1,000. His certificate was dated January 1, 1925, and made payable January 1, 1945, or at death.

4. Q. Why did Congress agree to give the veterans this extra amount?—A. When the Selective Service Act and other various legislative proposals were pending in Congress, relating to induction and enlistment of soldiers, sailors, and marines, the question of pay was very much debated. It was understood then that the pay agreed upon by Congress could be adjusted after the emergency in the event an adjustment was due. Many Members of Congress insisted on a $3 a day minimum pay. The war cost the United States more than $36,000,000,000; all the man power in uniform received less than $4,500,000,000 of this amount, or less than one eighth of the cost of the war.

5. Q. Did others receive adjusted pay from the Government for their services after the war?—A. Seven thousand war contractors received adjusted pay amounting to billions, directly and indirectly, after the war was over; many of them had invalid and illegal contracts which were validated by Congress. They were paid in cash. The railroad owners received a guaranteed return during the war equal to the average return 3 years prior to America's entrance into the war, which was the most prosperous period of railroading in the United States; in addition, they were given $3,000,000 a day extra pay for the next 6 months after being released from Government operation. Their adjustments in pay amounted to between one and two billion dollars; they were paid in cash. There were about 500,000 Federal civilian employees during the war, all of them receiving $2,500 a year or less had their pay adjusted, and the average received $1,000 extra pay. It was paid in cash. Many soldiers worked on the public roads in America during the war, side by side with civilians who were receiving $8 a day; these soldiers received an adjustment of $7 a day representing the difference between their soldier pay of $1 a day and the $8 a day drawn by the civilians. They were paid in cash after the war. Foreign countries, our allies during the war, were loaned billions of dollars by our Government after the war was over. They used a part of this money to pay their own veterans adjusted compensation and bonuses aggregating as high in some instances as $7,290 each.

6. Q. Are the veterans asking for the payment of a debt that is not due until 1945?—A. The debt is really past due now, although payable in 1945. The adjusted-service certificate gives the veteran the $1 a day for home service and the $1.25 a day for service overseas as of January 1, 1925, thereby depriving the holder of approximately 7 years' interest. If one is entitled to a certain amount daily or monthly over a period of time, the interest should be computed by allowing full interest from a date representing a time halfway between the beginning and ending of the period.

7. Q. If the veterans are allowed interest from the time the services were rendered instead of from 1925, will they be receiving special favors from the Government?—A. No; it has always been the policy of the Government to deal with others in that manner. For instance, when the war was over, applications for tax refunds were filed by individuals and corporations, many of them claiming that they had paid too much income taxes during the war and others claiming that they failed to deduct a sufficient amount for depreciation of their facilities used in war services. The Secretary of the Treasury has refunded to large income-tax payers more than two thousand million or $2,000,000,000 from the year 1922 to the year 1929, inclusive—an amount sufficient to pay the remainder of the adjusted-service certificates in full. Much of this money was refunded or given back to them on the theory that the taxpayers did not charge off a sufficient amount for depreciation in value of their properties during the war from 1917–19. A large part of it was refunded in plain violation of the law. A large number of the beneficiaries of these large gifts were war profiteers and should have been convicted of treason for dissipating and plundering our resources during the war. When each refund was paid, the Treasury also paid the one receiving it 6-percent interest from the year it was claimed the deduction should have been made. On one refund to the United States Steel Corporation of $15,736,595.72, interest amounting to more than $10,099,765 was paid. Mr. Mellon has made large refunds to himself and to his companies, and in each case allowed 6-percent interest—not from 1925, the date of the adjusted-service certificates, or 7 years later—but from the year he claims the credits should have been given. Those who are so loud in their denunciation of the proposal to pay the veterans this honest debt have been just as silent as the tomb while these war profiteers were wrongfully getting billions of dollars from the Treasury.

8. Q. Why do you say that the certificates are past due?—A. If a holder of an adjusted-service certificate is paid the extra pay Congress has acknowledged and confessed was due him with 6-percent interest, compounded annually, from the time the services were rendered, he was entitled to an amount equal to the face or maturity value of his certificate October 1, 1931.

9. Q. Is the interest rate suggested too high?—A. No. The veterans for many years were required to pay the Government 6-, 7-, and 8-percent interest, compounded annually, for their own money, when they borrowed on their certificates. The amount charged on these high interest rates is now a part of the loans and compound interest is being paid on the amount annually. If it was fair for the veterans to pay 6-, 7-, and 8-percent interest compounded annually, for their own money, and then receive it in small dribs, certainly it is not unfair for the Government to pay the veterans the minimum amount they were charged.

10. Q. What did the veterans receive for their services during the war?—A. An enlisted man, private, received $1 a day, except for overseas service, when he received 10 percent extra, or $1.10 a day. They were permitted and in many cases required to make allotments of a certain amount of their pay monthly to their dependents; the amounts varied from $5 to $25 a month and were deducted from the amount due them. They also paid for altering and mending their clothing and shoes, barber bills, laundry bills, and other incidental expenses. In addition, the average veteran had deducted from his pay $6.60 a month for insurance; if he had anything remaining after these deductions were made, he usually subscribed for a Liberty bond on the installment plan.

11. Q. How many of these certificates are there outstanding; what is their average value, and so forth?—A. October 31, 1932, there were 3,555,058 adjusted-service certificates in force, of the face value of $3,517,857,285; 2,735,323 of these certificates have been pledged to the Government for loans. It is not known how many have been pledged to the banks; they range in value from $126 to $1,590 each, and their average value is $989.92, or approximately $1,000.

12. Q. Have the veterans obtained loans on their certificates?—A. Yes; the average veteran holding a $1,000 certificate obtained a loan of $87.99 in 1927; $26.79 in 1928; $26.33 in 1929; $24.59 in 1930; $23.50 in 1931; and the last loan in 1931 when the 50 percent loan bill passed, and the only one he will be able to get for many years, of $271.99. They have borrowed the accumulated interest on the amount due them; the principal remains intact,

if settled within same way Government settled with all others connected with the war.

13. Q. Would it not be better for the veterans to keep their certificates as a nest egg to be used in 1945?—A. If the remainder is not paid now, practically all of the remainder due will be consumed by compound interest required to be paid on prior loans. The veterans will be benefited more by substantial payments than they will be by receiving their money in dribs; it will benefit the country more.

14. Q. If the veterans are not paid now, how much will be received in future by those who have borrowed the limit allowed by law, and will continue to borrow the limit on their certificates?—A. The following statement will answer for the average veteran holding a certificate of the average value:

Tabulation to show average adjusted-service credit, average amount of certificate, and amounts of principal and interest on loans, and amounts of cash to veteran as loans and at maturity. Assuming loans by a bank in the eleventh (Texas) Federal Reserve district at the maximum interest rate chargeable from 1927 to 1931, inclusive, then a loan on Mar. 1, 1931, for the 50-percent loan value and redemption of the note by the Government in 6 months

Certificate dated Jan. 1, 1925—made payable Jan. 1, 1945, average adjusted-service credit ($1 per day home service, $1.25 overseas, and after deducting $60)	$400.00
Amount of additional 25 percent added for deferred payment from 1925 to 1945	100.00
Total amount applied to purchase certificate (no interest allowed from 1918 to 1925)	500.00
Amount of certificate issued for the above amount at 4 percent compounded annually from Jan. 1, 1925	1,000.00

Year	Loan value	Outstanding indebtedness	Interest rate	Interest due beginning of period	Cash to veteran
			Percent		
1927	$87.99	$87.99	6		$87.99
1928	120.06	93.27	6	$5.28	26.79

Total				362.03	637.97

[1] Mar. 2, 1929.

15. Q. How much money will be required to pay the remainder due?—A. About $2,200,000,000. All except about 500,000 veterans have borrowed the limit allowed by law on their certificates.

16. Q. If this amount of money is needed in circulation, would it not be better for the country to provide that amount for public buildings or highway construction?—A. No; because it would not be so well distributed in that way; it would go to certain localities and certain cities and only to people engaged in that kind of work. If it is paid to the veterans, it will go into every nook and corner of America—possibly enough to replace the money now withdrawn for hoarding—will raise the per capita circulation of money about $18, can be paid immediately without waiting for blueprints, and will place purchasing power in the hands of consumers who will put it in circulation.

17. Q. You are asking that money be distributed to one class, are you not?—A. No; every class, race, and creed; every occupation, avocation, trade, and business will get a share. It is the only plan yet suggested that will cause such a wide distribution of money to such a large number of consumers without payment of a dole.

18. Q. Are you asking for a revision of the contract?—A. Yes; in order that another part of the contract, the legislative intent, may be carried out. Congress contemplated that the veterans should be paid the adjusted pay as of the time the services were rendered and not 7 years later without interest. The report of the Committee on Ways and Means of the House reporting the adjusted-compensation legislation in the year 1924 states two objects they had in mind, as follows: "That it should represent an amount approximately equal to the difference between what the soldier received and what he should have received. That it should confer substantial benefits upon the soldiers." The first object is not carried out by paying the veterans the amount representing that difference 7 years later. The second object is not carried out if the money is paid in dribs and a large part of the principal consumed by the payment of compound interest on loans.

19. Q. Have others ever asked the Government for a revision of contracts?—A. Yes; the foreign countries that borrowed billions from us asked for a revision of their contracts. In the revision that was granted them they were given more than $10,000,000,000 by our Government. Hundreds of thousands of income-tax payers have asked the Government to revise their income-tax returns and allow them credits, refunds, and abatements. This has been done and more than 3½ billion dollars refunded in that manner. The income-tax returns were prepared wholly by the ones wanting the refunds. The foreign countries asking for a revision of their contracts have been a party to the contracts and had a voice in their making. The veteran had no other alternative than to accept the adjusted-service certificate in the form in which it was offered to him.

20. Q. Didn't the veterans agree to accept payment in 1945?—A. No. They were told what would be given them and were never asked to enter into any agreement at all.

21. Q. While a mechanic enlisted as a soldier, what was received by mechanics who stayed at home?—A. As everyone knows, they received America's all-time high wages for mechanics. Laborers were paid as much as $6 and $8 a day, and the soldier, through service, probably lost from $5 to $10 a day as compared with what he could have made had he not served with the armed forces. The adjustment that was made of his compensation was only a partial adjustment. During the war some laborers in shipyards, doing piecework, are reported to have made as high as $70 a day. Of course, such cases were exceptional.

22. Q. Did the United States pay her soldiers more than any other country engaged in the war?—A. The United States paid a private $30, while Canada paid her privates $33, New Zealand $36.60, and Australia $43.50 a month. When the corporal in the United States Army was receiving $36 a month, the Australian corporal was receiving $72.90. While the sergeant in the United States Army was receiving $38 a month, the Australian sergeant was receiving $76.50 a month.

23. Q. Is it not a fact that the 25-percent increase that the Government allowed the veteran in addition to his $1 and $1.25 a day was intended to compensate him for the loss of interest from 1917–18 to 1925?—A. No; it is not a fact, although a former national commander of the American Legion, Mr. Spafford, made this contention before the delegates at the Portland convention. He was mistaken. The CONGRESSIONAL RECORD and the reports of the committees reporting the legislation in Congress clearly disclose that there was no such intent. Congress intended, as disclosed by these records, that the 25 percent would compensate the veteran for waiting from 1925 to 1945 for his money. As positive and convincing evidence that the 25-percent increase was not to compensate the veterans for waiting until 1945 from the time the services were rendered, the ones receiving $50 or less in case he did not receive the 25-percent increase, neither did the beneficiaries of the ones who had died prior to the passage of the act receive the 25-percent increase.

24. Q. Would it not be better to permit this amount of money to be loaned to big business institutions in order that they may employ labor and get the money in circulation in that way?—A. Labor has already produced more than can be sold. Owing to the lack of purchasing power among the masses, we have underconsumption, not overproduction. Business institutions will not employ labor to produce an additional surplus. The next move toward prosperity will have to be made by the consumers. The farmers and wage earners are the principal consumers. The additional money we propose to place in circulation will cause commodity prices to rise which will enable farmers to purchase what they need, thereby creating an incentive for manufacturing industries to employ labor and produce more. The large manufacturing industries can get all the credit they want from the banking institutions when they have a real demand for goods, and unless there is a demand they will not use the credit, except to bolster up the financial position of the industry or to pay dividends.

25. Q. Will it wreck the country to make the payment now?—A. The payment can be made without a bond issue, without increasing taxes, without increasing our national indebtedness, and without unbalancing the Budget.

26. Q. What is your plan?—A. It is to have the Government convert the veterans' adjusted-service certificates—which are noncirculating Government obligations—into United States notes—Government circulating obligations.

27. Q. Will not that plan involve the issuance of fiat or printing-press money, and is it not likely to throw us off the gold standard?—A. No. Fiat money is money not redeemable or at parity with gold. It will no more be fiat or printing-press money than the United States notes, Federal Reserve notes, or national currency now outstanding, which, together, represent about 90 percent of our circulating medium at this time. We have in this country today more than 100-percent gold to back up all paper money outstanding, much more than any other country on earth. A gold reserve of 40 percent is considered ample. Bank deposits are backed by less than a 2-percent reserve. The 40-percent gold standard is not retarding our country; it is the treble-gold standard forced upon us contrary to the policy of our Government. Since we have three times as much gold as we need to back our paper money, we can safely issue the amount of money necessary to pay the veterans in cash without affecting the gold standard. The Gold Standard Act of November 14, 1900, directs the Secretary

of the Treasury to keep all forms of money at parity with gold and authorizes him to issue 3-percent gold bonds for this purpose.

23. Q. Is there a precedent for issuing such money?—A. Yes; the last night Congress was in session, July 16, 1932, a law was enacted, which was approved by the President, allowing national banks to deposit with the Secretary of the Treasury Government bonds to the amount of $1,000,000,000, drawing 3⅜-percent interest, and receive in return therefor currency equal to the value of the bonds so deposited. The banks will get the use of the currency and also receive interest on the bonds deposited to secure the currency. The banks have been getting money from the Government in this way for the last 68 years—since 1864. The Glass-Steagall bill contains the same principle we are endeavoring to invoke.

29. Q. Compare your plan with the plan used by the national banks to obtain money from the Government on Government obligations under the law passed on July 16, 1932.—A. In each case a Government obligation, payable in 1945 or in the future, is deposited with the Secretary of the Treasury to authorize the issuance of money—a circulating Government obligation. In neither case will the total indebtedness of the Nation be increased. In neither case will there be a specific gold reserve set aside as a fractional coverage to redeem the paper money. We have, however, sufficient idle gold to establish such a coverage and the gold-parity act of March 14, 1900, in itself provides that all money issued is legally redeemable in gold. The Bureau of Engraving and Printing is running every working day and often overtime in order to print money to replace worn-out bills and new money for the national banks. The Bureau of Engraving and Printing has 4,500 employees and prints a billion new bills a year. The money to be issued to the veterans will be the same kind of money. If it is a fact that the paper money printed for the national banks is sound because it is secured by Government obligations, then the paper money to be issued to the veterans will be sound for the same reason. An unlimited amount of paper money cannot be so issued on the security of Government obligations, but we know that an amount sufficient to pay the veterans' certificates can be safely issued on the security of bonds based on these certificates without the setting aside of a specific fractional coverage of gold with which to redeem it. So far as redemption in gold is concerned the paper money to be issued for the veterans is on a par with that which is now being issued in large amounts for the national banks. It costs the Government tens of millions of dollars a year to pay interest on the Government bonds which the national banks deposit to secure the paper money they obtain from the Government. The Government will not be required to pay any interest on the bonds deposited to secure the paper money which is to be issued for the veterans. This will save the Government millions of dollars annually. In addition, the people will have the use, in a circulating medium, of nearly $2,000,000,000 upon which they will not be obliged to pay interest. Three hundred and forty-six million dollars and more of the paper money which was issued during the War between the States is still outstanding, and no one has been paying interest on it. The fact that the people do not have to pay interest on that paper money has saved them an outlay through the years of over half a billion dollars.

30. Q. Why do banks object to the payment of the adjusted-service certificates in full now?—A. The reason is obvious. At this time the banks are receiving interest from the veterans on their adjusted-service certificates. There is one bank in St. Paul, Minn., that has loaned an enormous sum of money on adjusted-service certificates. In fact, it has loaned a sufficient amount to enable the bank to construct two 30-story office buildings and pay for them with the annual interest installments that the veterans must make on their adjusted-service certificates, which the bank holds, between now and 1945. Many other banks are also profiting through these loans. Further, the banks do not want money put into circulation upon which no interest is being paid while it is outstanding. If the $2,200,000,000 are put into circulation like we propose, no one will be drawing interest on that money while it is outstanding. Whereas if the banks get new money from the Government in exchange for Government obligations and lend it to the people, someone is paying interest on every dollar of that money all the time that it is outstanding.

31. Q. Would paying the certificates in full now with new money help balance the Budget by eliminating the amount set aside annually to retire the certificates in 1945?—A. The country really needs this additional money in circulation, and I do not believe that it will ever have to be retired. As the country increases in wealth, population, and national income, the money should increase per capita. The country's wealth, population, and national income have increased the last 1 or 2 decades to the extent that more than $2,000,000,000 is needed in circulation, and it will not have to be retired. That being true, Congress can eliminate from its annual Budget the $112,000,000 payment each year, which now goes into a sinking fund to retire these certificates by 1945. However, if it is desired to continue this sinking fund and retire the certificates in 1945, the Government will not be required to expend one penny more between now and 1945, if the certificates are converted into new money as we propose. The only difference, after the conversion, will be that the money will be retired in 1945 and not continued as a part of the circulating medium.

32. Q. Texas is an average State. What is the per capita circulation of actual money in Texas at this time?—A. The latest State comptroller's report shows that all of the 1,200 State and national banks of Texas have in their vaults less than $28,000,000, which represents all the money in circulation in Texas except the amount in the tills and pockets of the people, which has been estimated by Mr. George W. Armstrong, of Fort Worth, to be about $3,000,000 or 50 cents per capita. Therefore, there is only about $5 of money per capita in circulation in the State of Texas. It is less than any civilized country in the world ever had before. This same per capital ratio prevails in practically all of the other States in the Union. It is absolutely impossible to restore prosperity without increasing the volume of money in circulation, and the bill to pay the veterans is the best measure yet proposed for that purpose.

33. Q. If the certificates are paid now, can the Government be saved annual expenses in administration of the act?—A. Yes; it is now costing the Government from a half million to three-quarters million dollars a year to administer the Adjusted Compensation Act. If the certificates are paid now, this expense can be abolished, thereby saving the Government many millions of dollars between now and 1945.

34. Q. Is the Government now making a profit on the interest charged on adjusted-service certificate loans?—A. Yes; the Government is borrowing all the money it wants for 13 to 20 cents per hundred dollars a year. The veterans are being charged compound interest at the rate of $3.50 per hundred dollars a year. They have been charged as high as 6- and 8-percent interest, compounded annually.

35. Q. Were the veterans given free war-risk insurance?—A. No; but they carried war-risk insurance with the Government by paying premiums monthly out of their pay. The average premium was $6.60 a month, which was deducted from the soldier's $30 a month. Much of the Government's cost of veterans' relief at this time is on account of insurance benefits paid to veterans; a benefit that they are entitled to receive because they paid for it with their own money.

36. Q. Is it likely that $2,200,000,000 will be too much money to add to the circulating medium at this time?—A. President Hoover, in his speech of acceptance, stated that $1,000,000,000 in gold had been withdrawn in the preceding year by Europe, and $1,600,000,000 of currency had been hoarded. The money to pay the soldiers would not fully replace this sum or put our circulation to normal. The people owe debts aggregating $203,000,000,000; these debts will be made easier to pay.

37. Q. The charge is made that your proposal represents uncontrolled inflation. The argument is made that if the money is issued under your plan that there will be no way to control it in the event of inflation or danger of inflation. What is your answer to that charge?—A. The original bill, H.R. 1, as amended by H.R. 7726, did not contain a provision for controlling the expansion of the currency in the event the extra money placed into circulation should cause a fear of inflation. However, former United States Senator Robert L. Owen, a former national banker and coauthor of the Federal Reserve Act, drafted an amendment for the Committee on Ways and Means, which was adopted by the House of Representatives, which provided that in the event there should be in the minds of the Federal Reserve Board danger of inflation at any time after the veterans' money was placed into circulation, that the Federal Reserve Board should have the right and authority to exchange Government bonds for any part of this money for the purpose of withdrawing and canceling it. This Owen proposal converted the bill into what was known as a "controlled-expansion measure" and answered every objection urged by the anti-inflationists. It is not thought that the Federal Reserve Board will ever have occasion to exercise this power, but it is given to it in order that it may be exercised if needed.

38. Q. Where does the responsibility for the issuance of money rest?—A. Under our Federal Constitution sole authority and responsibility rests with the Congress; section 8, article I, devoted to the duties of the Congress, reads in part: "To coin money and regulate the value thereof and of foreign coin."

39. Q. In what respect has the Congress departed from the above?—A. Under the Federal Reserve laws the issuance of currency is delegated to privately owned and, with the exception of governmental supervision, privately controlled banks.

40. Q. Is such private ownership and control objectionable?—A. Yes; in violating both the letter and the spirit of the Constitution in creating an agency whose interests and profit incentives are at variance with the public's; in the unwarranted expansion of credit banks are permitted to create under the law, the chief source of all inflation and resulting deflation. This has been frequently pointed out by J. S. Cullinan, of Houston, Tex.

41. Q. Why is such expansion of credit undesirable?—A. In the unjustifiable amount of interest collected by the member banks, the law permitting them to extend credit and collect interest on $10 or more for each dollar of gold deposited with the reserve banks. In their control over the property or the securities placed with the member banks as security or collateral by borrowers, and the impossibility of all borrowers meeting their obligations or protecting such property or securities when, through lack of confidence or other causes, deflation of credit occurs.

42. Q. How can such conditions be prevented?—A. By restoring the control of the issuance of money, its expansion or contraction, to the Government, where, under our Constitution, it properly belongs.

43. Q. Should the basis of issuing money be changed?—A. Yes; the volume of money should be regulated to conform with national wealth which it represents and national income which as the medium of exchange it is designed to facilitate, in addition to the existing basis—population.

44. Q. Should the volume of credit that may now be issued by member banks under the law continue while the volume of currency is being increased?—A. No; as non-interest-bearing currency is being expanded to meet governmental and individual requirements, the privilege extended by Government to banks of issuing interest-bearing credit should be contracted.

WORLD'S GREATEST RACKET

The greatest racket in the world today is the abuse of Government credit by powerful bankers for the benefit of themselves, common swindlers, and foreign countries, to the detriment and impoverishment of the American people, who build our country in time of peace and who save it in time of war.

Our country is being reduced to barter. Wooden money is even being used. A sufficient medium of exchange must be provided for the convenience of the people.

We need $2,200,000,000 more money in circulation. It cannot be distributed in a better way than by means of the plan offered to pay the debt due the veterans.

HOW MUCH WILL EACH STATE RECEIVE AND HOW MUCH WILL IT COST THE TAXPAYERS OF EACH STATE?

The following table in connection with the footnotes is self-explanatory:

(1) Residence of veterans	(2) Number holding certificates	(3) Remainder due on certificates	(4) Per capita payment to each State
Alabama	49,391	$29,876,840	$12.00
Arizona	10,555	7,411,302	17.00
Arkansas	42,576	25,373,058	13.68
California	194,607	136,500,005	17.50
Colorado	33,265	21,514,464	20.77
Connecticut	42,765	29,902,203	18.61
Delaware	4,743	3,918,525	16.44
District of Columbia	27,460	18,198,685	37.38
Florida	38,260	24,469,835	16.59
Georgia	56,882	35,151,645	12.10
Idaho	13,138	8,248,500	18.53
Illinois	245,900	157,543,750	20.60
Indiana	92,813	59,254,650	18.29
Iowa	77,498	46,574,480	18.85
Kansas	55,456	34,934,250	18.57
Kentucky	61,848	38,064,000	14.56
Louisiana	52,321	31,168,150	14.83
Maine	20,791	13,446,550	16.89
Maryland	46,918	31,140,525	19.09
Massachusetts	133,133	92,376,144	19.38
Michigan	130,120	85,407,400	17.64
Minnesota	83,049	53,105,260	20.67
Mississippi	35,736	21,456,974	10.68
Missouri	108,464	67,608,904	18.62
Montana	17,580	11,424,128	21.25
Nebraska	39,016	24,227,271	17.58
Nevada	2,978	1,988,889	21.84
New Hampshire	12,011	8,084,753	17.38
New Jersey	113,024	77,317,513	19.13
New Mexico	9,809	6,257,550	14.78
New York	366,236	245,948,177	19.10
North Carolina	62,106	38,794,117	12.24
North Dakota	15,705	9,738,745	14.30
Ohio	177,390	117,878,406	17.73
Oklahoma	65,231	39,815,376	16.62
Oregon	34,349	22,978,122	24.09
Pennsylvania	252,388	172,888,542	17.95
Rhode Island	20,186	13,731,012	19.97
South Carolina	34,710	21,349,617	12.28
South Dakota	22,054	13,074,391	18.87
Tennessee	57,231	36,318,844	13.80
Texas	144,453	95,655,800	16.42
Utah	13,969	8,930,767	17.58
Vermont	8,004	5,604,408	15.58
Virginia	61,300	41,006,200	16.93
Washington	54,666	37,874,647	24.22
West Virginia	42,004	25,976,846	15.02
Wisconsin	85,481	52,438,873	17.50
Wyoming	10,794	7,144,348	31.23

Column 1. Residence by States of all veterans holding adjusted-service certificates.
Column 2. Number of veterans in each State holding certificates.
Column 3. After deducting all prior loans, the amount remaining due veterans of each State if full payment bill is passed by Congress.
Column 4. Full payment will average per person, or for every man, woman, and child, in the State according to the 1930 census. The approximate amount of money that will be put into circulation in any city, county, or locality may be arrived at by multiplying the population by the per capita payment for that State.

I compiled this table from information received from Government departments.

Mr. Speaker, I reserve the balance of my time.

Mr. TREADWAY. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina [Mr. DOUGHTON].

Mr. DOUGHTON. The bill which the pending motion seeks to bring before the House was the first bill introduced in the Seventy-third Congress, having been introduced on the opening day of the special session, on March 9, 1933.

As you will recall, Congress was called into special session for the purpose of enacting emergency legislation asked for by President Roosevelt.

Congress remained in session for this purpose until June 16, 1933, or a total of 84 legislative days. During this period there were a total of 166 bills referred to the Committee on Ways and Means, as also 24 joint and concurrent resolutions.

The committee immediately began work, and on March 14, 1933, reported H.R. 3341 to the House, to provide revenue by the taxation of certain nonintoxicating liquors, better known as the "beer bill", and by reason of which the Treasury received, from March 22 until the end of the year, more than $112,000,000.

On April 18, 1933, the committee reported H.R. 5040, a bill to extend the gasoline tax and to modify postage rates.

On May 18, 1933, hearings were begun on the national industrial recovery bill. This bill was reported to the House on May 23 and passed on May 26, 1933.

On June 6, 1933, another administration bill was reported to the House by our committee, to validate collection of certain internal-revenue taxes.

The committee also reported a bill relating to extension of time within which American claimants might make application for payment under the Settlement of War Claims Act of 1928.

These bills were before the House 12 of the 84 legislative days of the session and, of course, were before the committee many additional days.

Hearings were also conducted by the committee on June 1 and 2 on the conservation of petroleum.

From the above it will be seen that the committee's time was completely occupied during the special session, and in addition it must be recognized that other committees of the House were likewise engaged on matters of an emergency nature, and the time of the House was almost completely occupied with emergency bills, and, as a matter of fact, the work of the special session was almost entirely confined to the enactment of the emergency program of the administration.

Prior to the convening of this session, as you all know, the Committee on Ways and Means met and conducted hearings on H.R. 6131, to raise revenue by the taxation of liquors. This was likewise a most important bill, and its speedy enactment saved the Treasury many millions of dollars revenue.

Hearings were also conducted prior to the convening of this session on H.R. 7835, the revenue bill of 1934. This was likewise a most important bill and was under consideration by the committee almost daily from December 15, 1933, until its passage on February 21, 1934.

On February 20, 1934, one day prior to the passage of the revenue bill, the motion now before the House was entered on the Journal and referred to the Calendar of Motions to discharge the Committee on Ways and Means from the further consideration of H.R. 1, to provide for immediate payment of the veterans' adjusted-service certificates.

I submit to the Membership of this House, and especially the proponents of this measure, that the Committee on Ways and Means in no way merits the slightest criticism, especially in view of the fact that at no time during this session has any proponent of this bill filed any request for a hearing on the same. In my opinion, the Committee on Ways and Means would have been remiss in their duty, and would have merited just criticism from Congress and the country had they failed to give attention and consideration to the matters I have previously referred to. So far as I am concerned, speaking for myself alone, I have no objection to the bill being considered by the House.

Mr. PATMAN. Mr. Speaker, I yield 5 minutes of my time to the gentleman from Minnesota [Mr. LUNDEEN], to yield to anyone he desires to yield to.

Mr. LUNDEEN. Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts, the able Chairman of the Labor Committee [Mr. CONNERY].

Mr. CONNERY. Mr. Speaker, we have paid the railroads, we have paid the war contractors, we have paid the draft dodgers, we have paid the profiteers, we have paid the stay-at-homes, and now let us pay the veterans their long-overdue just debt—these veterans who saved the country in time of war, and who now, in time of peace, are the bulwark of the American Nation against fascism, against communism, against naziism, and all the other isms that menace the foundations of our democratic form of government. [Applause.]

Let us pay this long-overdue debt and put $2,400,000,000 in circulation in 48 States of the Union, not in the hands of the bankers, not in the hands of the money changers, but in the hands of the people, the people who need the money, and thereby bring real prosperity to the Nation. [Applause.]

Mr. LUNDEEN. Mr. Speaker, I yield to the gentleman from Wisconsin [Mr. WITHROW].

Mr. WITHROW. Mr. Speaker, the immediate cash payment of the adjusted compensation is a question of vital importance. I am confident that the bill now being considered by this body will be passed by an overwhelming majority. I believe that it will also be passed by the Senate and I am hopeful that it will be signed by the President. To date our President has been hopelessly misinformed and ill-advised regarding veterans' legislation.

NATION NEEDS PURCHASING POWER

The chief obstacle now hindering our national recovery is the lack of purchasing power. The great majority of our citizens have no money with which to buy the many things they need.

In order to overcome this difficulty the administration has taken two major steps. The first was the C.W.A. While many injustices arose in the administrative details of the C.W.A., still it has been the most hopeful thing developed thus far. The C.W.A. put cash money directly in the hands of thousands of people who had an immediate need for the money and who immediately returned it to circulation.

The second step adopted by the administration was the liquidation of bank credits. The administration has "pumped" hundreds of millions of dollars into the banks on the theory that by placing money in the banks it would be available to the people. This policy has been a colossal failure. The banks got the money all right, but there the money stays. Anyone who believes that money is available in the banks should go to any bank and try to secure a substantial loan. The money supplied to the banks is still locked up in the bank vaults. The people of the country have received no benefit from this money and it has not helped to place our Nation on the road to recovery.

C.W.A. PROGRAM NEARING END

We find, then, that the C.W.A. program aided recovery by placing money directly in the hands of the people. The liquidation of banks has not helped because it did not place the money directly in the hands of the people.

We have definitely embarked upon a program of currency expansion. The object of this program is to make our monetary system the servant of the people rather than the people servants of the monetary system.

The program of currency expansion will not be successful unless we place the new money directly in the hands of the people. Our recent experience has proved that if the money is given to the banks the people never see it again. But if we place it directly in the hands of the people, the purchasing power thus created helps the entire country.

We are now nearing the end of the C.W.A. program. We need something that will take its place. The adjusted-compensation payment will take its place and will be a long step toward recovery.

IF THE ADJUSTED COMPENSATION IS PAID

First. More than $2,200,000,000 in cash will be distributed throughout the entire country. This money represents purchasing power. Every dollar of it will change hands many times, so that it will result in from twenty to fifty billion dollars' worth of business in the United States. This is enough to place us far on the road to recovery.

Second. It will require no increase in taxes and no bond issue of any kind. In fact, it will save the Government more than a billion dollars, or $112,000,000 per year for 12 years until 1945, when this debt to the veterans would normally have to be met.

Third. It will save the Government more than $10,000,000 in administrative expenses between now and 1945.

Fourth. It will pay a just, honest, and acknowledged debt of this Government to its veterans.

Fifth. It will save thousands of veterans from losing one half of the value of their adjusted-compensation certificates. Most veterans have borrowed one half of the face value of their certificates. The majority of these men have been unable to pay the interest on this loan. The result is that by 1945 the interest charges on these loans will have eaten up the remainder of the certificates.

Sixth. The immediate payment of the adjusted compensation will reduce the public debt. The money owed to veterans is a part of the public debt of this country and by paying the adjusted compensation the public debt is reduced by a like amount.

Seventh. The money used to pay the adjusted compensation would be sound money. The Treasury now holds enough gold to issue $8,000,000,000 in new currency with adequate backing of 40 percent in gold. Only $2,200,000,000 is required to pay the adjusted compensation.

EVERYONE WILL BENEFIT

The payment of the adjusted compensation will benefit not only the veteran but the entire Nation. The veteran and his family will receive the benefit of the money first, but this is as it should be, as each veteran earned his share of the adjusted compensation at the risk of his own life in the highest service of his country. Each veteran has a family and dependents. The money will do him no good if he keeps it in his pocket. He will use it to pay debts and buy goods. He will buy food and every farmer will benefit. He will buy other goods and every merchant will benefit. When goods are consumed new goods must be manufactured and men will be reemployed.

WIDE DISTRIBUTION

There are veterans in every nook and corner of the country. To be exact, there are 3,545,284 holders of adjusted-compensation certificates. Of these, 3,019,382 have already borrowed half of the face value of their certificates. The balance due to veterans, after deducting the amount of loans, is approximately $2,200,000,000.

BENEFIT TO OUR DISTRICT

Here is what the cash payment of the adjusted compensation will mean to the Third Congressional District of Wisconsin, which I represent. The following amounts of cash will go into the counties of the Third District: Crawford County, $299,373.04; Grant County, $686,286.96; Iowa County, $357,495.76; Juneau County, $307,989.76; LaCrosse County, $971,477.20; LaFayette County, $332,698.16; Monroe County, $512,703.76; Richland County, $348,326.00; Sauk County, $571,415.20; Vernon County, $509,100.08.

Remember that this money changes hands at least 10 times in each community and in each county. It is conservative to multiply these figures by 10 to determine the total benefit each county would receive by the payment of the adjusted compensation.

PAY DEBTS, BUY GOODS, GET NEW START

The distribution of purchasing power effected by the C.W.A. had a very beneficial effect to the entire Nation. The C.W.A. paid small weekly wages which were sufficient only to pay living expenses. The payment of the adjusted compensation will place several hundred dollars in cash into the hands of each veteran. The amount is determined by the length of time each veteran served at home and abroad.

This bill would pay the adjusted-compensation certificates in a lump sum—a sum sufficient so that most veterans could pay their debts, buy the many things they need, and get a new start. The amount of business created would give em-

ployment to hundreds of men in every locality so that millions of people through the entire Nation would also be given a new start.

NOT A NEW PROPOSITION

Gentlemen, this is not a new proposition. I and other Members of this House have been urging the payment of the adjusted compensation for the past 3 years. We have given it mature study and consideration.

In former years all manner of arguments were used against the payment of the adjusted compensation. None of those arguments now hold good. We have embarked upon a program of national recovery. The payment of the adjusted compensation is the most important step in that program. It must not fail.

NO LOGICAL REASON FOR FAILING TO PAY THE ADJUSTED COMPENSATION AT THIS TIME

No one can logically justify the failure to pay the adjusted compensation at this time. The Government has plenty of money. The veteran needs the money, and the Government owes it to him. The country needs purchasing power, and the Government is in position to supply adequate purchasing power through the payment of the adjusted compensation.

NO RED TAPE OR FAVORITISM

In the payment of the adjusted compensation there will be no red tape or favoritism. In this bill we are distributing purchasing power by paying a debt for service rendered. There is no question as to who shall receive the money. It is a program which can be put into effect immediately. The money could be placed into the hands of every veteran within a week after enactment, and each community would immediately begin to feel the effects of that purchasing power.

VETERAN HAS BEEN POORLY TREATED

I resent the kind of treatment which has been accorded to the veteran. He has rarely received even justice from his Government, and what small benefits he has received have largely been taken from him by the enactment of the so-called "Economy Act."

We now have the opportunity of paying our debt to the veteran. We have the opportunity of paying this debt in a manner which will prove to be the salvation of our country. By the payment of the adjusted compensation the veteran will again go "over the top" to save his country from economic ruin, just as he went "over the top" to save it from physical ruin in 1918.

This is not a measure for the relief of veterans alone. It is a measure for the relief of our entire Nation. It is a sure road to recovery. [Applause.]

Mr. TREADWAY. Mr. Speaker, first I wish to speak about the Committee on Ways and Means. The chairman, the gentleman from North Carolina [Mr. DOUGHTON], has explained that situation quite in detail, but possibly I might add a word to it. The bill which you are asked to discharge the committee from considering is H.R. 1, introduced March 9, 1933. The special session of Congress which opened on March 9, 1933, was called for the purpose of putting into effect the program of the new President, Mr. Roosevelt, who was inaugurated 5 days previous to that date. Included in the large amount of business that the President of the United States put before the Congress for consideration were measures that were referred to the Committee on Ways and Means. We worked diligently upon the bills that he sent us, and brought in reports on his measures. Other committees did the same thing. When the special program of the President of the United States was completed he authorized the Congress to adjourn. That is what he called the special session of the Seventy-third Congress for, namely, to write into law his new requests. No reference whatever to H.R. No. 1 was included in that program. That is the picture so far as the special session is concerned.

On the first day of the regular session, January 3, the gentleman from Minnesota [Mr. LUNDEEN] rose in his place and stated that there was a petition on the Speaker's desk for the discharge of the Committee on Ways and Means from the consideration of H.R. 1. Bear in mind, that was the first day of the session. I might inform that gentleman and others that the Committee on Ways and Means, through a subcommittee, as well as through the full membership of the committee, had been diligently at work day and night from the middle of October in preparing a new tax bill, at the request of the President of the United States. Whatever your views on this measure may be, I submit in all fairness to that committee at least it should have an opportunity to consider such an important measure, a measure that will make new currency in some way or other, I do not know how, for $2,400,000,000. Should not your financial committee at least be given an opportunity to consider it?

Mr. Speaker, I did not suppose it would ever be encumbent upon me to uphold the actions of a Democratic President, but it becomes encumbent upon me to read to this House the following, with the permission of our distinguished Speaker.

THE WHITE HOUSE,
Washington, February 26, 1934.

Memorandum for the Speaker.

DEAR HENRY: Mac has shown me your letter of February 21. Naturally when I suggested to you that I could not approve the bill for the payment of the bonus certificates I did not mean that I might let it become law without my signature. I don't do things that way. What I meant was that I would veto the bill, and I don't care to whom you tell this.

Let me know your thought on the next step.

F. D. R.

Mr. HOEPPEL. Mr. Speaker, will the gentleman yield?

Mr. TREADWAY. No; I cannot yield.

There is all the testimony I need. I have voted with the President, the President of our United States, although he does not belong to my party, in a good many instances, and I intend to do so on this measure. I hope the good sense of the House, particularly with such a majority as he has of his own political following, will follow his good advice as presented to the House in this memorandum to Mr. Speaker RAINEY.

The Ways and Means Committee should not be discharged from consideration of this bill, and the message from the President should be heeded.

I yield back the remainder of my time and ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. Is there objection?

There was no objection.

Mr. LUNDEEN. Mr. Speaker, I yield such time as he may deem necessary to the gentleman from Michigan [Mr. WEIDEMAN].

Mr. WEIDEMAN. Mr. Speaker, the Democratic Party of the State of Michigan in convention assembled pledged that it and its Representatives in this House would support a bill for the immediate payment of the adjusted-service certificates as provided for in the Patman bill, as did the Democratic convention in Wayne County, and I propose to keep faith with the people who sent me here, and also to do that which is stated in our party platform of 1932:

We believe that a party platform is a covenant with the people to be faithfully kept by the party when intrusted with power.

A PARTY PLATFORM IS A COVENANT WITH THE PEOPLE

The Democratic platform adopted at the convention at Chicago condemns the indefensible expansion and contraction of credit for private profit at the expense of the public. At the present time it is well nigh impossible for legitimate business and industry to secure commercial loans of any kind to enable business to carry on. The pocket money of the people has been withdrawn from free circulation and we are in the midst of a money panic, because the expansion or contraction of money is entirely in the hands of the private bankers, local, State, and international, all bending to the superwill of the Federal Reserve monster, a private-banking institution, owned and controlled by the Money Trust.

The owners of the Federal Reserve System can contract or expand the currencies and moneys of the United States at will, thereby causing feast or famine.

After every panic or depression the rich get richer and the poor get poorer. If you do not agree with this I ask

how many of you lost your homes during the last 4 years; how many of you citizens of this country lost your furniture because you could not keep up the payments? How many of you farmers have lost your farms through foreclosure? How many of you have lost your life savings through the closing of the banks? How many of you have lost your businesses? How many of you had to sell your diamonds and other security to get enough cash so you could feed and clothe your family? How many of you are using automobiles 6 and 7 years old because you cannot make enough money to feed and clothe yourselves, let alone buy a new car?

And was it someone who was poorer than you who foreclosed on your home or farm, who repossessed your automobile or furniture? Of course not. The money lords called in their notes and mortgages and loans; and your local banker was forced to call in his loans and mortgages of various sorts.

And you men who were formerly independent merchants and driven out of business, were you driven out of business by another small merchant? Of course not. The chain stores, which are all controlled from Wall Street, drove you out of business, and subjected our people to an absentee ownership of business places. The more small farmers who lose their farms the greater the concentration of land in the hands of the absentee landlords. This alienation of the farmer from his land is developing a dangerous situation in the United States as witnessed by the riots and bloodshed in the Middle West and the Northwest, caused by farmers, the backbone of this country, seeking to keep their hold on that land which they had for years tried to maintain and develop. A condition is not natural which gives hundreds of thousands of acres of the most fertile land in our country over to the ownership of bankers and insurance companies. The concentration of the ownership of land must be stopped in the same manner as the concentration of money and industry must be stopped.

The Congress of the United States has been most liberal to the bankers of this country. It allows them to draw interest of 4¼ percent on Government bonds and then again deposit the same bonds with the Government and secure Federal Reserve notes at a cost of one thirtieth of 1 percent, to again loan out to the people at an interest cost, for which the private banker may charge what he desires. The Congress has given the Money Trust such laws as it wanted, hoping that it would turn that money that it received in pursuance to those laws back to the use of legitimate industry. The bankers have absolutely prevented the return to prosperity. In the Dallas Bank of the Federal Reserve we find that there is outstanding in bills discounted the total of $241,000, while the same bank has total reserves of $88,535,000.

Now, just what has this to do with the passage of H.R. 1, the payment of the adjusted-service certificate? If the adjusted-service certificates are paid out as provided in H.R. 1, there will be distributed throughout the country the sum of about $2,200,000,000. Every nook and corner of every county in the United States will receive some of this money. My own county in Michigan will receive $33,321,007.44. This money, under the provisions of the Patman bill, will be backed by the gold reserve of the United States. Under the present condition of the Treasury it will not be backed by a 40-percent gold reserve, as all our sound-money advocates demanded, but will be backed by approximately a 100-percent gold reserve. There is approximately five and one half billion dollars of money in circulation in the United States now, and there is approximately seven and one half billion dollars in gold in the Treasury of the United States or under its control, according to the official report dated January 31, 1934, issued by the Federal Reserve bank and the Treasury of the United States. These United States notes to be issued by the Government of the United States will be noninterest bearing, giving to the veteran the same privilege of securing money on his United States bond as is enjoyed by the private bankers and the Money Trust.

IT WILL BE SAME MONEY AS YOU NOW USE

The money paid to the veteran will be the same kind, wording, color, size, form, and denomination as the money you use every day. It will form part of the circulating medium of the country, and will be lawful money of the United States and maintained at a parity value with the standard value fixed by law. Such notes held by any national banking association or Federal Reserve bank may be counted as part of its lawful reserve.

PATMAN BILL PROVIDES FOR ABSOLUTE CONTROL OF EXPANSION OF CURRENCY

The bill provides that when the index number of the wholesale all-commodity prices rises above the index average of 1926 the Secretary of the Treasury may contract the currency in five ways:

First. Abolish circulation privilege extended to certain bonds under section 29 of the Federal Home Loan Bank Act, and retirement of such bonds as security for circulating notes.

Second. Termination of the issuance and reissuance of national bank circulating notes, and retirement of such notes from circulation.

Third. Termination of the issuance and reissuance of Federal Reserve notes secured by direct obligations of the United States—interest-bearing bonds.

Fourth. Termination of the issuance and reissuance of Federal Reserve notes secured only by gold or gold certificates.

Fifth. Termination of the issuance and reissuance of Federal Reserve notes secured by notes, drafts, bills of exchange acceptances, or bankers' acceptances which are not issued in direct benefit to commerce, industry, and agriculture.

THE VETERAN GETS HIS CASH NOW

The passage of this bill and its enactment into law will give the veteran the amount due in cash now. It will only give him the same privilege as enjoyed by the bankers; it will give him the same kind of money as he now has; it will buy just as much goods as the money he now has in his pocket—if any; it will buy just as much of the same kind of goods that the money we now have; it will not be fiat or printing-press money as it will be backed up by the gold reserves of the United States of America, and on the basis of the official Treasury reports and the reports of the Federal Reserve banks it will be backed up by not only the usual gold backing of 40 percent but it will be backed up by approximately 100 percent gold according to the reports of the United States Government.

PAYMENT OF ADJUSTED-SERVICE CERTIFICATES A REAL ECONOMY FOR THE GOVERNMENT

The payment of the adjusted-service certificate will be a real economy for the people of the United States and not an economy bill for the bankers. The people will not be forced to pay interest on the money used to pay the certificates; we will issue the money to the people on the same terms we issue it to the bankers.

It will save the Government $112,000,000 a year for 12 years; it will save the Government more than $10,000,000 in administration expenses between now and 1945; it will pay the debt heretofore confessed due to the veteran; it will save the equity of the veteran who borrowed on his bond, as the piling up of compound interest on those certificates on which loans were made will eat up the balance due which will go to the international bankers who finance nations for their own private gain.

NO INCREASE IN TAXES NECESSARY

Under the provisions of the Patman bill there will be no necessity of any increase of taxes; there will be no necessity for a bond issue upon which the people would have to pay enormous interest charges.

There is 7½ billion dollars in gold in the general fund of the United States Treasury. This is sufficient to issue $15,000,000 of currency without reducing the gold reserve

to below 40 percent; the accepted standard of safety accepted by all the nations of the earth, and even the hard-shelled gold-standard advocates.

PAYMENT OF ADJUSTED-SERVICE CERTIFICATES WILL HELP PRESIDENT PUT OVER RECOVERY PROGRAM

The payment of the adjusted-service certificates will help put over the recovery program because it will put purchasing power into the hands of citizens in every nook and corner of the country. It will put it in the hands of men who will not hoard it but will use it to help empty the shelves of the butcher, the baker, and the candlestick maker. Debts will be paid, taxes will be paid, and this money remaining in circulation will pump the lifeblood of a people—money—back into their economic system.

It is the patriotic duty of every Member of the House and Senate to extend the same privilege to the veteran as he has extended to the banker. You help the veteran and he will help his fellow man. The veteran is not selfish. He is not the creator of panics. He has been the ways and means through which the war millionaire, who is now trying to keep the veteran down, was able in the name of patriotism to accumulate his war-time fortune. The war contractors received their adjustment of pay in 1925 in cash, and now they would deny it to the veteran.

How the propagandists built up the glories of war in 1917. How they cheered and clapped with their silk-gloved hands as the boys marched. They were heroes then. They were heroes as long as they were fighting amid the slime, filth, and vermin of the trenches. They were heroes then, when they were on the receiving end of bombs, shells, shrapnel, and poison gas. They were heroes, those boys in the prime of life who gave sturdy, clean, active bodies to their country and are now wasting away in veterans' hospitals with racked and ruined bodies, suffering the tortures of hell. They were heroes then, the same boys who are now shrinking and wasting away in the West with tuberculosis. They were heroes then, those boys who faced fire and flame, shot and shell, and poison and gas, those boys who now as men are manacled and chained in the hospitals for the insane.

And yet some men will not give the veteran what Uncle Sam said was due to him in 1925. Industrialists and bankers were paid their accounts in full in 1925, 7 years after the war, but they say the soldier debt is not due yet; he must wait until 1945, when the interest will have eaten up the whole of the balance due. Give the soldier the same break you gave the banker; the 7 years are up—pay now.

The time has now come for our confessions. I am ready to make mine now and vote for the immediate payment in cash now, and put my shoulder to the wheel of recovery and pass on to our heroes a little of the sunshine that they have been so long deprived of, and they will do a better job of helping their fellow man than those who would keep some of our veterans in starvation when the veteran has an earned pay check that can be cashed now.

There is no glory in war. The power of propaganda is mighty, but I hope that the rising generation will remember the lesson of the World War when the flower of the land, the youth, thought they were fighting to save the world for democracy, and woke to find out that they fought to make it safe for the rulers of the world, the international bankers. We are paying tribute to them now and will continue to do so in the future.

It is a grand old flag under which we live; long may it wave in peace. May we never again stick our nose in someone else's business and sacrifice the flower of our land. We cannot pay the bonus, say some, but we canceled $11,000,000,000 of war debts due us from European nations and saddled the debt on the back of the American taxpayer.

Today and now is the time to declare under which standard we will fight, that of the pirate banker or the patriot.

The SPEAKER. The time of the gentleman from Michigan has expired.

Mr. LUNDEEN. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin [Mr. BOILEAU].

Mr. BOILEAU. Mr. Speaker, the amount that we are to pay the soldier is not a bonus, but an adjusted compensation, and the full face value of these certificates are now past due if we are to pay the veteran compound interest the same as we did war profiteers and others who have had claims against the Government. We can pay for these adjusted-compensation certificates at this time, not through the issuance of bonds but through the issuance of currency, which will put more money in circulation, increase commodity prices, and help all the people of the country. [Applause.]

Mr. LUNDEEN. Mr. Speaker, will the opposition use some of their time?

Mr. TREADWAY. Our time is exhausted.

Mr. LUNDEEN. Then I understand there is no opposition. I yield half a minute to the gentleman from Minnesota [Mr. KVALE].

Mr. KVALE. Mr. Speaker, I hope that the House will remember that a sufficient strength has demonstrated itself in support of this measure, so that the discharge rule has become operative.

This vote is only a vote on consideration, and naturally every fair-minded Member of the House is willing to afford to this group the courtesy of at least considering the measure upon its merits under the rules of the House.

Let us follow the lead admirably voiced by the Chairman of the Committee on Ways and Means, who says that he has no objection to the consideration of the measure upon its merits.

VETERANS' LEGISLATION OF FIRST IMPORTANCE

Mr. LUNDEEN. Mr. Speaker, it has been stated here that there are other matters of great importance before this Congress, and that is true, but I maintain there is no legislation before the American Congress of more importance than veterans' legislation before us today.

GIVE THE VETERANS A ROLL CALL

It has been stated that this is not to be a debate upon the merits of the bill, but merely a vote on whether the bill shall be considered, and all we are asking is that the members of this House give the veterans of America a chance to have a roll call on this adjusted-service certificate bill, and I know that gentlemen will do that by an overwhelming vote in this House today.

LUNDEEN MOTION TO DISCHARGE WAYS AND MEANS COMMITTEE

Mr. Speaker, on April 27, 1933, I filed a motion to discharge the Ways and Means Committee of this House from further consideration of H.R. 1, the adjusted-service certificate bill, known as the "Patman bill". Ten long months, we struggled to secure the 145 signatures necessary to bring this motion to discharge the committee, before the House for a vote.

On February 20, 1934, the one hundred and forty-fifth Member, Congressman AYERS of Montana, affixed his signature completing the list of the 145 names necessary to bring up this motion.

We had about 45 signatures on the Lundeen motion when Congress adjourned on June 16, 1933. A new fighting force was added to our ranks in September. A new Veterans of Foreign Wars legislative chairman, the militant and courageous George K. Brobeck, the battling Dane from the North Star State, organized our forces for victory, stimulating our hopes and enlarging our endeavors all along the line. We were inspired by the platform and radio speeches of National Commander James E. Van Zandt, General Smedley Butler, and others—recognized militant authorities on veterans' legislation.

VETERANS' ORGANIZATIONS ON THE FIRING LINE

I will never forget the radiant, hopeful faces of the Veterans of Foreign Wars coming upon the scene of action, when it seemed almost impossible to win victory, when things looked dark all along the line. These men had fought on foreign soil; fought for weeks and months in the trenches and on the storm-swept decks of the battleships of our Navy. They knew the meaning of No Man's Land. No one can ever spell defeat to men like that.

When the Veterans of Foreign Wars came upon the scene of action they made it plain that Congress must carry out the wishes of the veterans of America. Should Congress fail them, the veterans meant to send their own men who wore the uniform in time of war, into Congress to carry out their mandate. They maintained that anyone who attacked the soldiers and sailors and marines of America was attacking the American people, and while they had not sought the battle, since the fight was on, since it was carried to them, they meant to see to it that the enemy should have battle until they cried enough.

WE HAVE THE VOTES TO MAKE THE PATMAN BILL A LAW

When they were told that if the House passed the bill, the Senate would defeat the measure, they merely smiled and answered back, "We will see about that." When they were told that the President would veto the bill they said, smilingly, "Perhaps he will, and perhaps he will not." Many of them answered back, "Presidents have vetoed veterans' legislation before, but much legislation has been passed over the veto of a Chief Executive."

Their optimism, determination, and courage was irresistible. It swept Congress along on the floor of the House on the Lundeen motion, discharging the Ways and Means Committee from further consideration of H.R. 1. Once more the veterans and their loyal friends talk to their enemies with votes.

THE FIRST BATTLE IN PENNSYLVANIA

These were the men who won the so-called "bonus" fight in Pennsylvania, on November 7, 1933, carrying that State by 400,000 majority for a $50,000,000 payment in the midst of the panic. They and their auxiliaries made it plain to the citizens of Pennsylvania that this money would go into every county, precinct, and home of the great Keystone State. The Pennsylvania battle was only preliminary to the greater national battle that was rapidly approaching.

The veterans are a cross-section of American life—that group of our citizens who bleed in time of war and suffer in times of economic depression. These were the men who gave the people of a State an opportunity to vote on a question pertaining to the rank and file of the soldiers for the first time since the World War, when the Veterans of Foreign Wars led the fight for the payment of the State bonus in Pennsylvania, on November 7, 1933.

AMERICANS SHOULD READ FOREIGN SERVICE

Great credit is due to Foreign Service, a monthly magazine published in Kansas City for the national organization of the Veterans of Foreign Wars, ably edited by Barney Yanofsky. Foreign Service has for years conducted an educational campaign along these lines. There is not a better service men's publication in America today.

Many posts of the American Legion, such as the great Bearcat Post of Minneapolis, Disabled American Veterans, the Bonus Expeditionary Forces, Spanish War Veterans, and their loyal auxiliaries joined forces with the Veterans of Foreign Wars in a united campaign which made success possible.

PAY ADJUSTED-SERVICE CERTIFICATES NOW

The adjusted-service certificates now held by veterans of the World War represent an adjustment of the amount due them for their war-time services. The payment of these certificates would in no sense be a bonus like the million-dollar bonuses paid officials of large corporations. The pay received by our soldiers while they served during the war amounted to $6.30 per month after all deductions were made from the scanty $30 allowed them. They actually received about 20 cents per day, and that was all. The World War Adjusted Compensation Act provides for paying to the soldiers the difference between their war-time pay and the pay received by the lowest-paid laborer who did not go to war.

NO BOND ISSUE—NO TAXES—NO INTEREST

Unless House bill 1 passes, this adjusted payment will not be received until 1945, and by that time nearly 400,000 World War veterans will have passed over the horizon into the great beyond. House bill 1 provides for immediate cash payment of these adjusted-service certificates. The payment will be made in non-interest-bearing United States notes. Four million men will receive approximately $2,200,000,000, and this money will be scattered throughout the country. It will go into every State, every county, every township, every city block, and every home.

WILL NOT DISTURB THE BUDGET

This money will go to 10 times more people than if expended for highway construction or public buildings. Consumers will have purchasing power, stimulating production and employment. There will be no bond issue, no increased taxes, no unbalanced Budget. This money will go to American citizens and will be expended in America. It will pay debts and furnish controlled expansion of the currency.

We do not set aside the constitutional mandate requiring the Congress to regulate the value of money. This bill complies with that mandate. International bankers are opposed to this bill, but millions of American citizens and soldiers will be made happy and American prosperity vigorously promoted.

VETERANS ARE ENTITLED TO THEIR MONEY NOW

Unless these adjusted-service certificates are paid now more than 1,000,000 unemployed veterans and another million of part-time employed veterans will be forced to deprive themselves and their families of the necessities of life. Meanwhile banks and the Government consume the remainder of their certificates by interest payment on prior loans. In making payment now we invoke the same principles and policies of government that have been invoked with others, including war profiteers. Payment will be a godsend to the Nation.

A SOUND-MONEY PLAN

The plan for distributing the money is the same in principle as the plan now allowed by national banks and advocated by the unanimous report of the Senate Banking and Currency Committee in its report on the Goldsborough bill. We are merely asking that a noncirculating Government obligation be converted into a circulating Government obligation.

Consider the real bonuses coined in blood out of the World War. The adjusted compensation paid to railroads was something like $764,000,000. The adjusted compensation paid to corporations for profits not earned because the war did not last long enough was $3,000,000,000—more than the entire cost of the so-called "soldiers' bonus." Congressman JEFFERS, of Alabama, placed in the CONGRESSIONAL RECORD figures to show a total adjusted compensation of about $8,000,000,000 to members of the United States Chamber of Commerce, the organization which is leading the fight against payment of the soldiers' back pay. Eight billion dollars in bonuses for railroads and war profiteers, but not a cent for the defenders of the flag.

OTHER NATIONS PAID THEIR VETERANS WITH OUR MONEY

Every great country recognizes the debt it owes to its war veterans. Great Britain, France, Germany, Italy, Australia, Canada, Belgium—give their veterans some kind of adjusted compensation. But, while we cancel more than twelve billions of dollars in debts owed to this country by foreign nations, these nations take care of their soldiers, and we throw our own men into the bread lines. There is plenty of money to discharge the obligation of the United States to the soldiers of America. What about the $12,000,000,000 due from the countries of Europe? What about the huge salaries and bonuses received every year by the heads of the large corporations who profited from the war? The New York Times for January 2, 1934, shows that the cash dividends alone paid last year by 2,240 corporations amounted to over $2,385,000,000—more than enough to discharge the debt to the veterans, more than enough to pay the bonus, and remember—only 2,240 corporations made any report. The salaries and bonuses of officials of steel, aircraft, tobacco, and mining corporations amount to millions of dollars. If we can conscript soldiers for war, we can conscript wealth to pay the soldiers after the war.

SO-CALLED "ECONOMY LEAGUE" GETS BUSY

In the recent election in Pennsylvania, on November 7, 1933, the veterans of that great State went to the polls and

talked to their enemies with votes. Chambers of commerce, economy leagues, and imported "veterans'" organizations met a crushing defeat. The State Legislature of Pennsylvania, in the midst of the greatest American panic, passed a $50,000,000 bonus law without one dissenting vote in either house or senate.

And how did they do it? They talked to their friends, the common people; and they talked to their enemies with votes. The Veterans of Foreign Wars instructed every veteran to take his father, mother, sister, brother, wife, and three or four friends to the polls. Every polling district was covered, and voters were personally contacted in cities and throughout the rural districts. With civic and commercial organizations and large newspapers thundering against soldier legislation, with imported organizations against them, the 400,000 veterans of Pennsylvania, under the leadership of the Veterans of Foreign Wars, marched to the polls with their friends and won a smashing victory. The Pennsylvania Legislature points the way for the Congress of the United States. What the veterans of that great State did can be done by the veterans of America.

The veterans of America are interested in the adjusted-service certificates bill, H.R. 1, and I have been requested by many individuals and organizations to thank the Members who have signed the Lundeen petition to bring the motion to discharge the Ways and Means Committee from further consideration of H.R. 1, before the House for a vote, and we certainly appreciate the support we are receiving on the floor today.

AN ATTACK ON THE VETERANS IS AN ATTACK ON THE AMERICAN PEOPLE

An attack is being made upon the veterans of America by the Economy League, by chambers of commerce, newspapers, and other organizations. When these organizations attack the veterans, they attack the great American public, for whoever attacks the veterans, attacks America. It is my belief that the payment of the adjusted-service certificates cannot be much longer postponed. This is plainly and clearly shown by the bonus election in the State of Pennsylvania last November, about which I have just spoken. Pennsylvania is now getting ready to carry out the mandate of the voters.

VICTORY IS CERTAIN

I believe the veterans' adjusted-service certificates bill will carry this House, and I believe that the veterans' adjusted-service certificates bill will carry the United States Senate, and I feel certain that the Chief Executive of this Nation will join with the Members of the House and Senate in immediate payment of this sacred obligation to the men of the World War.

LINCOLN AND ROOSEVELT

I hope the Members of Congress will follow the advice of Abraham Lincoln when he said: "It is the duty of the country to care for him who shall have borne the battle, and for his widow and his orphans." I hope they will remember the words of Theodore Roosevelt, who said, "War veterans have a greater claim upon us than any other class of our citizens." [Applause.]

MERELY ASKING THAT FORM OF OBLIGATION BE CHANGED

Mr. PATMAN. Mr. Speaker, in 3 minutes we will vote upon the question of discharging the committee. The Chairman of the Committee on Ways and Means has stated to you that he has no objection to it. All we are asking to do in this bill is to permit the veterans to exchange a non-circulating obligation for a circulating obligation. The banks of this country are permitted to take a Government obligation that is payable January 1, 1945, deposit it with the United States Treasury as collateral security, and receive in money the same amount in new United States currency—the same kind of money we are asking be issued to pay this debt. The only difference is they let 5 percent remain there as a redemption fund, and at the same time they get interest on the bonds that they have deposited to secure this money.

LET VETERANS SAME AS BANKS USE GOVERNMENT CREDIT

So if you are going to let the large banks of the country use the Government's credit all the time, free of charge, as they have been doing, to the extent of a hundred billion dollars a year, why cannot you let the veterans use that credit between now and 1945, without charge, to the extent of $2,200,000,000? That is all we are asking be done.

Mr. CANNON of Wisconsin. Will the gentleman yield?

Mr. PATMAN. I cannot yield. There is no new principle of money or the issuance of money involved in this legislation. If this bill becomes law, United States notes, the same kind of money that you have in circulation today will be issued, and all the gold that is in the Treasury will be back of that money. We have more than $3,000,000,000 of gold in the general fund of the Treasury today, a sufficient amount to use as a basis for the issuance of $7,500,000,000 of additional money and still have a 40-percent gold reserve behind each dollar. We only have five and a half billion dollars of money in actual circulation. All of it is not in circulation, but it is outstanding. If we will increase the circulating medium by $2,200,000,000, we will then have less actual money in circulation than we have gold in the United States Treasury and the Federal Reserve banks. Therefore we will have more than 100-percent gold coverage behind every dollar that is issued after this $2,200,000,000 is issued. So why should you not expand on our broad gold base in order to give the people in every nook and corner of this country sufficient circulating medium and this additional purchasing power?

I hope you vote for this motion.

Mr. Speaker, I ask unanimous consent that all Members be allowed 5 legislative days in which to extend their remarks on this matter.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. PATMAN]?

Mr. CANNON of Wisconsin. Reserving the right to object, I just want to say that I am wholly in accord with everything the gentleman has said.

The SPEAKER. Is there objection?

There was no objection.

The SPEAKER. The time of the gentleman from Texas has expired. All time has expired.

The question is on the motion of the gentleman from Texas to discharge the Committee on Ways and Means from further consideration of the bill H.R. 1.

Mr. SNELL and Mr. O'MALLEY asked for the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 313, nays 104, not voting 14, as follows:

[Roll No. 101]

YEAS—313

Abernethy	Carmichael	Dickstein	Fuller

NOT VOTING—14

Brown, Ky.	Deen	Moynihan, Ill.	Wadsworth
Burke, Calif.	Dingell	Norton	Williams
Carley, N.Y.	Gasque	Reid, Ill.	
Crowther	Hamilton	Sumners, Tex.	

So the motion was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Moynihan of Illinois (for) with Mr. Wadsworth (against).

General pairs:

Mrs. Norton with Mr. Crowther.
Mr. Carley of New York with Mr. Reid of Illinois.
Mr. Sumners of Texas with Mr. Brown of Kentucky.
Mr. Gasque with Mr. Dingell.
Mr. Williams with Mr. Deen.
Mr. Burke of California with Mr. Hamilton.

Mr. COX. Mr. Speaker, because of the statement of the Chairman of the Committee on Ways and Means to the effect that his committee had not had time to consider this measure——

Mr. RANKIN. Mr. Speaker, a point of order.

Mr. COX. And in order to protect the organization of the House and permit it to function in a normal way, I voted "no" on the motion to discharge; but, in view of the fact that a majority of that committee has indicated a desire that this bill be taken from it, I change my vote from "no" to "aye."

The result of the vote was announced as above recorded.

On motion by Mr. BLANTON, a motion to reconsider the vote by which the motion was agreed to was laid on the table.

VETERANS' ADJUSTED-SERVICE CERTIFICATES

Mr. PATMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H.R. 1) to provide for controlled expansion of the currency and the immediate payment to veterans of the face value of their adjusted-service certificates; and pending that motion I should like to have some agreement as to time for general debate.

Mr. FISH. Mr. Speaker, I ask for recognition against the bill.

Mr. PATMAN. I should like to know if the gentleman from New York will agree that we have 30 or 40 minutes of general debate on each side, and then the bill be taken up under the general rules, and those who did not have an opportunity to speak in general debate may have that opportunity under the 5-minute rule.

Mr. FISH. I am anxious to go along with the gentleman as far as I can, but this is a very important matter, and I think there should be at least a minimum of 1 hour on each side.

Mr. PATMAN. I hope the gentleman will agree on 45 minutes to the side.

Mr. FISH. No. I think 1 hour on a side is the very minimum. It ought to be more than that, as a matter of fact.

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that there be 2 hours' general debate, the debate to be confined to the bill, the time to be equally divided and controlled by the gentleman from New York [Mr. FISH] and myself.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. PATMAN]?

Mr. PARKS. Reserving the right to object, I should like to ask what would be the effect if this bill is considered under the general rules of the House without unanimous consent?

Mr. BLANTON. It will be extended over about 3 days.

Mr. PARKS. I think that would be a pretty good idea.

The SPEAKER. In that event, any Member getting recognition by the Chair would be entitled to 1 hour in Committee of the Whole.

Is there objection to the request of the gentleman from Texas?

Mr. CANNON of Wisconsin. Yes, sir; there is objection. I object to it. I think that anything that is done here now should be done immediately. Everybody knows what is going to be done, and we should not allow this time for the purpose of Members having their names appear in the CONGRESSIONAL RECORD tomorrow morning.

The SPEAKER. Does the gentleman from Wisconsin [Mr. CANNON] insist on his objection?

Mr. CANNON of Wisconsin. I reserve the objection for the purpose of saying that I have had a petition on the desk——

Mr. PETTENGILL. Mr. Speaker, regular order.

Mr. SNELL. Regular order, Mr. Speaker.

The SPEAKER. Does the gentleman from Wisconsin insist on his objection.

Mr. CANNON of Wisconsin. I will withdraw my objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Texas [Mr. PATMAN]?

There was no objection.

The SPEAKER. The question is on the motion of the gentleman from Texas [Mr. PATMAN].

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the con-

sideration of the bill (H.R. 1) providing for the payment of the veterans' adjusted-service certificates, with Mr. CANNON of Missouri in the chair.

The Clerk read the title of the bill.

By unanimous consent the first reading of the bill was dispensed with.

CAREFULLY PREPARED BILL

Mr. PATMAN. Mr. Chairman, I hope each Member of the House will obtain a copy of House Resolution 1 and read the bill over carefully. It represents the combined and best thought of the people in this country who have given this matter so much consideration for many years.

The first bill, calling for the full and immediate payment of adjusted-service certificates, was filed in 1929. Since that time, in each session of Congress, other bills have been filed and have improved on the previous bills. The pending bill represents the best thought of the Members of Congress and those in this Nation who have given this matter consideration for the last 5 years. It was drawn by the legislative drafting service. The Treasury Department, 2 years ago, frankly informed us they were opposed to the legislation, but would cooperate in an effort to help prepare a bill that could be easily administered in the event such a bill should be passed by Congress. The Administrator of Veterans' Affairs assured us that he was not in favor of the legislation, but he would be glad to cooperate in order to make sure that the bill was drawn in such a way that it could be easily administered in the event it were enacted.

The Members of Congress who have been sponsoring this legislation were consulted; the 10 members of the Ways and Means Committee, who sponsored it in 1932; the gentleman from Massachusetts [Mr. CONNERY], the gentleman from Mississippi [Mr. RANKIN], the gentleman from Tennessee [Mr. BROWNING], the gentleman from Alabama [Mr. JEFFERS], the gentleman from Kentucky [Mr. VINSON], the gentlemen from Minnesota [Mr. BOILEAU, Mr. LUNDEEN, and Mr. KVALE], the gentleman from Oklahoma [Mr. JOHNSON], and other Members of the House too numerous to mention, were consulted about the drafting of this legislation. We believe it is the best bill that has been introduced along this line. We had a meeting on yesterday, attended by 100 Members of the House. We considered this a good attendance, in view of the bad weather existing. After discussing this bill from every angle and discussing many amendments, we decided it could not be improved upon; and we are going to ask that you take the bill and pass it as you find it today.

THIS MONEY WILL EQUAL TWO CROPS IN AGRICULTURAL SECTION

I have before me a speech made on the floor February 20, 1932. I have some extra copies here at the table. It shows the amount each county in the United States will receive in the event these certificates are paid in cash. The amount set opposite the name of the county represents the remainder that is due and which will be paid in the event this bill becomes a law. It will represent at least two crops in an agricultural section; it will be equal to that.

WHAT WE MUST PROVE

I shall speak to you very frankly, as I always do whenever I appear before the Ways and Means Committee in regard to this legislation. Unless we can prove that this legislation will be a benefit to the entire country first; and, second, that the amount is really due now and past due, we are not entitled to win; but, Mr. Chairman, we can prove that these certificates, if they are now paid, will benefit everybody, not just the veterans. It will place $2,200,000,000 throughout the Nation, reaching to every nook and corner. It will give to 3,550,000 veterans an average amount of a little better than $500. It will be paid in new money, not in credit.

EVERY DOLLAR WILL MEAN FROM $15 TO $45 IN BUYING POWER

This money will go into the channels of trade in the local communities where it is paid to the veterans. Each dollar so paid will not mean just $1 to each veteran, but from $15 to $45 for every $1 that goes to the veteran, for it will circulate from 15 to 45 times in the community. Therefore, it will increase the buying power of this Nation from $15 to $45 the next year for every $1 that is paid under the terms of the bill.

Furthermore, when this $1 is used it moves along; it will go into your local banks and there become a basis for $10 additional credit for each $1 that is paid. It will extend the credit in your community not only for veterans but will help everybody; and everyone here knows the need for credit in this country at this time. If we do not have credit facilities, we cannot have a prosperous country.

DALLAS FEDERAL RESERVE BANK

The Dallas Federal Reserve Bank has in cash and in gold over $100,000,000, yet it has in loans outstanding, I am told, just $30,000. How can the banks of the Dallas Federal Reserve District properly serve the people under such conditions? The small banks and bankers of that area are getting blamed by the people when the Federal Reserve bank is entitled to a large share of the responsibility. Our banks cannot meet the credit needs of the people and industry without the support of the Federal Reserve banks. The Federal Reserve banks have failed and refused to perform their function of extending credit at the time the people need credit. Therefore, it is incumbent upon the Members of this House to read the Constitution of the United States and see for themselves whose duty it is to issue money and perform that duty.

SHOULD POWER TO ISSUE MONEY BE FARMED OUT?

Do you want to farm this great privilege out to a few bankers and let them use the credit of this Nation free of charge forever, or do you want to use the credit of this Nation in a way which will help everybody? This is the issue involved. Read the Constitution; it is very plain on this point.

Mr. CANNON of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. For a question only.

Mr. CANNON of Wisconsin. I am in complete agreement with the gentleman's argument. I have a petition at the Speaker's desk to call in $13,000,000,000 of the tax-exempt bonds held by the big bankers of New York.

Mr. PATMAN. The gentleman knows my views on that.

Mr. CANNON of Wisconsin. But the gentleman from Texas has not signed my petition.

Mr. PATMAN. I am in favor of bringing them all in, not just $13,000,000,000. We can pay the entire national debt with new money and not have undue inflation by raising the reserve requirements of banks.

HOW BANKS GET MONEY ON GOVERNMENT OBLIGATIONS

Now, in regard to the use of the Government's credit, a national bank belonging to the Federal Reserve System can deposit with that System a Government bond payable July 1, 1945, and money will be issued against that bond. If it is a bond for $1,000,000, the bank can deposit that bond with the Government and receive $1,000,000 in new money in return, with the exception of 5 percent as a reserve, and he will get interest on the bonds, too. He is using the credit of this Nation free of charge and getting paid for it in addition.

The adjusted-service certificates are backed by the same assets that are back of the Government bonds. Why not use the certificates for the purpose of furnishing a circulating medium? They are backed by the credit of this Nation. They are made payable at the same time, January 1, 1945. The veteran should be allowed the privilege of depositing these obligations and receive the same consideration the bankers receive. This will save the Government money, because the Government will not pay the veteran interest annually on the collateral security deposited for the money.

Therefore, if you say for argument's sake—and I do not agree that it is true—that the certificates are not due until January 1, 1945, are you not willing for the credit of this Nation to be used by these veterans in a way in which it will help everybody, save this country a billion and a quarter in money between now and 1945, and in addition, save more

than $10,000,000 in administration expenses? You are permitting the bankers to use Government credit every day. Why should you not let the veterans do the same thing?

HOW A BILLION AND A QUARTER DOLLARS CAN BE SAVED

Mr. SNELL. Will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from New York.

Mr. SNELL. I understood the gentleman to say that the Government would save a billion and a quarter dollars. I wish he would explain his statement in that regard. I am interested in the gentleman's statement.

Mr. PATMAN. The present law provides that $112,000,000 a year shall be put aside in a fund for the purpose of redeeming the certificates in 1945. This bill provides for the repeal of that part of the law. This money will not have to be paid, and it will save $112,000,000 in appropriations each year until 1945 and such additional amount as might be required at that time, which will certainly be a billion and a quarter dollars in all.

Mr. SNELL. The gentleman could save $15,000,000,000 by using all of the national debt in exactly the same way.

Mr. PATMAN. That is very true. Of course you would have to retire it; you would not want to keep that much out permanently. We only have five and a half billion dollars in circulation now, may I say to the minority leader; and if we put out this $2,200,000,000, we will have less than seven and a half billion dollars outstanding, which is less than the total amount of gold held in the Treasury and by the Federal Reserve banks. We will have more than 100 percent in our coverage.

Mr. CANNON of Wisconsin. Will the gentleman yield? I am in sympathy with the gentleman's argument.

Mr. SABATH. The gentleman from Texas said that there are five and a half billion dollars in circulation. He means there are five and a half billion dollars outstanding but not in circulation.

Mr. PATMAN. Theoretically in circulation.

Mr. SABATH. But it is not in circulation.

HOW CURRENCY MAY BE CONTROLLED

The CHAIRMAN. Does the gentleman yield; and if so, to whom?

Mr. PATMAN. I did not yield to anyone except for the purpose of asking a question about this bill.

Mr. CANNON of Wisconsin. That is exactly what I am talking about.

Mr. BLANTON. Mr. Chairman, I make the point of order that the gentleman from Wisconsin is not in order.

Mr. PATMAN. Mr. Chairman, the theory of this bill is that the $2,200,000,000 will remain a part of the permanent circulating medium of this country. I presume we have a right to assume that this Nation will always be as wealthy and have as many people and need as much in the form of a circulating medium as they have today, if not more; therefore, there will not be a need to withdraw this money; but if the commodity prices should rise too high, we have included the same principle as is in the Goldsborough bill, which gives the Secretary of the Treasury the right to contract currency but not to take one dollar of this money out of circulation. This bill says if it is necessary for the currency to be contracted, that the first money that shall be taken out shall be this borrowed money where the banks put up 3% in bonds under the Glass-Borah amendment and receive in return the same amount in new money, and also receive interest on the bonds. We ask that that money be taken out of circulation first.

DISCRETIONARY POWER TO CONTRACT

Next we ask, if there is need for additional contraction, that the national-bank notes that are outstanding to the amount of a billion dollars or so be taken out of circulation, but not one dollar of this money is to be taken out of circulation. This is to remain a part of the permanent circulating medium of this Nation. The bill also provides other ways of contracting and adjusting the money supply. These powers are not compulsory; they are discretionary.

NO ONE WILL BE PAYING INTEREST ON THIS MONEY

May I tell you a need for this? We have recently taken out of circulation a large sum in the form of gold certificates amounting to almost a billion dollars. That money was in circulation. Nobody was paying interest on the money while it was in circulation. It has been taken out. We want to put more money into circulation on which no one will be paying interest while it is in circulation. Take the Federal Reserve notes, money that is issued under the Glass-Borah amendment and the Glass-Steagall amendment, and all these other provisions which allow the Federal Reserve banks to get money in return for bonds. Someone is paying interest on every dollar of that money that is outstanding. We should have some circulating medium upon which no one is paying interest. After taking the gold certificates out, we only have about a billion dollars remaining in the form of United States notes and silver certificates upon which no one is paying interest.

SAME KIND OF MONEY NOW IN CIRCULATION

This bill provides that United States notes shall be issued. That is the same kind of money that is in circulation today. It will be just exactly like the money you use every day. It will be backed in identically the same manner as the present United States notes. Section 408 of title 31, a part of the act of March 2, 1900, shall apply to this money. This means that every dollar of the money that is issued will be backed by all the gold in the general fund of the United States Treasury, and we have in the general fund of the Treasury today $3,126,000,000. You will recall that a while back, in connection with revaluation, as one witness expressed it, the Government reached out into thin air and drew down almost $3,000,000,000 in free gold. This money is in the Treasury of the United States unallocated, unencumbered, and unobligated. You can lay $2,000,000,000 aside for the stabilization fund and still have enough remaining to back this money with a 40-percent gold reserve and still have plenty of gold left.

So, having the money to pay, where the debt can be paid without a bond issue, without increasing the taxes, without incurring any other obligation in any fashion, do not you think that we are fortunate that we can put the money into circulation in this manner where it can benefit everybody?

Mr. BLANCHARD. Will the gentleman yield?

Mr. PATMAN. I will yield.

Mr. BLANCHARD. How much money have the banks put out?

Mr. PATMAN. The banks are not putting out money. The Federal Reserve banks have failed to function, and the Constitution says that Congress shall issue the money and regulate its value.

Mr. EAGLE. Will the gentleman yield?

Mr. PATMAN. I yield.

Mr. EAGLE. I will answer the gentleman from New York; $2,000,000,000 lie idle. One year ago, owing to the banking situation, they called in a billion of outstanding currency.

Mr. ANDREWS of New York. Will the gentleman yield?

Mr. PATMAN. I yield.

Mr. ANDREWS of New York. The gentleman says that the Government is required to set aside $112,000,000 each year.

Mr. PATMAN. Yes.

Mr. ANDREWS of New York. Does the gentleman know whether that has been done, and does not the gentleman think it would be better to pay the veterans $112,000,000 each year until 1945?

Mr. PATMAN. No; that is not the way to do it.

Mr. MAY. Will the gentleman yield?

Mr. PATMAN. I yield.

Mr. MAY. Based on the present gold reserve, what amount of currency could be issued legally?

Mr. PATMAN. Eight billion dollars on the gold in the Treasury alone, and $7,000,000,000 additional on the gold in

the Federal Reserve banks. If we are not going to expand or issue new money on the gold base, devaluation will not amount to anything.

CASH INTO HANDS OF MASSES

This bill will put cash money in every nook and corner of the Nation, into the hands of nearly 4,000,000 World War veterans, who will use it to purchase comforts and necessities of life, pay debts, taxes, and otherwise place it into the channels of trade and production. This money will find its way into the banks all over the Nation and will be used as a reserve for the issuance of additional credit, thereby helping everybody in every community.

IF THIS BILL IS ENACTED

First. It will save the Government more than a billion dollars, or $112,000,000 a year for 12 years.

Second. It will save the Government more than $10,000,000 in administration expenses of the Adjusted Compensation Act between now and 1945.

Third. It will pay a debt heretofore confessed by the Government to the veterans for services rendered. It is no bonus. The term "bonus" is a misnomer.

Fourth. It will be granting to the veterans the right to deposit a Government obligation and receive in return therefor new currency, the same right that is now enjoyed by Federal Reserve banks and all national banks.

Fifth. It will prevent the veterans from losing a valuable equity by releasing them from the payment of compound interest on their loans. Veterans, who have borrowed 50 percent under the present law, will have very little remaining in 1945. It is not right for the Government and the banks to consume these valuable equities by requiring the veterans to pay compound interest on their own money.

Sixth. It will require no bond issue, no increase in taxes, no additional interest payment by the Government. The debt must be paid some time. Everybody will be helped if it is paid now.

Seventh. The Treasury holds in the general fund $3,126,000,000 in gold. It is unencumbered. This does not include the gold owned by the Federal Reserve banks. This is sufficient gold to issue $8,000,000,000 in new currency without reducing the gold reserve less than 40 percent. No nation on earth has ever claimed that more than a 40-percent gold reserve as a reserve for issuing money is required.

Purchasing power must be placed in the hands of the masses. In this way, it can be distributed quickly without the possibility of graft or favoritism. It is the best plan that has been proposed to be used as a vehicle to convey additional money into the hands of those who will buy goods.

HOW OTHERS USE CREDIT OF NATION

Under subsection 1 of section 3 of the bill, it is provided that the circulation privilege extended certain bonds may be abolished if there is too much money in circulation at any time. Let me explain what I mean by that. The national banks of the Nation are capitalized for about $1,590,000,000. Under the present law, these banks may deposit with the United States Treasury bonds bearing interest at a rate not in excess of 3⅜ percent and receive in return therefor $1,590,000,000 in new currency, the same kind of money we propose to issue in this bill. The only obligation is that the bank will keep on deposit at the Treasury 5 percent of the amount of such money for redemption purposes. This places the Government in this idiotic position. The Government sells to the bank a thousand-dollar bond drawing 3⅜-percent interest, or $33.75 interest for a year. The bank immediately redeposits the bond with the same United States Treasury that sold it to the bank, and receives in return therefor $1,000 in new money. Fifty dollars of the money is left on deposit with the Treasury. The bank gets the use of the money and also gets interest on the bonds deposited. There is a small charge of one half of 1 percent against the bank for expenses in connection with the issuance and reissuance of the money. Therefore banks can take Government obligations due in 1945 and receive new money in return for them, and at the same time get interest on the obligations. Why is it not fair to let the veteran take his obligation, made payable in 1945, and receive money in a similar manner? There is no difference in the two obligations. They are both made payable in 1945; they are both backed by the credit of this Nation; they are both obligations of this Nation. Money purchased one, services purchased the other. If it is fair for the bank, it is fair for the veterans. The National City Bank (Mr. Mitchell's bank) can obtain $124,000,000 in this way. The Chase National Bank (Mr. Wiggins' bank) can obtain $148,000,000 in this way. Certainly banks take advantage of this opportunity.

Under this bill, if there is too much money in circulation, the bank will be required to return their currency, or part of it, and receive their bonds in exchange, thereby taking a certain amount of money out of circulation.

BLANKET MORTGAGE

Under the present law a Federal Reserve member bank may deposit Government obligations, payable in 1945, or any other time, regardless of the amount and regardless of the amount of its capital stock and may receive the same amount in new Federal Reserve notes. These notes are new money and are guaranteed by the United States Government. The wording on each note speaks for itself. It is a blanket mortgage on all the property and the incomes of all the people in this Nation. It is enjoyed by a few at the expense of the many. The banks also receive interest on the Government obligations while they are on deposit, but are required to pay the rediscount rate to the Federal Reserve banks, which is considerably less than the interest on the Government bonds. [Applause.]

Mr. FISH. Mr. Chairman, I yield 2 minutes to the gentleman from Massachusetts [Mr. LUCE].

Mr. LUCE. Mr. Chairman, the gentleman from Texas has devoted almost all his remarks to the question of inflation. It seems that his motive is not primarily solicitude for the veterans but that his main purpose in securing the discharge of this bill from the consideration of the Committee on Ways and Means is to embarrass the Congress and the President by the premature introduction of the subject of money. The public had understood, the veterans themselves had understood, that the sole object of this measure was to advance the payment of the bonus. To that object we find tied, artificially and unnecessarily, a program for replacing our present currency system with that of what is called "managed currency", a program that ought to be considered quite by itself, with long and thorough discussion. It involves resort to printing-press money. Last Saturday evening over the radio I discussed the monetary situation with observations relating to printing-press money that may be pertinently repeated at this point if the House is good enough to give me unanimous consent to extend my remarks in the RECORD, and I so request.

The CHAIRMAN. The gentleman from Massachusetts asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

Mr. LUCE. Through 12 months President Roosevelt has addressed himself to three R's—not Reading, 'Riting, and 'Rithmetic, but Recovery, Relief, and Reform.

Of relief it need here be observed only that it will have enormously increased the public debt and will thereby make sound financing more important than ever.

Reform, however desirable it may be of itself, embroils the monetary situation by delaying return to prosperity. The evils at which it is aimed had nothing to do with creating a world-wide depression, and their cure will do nothing toward allaying the fears that caused this depression. Meanwhile, by disturbing industrial practices and business relations, it postpones the natural readjustments demanded by a dislocated financial structure. When a man's ribs are broken, it is no time to shake him.

Recovery is the field where money plays important part. Let us see if from what has taken place in that field we can guess what will take place.

The Democratic platform said: "We advocate a sound currency to be preserved at all hazards." In a speech at Albany on the following 30th of July, Mr. Roosevelt, nomi-

nated for President, said: "Let us have equal courage to insist on a sound currency." Just before the election, in November, he quoted the words of the platform, "a sound currency to be preserved at all hazards", and added, "I have announced my unqualified acceptance of that platform." In his inaugural message on the following 4th of March he said: "There must be provision for an adequate but sound currency."

For centuries the phrase "sound money" has been taken to mean metallic money or other forms of money interchangeable with metallic money at pleasure. So it was understood by the people of the United States.

Twelve months later we find ourselves with a currency consisting of paper tokens, not a dollar of which can be exchanged for metal of corresponding market value to be used for money within the borders of this country. In effect, we have an irredeemable paper currency. The wildest imagination could not conceive this to be the sound currency the people were guaranteed.

However strongly I may feel about whether the President was justified in thus reversing his position, I do not tonight raise that issue but would confine myself to facing the fact and drawing conclusions therefrom.

The President set out to relieve the debtors of the land by raising prices to their level of 8 years ago so that debts could, on the average, be paid with buying power equal to that which was then borrowed. You cannot understand how he hoped to do it unless you get firmly in mind and keep constantly in mind that as money cheapens, prices rise; as money becomes more valuable, prices fall. Those are two ways of saying the same thing. If, then, the debtors were to be helped, somehow prices must be raised, in other words, money cheapened, that the farmer in debt might get more for his crops and the wage earner in debt get more for his day's work, with which to pay off his mortgage or meet his note.

The first step the President took to this end was by way of getting Congress to turn over to him almost complete power over coinage and currency, power that the Constitution had entrusted to Congress alone and as to the right to delegate which there is the gravest doubt. However, facing the accomplished fact, observe what followed. At the President's request, Congress, by what is known as "The Repudiation Bill", helped the President take value out of the dollar by annulling all promises to pay gold, on the ground that they were contrary to public policy. Then last fall, here and abroad, we began buying all the gold we could, at prices higher than anybody else would pay. In a few weeks it became apparent that this was accomplishing nothing toward the desired end, and it seems to have been abandoned. Prices were refusing to rise to any material degree, save of those commodities artificially forced up by the workings of the N.R.A. and the processing tax on staple foods. So, again at the President's behest, Congress a few weeks ago passed what is known as "The Devaluation Bill", confiscating all the gold owned by the Federal Reserve System, impounding that and all other gold in the vaults of the Treasury, making it illegal for any citizen to have any gold except for the needs of foreign trade and for use in the arts, and making our currency irredeemable in metallic money of corresponding market value.

These steps have taken us no long way toward the goal, namely, the price level of 1926. The President has not shown any intention of changing his mind about that goal. What further step is possible?

I know of but one, an ancient step, one taken again and again and again through the centuries, that of swelling the volume of currency, what we call inflation. Again and again and again it has worked havoc, wrought ruin, destroyed happiness, created misery. With famine and pestilence it has ranked as one of the scourges of mankind. Once more it threatens. The House of Representatives would vote for it tomorrow if given the chance. It would probably get the approval of the Senate.

There can no longer be any valid question about the desirable volume of cash currency. Bear in mind that there are two kinds of currency. One we call cash, the money we carry in our pocketbooks or keep in our tills; the other we call credit currency, the kind that we put into the banks, and against which we draw checks, a kind of currency comparatively new and one that is so much disregarded by the inflationists as to spoil most of their arguments.

They refuse to recognize that nowadays most of the transactions of the country are conducted by the use of checks, 92 percent of it indeed, according to the best estimates. I have had the curiosity to classify my own transactions in 1933 and find just 92 percent of them were by the use of checks, 8 percent with cash, and there is no reason to suppose my own case exceptional.

Yet even with this great change in our habits, there is outstanding almost exactly twice as much cash currency per capita as there was in 1896, the year when Bryan ran. And no more can be kept out than the people are willing to use. It is absurd to think that by legislation they can be either forced to carry about with them more than they find convenient and safe, or to keep it in cash drawers or safes or hidden in their houses. No matter how you tried, whether by paying Government running expenses or bonds or bonuses, the people would carry to the banks all they do not need for daily use or to have on hand for emergency.

If you cannot keep in circulation more of cash currency, only one other door is open, that of the bank, the institution that handles credit currency. In the expansion of that form of money we have made another step of great importance, also one not recognized by the inflationist. We have created the Federal Reserve System, which has by several fold multiplied the possibilities of credit currency. We have so provided that under normal conditions the supply of this adjusts itself automatically to the needs of agriculture, industry, commerce, and all other forms of social activity. Conditions now are, to be sure, not normal, but if we catch up with the rest of the world, they presently will be. Enlarging credit beyond the need will but postpone that happy outcome.

Many who are expert in these things doubt if what has been done will raise the price level to that of 1926, but if currency inflation should do that, it will be at the expense of wage and salary earners, for invariably wages and salaries rise more slowly than prices. In the Civil War period, for instance, when the cost of living more than doubled, wages rose less than one half. Furthermore, the holders of 60,000,000 pass-books attesting thrift accounts will have seen two fifths of their buying power disappear. The value of 120,000,000 life insurance policies will have shrunk to the same extent. The same thing will have happened to all pensions and veterans' allowances.

In the meantime all enterprise will have been checked. The one prime requisite for recovery is a renewal of confidence on the part of those who lead in enterprise. Until they know what will be the buying power of money changing hands upon the performance of contracts, they dare not plan save from day to day. By making our money irredeemable, we have made it impossible to know what is likely to be the buying power of dollars a month or a year from now. We have cut the cable that kept currency from doing more than rise and fall with the tides of business. The currency float is adrift and nobody knows where it may be swept by wind and flood. The cable should be replaced. Once more there should be a definite standard of value. Then farmer and manufacturer and merchant will take heart. Then recovery will be assured.

Mr. FISH. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I have not followed the President of the United States since he turned his back on the veterans with war-service-connected disabilities and the Spanish War Veterans, but on this particular legislation I propose to follow him all the way through. On the other hand just as soon as the independent office bill comes before the House I propose to vote for a full restoration of the benefits for the real disabled veterans and for the Federal employee. I was very much interested in the remarks of the gentleman from Michigan when he resurrected the Democratic national

platform. It is about time that document was brought to light by some Democrat for with the exception of the repeal of prohibition it is difficult to find any promises or pledges contained in the Democratic national platform that have been kept. The "brain trust" has seen to it that no essential obligation has been fulfilled and that most every important commitment has been either disregarded or repudiated.

It is the first speech that I have heard in recent days from a Democratic source that even dared to mention the existence of such a document as the Democratic national platform. I agree with the distinguished gentleman from Massachusetts, that there is far more support back of this bill on account of the inflationary proposals and the issuance of printing-press and fiat money than merely the merits of the bill, as far as the veterans and their interests are concerned. If this bill goes through, providing for printing-press money in excess of $2,000,000,000, it will be the beginning of the wildest inflation that this country has ever known. Both the American Legion and the American Federation of Labor are opposed to inflation and the use of fiat money, and have openly declared against such unwise and unsound monetary policies that have always brought disaster and ruin to the wage earners in every nation that they have been tried. The real test in the pending bill is, and I know, for one, if I believed in printing-press and fiat money and greenback inflation, I would vote for the bill, because that is far more important as an issue than the question involved of paying the adjusted-service certificates to the veterans at this time. If you are ready to start the printing presses going, and to create an enormous inflation that will never end, then vote for the bill. You might just as well pay the Army appropriations, the Navy appropriations, the Agricultural appropriations, in fact, all appropriations, by exactly the same method—by just starting the printing presses and calling on the Bureau of Printing and Engraving to issue any number of billions of dollars that may be required to run the Federal Government and pay its debts.

Mr. BUSBY. Will the gentleman yield?

Mr. FISH. I am sorry not just now. I voted for the adjusted-service certificate bill on two occasions. I voted to override the veto of two Presidents of my own party. I never apologized for doing it. I did it openly and advisedly, but I am opposed to this legislation primarily because the bill does not provide any way of paying the bonus at this time except through the printing-press method.

Mr. BUSBY. Mr. Chairman, will the gentleman yield?

Mr. BLANCHARD. Mr. Chairman, will the gentleman yield?

Mr. FISH. No. Not just now.

Mr. BUSBY. I want to correct that printing-press proposition.

Mr. FISH. I do not yield at the present time. If we are going to indulge in printing-press methods, I would prefer to pay such money to the unemployed, to the millions of unemployed in this country for the maintenance of their families. Then again, and this is no criticism upon the overwhelming majority of the House who will vote for the bill, but in view of the President's statement that he will veto it, in view of the situation in the other body where it is doubtful that it will even pass, I regard this measure as a political gesture and as an attempt to kid the veterans into believing something is being done for them when actually nothing is being done for them.

I naturally assume that the Members of the House are voting for the bill on the merits of the proposition, but just the same it amounts to a political swindle, as far as the veterans themselves are concerned, because they are not going to get one red cent out of this measure, and we all know it, no matter how we vote, whether we vote on the merits of the bill or not. This is nothing but a political ride for the veterans and will not deceive many of them. The proof of the pudding is in the eating, and I will apologize openly for being a poor prophet if this bill becomes a law at this session of Congress. From my experience of 14 years here I know that it has not a scintilla of chance of being enacted into law, and, therefore, it amounts to nothing more than a political gesture. It is just an attempt to kid the veterans and give them a political joy ride. If you want to do something for the veterans that is constructive and worth while and helpful, reduce the rate of interest on these adjusted-service certificates from 3½ percent, which it is at the present time, down to 1¾ percent or maybe to nothing at all, so that there will be something left in these adjusted-service certificates when they mature or when they are paid off.

Mr. YOUNG. Mr. Chairman, will the gentleman yield?

Mr. FISH. Yes.

Mr. YOUNG. Is it not a fact that approximately 528,000 veterans have not as yet borrowed upon their adjusted-compensation certificates and that those veterans are obviously not in need at the present time, and would not this be a better bill if it were amended to eliminate those veterans and other veterans who are not in need? Then should we not go further and eliminate altogether that interest charge, instead of reducing it?

Mr. FISH. I think there is a great deal in what the gentleman says, but I am afraid the gentleman will find that it will be very difficult to amend the bill at all. I understand it is the desire of those in charge of the bill, and they apparently have the votes, to rush the bill through today after a limited amount of general debate, and I take it they will control the legislation, and it is unlikely that any amendments will go through. I can think of a half dozen amendments that I would like to propose myself. I could think of a number of amendments that, if adopted, would cause me to vote for the bill, striking out particularly the printing-press method of paying the certificates, but I do not believe there is a chance of getting any amendment adopted at all.

Mr. RANKIN rose.

Mr. ELLENBOGEN. Mr. Chairman, will the gentleman yield?

Mr. FISH. I cannot yield to everybody. The question is raised, How can you pay the certificates? I would vote for the bill if you put on a sales tax to pay for them, but I know that that will not go through.

Mr. SIROVICH. Would that be enough to pay the soldiers?

Mr. FISH. It would if you adopt the amendment just suggested by the gentleman from Ohio [Mr. YOUNG]. If you limit this bill to the payment of adjusted-service certificates to those veterans with war-service-connected disabilities and those with nonservice disabilities who are more than 25 percent disabled, you could pay it, and that would cost approximately $300,000,000. You could provide means to do that in this session of Congress, but as the bill stands, if you vote for it, you cannot get away from the bald fact that you are voting for fiat money, greenbacks, and for the most gigantic inflation in the history of the United States.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. FISH. The gentleman has just spoken for 20 minutes and I do not want him to take my time.

Mr. PATMAN. I want to ask the gentleman a question about fiat money.

Mr. FISH. I shall take that up later.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. FISH. Yes.

Mr. RANKIN. I just wanted to ask the gentleman if he would vote to cancel all of the interest on these certificates.

Mr. FISH. I will say to the gentleman that I would, and the reason I would do so is this: That is going pretty far, but the reason is that you have, by congressional action, reduced the dollar to 59 cents. You have reduced the value of these certificates at the same time from $1 to 59 cents. I think it would be only fair to wipe out all the interest payments, and the veterans back home, I am sure, would appreciate it a great deal more if you did something of that kind that is worth while and helpful than this political gesture that you are now indulging in.

Mr. CANNON of Wisconsin. Will the gentleman yield?

Mr. FISH. I cannot yield to everybody. I decline to yield, Mr. Chairman.

Mr. FITZPATRICK. Will the gentleman yield for just a short question?

Mr. FISH. Very well. I will yield for a short question.

Mr. FITZPATRICK. What is the purchasing power of the dollar today as compared with 1928?

Mr. FISH. I cannot give the gentleman the exact figures. I would say that the cost of living has gone up 10 percent in the last few months, since you have devalued the dollar to 59 cents and you propose to increase it 50 percent more if you can.

Mr. FITZPATRICK. I am asking the gentleman, what is the purchasing power of the dollar today as compared with 1928? Is it not greater today?

Mr. FISH. Of course, I appreciate the compliment, but I will tell the gentleman that his party is bending every effort to get the purchasing power back to where it was in 1926 under a Republican administration.

The CHAIRMAN. The time of the gentleman from New York has again expired.

Mr. FISH. I reserve the balance of my time.

Mr. CANNON of Wisconsin. Will the gentleman yield? I have been fair with the gentleman.

Mr. FISH. Very well. I will yield myself another minute to answer the gentleman from Wisconsin.

Mr. CANNON of Wisconsin. I have a bill to do away with these tax-exempt bonds, calling in $13,000,000,000 of them, that is on the desk, and you fellows have got "guts" enough to go up and sign it, and still you stand here day after day and talk about getting rid of these tax-exempt bonds.

Mr. FISH. I should like to ask the gentleman this question: Who is in the majority in this House?

Mr. CANNON of Wisconsin. The Democrats are, and they have not got "guts" enough to go up and sign it. [Laughter and applause.]

Mr. FISH. Mr. Chairman, I yield 5 minutes to the gentleman from Kansas [Mr. McGUGIN].

Mr. McGUGIN. Mr. Chairman, in considering the payment of the adjusted-service certificates I do not believe that their advance payment prior to 1945 can be justified. These certificates are based upon adjusted-service compensation requested by the veterans' organizations, based upon $1 a day extra for home service and $1.25 a day extra for foreign service. The average amount due the individual veteran was $398; but Congress increased that 25 percent, making the average amount approximately $500. This is the average amount which is actually due the veterans, which they requested and accepted as adjusted compensation. It was issued in the form of a 20-year paid-up life-insurance policy; and the face value of the average policy is $1,000. So when the veteran has received one half he has received 25 percent more than he asked for in the first instance; and in those cases where they have borrowed on the policies, what has actually happened is that they have drawn down their principal and ceased drawing interest. There is no way you can touch these adjusted-service certificates, even though it may be politically expedient to do so, except you do it at the expense of the people of this country; and for my part so long as I am in Congress I do not intend to vote to pay in advance one dollar to any person or to any class of persons. I say this not only as a Member of Congress but also as a veteran. I say that this bonus agitation has been the most unfortunate thing that has befallen the veterans of the World War. [Applause.] Today it stands in the way of just legislation for just benefits for Spanish War veterans and presumptively service-connected World War veterans.

With these introductory remarks, I take the position that there is no way we can justify a vote for the advance payment of these certificates today. Let me consider the manner in which these certificates are going to be paid by this bill. The gentleman from Texas [Mr. PATMAN] is very frank. If you pay one Government obligation with printed money you can pay all of them; and as I understand his statement he chooses to take up the outstanding Government bonds and pay them with non-interest-bearing currency. All right, there is $30,000,000,000 of Government bonds which, added to the present $6,000,000,000 of currency, would give us $36,000,000,000 of currency in circulation, or a 600-percent inflation. Such an inflation will destroy the value of every wage check and of every pension check of war-disabled veterans.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. McGUGIN. I cannot yield. The gentleman from Texas has control of the time on his own side. I suggest he answer in his own time.

Mr. PATMAN. Then the gentleman does not want an explanation?

Mr. McGUGIN. Yes; what was the gentleman's statement?

Mr. PATMAN. You change the reserve requirements of the banks so that they cannot loan $10 to every $1 in reserve; you can, of course, take care of the element of inflation so we would have no inflation at all.

Mr. McGUGIN. And have $36,000,000,000 in circulation?

Mr. PATMAN. That is right. Pass legislation so that the banks cannot loan 10 to 1 but only 2 to 1. Just change the reserve requirements, that is all.

Mr. McGUGIN. The gentleman from Texas is pulling a Houdini stunt.

Let us discuss the payment of these adjusted-service certificates on the basis of need. There are some 50 or 60 veterans in this House today drawing $8,500 a year salary. Are we entitled to a bonus which is based on need? Should we be allowed to profit by the poverty and distress of a part of our comrades? No. If we want to print money to take care of needy people and reach the greatest number of people, then let us print money and pay the C.W.A. debts. That will reach both veterans and nonveterans in need.

It has been said we should pay the certificates in advance because the Government is spending money for this, that, and the other. Now, I want to say to my Republican friends: If you vote for this measure you have foreclosed yourself from saying one word in defense of our political existence today. The one real issue we have today is that this administration has not balanced its budget, but has spent money too lavishly. If we Republicans vote for this bill today then we stand in the position of saying that our criticism of this administration is not because it has spent $7,000,000,000 more than it has taken in, but because it has not spent $9,500,000,000 more than it has taken in. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Minnesota [Mr. LUNDEEN] as much time as he desires.

BILLIONS FOR AMERICA, NOT A DOLLAR FOR THE KINGS OF EUROPE

Mr. LUNDEEN. Mr. Chairman, not long ago Members of Congress voted to give billions to the railroads, billions to the banks, and billions to war profiteers. There was not much argument about that. Not so long ago the American Congress voted to cancel $12,097,667,000—due America from Europe; that is over twelve thousand million dollars—and there was not so very much debate about that vote to turn it over to kings and foreign countries who paid large sums of money to their soldiers. And even now there are those who say we should cancel the balance of European indebtedness to us, an additional $12,000,000,000. They do not hesitate on that. How can they now oppose payment to our soldiers? If we can turn large sums of money over to foreigners and to foreign countries, we can do as much for our own men in America who carried the flag in time of war.

Just now I am handed this telegram from the George R. Wolf Post, No. 425, Veterans of Foreign Wars, Hopkins, Minn. With your permission, I read it, as follows:

Two World War veterans committed suicide in your district March 10. Both men overseas veterans living in Hopkins. Both funerals will be held in Hopkins on March 13. Veterans in this territory are not receiving consideration as promised in administration orders on C.W.A. Thanks for your efforts.

Millions of men are watching our course today, and who shall say that those who have "gone west" into the Great Beyond are not in our very midst? Let us give heed to those who speak to us from the open grave.

Not long ago I heard the able and distinguished Chairman of the Labor Committee, Mr. CONNERY, from Massachusetts, state that 37 Spanish-American War veterans committed suicide in the State of Massachusetts within 30 days after the passage of the Economy Act. This has been going on all over the United States. Thousands of veterans of all wars have passed into the Great Beyond because of vicious, cruel, and inhuman legislation enacted by the Seventy-third Congress and signed by the Chief Executive.

It is time that we listen to the cry of widows and orphans of men who could not bear to see them suffer cold, misery, and hunger—disabled men. Remember, they cannot go out and get a job. They were gassed in war time; their lungs were burned out; some of them are feeble with age and suffering from war-time ailments and wounds. Is there any justice in that?

Now is the time to pay the adjusted-service certificates while these men are with us; when they can use it to protect themselves and their families. Remember, they are American soldiers who wore the uniform and who faced the enemy on the battlefields of war. I am not going to have my children say that I was down here in Washington drawing a salary while I voted to reduce the salaries of the Federal employees below the point of a decent American standard of living, and forced poverty and misery and hunger upon my comrades of long ago.

With your permission, I will read the wire of G. K. Brobeck, legislative representative Veterans of Foreign Wars:

Note statement of Economy League says V.F.W. not representative of service men. Why is Economy League silent on income-tax scandals, mail, and bank scandals. Curran's so-called "Economy League" group represents that part of American life who are living luxuriously through the depression. This is the opinion of half a million overseas men.

With your permission, I will read the wire of James E. Van Zandt, commander in chief of the Veterans of Foreign Wars:

Newspapers indicate pressure being put upon Members by administration relative vote on bonus bill. My visit and personal contact with veterans in every State indicate, not only veterans, but general public favor immediate payment of bonus. Moreover, the devaluation of gold makes it possible to enact so-called "bonus bill" without destroying monetary system. Speaking for World War veterans and families a vote in favor of the bonus means our united, strong support in coming elections.

With the permission of the House, I will read the following letter from the Veterans' of Foreign Wars dated March 8, 1934:

MARCH 8, 1934.

MY DEAR CONGRESSMAN: Information has come to me that you have lately received a letter from Mr. Henry H. Curran, who styles himself "director of the National Economy League", known to all real Americans as the "national comedy league." This letter, I am informed, contained an attack upon the program of our organization for the immediate cash payment of the adjusted-service certificates. You, of course, realize that the National Economy League was formed by the big-business element of our country, who made the billions in war profits.

In the letter written by Mr. Curran he states that the payment of the adjusted-service certificates is asked by only one organization, and we are proud to state that that organization is the Veterans of Foreign Wars, every member of our group having had service on foreign soil or in hostile waters in time of actual war. If you will avail yourself of information which can be obtained from the Congressional Library you will see that the vast majority of the membership of the National Economy League is the type of American that did the cheering while the men who make up our organization marched away to sleep in the mud and trenches of a war. It is interesting also to note that the National Economy League, who claim they are in favor of economy in government, have been strangely silent on such things as income-tax evasion, air- and ocean-mail-contract graft, stock-market graft, and all other forms of governmental corruption which permits many of their membership to take the profit out of peace.

Our organization represents almost half a million American citizens who are a cross section of the plain people of this country who bleed in times of war and suffer economic distress in times of depression. We often wonder what this Nation might have been if the type of grafting, greedy interest, represented by the Economy League, had been in control of this Nation from the date of its founding.

Mr. Curran's statement that the adjusted-service certificate is not due until 1945 is, if properly considered, an inaccuracy. All other war debts are paid to the contractors, shipbuilders, etc., as of the date of the war, but the meager certificate given the fighting men of this country was dated January 1, 1925.

Very sincerely,

JAMES E. VAN ZANDT,
Commander in Chief.

THE PRESS AND THE LUNDEEN MOTION

For some reason or other, the great press of the country insists on twisting and distorting statements about the adjusted-service certificates, and the battle now going on in Congress.

In the issue of March 12, 1934, the New York Times, front page, we find the following statement, as of March 11, 1934. I am reading:

Mr. PATMAN said he was sure he could get the 145 signatures necessary to bring the bill out of the Ways and Means Committee which it has had since the early days of this Congress. After this petition has been made a vote of a majority of the House is necessary to have the bill brought up for discussion.

When the New York Times wrote that, they well knew that the Lundeen motion to discharge the Ways and Means Committee received its 145th signature on the 20th of February 1934, nearly 3 weeks before this statement was made, and yet they seek to mislead the public and give out the impression that we were still trying to get signatures to the motion to discharge the committee.

The New York Times owes the veterans of America an apology for such a misstatement. The records of Congress will show that ERNEST LUNDEEN was the author of the motion to discharge the Ways and Means Committee from further consideration of H.R. 1.

I warn the great press of America that the patience of the soldier boys of the United States is rapidly being exhausted with tactics such as these, and I wish to remind the great press of the country that the Federal employees and veterans' organizations are building up a press of their own. They no longer need to turn to the daily press for information and for truth on pending legislation.

FARMER-LABOR PLATFORM CHAMPIONS VETERANS' CAUSE

The Farmer-Labor platform of Minnesota declares that "We demand the immediate cash payment of all soldier-bonus claims, to be financed by the issuance of Treasury notes and not to be dependent upon a bond issue."

Remember, this plank was written by Legionnaires, V.F.W.'s, U.S.W.V.'s, D.A.V.'s, and members of other veterans' organizations. Our platforms are written by farmers, workers, and veterans, and our platforms are not written "just to get in on." We mean business—don't forget that. When the farmers and workers and veterans rule America you will have soldier justice, and a square deal for farmers and American labor. If you want more information on this subject, write the Farmer-Labor Leader, St. Paul, Minn.

AMERICAN LEGION POSTS FAVOR PAYMENT

One of the finest Legion posts in the great State of Minnesota is the Minneapolis Bearcat Post, No. 504, 15 North Sixth Street, Minneapolis, Minn. On March 9, 1934, I received the following letter, which I will read with your permission:

MARCH 9, 1934.

Hon. ERNEST LUNDEEN,
Congressman from Minnesota, Washington, D.C.

DEAR CONGRESSMAN: We are enclosing some more bonus petitions which recently arrived. Like the first ones sent you, they represent all sections of the State, which more than proves the universal demand for immediate payment of the bonus in our State. As these are the originals and only copies which we have, please keep them.

Joe Glascock, our vice commander, reported at our last meeting on his recent visit with you. Thank you for the courtesy shown him and for the fine work which you are doing at Washington. The boys all send their regards and wish you continued success.

Yours very truly,

MINNEAPOLIS BEARCAT POST NO. 504,
F. H. FOURNIE, *Commander.*

Here is one petition signed by 207 veterans from the American Legion Axel Buseth Post, No. 18, Henning, Minn. I will read their communication:

FEBRUARY 2, 1934.

Mr. F. H. FOURNIE,
Commander Minneapolis Bearcat Post, No. 504,
Minneapolis, Minn.

DEAR COMRADE: I am attaching hereto quite a number of petitions that our members have solicited signatures to from the voters of this village and surrounding territory.

Due to blocking of many of our roads by snow, these petitions have been slow in coming in, and, in fact, there are many that have not been returned yet. I hope however that even though they are late they can and will be of use in the fight you are making for the immediate payment of the soldiers' bonus.

Sincerely yours,

B. M. THOMPSON,
Commander Axel Buseth Post, No. 18.

Here are 538 signers on petitions, which I will read as follows:

A PETITION TO THE PRESIDENT OF THE UNITED STATES AND THE CONGRESS OF THE UNITED STATES

We, the members of the Minneapolis Post, No. 504, American Legion, Department of Minnesota, and our friends, including business and professional men as well as merchants, believing that the restoration of buying power will increase and return to normal through sound revaluation of the gold dollar and generous coinage of silver, making it possible to print additional money, do urge, petition, and sincerely pray that without delay you will cause the payment of the remaining balance of the veterans' adjustment compensation. The money thus paid, we are positive, will be placed in immediate circulation, thereby creating a buying movement which will prove beneficial to every individual in the United States.

These petitions include the Minneapolis (Minn.) Soldiers' Home, Princeton (Minn.) post, Starbuck (Minn.) post, Bovey (Minn.) post, Edgerton (Minn.) post, Waterville (Minn.) post, Red Lake Falls (Minn.) post, and innumerable Legion posts throughout the great North Star State too numerous to mention, although I would be very happy to enumerate them if there were time and place to do so.

I remember a statement's going out over the country that the Legion was against payment of these certificates, and just then 870 Legion posts reported, and of these, 860 favored the immediate payment of the adjusted-service certificates, and only 10 posts were opposed to this measure. That does not look like very much opposition on the part of the rank and file of the legionnaires of that great organization.

The national encampment of the American Legion held at Portland, 1932, declared for the immediate payment of the adjusted-service certificates, and the 1933 encampment held at Chicago, 1934, did not reverse that action. I am informed by legionnaires that this is correct. If I am mistaken, there are legionnaires on the floor who will correct me. I wish to adhere to the truth, and I do not wish to make any misstatements. I am satisfied from traveling through 25 States in the last few months that the rank and file and the mass of the veterans of America are almost a unit for the payment of these certificates. Here and there you will find a man opposed—usually someone identified with big business in some way or under the lash of some business organization that threatens his job or position. There may be a few here and there who are opposed to the bill on principle, and we will acknowledge their right to oppose the bill if they see fit, but they have yet to advance a good argument against immediate payment of these certificates. The best argument in favor of this bill is that the veterans themselves demand payment now, and almost as a unit state that they should have been paid on their return from the war in 1918 and 1919, at the same time the war profiteers were paid off and the war contractors were paid off and the railroads and the bankers and members of big business and war profiteers in general.

FARMER-LABOR DELEGATION VOTES SOLID

I am proud of the fact that the entire Farmer-Labor delegation in Congress—HENRY ARENS, MAGNUS JOHNSON, PAUL JOHN KVALE, ERNEST LUNDEEN, and FRANCIS H. SHOEMAKER—are voting today as one solid unit for the Lundeen motion to discharge the Ways and Means Committee from further consideration of H.R. 1 and for the immediate payment of the adjusted-service certificates, known as the "Patman bill." Our record is straight on this question. We obey the mandate of our platform. We came here, elected by the farmers, the workers, and veterans of America, and we are loyal to them. We are keeping faith with them. We can go back home, look them in the eye, and give an account of our vote here on these roll calls. We will continue that kind of a record so long as the people of Minnesota send us to Congress.

We plead for an overwhelming vote in the House today—a vote that will astound the country—a vote that will make these newspapers and others, who have been telling us that we could not pass the bill, sit up and take notice. We want a vote here today that will exceed the two thirds necessary to pass the bill over a veto, if that is forthcoming. We want a vote here that serves notice on the Senate that we mean business, and that serves notice on the Executive that we mean business, and that serves notice on the country that we are keeping faith with the veterans. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Oklahoma [Mr. HASTINGS] as much time as he desires.

Mr. HASTINGS. Mr. Chairman, I favor this bill—commonly known as the "Patman bill"—which provides for the immediate payment to the ex-service men of the face value of their adjusted-service certificates and I voted for the motion to discharge the Ways and Means Committee from further consideration of this bill for the reason that it was introduced on March 9, 1933, more than a year ago, and no consideration has been given it by the committee, and no report made upon it.

I shall vote for the bill for a number of reasons: First, I believe it to be an act of justice to the ex-service men because the compensation which was given them during the World War was entirely inadequate, and Congress thereafter, and on May 19, 1924, passed a bill to adjust their compensation because everyone throughout the Nation appreciated that $30 per month for service at home and $33 for overseas service did not at all compare with the compensation which was paid to the men in civil life during the period of the World War. Instead of issuing to them adjusted-service certificates payable 20 years thereafter, the ex-service men should have been paid in cash. I have always favored this payment and have repeatedly so stated in public addresses, in private interviews, and on the floor of the House.

Second, I believe that the payment of these adjusted-service certificates now will do more to relieve the depression than any other act that Congress may pass at the present session. It would distribute approximately $2,200,000,000 to ex-service men, their representatives, or dependents in practically every community throughout the Nation. This money would go into the channels of trade for the benefit of everyone. From a compilation that has been made and inserted in the RECORD, my State, Oklahoma,, would receive $39,822,-184.80, and the second congressional district, which I am privileged to represent, would receive $3,960,299.22. Divided into counties the distribution would be as follows: Adair, $245,244.72; Cherokee, $290,351.40; Haskell, $269,509.92; McIntosh, $414,236.88; Muskogee, $1,103,966.88; Okmulgee, $939,993.96; Sequoyah, $324,173.10; and Wagoner, $372,753.36.

Third, the pending bill provides for controlled expansion of the currency and would place the additional amount of $2,200,000,000 in actual circulation which would be in addition to the currency in circulation at the present time. These Treasury notes are made legal tender, receivable in payment of all debts and dues, public and private, and are backed by the provisions of the act of March 14, 1900, and section 26 of the Federal Reserve Act in the same manner and to the same extent as such provisions apply to the United States notes.

In my judgment, the payment of these certificates through the issuance of the amount of additional notes will immediately affect commodity prices and result in raising the price of all commodities, including farm products of all kinds and stabilize property values, including farm lands and real-estate values in cities and towns. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield 1 minute to the gentleman from Alabama [Mr. JEFFERS].

Mr. JEFFERS. Mr. Chairman, if these adjusted-service certificates can be retired at this time it will give to all classes of business in this Nation that new life blood—additional money in circulation—which is certainly needed and needed now. At the same time, it will accomplish the retirement of Government paper—Government obligations—which must, of course, eventually be paid. The Government is already putting out vast sums of money, along many different lines, and it seems to me that there could not be any more equitable distribution of funds over the Nation than the payment of the balance of these certificates, because we know that these certificates are now held by men who live in every nook and corner of the land. In this way we would have a great relief measure which could be fairly distributed to every community in the Nation without the possibility of graft or favoritism. To increase the general purchasing power of the people in this manner would carry us a long way on the road to recovery. Let us bear in mind that this money would not simply be paid to the veterans who are holding these certificates and stop with them, but all this money would very soon find its way into the channels of trade. Every line of business imaginable would receive its share of the benefit. A dollar sent into any locality would not simply mean one dollar always, it would be multiplied many times over in purchasing power, because it would turn over from 15 to 40 times each year. So, if we can arrange to distribute this money through the payment now of these certificates it seems to me that it certainly would be in the interest of the general welfare.

To pay off these certificates at this time, thereby increasing the purchasing power of the masses of our people and, at the same time, getting this Government's obligation out of the way now, would mean a saving to the Government of more than $10,000,000 between now and 1945 in the overhead expenses of the administration of the Adjusted Compensation Act.

I feel perfectly safe in making this statement, that if these certificates are paid off at this time, a vast majority of the veterans will undoubtedly put the money to good use by paying current debts, making payments on homes, and thereby preventing the actual loss of their homes, which a great many of these men are now facing; the purchase of furniture for their homes, equipment for their farms, establishing themselves in modest business enterprises, and many other worthy purposes.

The point has been raised that the balance on these certificates is not yet due. But, let us bear in mind that these certificates were not issued to the veterans at the time when they should have been issued—when the soldiers of the World War received their discharges—they were not issued until 1925. And, be it remembered that the veterans were not paid one penny of interest from the time they rendered their services in 1917 or 1918 up to 1925, when the certificates were dated.

On the other hand, the huge monopolies of the Nation, such as United States Steel Corporation and the American Aluminum Co., made claims for enormous amounts of money as tax refunds, and many of these big tax-refund claims were granted by the Treasury Department, and in every such case these people, when the Government confessed its debt to them, got the Treasury Department to allow them an additional sum as interest dated back to some certain date during the war period and the Government paid them 6-percent accrued interest from 1917 or 1918 up to the time when the claims were finally paid, and some of these immense refunds were pending up to 1932. In other words, they were paid 6-percent interest from the time they rendered the service. If the adjusted-service certificates had been issued to the soldiers as of the date of their discharge from the service, and if 6 percent had been figured on their claims back to the date of their discharge, we find that these certificates would have been due and payable in 1931 instead of in 1945. So, if the Government will give to the veterans who gave their services during the World War for a mere pittance of pay the same treatment as has been given to the great industrial interests which furnished war materials and made immense profits for themselves, we can say with accuracy that these certificates are already due instead of not being due until 1945.

There is another important angle which should be considered; Congress has already granted a 50-percent loan value on these certificates, and a very large percentage of the veterans, hard hit by the distressing economic conditions that have existed during the past several years, have already borrowed up to 50 percent of their certificates. Now, if we do not find a way to pay off the balance of these certificates, this balance will be consumed by compound interest on what has been borrowed, so if the veterans are forced to wait until 1945 they will then find that almost nothing at all will be left, because by that time it will have been eaten up by compound interest. Certainly that condition is not one which we wish to contemplate or anticipate. If that should be allowed to come to pass, everyone would lose, because there would be nothing then for the veterans to put into the channels of business. In other words, if the country is to get any benefit from the payment of the balance due on these certificates such payment must be made before that balance is eaten up by compound interest.

The payment of these certificates would be a great practical benefit now to these veterans, their families, and to every class of business people of the country, because of the increase in the purchasing power of the people of the Nation that would be brought about; but let me suggest that another result just as valuable as that, or even more so, would be the satisfied feeling toward their Government, for the protection of which they served in time of national peril, in the minds and hearts of our ex-service men and women, and I want to see that result just as much as any other.

The funds to pay off this obligation will be the sound money backed by perfectly adequate gold reserve, the same as any other money which we are now using is backed by our gold reserve.

For my part, I wish to say that I have been consistent in supporting this adjusted compensation. During the World War period the men and women in the service stood the brunt, for the protection and salvation of America—their homeland—and American institutions, and drew very small compensation for their services in comparison with the amounts that others were receiving for their labor, and for the products of their labor during the war period, so it was only fair that their compensation should be adjusted in some manner.

In 1924, during my remarks here in this House on this subject, I stated:

> I am in favor of fair adjusted compensation for the ex-service people of our Nation as a matter of right, looking at it from the standpoint of merit, fairness, and justice.

In 1932, during my remarks on this same subject, I stated:

> We are hoping for and looking forward to the return of more prosperous conditions; but in the meantime we sorely need, in every nook and corner of the land, among the rank and file of the people, some form of relief which will put money into circulation immediately.

I feel now that the great need of business all over the Nation is that we should have as quickly as possible additional actual money in circulation. Certainly this is true in my section of the country.

We are furnished with statistics which give us a very clear and understandable idea as to how this money would be put into circulation in every locality, however remote; and I note that it is estimated that the amount which would go to my own State of Alabama is $29,876,139.92. In the congressional district which I have the honor to represent, the estimated amount which would be put into circulation is $2,987,988.82. This amount of real circulating medium in my section would undoubtedly be the stimulant which is a vital need at this time.

So let me again say, looking at this proposition from the same standpoint of merit, fairness, and justice, I am of the

sincere and honest opinion that this matter can be rightfully settled only by the payment of the balance of these certificates.

Mr. PATMAN. Mr. Chairman, I yield 1 minute to the gentleman from Wisconsin [Mr. O'MALLEY].

Mr. O'MALLEY. Mr. Chairman, I intend to vote for this measure because I have always believed that we should pay for past wars before we start into another one. The big-army and the big-navy crowd have come to Congress in the past weeks and have obtained millions of dollars in appropriations for the next war when we have not yet paid off the men who fought in the last war. And I remind my Republican friends that if this is fiat money—and it is no such thing—then every bond we have issued in this Seventy-third Congress is a fiat bond, and we are inflating with bonds at 4½ percent for the taxpayers to pay. Those who are against this bill and who believe that it is an inflation, should remember that they have voted to inflate the credit structure of this country by billions of dollars. It is about time that we get some cash money into circulation through the medium of the common people and not by way of bankers with bonds that compel us and generations yet unborn to pay interest to a privileged group for the use of our own money.

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Mississippi [Mr. COLMER] such time as he may desire.

Mr. COLMER. Mr. Chairman, if I should not avail myself of this opportunity which has been so graciously extended me by my warm personal friend, Mr. PATMAN, of Texas, who is in charge of the time in the consideration of this bill, I should feel derelict to my convictions and to my constituents. I keenly regret that the limited time allotted for the consideration of this measure will not now permit me to discuss it in detail, as I should prefer to do.

I have long entertained the view that there was an urgent need for the expansion of the currency by a process of controlled inflation on the one hand and the payment of a just obligation by the immediate payment of the soldiers' adjusted-service certificates on the other. As a candidate for Congress in 1932, without being familiar with the provisions of the bill under consideration, known as the Patman bill, I advocated from every platform on which I appeared the very principles embodied in this bill. Believing as I do in the merit, justice, and expediency of this legislation in this crisis, with three other Members of this Congress, Mr. PATMAN, of Texas; Mr. MCCLINTIC, of Oklahoma; and Mr. CONNERY, of Massachusettts, I called upon the President in the extraordinary session and discussed the immediate payment of these certificates with him. Subsequently, I signed the petition to discharge the committee in order that the bill might be considered by the House. I am happy that I have been selected as one of the nine members who compose the steering committee, which was selected to guide this legislation here today.

Mr. Chairman, the passage of this bill would mean several things:

First. It would mean the payment of a just obligation to the boys who offered their lives as a sacrifice upon the altar of our country in 1917 and 1918. Certainly this is a small contribution to those who were offered and promised so much when they went into the service of their country at a time when their country needed their services so badly. Time will not permit my going into comparisons with the millions of dollars that were accumulated into gigantic fortunes by those who profited here by not going into the armed services of their country. But that was not all. While these boys were drawing a paltry $1 a day salary for the hardships which they were called upon to endure, the very day laborer and munition worker and those who kept the home fires burning were drawing from $5 to $20 a day and at the same time being surrounded with all the conveniences and luxuries of civil life.

Second. The passage of this law by the Congress would mean that $2,300,000,000 of new money would flow into the channels of trade, would increase the purchasing power of our citizenship, and would accomplish in a large measure that which we have been hopelessly striving to do for the past 2 years, namely, to increase the purchasing power of our people, to distribute an inflated currency throughout the Nation, and relieve distress among our people. For I defy anyone to conceive of a better method for the distribution of an expanded currency than that provided in this piece of legislation. It means that every village and every metropolitan center from coast to coast and from the Lakes to the Gulf will receive its proportionate part of this $2,300,000,000. In this connection, Mr. Chairman, at this point I desire to insert the following statistics which will reflect the amount of money which will be distributed to the four corners of my congressional district under the immediate-payment plan provided in this legislation. The amounts to be so received by the veterans in each county of my district are as follows: Covington, $160,499.04; Forrest, $321,628.20; George, $80,345.64; Greene, $113,677.92; Hancock, $121,912.20; Harrison, $471,447.24; Jackson, $170,591.64; Jefferson Davis, $152,521.08; Jones, $443,134.56; Lamar, $137,216.64; Lawrence, $133,190.28; Marion, $212,777.64; Pearl River, $207,245.40; Perry, $87,543.96; Stone, $60,918.72; Wayne, $163,350.60.

Third. The enactment of this measure into law will save the taxpayers of this country $122,000,000 a year for 12 years in administrative and other overhead costs.

Fourth. The passage of this legislation will grant a privilege to the veterans who hold the certificates long enjoyed by the national banks and the Federal Reserve banks—to receive new currency from the Government in return for a Government obligation. The so-called "bonus certificates" are in no sense a bonus; they are Government obligations.

Fifth. Under this bill no new taxes are required; no bond issues are called for. No additional burden is placed upon anyone. A just and recognized obligation is paid, and paid now when it is sorely needed and at a time when the Government is trying every conceivable theory to get money distributed among the masses of its people.

Sixth. The payment of these certificates now will mean that the 3,019,592 veterans who have already been forced to borrow $1,340,659,199.38 on their certificates will be paid the balance due them now and not lose it, as will be the case under the present arrangement. For it is a well-known and undisputed fact that the interest charged on the amount so borrowed will almost completely eat up the balance due on the principal by 1945, the date set for the payment of these certificates.

Seventh. And, moreover, it means that the so-called "bonus" will no longer be the football of politics that it is today. The issue will be once and finally settled.

This legislation, if enacted, means a decided departure in the right direction from the old, antiquated, and useless system so long practiced in our issuance of currency. For this bill provides for the immediate payment of this obligation to the holders of these certificates in United States notes, which shall be legal tender in payment of all debts and dues, public and private, and shall be receivable for customs, taxes, and all public dues, and, when so received, shall be reissued and shall not bear interest. This means, of course, that this money will have the same efficacy, and it will to all intents and purposes serve the same purpose, as any other currency issued by the United States Government; that it will have the faith and credit of the United States behind it. This obligation to the holders of these certificates will be paid without the necessity of a bond issue for which the taxpayers of the country will be called upon to pay interest, that no doubt would accumulate before the bonds were retired to the point where they would exceed the principal amount of the bond issue.

And that, my colleagues, brings us down to the only objectionable point that has been seriously raised to this legislation—this is termed fiat money. I deny this. I challenge any Member of this House who considers himself an authority on the matter of currency—and I certainly do not regard myself as one—to point out any material difference between the currency provided for in this legislation and a bond issue of the United States Government upon which currency is

issued other than that the bond issue provides for interest to be paid by the taxpaying public and the currency provided for in this bill does not. The faith and credit of the United States are behind the bond issue, and they likewise are behind the notes provided for herein. Is there any good reason why the Federal Government should pay the big banking interests of this country millions of dollars annually for the privilege of issuing its currency? But the opponents of this bill argue that in passing this legislation we are setting a dangerous precedent and that we may issue too much currency. It is true that if too much currency is issued that it will become cheapened and that the credit and faith of the United States Government will be destroyed. But by the same argument, is it not likewise true that if too many interest-bearing bonds are issued the faith and credit of the United States will be destroyed? The rule applies to one as well as the other.

Mr. Chairman and colleagues of the Seventy-third Congress, notwithstanding this fact and the additional fact that this legislation would be a substantial contribution to the recovery program of this administration, I must confess that I am deeply concerned and grieved at what we are informed is the attitude of the administration toward this legislation. I have the utmost confidence and the most profound respect for the great leader at the other end of Pennsylvania Avenue, the President of the United States. That confidence and respect border upon personal adoration on my part. There may be others in this Congress who have supported his leadership in this great national crisis more effectively than I have. But there is not a Member of this House who up until this moment has supported him more zealously and conscientiously and more uniformly than have I in the year that he has been the President and I have had the honor to be a Member of this Congress. I have gone down the line like a good soldier with him. Oftentimes this policy of standing by the Commander in Chief has been at the expense of my own opinions and almost at the sacrifice of my own convictions. Always I have felt that as the outstanding leader of the country he was entitled to my support as a Representative of some 300,000 Mississippi citizens. But the time has come, because of my previous sacred commitments and because of my sincere convictions, that I must either follow his wishes on the one hand and thereby keep a perfect record of administration support, or on the other maintain my campaign commitments and my own strong, personal convictions, thereby maintaining my own self-respect. In this dilemma, Mr. Chairman, I must preserve the latter at all costs. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield the gentleman from California [Mr. DOCKWEILER] 1 minute.

Mr. DOCKWEILER. Mr. Chairman, I am not afraid to take the position I do on this bill. During my campaign I spoke on the radio for immediate payment of the soldiers' bonus. The folks that did not like my attitude on this question were very frank about it and did not vote for me. Nevertheless, I was elected in the Sixteenth Congressional District.

May I leave this thought with the members of the Committee: I assume during these trying times we are endeavoring to do something to take the economic lethargy out of our business world today and take it off the dead center. I believe that we can use this channel to put money into the people's hands in order to make for new prosperity in this country.

Mr. PATMAN. Mr. Chairman, I yield to Mr. AYERS of Montana such time as he may desire. [Applause.]

Mr. AYERS of Montana. Mr. Chairman, I was not definitely committed on this bill as far as my campaign was concerned, but a study of this bill by any man who has some legal training brings him to the conclusion that it is one of the most statesmanlike pieces of legislation we have been called upon to consider at this session. [Applause.]

From every source, and every day, we hear the cry for more purchasing power for the masses. Great effort is being exerted on every hand to do that. During the past 3 years fabulous sums have been appropriated for financial, insurance, and transportation institutions, with the hope that it would percolate downward to the masses. The desired purpose has, to a large degree, failed. To get purchasing power in the masses a start must be had with them, and the start must not be by way of subsidies, bonus, or doles. It must be in fair prices for products, honest pay for labor, and equal recognition of all Government obligations. The President is striving to bring about that end. To do this, I feel that we must have the silver bill, the Frazier bill, and a bill providing payment of the veterans' adjusted-service certificates. The last mentioned of these bills is our instant consideration.

THIS BILL FITS INTO RECOVERY PROGRAM

The President has made decided progress in taking power from the Money Trust. No longer does it have access to the White House. His gold program was a solar plexus to the Money Trust. When the Federal Reserve banks were compelled to surrender their gold and take certificates for it before the devaluation order went into effect, they saw a profit of nearly $3,000,000,000 going into the United States Treasury that they had planned and expected for themselves.

The President is waging a war on high-interest rates. He is using the Nation's credit to help the farmer and home owner, and he is trying to rehabilitate industry. The trouble in these instances revolves around the instrumentalities used. He is using the Nation's credit in the Public Works and Civil Works Administrations.

Employment and purchasing power is on the increase, and the Government is putting up fabulous sums of money to keep them progressing. The enactment of the adjusted-service certificate bill, dollar for dollar, will do more good than anything else this administration can do to keep employment and purchasing power on the increase. The moneys paid on the soldiers' obligation would be free from favoritism, waste, or scandal. It would do more good in bringing purchasing power to the masses than any other money that has been expended.

While the payment of these certificates, as I will directly show, would not disturb the Budget one penny, nor cause a bond issue, nor impair Government credit, yet the National Economy League insists that the payment should not be made. The league is worried about the Budget for reasons personal to its members and their kind, and they use it as a smokescreen, because they realize this money will go to other channels than theirs. There is nothing quite so suitable to the Government's present purpose as the immediate payment of these certificates. This payment would not create a new obligation and would discharge an existing one—no such features apply to any other Government spending under the recovery program. Unlike other Government spending, little red tape or overhead expenditures would be required in this distribution.

POLITICS NOT INVOLVED

This is not a party measure. Neither party advocated it nor opposed it in their platforms. The Democratic platform declared for a sound-money system at all hazard. This bill is unqualifiedly for sound money. Many candidates in each party advocated and others opposed it in their individual capacity during the last campaign. As for me, I felt kindly toward the payment of these certificates, provided it could be done without disturbing the Budget or creating additional tax burdens or impairing the credit of the Nation. Now that I am sure the payment can be made without doing any of these things, I am glad to give it my unqualified support.

This is not an administration measure, nor an antiadministration measure, and it is not now, nor ever has been, political in its nature. It has heretofore been passed by a Democratic House and vetoed by a Republican President. This instant bill was introduced by a Democrat; it is being brought to the floor of the House by a petition of 97 Democrats, 43 Republicans, and 5 Farmer-Laborites; hence partisanship cannot be injected.

I am not finding fault with any Members who oppose this bill. Every man has a right to his own opinion, but every man should be open to conviction by honest argument based upon facts. That is what I am trying to do—not finding

fault, just trying to convince by honest argument based upon actual facts.

ADJUSTED-SERVICE CERTIFICATES

The adjusted-service certificates are not bonus claims by any means. That word "bonus" in this connection is a misnomer. These certificates are Government obligations issued for services rendered. They were arrived at by a committee, which, after a thorough investigation, found that the lowest paid unskilled laborer in the United States during the World War ranged from $1 to $1.25 per day more than the amount a private soldier received in service. After the facts were gathered by this committee they were put before Congress. It found that an equitable adjustment was necessary, and that adjustment was made by Congress in allowing a soldier $1 per day for home service and $1.25 per day for overseas service in addition to his soldier's pay. Pursuant to that adjustment—a congressional act—these certificates were issued. In the face of such facts, they are not bonus certificates, but quite the contrary. They are certificates issued by the Government, upon authority of Congress, for services rendered. The issuing of these certificates is not a matter for consideration now. That is a closed deal.

These certificates are outstanding obligations of the Government. They are its bond. Uncle Sam's name is on them. He has confessed a debt for services rendered, and issued these certificates as evidence of same. The service rendered was a service in line of duty with breasts bared in defense of country.

MILLIONAIRES WERE MADE AT EXPENSE OF SOLDIERS

The soldier answering the call of his country was being paid $30 per month, while war profiteers at home, taking advantage of the perilous condition, were becoming millionaires. While these veterans, at the risk of their lives, were making the world safe for democracy, these home profiteers were actually robbing their Government, and, in the name of patriotism, they were cornering the wealth of the Nation—the very thing that is now threatening our destruction. They were bringing about the present condition at cost of health, maimed bodies, and the very lives of the boys at the front. And now these same profiteers and their allies, under the mask of a new patriotism, and in the name of economy fostered by the National Economy League, which they have organized, are trying to prevent the payment of an honest Government obligation in order that they might reserve the Treasury money of the United States for further "runs" of their own.

NATURE OF CERTIFICATES

These certificates are 20-year endowments, issued in 1925 and payable in 1945. The National Economy League propaganda is that if these certificates are recognized they should be recognized only on the basis of the veterans remitting what the league claims to be unearned benefits. In other words, their propaganda is that these certificates should be recognized on a 9-year basis instead of a 20-year basis. They urge that if the face of these certificates is paid now the Government will be losing and the veterans will be gaining the earnings on the certificates from now until 1945.

Let us see what there is to that argument. If this bill passes, the Government will be taking up its own obligation, together with all its earnings and benefits, and holding it as security for the issuance of money therefor. The veterans will be getting nothing more, and the Government will be holding its own outstanding obligation for disposition as it sees fit. It will not be costing the Government anything in the meantime and the Government will be repossessing itself of all of these endowment obligations and benefits; therefore why should it not pay face value?

By taking these certificates up at their face value today and issuing money on them we will be saving the Government $112,000,000 per year from now until 1945, or $1,232,000,000. This is how the saving will be made: This bill repeals the appropriation clauses of the original law, which amounts to $112,000,000 per year up to 1946, and it provides for taking the certificates now and issuing nonearning certificates for them.

In mighty few words here is what it does: It takes noncirculating and earning obligations and transfers them into circulating and nonearning obligations. No one in the world is harmed or burdened and everyone is helped and relieved.

The Government is issuing circulating obligations—new money to the banks on their noncirculating obligations—Government bonds. It is doing for the banks just what this bill proposes to do for the veterans. Yet the big banks of the country and their allies, the National Economy League, are making the biggest hollo about this bill. They are the ones that have been sending out the poison about this bill. They call it wild inflation; an orgy of promiscuous issuance of greenbacks, and printing-press money. They tell us a story of how it would cheapen money and ruin banks. To the person who has given this and the bank situation only casual thought, this propaganda is ridiculous. It is poison that no thinking person will take. First consider its source; and, second, if the money issued under this bill is not sound, then we have no sound money. [Applause.]

SOUND EXPANSION IS PURPOSE OF BILL

The terms of this bill are vastly different from what people generally believe them to be. A propaganda of misrepresentation has been widespread to the effect that it will unbalance the Budget; that a bond issue will be necessary; that the credit of the Nation will be jeopardized and that fiat money will be issued. Ladies and gentlemen of the House, facts are quite to the contrary. Let us see what the bill really provides. It provides for a controlled expansion of the currency in the immediate payment to the veterans of the face value of their certificates in new currency—United States notes. These notes will not bear interest and will be lawful money of the United States and shall be maintained at a parity value with the standard unit of value fixed by law. No new principles of issuing money are involved.

Such notes will be legal tender in payment of all debts, public and private, and shall be receivable for customs, taxes, and all public dues, and when so received shall be reissued. Such notes, when held by any bank association or Federal Reserve bank may be counted as a part of its lawful reserve. This is nothing new. It is only treating the holders of these obligations in the same way that the Government treats the Federal Reserve and national banks holding Government obligations. Now, please bear with me that we may understand the situation.

EXPANSION UNDER THIS BILL IS DEFINITELY CONTROLLED

Section 3 of the bill definitely controls the proposed expansion of the currency. It provides that whenever the index numbers of the wholesale all-commodity prices rise above the index numbers of such prices for the years 1921 to 1929 as computed by the Bureau of Labor Statistics of the Labor Department, the issues of currency of the United States shall be contracted so as to maintain such index numbers at the wholesale all-commodity level for the years 1921 to 1929.

This is to be done, first, by the abolishment of the circulation privilege extended to certain bonds of the United States; second, termination of the issuance and re-issuance of national bank circulating notes; third, termination of the issuance and re-issuance of Federal Reserve notes secured by direct obligations of the United States; fourth, termination of the issuance and re-issuance of Federal Reserve notes secured only by gold or gold certificates; fifth, termination of the issuance and re-issuance of Federal Reserve notes secured by private paper and which are not issued in direct benefit of commerce, industry, or agriculture.

Therefore, the cry of dangerous expansion is only imaginary. It is absolutely and definitely controlled by this legislation.

VETERANS TO HAVE SAME RIGHTS AS BANKS

If this bill passes, the veterans holding these Government obligations will have the same rights as a bank holding Government obligations. The veterans may deposit their Government obligation—their certificates—and receive cur-

rency therefor. This is the same right that is now enjoyed by the national banks and by the Federal Reserve. The national banks of the country are capitalized for approximately $1,159,000,000. These banks may deposit with the United States Treasury bonds which they have purchased from the Government, bearing at the rate of 3⅜ percent and receive in return therefor $1,590,000,000 in new currency. The only obligation on the part of the banks is that they keep on deposit in the Treasury 5 percent of the amount of such money for redemption purposes.

To ascertain the position of the banks and the Government, let me illustrate a transaction. The Government sells to a bank a $1,000 bond upon which it pays the bank 3⅜ percent interest—$33.75 annually. The bank immediately redeposits the bond with the United States Treasury and receives $1,000 in new money. It gets its money back right now, except 5 percent, or $50, which is left on deposit with the Treasury. The bank gets $950 for immediate use and once each year it also gets interest on the $1,000 bond deposited. In other words it gets from the Government 95 percent of its money back and it also gets 3⅜-percent interest on the $1,000. There is a small charge, one half of 1 percent, against the bank for expenses in connection with the issuance and reissuance of the money. And then, when the bond is paid, it gets the balance of its $50 back.

The solution of this proposition is that the bank gets back its $1,000 plus $28.75 per annum, which is the 3⅜ percent less one half of 1 percent retained for expenses, and in the meantime has the $950, which it can loan at such rate of interest as it sees fit, or it can take it back to the Treasury and reinvest it in other bonds under like circumstances. Therefore banks can take Government obligations due in 1945 and receive new money in return for them and have the use of it from now until 1945, and in addition thereto they can clip the coupons on the bonds, all at the outlay of only one half of 1 percent.

The Federal Reserve does the same thing as the national banks in the way of depositing Government bonds with the Treasury and getting new money issued on them, except that it is paid 4¼ percent interest instead of 3⅜ percent as the national banks are paid. That is using Government credit to a fare-you-well.

Just think of the endless chain these banks can work. They may take the new money in each instance and loan it out at such rate as they see fit, or they may buy more bonds again and again and again. That system of buying bonds and depositing them for currency is the greatest system of pyramiding ever invented. That is what takes the money out of circulation. That is why the banks nowadays show "Government bonds" in their footing instead of "loans." Under the independent banking system the money would get into circulation and would show up as loans instead of bonds.

FEDERAL RESERVE HAS BEEN DIVERTED FROM ORIGINAL PURPOSE

The Federal Reserve went into effect December 1913. It was intended to decentralize money and credit and to extend sufficient credit to commerce, industry, and agriculture. The Government does not own any stock in these banks. It is all privately owned. It is supported by Government credit and was organized as a nonprofit institution for the purposes I have just mentioned. It was never intended that the System would use Government bonds for private gain.

The System is authorized to issue money—Federal Reserve notes. This is a privilege that no other group enjoys. It does not agree to redeem its money, the Federal Reserve notes, but the United States Treasury, the people of this Nation, agree to redeem them. Therefore those notes are a blanketed mortgage on all American property.

The paid-up stock of the Federal Reserve banks is $160,000,000. Upon that investment they have done as much as $100,000,000,000 of business a year. Just think of it, a hundred thousand million dollar business on an investment of $160,000,000. Such volume of business just cannot be done on that investment. It is done on Uncle Sam's credit, and while they are using his credit they are being paid by him for using it. To me that is a bank bonus.

These things could not be done under the original Federal Reserve Act, but they have been brought about by perfecting amendments or by emergency amendments so that the Federal Reserve is receiving benefits never intended by the act.

BUDGET NOT DISTURBED NOR DEBT INCREASED BY VETERANS' ACT

While this system of bond selling and issuance of money to the banks is going on, surely it is not legitimate argument to say that the adjusted-service certificates should not be paid by taking them now and issuing money therefor. The poison peddlers tell us that it will necessitate another bond issue, that it will make additional interest payments by the Government, that it will increase taxes, and, in short, that it will impair the credit of the United States. This argument can usually be traced back to the war profiteers and to the influence of Wall Street banks. They urge that it is all right to issue money to the banks on Government obligations but insist that it is not right to issue money to the veterans on Government obligations. They are blowing hot and cold on the same subject at the same time. Why, they even say that money issued under this bill would be fiat money. Now, let us analyze their argument in that respect.

NEW MONEY UNDER THIS BILL WILL BE EXPANSION ON GOLD BASIS

The Treasury is holding, according to the report I obtained from the Treasury Department Saturday morning, March 10, 1934, actual gold in the general fund to the extent of $3,047,633,356.83 unassigned and unencumbered. This does not include any gold which has been earmarked for any purpose. This general fund gold is sufficient to issue seven and one half billion dollars of money. Neither this Nation nor any other nation on earth has ever claimed that more than 40-percent reserve as a reserve for issuing money is required. Therefore, this money may be backed with gold, and we will still have gold enough to back two and one half times more money.

It is admitted by all that we must have some new life pumped into the channels of trade. Today we have a half million dollars less in circulation than we had on January 1. Currency must be expanded and prohibition of centralization must go into effect. We can do only one thing at a time. This proposition of controlled expansion on a legitimate gold basis is before us today. Let us take it and stop trying to lift ourselves by our own bootstraps.

VETERANS' MONEY WILL GET TO WORK

If this bill passes, then the veteran who has not negotiated a loan on his certificate will be permitted to secure the full amount in cash, and those who have made loans on their certificates will receive the difference between face value and the loan.

It must be an admitted fact that this payment will fit into and materially aid in the recovery program. It would put purchasing power in the hands of the masses to the extent of $2,203,000,000, and this money will reach every nook and corner of the land. It will go to more than 3,500,000 veterans. It will pay debts, taxes, and in many instances will save homes and property that otherwise must be sacrificed. This money will go to the very places where it will get to work. It will be a real step toward getting the purchasing power in the hands of the masses, the very thing for which everyone is crying.

NUMBER OF CERTIFICATES AND AMOUNTS

On January 1, 1934, there were 3,545,284 service certificates outstanding of the total face value of $3,543,981,515. There has been borrowed from the Government on these certificates the total sum of $1,340,659,199, leaving a balance, in round numbers, of $2,203,000,000 payable on the certificates.

We are now spending billions in trying to put more purchasing power in the masses, and I am sure that, dollar for dollar, none of these vast sums, with the exception of that spent by the C.W.A., is getting within cannon range of the purchasing power this certificate money will have.

The far-reaching significance of the money to be issued on these certificates and the good that it will do is emphasized when we consider how generally the veterans are distributed. It will go to every county in the United States; $11,423,022 will go to the State of Montana. The 39 counties in my district will receive $6,960,826.50, and it will be distributed as follows:

Big Horn, $181,528.75; Blaine, $191,377.50; Carbon, $267,133.75; Carter, $87,890; Cascade, $874,352.50; Chouteau, $183,493.75; Custer, $283,892.50; Daniels, $118,001.25; Dawson, $209,971.25; Fallon, $97,070; Fergus, $351,283.75; Garfield, $90,355; Glacier, $112,561.25; Golden Valley, $45,177.50; Hill, $292,718.75; Judith Basin, $111,307.50; Liberty, $46,707.50; McCone, $101,787.50; Meagher, $48,280; Musselshell, $153,892.50; Park, $232,092.50; Petroleum, $43,456.25; Phillips, $174,420; Pondera, $147,985; Powder River, $83,066.25; Prairie, $83,746.25; Richland, $204,701.25; Roosevelt, $226,780; Rosebud, $156,123.25; Sheridan, $209,716.25; Stillwater, $132,876.25; Sweet Grass, $83,810; Teton, $128,945; Toole, $142,672.50; Treasure, $32,296.25; Valley, $237,596.25; Wheatland, $79,780.75; Wibaux, $58,798.75; Yellowstone, $650,181.25.

TREAT VETERANS SAME AS BANKS

Now, Mr. Chairman, is it not fair to let the veterans take their obligations, made payable in 1945, and receive money in similar manner as the banks have received and are receiving on the Government obligations they hold? They are both Government obligations and they are both made payable in 1945, and they are both backed in the same way—by the credit of this Nation. Money purchased one of the obligations, and service, at the hazard of life, purchased the other. Surely we are not going to put money ahead of such service. [Applause.]

WHAT TWO BANKS ALONE CAN DO

The National City Bank of New York is permitted under existing law to have money issued to it from the Treasury, under the circumstances I have related, to the extent of $124,000,000, and the Chase National Bank of New York is likewise permitted to get an issue to the extent of $148,000,000. By reinvestment in Treasury bonds and by the system of pyramiding these banks can make fabulous profits from Government credit alone. Undoubtedly they do make such profits, for the Senate Investigating Committee last week, under the Costigan resolution, developed that W. W. Aldrich, chairman of the governing board of the Chase National Bank, drew a salary of $151,744 for the year ending June 30, 1933. C. S. McCain, chairman of the board of directors of the same bank for the same year, drew a salary of $128,488. Seven other officials of the same bank received salaries from $54,000 to $90,000, and 63 vice presidents of the same bank were listed at salaries from $11,500 to $40,500 for the same year. And, remember, this was the year which included the bank holiday and was the year in which the banks were supposed to have been hardest hit.

IN FACE OF FACTS SHALL WE SAY "NO" TO VETERANS?

In the face of these facts and conditions is it fair to say that the veterans' obligations shall be refused, and at the same time let the banks, by working double, treble, or quadruple shifts, have money issued and reissued to them? The way the banks are overworking this matter it seems we should see General Johnson and have a code made for them.

FIAT MONEY ARGUMENT HAS BEEN ANSWERED

Mr. Chairman, the fiat money argument has gone up in smoke. The money to be issued under this bill is not fiat money. Every time fiat money is argued against this bill by its opponents the bank money hits them in the face, and since they know that the bank money is not fiat money, then surely the money issued under this bill will not be fiat money.

The proponents of this bill are accused of proffering class legislation, and of efforts to create discriminatory legislation, and favoritism of one class over others. In face of the facts, just the opposite is true. If this bill does not pass then we are on record as having class legislation in favor of the banks, and we have discriminated against the veterans in favor of banks. Are we going to say to the banks, "Come on, we will issue new money to you on Government obligations, upon which we will continue to pay you interest" and at the same time and in the same breath and upon like obligations say to the veterans "Go hence; we are not interested in you"? And are we going to say to the great masses of this country that we are not going to expand the currency for anyone but the banks and then only in such manner as they alone may benefit? No, no, no, Mr. Chairman, that will never do. It is unfair, it is unjust, and it is un-American. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Missouri [Mr. DICKINSON] such time as he may desire.

Mr. DICKINSON. Mr. Chairman, I voted for this or a similar measure 2 years ago. I joined in the minority report of the Ways and Means Committee that then brought the bill to the House, and I voted for it when it passed the House 2 years ago. I voted for the consideration of this bill today and I am ready and will vote for its passage when it comes up for a vote after debate. [Applause.]

Mr. FISH. Mr. Chairman, I yield 5 minutes to the gentleman from Kentucky [Mr. BROWN].

Mr. BROWN of Kentucky. Mr. Chairman, I have just this morning returned from my home in Kentucky. I started 1 hour behind the C. & O. train and drove for 200 miles in order to catch that train. I ran out of gas 5 miles out of Ashland, Ky., and walked those 5 miles, getting there just barely in time to catch the back end of the train to get here to do something that is not easy to do. However, I consider it my duty.

May I say to the gentlemen of this House that in my immediate family every member who was big enough to go to war went. One of them was wounded three times in the war. It is my opinion that while there is a noisy minority among the ex-service men who make a big fuss about this matter that the ex-service men of this country who went to war do not want us to embarrass their leader's program in a time of peace. I recognize that I am hopelessly in the minority today. I recognize that the gentlemen on this side of the House are going to vote against me, and I grant them the right to see the matter in the way they do. I only ask that I may be indulged here 3 or 4 minutes to express to you the way the thing appears to me.

Last year we chose a leader, not in a time of war but in a time that is more important than a time of war. The war of today has caused more deaths than the World War did. The people of this country chose Franklin D. Roosevelt. He tells you that this country cannot pay the bonus at this time. I hope that the time will come during this administration when our leader will work out a way in which this country may pay the certificates of those out of work or in need.

May I say to the gentleman from Texas that if the people had wanted him for their leader they would have placed him at the head of the Democratic ticket and he would be President today instead of the man who sits in the White House at the present time. The President has stated that this is not the time. I may say that I am going to follow the leader in this instance, the man in the White House, and I do not care if it cuts my throat, politically. That should be of no consideration. There are many Members who have pledged on this measure and, of course, they must vote for it, but, as the gentleman from New York has ably said, the thing that brings this measure on the floor of the House today is a political impulse. There is hardly an individual on the floor of this House who expects to see this made a law at this session. We are only going to hold out a piece of bait in order to get the veterans' vote this summer. There is no use kidding ourselves. We are all candidates. The great commoner once said that candidates are cowards. We are going to vote today for something we know is not going to become law. With no intention of impugning the motive of any Member, we are going to hold out a little bait in order to buy some veterans votes. I do not believe in buying votes at any time, and I certainly do not believe in taking the taxpayers' money and using it to buy votes with. I do not believe that we as Members of the House should hide behind

the President and place the burden on him of vetoing a measure that will bring some enmity from the veterans, but that we should stand up like good soldiers and say, as our leader says, it cannot be done now. If they shoot me down because of my attitude, all right; but we are engaged in a war today to determine whether or not we will conquer the forces of depression. Our leader in the White House says to the soldiers: "This is the line of attack." Another leader comes along and says, "No, no. Let us go in a different direction."

Another says, "No, no; that is not the way, take a different direction." I want to ask you if we were in a war today do you think we could win it if one leader said, "Go this way", and another said, "Go that way"?

This is the time to choose your leadership. If you think the man in the White House is the one to lead us out, follow him, but if you are seeking your own political fortunes, if you choose to follow another leader in another direction, then you have that to do. I say in all friendship and fairness to the gentleman from Texas, because I like him, that I am not going with him today. I know I am taking the unpopular side, the side that will lose me some votes, but this country will not be hurt if some of us are missing next year. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Michigan [Mr. WEIDEMAN] such time as he may desire.

Mr. WEIDEMAN. Mr. Chairman, I am not in favor of deputizing the powers of Congress to the President or any other man. We Members of Congress were elected to legislate, and I propose to do it. We find the gentleman from Kentucky [Mr. BROWN] today saying that he will follow the President of the United States, when 10 days ago he led a revolt against the President of the United States.

Mr. BROWN of Kentucky. Will the gentleman yield?

Mr. WEIDEMAN. No; the gentleman refused to yield to me. I am not one of those men who talks one way and votes another. I do not talk against a gag rule and then vote for it. When I talk against a gag rule, I vote against it. A week ago the gentleman from Kentucky voted to give the Federal Reserve banks the privilege of depositing their bonds and receive cash therefor at a price of 30 cents for every thousand dollars, so secured, and at the same time paying 3 to 4 percent in interest to the bankers on the same bonds for which they had received cash. If I had voted for such a bill, I would not condemn one who voted to pay the adjusted-service certificates to the soldiers or the veterans who served in the war among the slime and dirt and the lousy conditions that they were forced to go through. And still some people think they can frighten this Congress not to do what they think is their honest duty.

For my part I am going to vote in the future as I have in the past and I hope you gentlemen will do the same. [Applause.]

I am losing confidence in these legislative acrobats who, for the purpose of the RECORD, make speeches on the principles involved in legislation one moment and then the next moment do a back flipflop and vote against their previously expressed convictions. And their only alibi is that someone high in the councils told them to do so. It is much easier to follow the dictates of any group in power, and go marching down the aisle of present approbation, if you want to curry favor or are afraid of your patronage. Congress has its duty to perform, and that is to legislate honestly, following its own convictions of right and wrong, to be unafraid of any outside influences, not to be a rubber stamp for anyone, and to keep faith with the people who sent them to Congress.

Mr. FISH. Mr. Chairman, I yield 3 minutes to the gentleman from Alabama [Mr. OLIVER].

Mr. OLIVER of Alabama. Mr. Chairman, I have no criticism to offer of any Member who differs with me. In my association with my colleagues on this side of the aisle since March last, I have been profoundly impressed with the fact that all of us have seemed to be in agreement that our country was moving upward out of the sloughs of depression under the leadership of a great President with a vision, courage, and mind competent to create programs that have commanded and deserved the support of Congress and of the people and which have resulted in a working Government, not in a house divided. No one can deny the greatest asset our Nation has today is the wide-spread confidence which our people have in the President, who in so many ways has shown how willing and ready he is to devote his energy—and life, if need be—to the proposition of helping the common man. Who can doubt that the real reason why today he enjoys so fully the confidence of the country, irrespective of party lines, is that all classes of our people have been convinced of his sincerity, his courage, and his sympathy, and recognize how earnestly he desires to be of helpful service to the common man? [Applause.]

It is unfortunate that today, whether conscious of it or not, large numbers of my colleagues on this side of the aisle seem unwilling to lend him that hearty support which he well deserves and should have in reference to a matter on which he declared his position in his campaign for the Presidency and has repeated only recently in a letter to the Speaker of this House. Remember we are still in the midst of a national crisis, and the one thing that may have saved us from the dire and bitter experience of other countries has been the confidence that the ordinary common citizen has in our President's matchless leadership. It is a mistake now to refuse to follow that leadership. You thereby detract from the confidence that this side of the aisle has rightly expressed in the President. This country for its task ahead requires a patriotism and loyalty undiminished and constant to our chieftain, if under his leadership we are to succeed in bringing back a new prosperity—not a prosperity under which the rich are rich and the poor are poor, but one which every American can share. I plead with you, my colleagues, not to do anything that might tend to minimize or impair the confidence that the American people have in him. No one can tell how far-reaching in its baneful influences would be a vote cast by you today which could be interpreted as a lack of confidence in the leadership of the President in this time of national emergency. [Applause.]

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Missouri [Mr. LOZIER] such time as he may desire.

Mr. LOZIER. Mr. Chairman, I favor the enactment of the pending bill H.R. 1, which provides for the cash payment of adjusted-service certificates. No one will challenge my loyalty to President Roosevelt and his administration. I have whole-heartedly supported each and every one of his forward-looking, epoch-marking, history-making measures, and this I will continue to do.

For our great President I have a profound respect, an unfeigned affection, and among his many admirable qualities are his intellectual integrity, robust sincerity, broad catholicity, tolerance of opinion, and the charity by which he judges the motives, actions, and sincerity of his fellowmen. I do not believe our President has applied or seeks to apply any species of pressure or coercion to force Members of the Congress to oppose legislation, which they believe to be wise, wholesome, and expedient, or to effect legislation they consider unsound, unwise, and inexpedient. Nor do I believe that the President would seek to apply disciplinary measures to Members of the House or Senate who may differ with him on this or any other public problem.

The President's greatness, broadness, and tolerance are reflected in his generous estimates of other men's virtues, good qualities, and sincerity of purpose. I am sure he would not have the Members of this House surrender their honest convictions in reference to important legislation, or expect us to "crook the pregnant hinges of the knee, where thrift may follow fawning."

I believe the President would have Congress exercise its constitutional prerogatives and its Members vote in harmony with their convictions and deliberate judgment and act as becomes faithful public servants in the discharge of important, and at times embarrassing, public duties.

There is no instance where the President has shown a disposition to force Members of Congress to register his decrees at the expense or in disregard of their honest convictions. So fair and just is the President in appraising the motives and good faith of others that methinks he always keeps a corner in his big brain open and free, where he makes room for the opinions of his friends with which he may not be in accord, for in every tolerant mind the honest opinions of others may find an hospitable asylum and fair consideration.

Perhaps there is a striking difference of opinion between the President and this House as to the wisdom of the pending legislation. Unquestionably, the President is actuated by lofty ideals and a high sense of duty, and I do not believe that he will question the sincerity and good faith of the Members of the House and Senate who may favor this legislation. I believe this bill embodies a sound public policy, and its enactment will materially hasten our national recovery. This bill was introduced more than a year ago and referred to Ways and Means Committee, where it has since been pigeonholed. I believed that those who favored this legislation were entitled to have it considered, and as the committee had not had hearings or reported the bill to the House, I was one of the 145 Members who signed a petition discharging the committee and bringing the bill on the floor of the House for consideration.

I concede there are strong arguments both in favor of and against the immediate cash payment of the adjusted-compensation certificates. The term "bonus" is a misnomer. The Government never issued any bonus certificates, but did issue "adjusted-compensation certificates" that represent an actual debt due from the United States to the World War veterans, and which certificates represent the difference between what the soldiers received while in the service and the amount the Government afterward found they were entitled to.

By legislative and Executive action the Government has solemnly admitted its indebtedness to the ex-service man, but instead of settling this debt with cash as all other obligations have been settled, the Government, by the Adjusted Compensation Act, arbitrarily said to the veterans, "The Government is indebted to you, but you must wait 20 years for a settlement." The Government made no such settlement with any of its other creditors, and now many deserving veterans who have been caught between the upper and nether millstones of the depression need and should be paid whatever sum the Government owes them, and such payment would not only discharge an admitted obligation but would relieve millions now in distress and tremendously improve business and economic conditions.

One of the strongest arguments in favor of such payment is that it will undoubtedly result in an expansion of our currency and put an additional $2,000,000,000 in circulation, which will aid in our national recovery, increase commodity prices, and augment the purchasing power of the masses.

Our currency cannot be expanded by the Government's issuing more money, if as soon as that money is issued it is turned over to the great banking institutions and locked up in their vaults. The circulating medium of a nation is not measured by the amount of money that the Government has issued, but by the amount that is actually in circulation. Our currency would not in reality be expanded if we should issue $10,000,000,000 of new money, if we allow the bankers to lock it up and keep it out of circulation.

Money, to be of substantial value to the people, must circulate freely in the channels of trade and commercce, and it performs no useful function if it is idle and frozen in the banks. By sympathetic administration of the provisions of the so-called "bonus bill", the expansion flowing from its enactment would be gradual and controlled, thereby avoiding any serious shock to our financial or economic structures.

I do not believe in fiat or printing-press money, but no student of financial and economic conditions will deny that there is too little money in actual circulation. The money paid veterans under this act would go directly into circulation and would substantially increase our stock of money available for the use of the people.

Every community in America will be immediately benefited by the cash payment of these adjusted-service certificates, which will not only enable the veterans to support their families during this period of unprecedented depression, but will permit them to pay their store bills, and discharge other obligations created when times were more prosperous. The retail merchant, the doctor, the dentist, the "butcher, the baker, and candlestick maker", and practically every other person in a community will either directly or indirectly be benefited by the cash payment of these adjusted-service certificates.

Money is to business, commerce, and industry what blood is to the human body. Science tells us that the weight of the blood in a healthy man is approximately one fifth of his total weight. If blood does not circulate through the veins and arteries, disease and death are inevitable. By a normal circulation nutrition and life are carried to the tissue, bones, hair, nails, brain, nerves, and other component parts of the body. If the blood is unduly concentrated in any part of the body, disease is as certain as that night follows day. So by the same token, if money, the blood of business and commerce, is concentrated in a few great cities and locked up in stone, steel, and concrete vaults, it does not and cannot serve the purpose for which money is created.

The issue of nine or ten billion dollars' worth of Government bonds would not necessarily mean a substantial increase in our circulating medium; and in view of the universally admitted fact that there should be a reasonable and controlled expansion of our currency, I fail to see how the addition of $2,000,000,000 to our circulating medium could cause even a ripple in our financial system or threaten the stability of our financial structure.

When the bonus was last considered by Congress, conditions were very different than those which now prevail. At that time the American people were demanding a drastic reduction in Government expenditures, and under that policy delay in the cash payment of the bonus could be, and in my opinion was, justified. Then the slogan throughout the Nation was, "Reduce Government expenditures, economize, economize, economize!"

At that time the American people looked with horror on any proposal that in one fell swoop would have added $2,000,000,000 to our national debt. We had not then formed the habit of issuing seven or eight billion dollars of bonds in 1 year, and at that time an overwhelming majority of the American people, in all stations and walks of life, honestly and sincerely believed that the enactment of the bonus bill would unbalance our Budget and impair our national credit to such an extent as to imperil, if not destroy, our entire financial and economic structures.

But several months ago this policy of limited Government expenditures was reversed, and the Nation entered on a far-flung, Nation-wide, seemingly prodigal but nevertheless wise and prudent program for the expenditure of seven or eight billion dollars, and the adoption by the Government of this almost unlimited spending program, in my deliberate opinion, justifies the immediate cash payment of its legal obligations to the veterans of the World War, and more liberal, generous, and equitably adjusted payments to veterans of all wars and their dependents. If in any particular H.R. No. 1, the bonus bill, goes too far, its provision may now be amended by the House.

I think we would be justified in delaying the payment to veterans who are rich and who do not need their adjusted compensation.

Mr. FISH. Mr. Chairman, I yield 5 minutes to the gentleman from Illinois [Mr. BRITTEN].

Mr. BRITTEN. Mr. Chairman, on several occasions today an appeal has been made to stand by the President, and also the suggestion has just been made by the gentleman from Kentucky [Mr. BROWN] and one or two others on the other side of the aisle that a vote today is but an idle gesture, because this bill will never become law.

Mr. Chairman, there never has been a time since the armistice was signed when the American war veteran would have been more justified in requesting the payment of his adjusted-compensation certificate than he is at the present moment, when millions of dollars, yes, billions, are being withdrawn from the Federal Treasury for loan or for grant on so-called "Public Works" and "Civil Works" projects, which in many cases have little if any value. Money has been literally shoveled into power projects, railroad improvements, socialistic farm theories, gifts of hundreds of millions of dollars to political subdivisions in States for public works of questionable value, and now comes a report that Uncle Sam is making a gift of a million dollars to the Virgin Islands for the manufacture of rum as a means of providing employment for the people down there.

Surely no one can blame the war veteran for styling himself "the forgotten man." He has been forgotten by the present administration, and from the best information obtainable he will continue to be the forgotten man, because I am informed that Democratic Members generally will vote for the Patman bill with the more or less secret understanding that they will later vote to support the President in his veto of this bill. In other words, you Democrats are willing to throw sand into the eyes of the ex-service man by making him believe that you favor the bill.

If you gentlemen on that side of the aisle think that the World War veteran is a dummy or a nit-wit you are badly mistaken, because they will be the first ones to see through your vote, which cannot be smoke-screened by a Presidential veto. If you are sincerely in favor of the Patman bill, you will vote for it now and you will vote for it despite a Presidential veto, but this I am told is not your intention.

I have always contended that a great majority of the war veterans have looked upon economy in government as an ideal thing with real merit, and if economy had to be practiced generally they were willing to do their bit as they did in 1917.

The Economy Act was the first big step toward a balanced Budget. The frightful wrongs which it did to certain war veterans have since been partially corrected. As an economy act, it was the first, last, and only economy measure presented by the present administration, and, on the contrary, it has been followed by the most extravagant legislation in the history of our Government. Real economy has been thrown to the winds and every new socialistic scheme for putting money into circulation and the Government into autocratic power, has been resorted to. Then came the frank declaration of President Roosevelt that there would be a $7,000,000,000 deficit in the Budget this year brought about by the extravagant use of Federal money in every possible walk of life, which startled the country.

Corporations, banks, insurance companies, railroads, cities, counties, and States are permitted to borrow millions from Uncle Sam on advantageous terms, and in many instances an outright grant of 30 percent of the amount borrowed from the Treasury will be presented to the borrower and his cause. This rain of dollars has helped the veteran little, excepting where he has managed to find employment under its expenditure. Never once has the present administration offered to expedite the payment of its debt to the war veteran, which was definitely agreed upon nearly 10 years ago in the shape of an adjusted-compensation certificate, the payment of which will fall due in 1945.

It is true that this definite indebtedness of the Government does not mature until 1945; but as it is an acknowledged debt whose final payment is positive, it would appear to be good, sound business sense to pay it now while the Government is offering extensive relief in every other direction and in most instances where no direct or immediate obligation exists excepting for the emergency laws passed under the Roosevelt dictation. The money paid to veterans now while they can use it to very great advantage will not have to be paid to them out of the Treasury 10 years from now, when many of them may not have use for it at all, or prior to which time their certificates may be taken up by their loved ones at home through the death of the veteran himself.

Frankly, I am at a loss to understand the psychology which makes the present administration a squanderer of public funds in one direction upon the theory of putting a lot of money into circulation, and being a literal miser in another direction where the distribution of public money would find a very much wider and more beneficial general circulation.

This so-called "bonus bill" does not provide for an arbitrary expenditure from the Treasury, but, on the contrary, it provides for the payment of an obligation under a specific contract with a World War veteran. The ultimate payment of that contract by the Federal Government is just as certain and just as equitable as the payments by Uncle Sam on a contract for the construction of a warship, a Federal building, or a power project. The slight difference being that the time clause in the veteran's contract has not yet been entirely consumed.

I cannot help but recall that when the President himself addressed some 5,000 representatives of the principal American industries at their big N.R.A. code meeting last Monday he particularly emphasized "humanity's needs", and he was roundly applauded when he said:

> Never again will we permit the social conditions which permitted the vast sections of our population to exist in an un-American way, which permitted a maldistribution of wealth and of power.

Mr. Chairman, I call to the attention of the House that many hundreds of thousands of war veterans are today living in an un-American way, while a maldistribution of wealth from the Federal Treasury is caring for millions less deserving.

At that meeting the President repeatedly laid emphasis upon improving the purchasing power of the consumer, the so-called "small-salaried" consumer, who purchases two thirds of all the products of field and factory of the United States. They are the ones who keep the farmer, the baker, the butcher, and the manufacturer of practically everything alive. They are the ones who would be reached immediately by the passage of the bill now before the House, and their newly acquired wealth would filter into every channel of commercial and industrial life.

Mr. HOEPPEL. Mr. Chairman, will the gentleman yield?

Mr. BRITTEN. I decline to yield to anyone.

Mr. Chairman, the time is most propitious for the payment of this national debt. I will not refer to it as a debt of honor; it is more than that, it is a definite and fixed charge against the Government to which the Government voluntarily agreed. It should be paid now for "humanity's needs", as the President so aptly applied those two words.

The payment of the soldiers' bonus will go far toward promoting immediate recovery and lessening unemployment. It will go farther than the mere expenditure of the amount of money involved, because of its fine psychological effect upon those hundreds of thousands of men when they receive their check from the Government. It will make them feel that the Government has as much interest in their rehabilitation as it has in the reconstruction of the industries, the railroads, the banks, and other facilities which go to make up our daily life. It will make them realize that while their Government is leaning backward to be of assistance to humanity's needs, the man who leaned forward in 1917 and 1918 will also be benefited. [Applause.] Not by a gift, not by a grant, not by a loan out of the Federal Treasury, but by the premature payment of a debt which would have to be met at a later date. Surely this is no great national sacrifice. This is no great governmental charity nor is it something that the Government can take great credit for. It is but an act of justice when compared with what the Government is doing in every other direction in the interest of national recovery.

Mr. Chairman, we are about to advance hundreds of millions of dollars in order that our manufacturers may sell their goods in Russia and at the same time we will provide credit for Russians who desire to do business in the United

States. I now predict that our Russian endeavors will go up in smoke and will ultimately prove of interest and profit only to Russia. Surely these millions could be better used at home. This is but one of the many socialistic schemes which have been foisted upon our people by the "brain trusters" surrounding the President. The almost daily socialistic utterances of presidential advisers in and out of his Cabinet, would fill volumes, and yet the man who was drafted into an unpopular war which the world now realizes has been fought in vain, is completely forgotten because the amount due him is not yet due. [Applause.]

The CHAIRMAN. The time of the gentleman from Illinois [Mr. BRITTEN] has expired.

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Texas [Mr. BLANTON] as much time as he desires.

Mr. BLANTON. Mr. Chairman, every man of character will keep his promises. No man who is reliable will break a solemn pledge. Throughout my life I have kept my promises. I have never broken a solemn pledge.

We, who were in Congress during the war, have some burdens upon our shoulders not resting at this time upon those who came later. We caused our soldiers to don uniforms and go to France. We gave them certain assurances when they were embarking on camouflaged ships, with their destination unknown. We told them we would care for them. We told them that nothing would be too good for them when they came back. I was one of those who made this pledge to them years before President Franklin D. Roosevelt ever thought of the White House. I have given them my pledge that I would help pass a law that would pay to them their adjusted-compensation certificates. Under circumstances now existing I cannot break that pledge. Our President would have no respect for a Democrat who would treat his pledge as a scrap of paper.

This is not a bonus. It is not a gift. It is not a gratuity. It is a debt of honor. While these soldiers were in France, and during the time they were readjusting themselves after returning, this Government paid to its 600,000 Government employees who remained at home, and who worked in safe, convenient, pleasant surroundings, first a bonus of $120, then a bonus of $240, then another bonus of $240, and then a reclassification act in 1923 that materially increased all, and doubled, and even trebled some salaries.

When we voted to allow these adjusted-compensation certificates, I then insisted that they should be paid in cash. But I was outvoted. Everybody else was paid in cash. Contractors became rich with their 10 percent plus contracts. Railroads received stupendous sums from the Government. Bankers used the Government credit free of charge, and received many subsidies. We gave billions of dollars in discounts and debt cancelations to foreign governments, who passed such benefits on to their soldiers at the expense of our own. We had money for everybody except our own patriots in uniform. When we finally agreed to add to their paltry pay of $31 per month the magnificent sum of $1 per day for service in the United States and $1.25 per day for foreign service, Congress could not pay them in cash but had to give them this "I O U" due in 1945. It was outrageous. It was inexcusable. It was damnable.

I voted in the previous Congress to pay these adjusted-service certificates in cash. I favored passing such bill over the President's veto. But it was killed in the Senate. I voted to allow them to borrow as much as 50 percent of these certificates. I have told them that I would vote for the present bill. And I intend to do it.

With only two exceptions, I have given our President my loyal, active support in all his plans and policies. I voted against bringing back the saloons. I am voting for this bill now. On both such propositions I have been definitely pledged to my constituents. I was thus pledged long before our President became a national candidate and long before the last national Democratic platform was written. Our President would have contempt for me now if I had broken such pledges.

On Friday, February 16, 1934, our colleague who is the author of this bill, H.R. 1 [Mr. PATMAN], went to the White House and advised the President's secretary that unless it would disrupt the President's financial plans and policies he intended to sign the motion to discharge the committee, respecting this bill, on the succeeding Tuesday. Up to that time I had helped Mr. PATMAN and others to keep down this motion to discharge until we had some assurance that we could pass the bill. Not one word did Mr. PATMAN hear from the President. The President did not advise him that this bill would interfere with his financial program. So on Tuesday, February 20, 1934, Mr. PATMAN signed said motion to discharge, and right next to his signature I signed it, and later came the report that the President would not approve it, but that came too late, for in less than 30 minutes thereafter the full 145 Members had signed the motion to discharge, and the bill, H.R. 1, automatically went upon the Calendar, to be called up today under our discharge rule.

Immediately after signing the discharge rule on February 20, 1934, I took the floor and made the following statement regarding the matter:

Together with my friend and colleague from Texas [Mr. PATMAN] I have signed the petition to discharge the committee, and to bring the Patman bill, H.R. No. 1, before the House for passage, which bill provides for paying these adjusted-service certificates in cash. I believe that this is a debt of honor, and should be paid immediately by our Government.

Thus far the President has been silent on his attitude respecting this matter. He has sent no recommendation to Congress. If he had, I would comply with his request. But on last Friday our colleague [Mr. PATMAN] went to the White House and advised the President's secretary of his intention to take this action today, and no word came to him from the President indicating a desire for the bill not to come up.

If, when this bill comes up for consideration on March 12, the President should notify us that it is against his plans and policies, and that it would disrupt his financial program, and he asks us not to pass it at this time, I would respond immediately to his wishes and would vote against the bill.

I realized full well that an emergent crisis might arise when it would become my duty as a loyal American to grant an appeal from the White House, and that such an appeal would relieve me temporarily from fulfilling my promise and pledge; and I then plainly stated that if the President should notify us that it would "disrupt his financial program" that I would patriotically respond. But he has not so notified us. He has not said it would "disrupt finances." All he has said is that he will veto the bill. That is a President's prerogative; and it is the prerogative of Congress to override his veto, if it thinks the circumstances warrant it.

In reply to questions asked me by my distinguished friend from New York [Mr. FISH] and others, I have said that if the President asserted this bill would disrupt finances, and he asked us not to pass it at this time, I would patriotically respond to his appeal. But the President has never at any time said that the passage of this bill would destroy the economic structure of this Government. He has not said it, because he could not truthfully say it. We all who are posted here know that it will not destroy the economic structure of this Government. We could not make such a declaration truthfully to our constituents back home. They would laugh at us. They know how billions have been spent; and all of you here who have served with me know just how hard it has been for me to back this administration while such billions are being spent. But I have backed it. I am a loyal Democrat.

I believe in our President. I know that he is sincere. I know that he is earnest. I know that he is able and efficient. I know that he is honest and dependable. I have confidence in him. And he has confidence in us. He knows we are sincere. He knows we are honest. He knows we are backing him on all his economic plans whether we approve of them or not, because we want him to have a chance to put his plans into execution. No political party has ever given more cordial, unstinted support to, or had more faith and confidence in, their President than we

Democrats of this Congress have given to and had in President Franklin D. Roosevelt. And he is too honest to tell us that this bill will disrupt finances. [Applause.]

I want to ask my friend from Texas in charge of this bill to grant me some more time.

Mr. PATMAN. I yield 1 additional minute to the gentleman from Texas.

Mr. BLANTON. I am surprised, Mr. Chairman, that our good friends, the Republican leaders on the other side of the aisle, who, with crocodile tears in their eyes, have been crying here for the soldiers for weeks, should oppose this bill. Their leaders, like Mr. SNELL, the Republican floor leader, and almost the entire delegation from Massachusetts, Mr. TREADWAY, Mrs. ROGERS, Mr. GIFFORD, Mr. TINKHAM, Mr. MARTIN, and Mr. LUCE, all of them voting against this soldiers' bill; then there is their great chief, the gentleman from Pennsylvania [Mr. DARROW], the leader of their Republican steering committee; and Mr. TABER, of New York, and Mr. MAPES, of Michigan, and Mr. BECK, of Pennsylvania, and Mr. FISH, of New York, all stalwart Republican leaders here, and all authorized spokesmen for the Republican Party, now knifing the soldiers of this country by their votes against this bill. [Applause.] I am surprised at them.

Mrs. ROGERS of Massachusetts. Will the gentleman yield?

Mr. BLANTON. How can they do it? Do not their hearts function? Now is the time to come to the aid of the soldiers. If you are a friend of the soldier, vote for their bill. [Applause.]

The CHAIRMAN. The time of the gentleman from Texas [Mr. BLANTON] has expired.

Mr. FISH. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. TABER].

Mr. TABER. Mr. Chairman, I am opposed to this bill because I believe the only way to bring this country back to the place it is entitled to in the sun is to go down the line with governmental economy. I do not believe we can do it unless we balance the Budget. If we go through with this and go through with the rest of the extravagance program of the President, which will result in a deficit of almost $8,000,000,000 for the fiscal year 1934, the only way we can establish the credit of this Government without wildcat inflation, in my opinion, is by a tremendous income tax of 10 percent on incomes from $1,000 up to $10,000, and 20 percent, at least, from there on, and by the imposition of a straight sales tax, without any exemption, of at least 2 percent. I do not believe this House has the courage to put on the tax that it needs to put on to save the credit of America, if we are going to pass such things as this.

Another thing: This bill carries with it the power of inflation. [Applause.] You know it carries the power of inflation. [Applause.] But what will inflation do to the veteran? You will not dare go home and face the wounded and the disabled veteran who is drawing a pension or compensation after you have voted for this bill.

Mr. HOEPPEL. Will the gentleman yield?

Mr. TABER. I cannot yield.

If we have this wildcat inflation, it will reduce the purchasing power of the dollar to such an extent that your veteran may get half as much compensation or half as much pension as he is now receiving, and he may get only 10 percent as much.

Mr. HOEPPEL. Will the gentleman yield?

Mr. O'MALLEY. Will the gentleman yield?

Mr. TABER. It is perfectly apparent that you do not realize what you are doing. You dare not face the situation by either putting on a tax to pay the bill, or by telling the truth to your veterans back home, after you cut their pensions, cut their compensation anywhere from 50 to 90 percent, and the same thing with the salaries of employees of the Government, and the same thing with the workingman who works in your factory back home. That is what this bill will do. Let us try and use a little common sense. We want to do what is fair by the veteran. We want to do what we ought to do in the line of giving him a decent chance and decent compensation, but let us not do things that will destroy everything that you have done for him and everything you might do for him. Let us stop right here and vote this bill down and do things right. [Applause.]

I yield back the balance of my time, Mr. Chairman.

The CHAIRMAN. The gentleman yields back 1 minute.

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Arkansas [Mr. GLOVER] such time as he may desire.

Mr. GLOVER. Mr. Chairman, I am glad we have the chance today to vote for the payment of the soldiers' adjusted certificate. It is a debt the Government has recognized that it is justly due the soldier and should have been paid a long time ago instead of waiting until 1945, when many of them will be gone to their future home where there is no war. These boys were called by the Government into service by the selective draft law. They had nothing to do with bringing on the war. War was declared by Congress when we were attacked by another nation, and these brave boys went at the call of their country and many of them today sleep in Flanders Field in a far-away country to await the resurrection morning. We can do justice to those living. We said to them when they were going away, "Go boys, be brave, and justice will be done by you in the homeland." Many of them came home with the loss of limb, many who lost their health, some gassed, and injured in a way that we have not time to describe. The boy who was best fitted for service was taken, and the one who had some physical defect was left at home. I remember of one case that illustrates what I want to say. Two boys of the same family went to the place for examination to see if they were fit for service. One of them was perfect and was chosen for service and mustered into service and was carried overseas, the other had a slight physical defect; he was not taken but went to camp and worked for $8 per day, while the one who was physically perfect served as a private at $30 per month. This bill will do simple justice to the soldier boy. It will put cash into every nook and corner of the United States. It will put into my State, the State of Arkansas, the sum of $25,369,313.76. It is figured out and placed in the RECORD just what each county in the United States would receive from this fund. I will give you the figures as to the 12 counties in the Sixth Congressional District of Arkansas that I have the honor to represent to show you what each county will receive, and is as follows: Arkansas County, $305,064; Cleveland, $174,337.92; Dallas, $200,699.28; Desha, $298,415.52; Drew, $272,615.04; Garland, $492,904.08; Grant, $134,529.12; Hot Spring, $247,676.40; Jefferson, $877,626.72; Lincoln, $277,020; Lonoke, $461,823.12; Saline, $214,228.80. This amount of money would go into circulation at once, and the boys could pay their bills at the bank, the store, pay out a home, or buy one. There is nothing I know of that would help to get the country back to prosperity quicker than to pass this bill. It is paying that much the Government now owes instead of using it for some purpose that will not get results.

This bill is nothing more or less than paying a just debt with controlled expansion of our money about $2,200,000,000. We now have in the Treasury and in the Reserve banks nearly seven and a half billions of dollars in gild. We only have $11,000,000,000 of gold in the world. The way we are now getting it we will soon have it all. We have now around $3,500,000,000 in gold that is free gold. We have only about $5,000,000,000 of money issued on the gold we have. In other words, this amount can be issued now and have 100 percent of gold back of every dollar of it. Why do the big banks and big interests fight the payment of the bonus? Because it is to be paid in money and not in bonds bearing interest as they would like to have it. I venture that if someone would propose to pay this off by issuing interest-bearing bonds, they would be for it. I hope to see a constitutional amendment soon to prevent the issuing of interest-bearing nontaxable bonds. We are now paying $760,000,000 per year interest when we should not be paying one cent of it. We have a right to call these bonds and pay them off in legal-tender money, and that should be done as quickly as possible. The cost of the amount to be ex-

pended to carry on the administration of this fund as it is now carried will in the 10 years this will have to run—if not paid off now—be, as I figure it, around one and a third billions of dollars. Nearly enough saved to pay this off now. I can see no good or sound reason for deferring it longer, and I am glad to have the opportunity of voting to pay it off now and save expenses to the Government, restore business, and do justice to the soldier. We hope our Nation will never be plunged into war again. We have loaned money to other nations, and they have paid their soldiers, and we ask ours to wait until 1945. Is that right? I answer, "No!" We paid our soldiers a pittance even with the service-adjusted certificate. If our Nation should be forced to call the boys back into service again to defend our country, I wonder if the first question they ask would not be, When are you going to pay us for the last war we fought and won for you? [Applause.]

Mr. FISH. Mr. Chairman, I yield 4 minutes to the gentleman from Iowa [Mr. BIERMANN].

Mr. BIERMANN. Mr. Chairman, I do not yield to anyone in my loyalty to the man who now is suffering because, during the time of the country's need he served in the Army or in the Navy; nor do I yield in my loyalty to his widow or to his fatherless children. But this bill is not for them. We have heard talk about them and talk about the men who suffered in the trenches. This bill is not for them except incidentally. This is a blanket appropriation for all the four and one half million veterans who survived that war.

It is well to bear in mind that this is only a gesture. Without casting any aspersions on men who are going to vote for it, everyone in this House knows it stands no chance of becoming law. The signing of the petition was a gesture; the vote this morning was a gesture; the vote on this proposition today will be a gesture. The bill never can become a law.

Mr. LUNDEEN. How does the gentleman know that?

Mr. TRUAX. Who is the authority for it?

Mr. BIERMANN. From a better authority than either of the gentlemen who have just interrupted me.

Mr. TRUAX. I ask the gentleman to name his authority.

Mr. BIERMANN. This bill cannot possibly become a law; that is a sure thing; but if it did become a law, what would be its effect?

In 1925 there was a very definite contract made with the veterans of this country, a contract as definite as one could be made with the veterans' organizations. That contract was to pay the veterans $1 per day for each day of service in this country and $1.25 per day for each day of service in foreign countries; then to add 25 percent to that and consider the whole as a one-payment endowment insurance policy, due in 1945. If I were the director of an insurance company which had outstanding several million endowment policies due in 1945, and I voted to pay them in full 11 years ahead of maturity, I would feel recreant to my trust as a director of that company. And today I would feel, if I voted for this bill to pay these insurance policies 11 years ahead of time, without any discount, that I would be unfaithful to the trust placed in me as a Congressman of the United States.

Of course, the easiest thing, perhaps the politically expedient thing, would be to vote for this measure; but, as the gentleman from Kentucky says, if we do not do the expedient thing, if we make a political error in voting against it, I would a great deal rather cast my vote the way my conscience dictates than to vote for the measure on the ground of political expediency.

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Illinois [Mr. SABATH] such time as he may desire.

Mr. SABATH. I yield to no one in my loyalty and admiration for our great President Franklin D. Roosevelt, who has displayed supreme courage, determination, and ability in bringing our country back to normalcy. That cannot be justly denied by anybody. I am pleased that it is and has been my good fortune to cooperate with him and work for his entire program. However, in 1932, realizing the unfortunate situation that the 4,000,000 ex-service men were thrown into by Republican misrule, I joined with a few others to advocate the immediate payment of the adjusted-compensation certificates.

In 1929 under the Republican administration, the American people were drained and milked dry, which brought about the closing of thousands of banks and many more thousands of industrial plants, throwing and keeping out of employment approximately 15,000,000 persons. These conditions brought about centralization of our money and destruction of our credits. I felt then, and I feel now, that by the cash payment with Government notes of the adjusted-compensation certificates, if this bill is enacted, first, it will save the Government more than a billion dollars, or $112,000,000 a year for 12 years.

Second, it will save the Government more than $10,000,000 in administration expenses of the Adjusted Compensation Act between now and 1945.

Third, it will pay a debt heretofore confessed by the Government to the veterans for services rendered. It is no bonus. The term "bonus" is a misnomer.

Fourth, it will be granting to the veterans the right to deposit a Government obligation and receive in return therefor new currency, the same right that is now enjoyed by Federal Reserve banks and all national banks.

Fifth, it will prevent the veterans from losing a valuable equity by releasing them from the payment of compound interest on their loans. Veterans who have borrowed 50 percent under the present law will have very little remaining in 1945. It is not right for the Government and the banks to consume these valuable equities by requiring the veterans to pay compound interest on their own money.

Sixth, it will require no bond issue, no increase in taxes, no additional interest payment by the Government. The debt must be paid sometime. Everybody will be helped if it is paid now.

Seventh, the Treasury holds in the general fund $3,140,000,000 in gold. It is unencumbered. This does not include the gold owned by the Federal Reserve banks. This is sufficient gold to issue $8,000,000,000 in new currency without reducing the gold reserve less than 40 percent. No nation on earth has ever claimed that more than a 40-percent gold reserve as a reserve for issuing money is required. If it is desired to back this money with gold, it will be very convenient to do so, although it is unnecessary.

Purchasing power must be placed in the hands of the masses. In this way it can be distributed quickly without the possibility of graft or favoritism. It is the best plan that has been proposed to be used as a vehicle to convey additional money into the hands of those who will buy goods.

It would place in immediate circulation approximately $2,000,000,000; and although conditions are improving, the credits are still frozen and money is hard to obtain. Therefore, I feel that the conditions still justify and demand the paying of these certificates and putting this amount of currency into circulation. This will not only aid the several million ex-service men but will be of general aid and blessing to others, enabling them to pay their debts to the butcher, the baker, the candlestickmaker and, most of all, to pay their rent to enable them to keep a roof over their heads and will materially aid the business of the Nation. It will create employment and in addition will add to the things we have already done to turn the wheels of commerce. [Applause.]

Some of our Republican and Democratic friends claim that the money to be issued under this bill will be fiat money, but this I deny. It will be as good currency as the money in circulation today, as we have enough gold in the Treasury to issue not only $2,000,000,000 for this purpose but an additional $2,000,000,000, and we will still have an unallocated gold reserve.

In my State we have about 246,000 holders of these certificates, and in my county (Cook) at least 120,000. Therefore, the amount of money that would be paid if the bill becomes law to the ex-service men, according to statistics, will be close to $85,000,000, and about $7,000,000 to the boys

in my own district. In view of the fact that the majority of them have been out of employment for 2 and 3 years, I feel that it can be and will be used and that the need is much greater now than it possibly can be in 1945.

The paying of this bonus at this time will not cost the Government—in fact, it will save the Government—money. Of course, the bankers and the war profiteers are opposed to this legislation, but they are at all times against legislation that will help the masses.

It is charged that not all the ex-service men have borrowed money against their certificates. Not all, I admit, but out of a total of 3,545,000, 3,019,582 have done so, leaving only a small number who have not borrowed.

I very much regret that this bill has not the approval of the President; still I feel honor-bound to support and vote for it. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from West Virginia [Mr. RANDOLPH] such time as he may desire.

Mr. RANDOLPH. Mr. Chairman, I sought to ask a question of the two gentlemen who spoke a moment ago. I now change it to an observation.

The President of the United States has said publicly that if he can be right 75 percent of the time, he should be satisfied. He will be the last person to unfairly criticize Members of this body who honestly differ with him on this measure. He respects always an honest conviction. I believe this afternoon we might well ponder the proposition that he might change his mind upon this issue and that while today he stands against it, yet tomorrow his opposition may be changed to approval. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Delaware [Mr. ADAMS] 1 minute.

Mr. ADAMS. Mr. Chairman, in 1 minute, the time allotted to me, I cannot make the speech I should like to make, and for that reason I ask the privilege of revising and extending my remarks.

I have asked for 1 minute to address myself to the statement of the gentleman from New York [Mr. FISH], that this bill cannot pass the Senate. I wish to remind the gentleman from New York that we are not called upon here today to wonder or guess what the Senate will do with this bill. We have a duty to perform. We owe a duty to the World War veterans. I shall vote today as a Member of the House of Representatives regardless of what the Senate may do. I am hoping that this bill will be passed by the House.

Mr. FISH. Mr. Chairman, I yield 5 minutes to the gentleman from New Jersey [Mr. EATON].

Mr. EATON. Mr. Chairman, when the President's economy measure came before the House I voted for it because I believed the country had given him and his party a mandate to grapple with the great problems of the depression, and as a good citizen it was my duty to forget the claims of partisanship and support him. As this so-called "economy bill" was applied in the governmental relations of the veterans of various wars, certain injustices developed. I had hoped when the independent offices appropriation bill came before this House that we would be free to introduce amendments to take care of certain groups of veterans who were suffering great injustice at the hands of the United States Government, I am sure without any purpose or desire on the part of the Members on either side of the aisle.

I had hoped for an opportunity to vote for an amendment that would take care of our Spanish-American War veterans, who have had the rawest deal of any class of veterans in this country. If this Congress adjourns without doing justice to our Spanish-American War veterans, it will be to our everlasting disgrace.

I had hoped there would be removed by action of this House the terror that is now hanging over certain veterans with service-connected disability, in the ruthless reduction of their pension by the present administration.

I had hoped that at least some of the presumptive cases that were certainly worthy would be taken care of.

I had hoped that where we had widows and orphans of veterans that needed looking after the Government would by appropriate legislation look after them.

But we were gagged. We were not permitted to do our duty by this class of veterans. The bill went to the other body and came back with certain provisions in it that we ought to have put in ourselves and is now in cold storage somewhere. I do not know where. I am at sea, almost as confused as you gentlemen on this majority side seem to be most of the time, on this legislation. If we pass this bill today, for instance, turning out $2,400,000,000 of fiat printing-press money for the veterans, and then bring in the other bill taking care of these other equally deserving groups of veterans, what are you going to do? You cannot expect the Government to do both. If we pay out $2,400,000,000 in this bill, you cannot turn round and add three or four hundred million for veterans in the economy bill.

I am going to vote against this bill today first because it is a mere vote-getting gesture; second because it involves a dangerous inflation of our currency; and third because it involves the failure to care for our Spanish-American veterans.

I hope and pray that the powers that be that now control this Government will have statesmanship and sand enough to bring before this House the other bill and allow us to vote on these amendments to take care of the Spanish-American War veterans, the boys who were wounded abroad in the World War, and who are not now properly taken care of, and give us a chance to do the decent and honorable thing by all veterans who are in real need and not go off half cocked as we are going to do today by passing the Patman bill against a Presidential veto which will be sustained in both Houses. This Patman bill is not really a veterans' bill at all. Its last section provides that "This act may be cited as the 'Controlled Expansion Act, 1933.'" It is first and last a cheap money bill and if it becomes law it will help to bring more suffering and ruin upon all our people than we have faced thus far. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Oklahoma [Mr. JOHNSON] such time as he may desire.

Mr. JOHNSON of Oklahoma. Mr. Chairman, I voted a few moments ago to bring this bill up for consideration to pay the adjusted-service certificates in cash. I shall vote for the bill today and if the occasion should demand, shall keep on voting for the bill. [Applause.]

A question has been raised by the gentleman from Kentucky [Mr. BROWN] and others that Members who are supporting this legislation are doing so for political expediency. I deny the charge. I submit in all sincerity that it takes more courage under the circumstances for Members to stand here and announce they are voting for the so-called "bonus" bill and will keep on voting for it in face of White House opposition, than it does for the gentleman from Kentucky to vote the other way. [Applause.]

I challenge the distinguished young gentleman from Kentucky or any other opponent of the soldier bonus to show a more consistent record for having supported the President's program than mine. But I have also consistently supported legislation to pay the adjusted-service certificates in cash. I am pledged to continue to support this legislation. Knowing our great President as I do, I feel that he would not have much respect for me or any Member of Congress who would not keep a solemn pledge made to his people.

So it will not be any particular surprise to the people of my district to learn that I have voted and spoken for the bill here today. I am on record on this with the people of my district, having discussed it freely in the last campaign when I received a majority of over 39,000 votes, against a majority of 21,000 given me in the preceding election.

I am supporting this bill for two major reasons: First, it will pay a just debt; second, it will make a necessary and needed expansion of the currency.

Some of you may have been surprised when the gentleman from Texas [Mr. EAGLE] pointed out here this afternoon that the amount of money in circulation has declined $2,400,000,-

000 in the last 12 months because of the policy of the Federal Reserve banks in tightening up credits and consequently reducing the volume of Federal Reserve notes circulating.

The opposition seems to be centering its attack against this bill on the claim that it is inflation, which shows why the major opposition is coming from the so-called "old guard." You heard the gentleman from Massachusetts [Mr. LUCE] refer to the pending measure as "wild inflation"; but he made no objection to similar proposals for the big bankers of the country. The gentleman from New York [Mr. FISH] protests because we would issue what he calls "printing-press money", which, of course, is a mere subterfuge.

As I have previously stated, I am not a recent convert to this measure. Permit me to quote from the testimony I gave before the Ways and Means Committee on April 15, 1932. I testified, in part, as follows:

I listened with surprise to one of the witnesses for the bonus the other day who said, "We admit that it is not due." I make no such admission. I do not hesitate to say to this committee that it is all past due, and it is a rank insult to every man who wore the uniform to refer to this legislation as a proposed donation to the World War veterans.

Again I stated to the same committee:

You will doubtless remember that hardly had the bark of the cannon died away and the smoke cleared from the battlefields in the Argonne Forest when the railroads, the shipbuilders, and some of the ammunition factories, as well as several thousand civilian employees, came to Congress demanding a bonus for their "patriotic war-time service." They did not ask for promissory notes. The railroads did not ask for notes due in 1945. The shipbuilders did not ask for promises, but they wanted the cash on the barrel head. I am ashamed to say that Congress very soon after the war gave the shipbuilders their bonus, and gave it to them in cold cash. They gave the civilian employees, the shipbuilders, the railroads, and the ammunition makers, some of whom had profiteered to the tune of 500 percent, their bonus in cash. Then, after the railroads had gotten their bonus, someone thought that probably the boys who had faced the machine guns at a dollar and a quarter a day should have their pay adjusted—not a bonus, mind you; Congress never gave the veterans a bonus, but merely proposed to adjust their pay.

Mr. Chairman, the plan to adjust the pay of the veterans in cash was bitterly opposed and defeated by the international bankers, bond brokers, and Wall Street in the last Congress, and they are still opposing it very bitterly. I submit that those who profited most out of the last war should help pay for it before they start another one. [Applause.]

It has been repeatedly stated on this floor today that although the Government owes the former service men a debt, that it is not now due them. Let me remind you that others not only received their pay in cold cash, but they also received the interest rate they demanded from the beginning of the war. I submit in all fairness that if those with less-hazardous jobs were entitled to pay from the beginning of the war, with interest, the war veterans, who faced machine guns and the shrapnel that American profiteers sold at 500-percent profit, are entitled to interest from the date of their enlistment. If that be true, and the war veteran had been paid his interest at the same rate the railroads received at the hands of the Government, the adjusted-service certificates would have fallen due in the year 1931. I have no apologies in looking Members of this House in the face and saying it is a just debt, and by all the rules applied to others that it is all past due.

I speak today not as a general who pulled down a big salary during the war, and who was usually safely behind the lines, but as a very humble private in the rear ranks, but with front-line service—that I know war veterans more than earned every dollar Congress has admitted it owes them. [Applause.]

Let me add that if I thought that the payment of the last half of the bonus would impair the financial structure of the Government or hurt business to any extent whatever, I would not, under any circumstances, support this legislation. On the other hand, after talking with many economists and financiers in high authority, I am fully convinced that the currency must be expanded, or reexpanded, if we are to have a real revival of business conditions.

It is needless for me to picture to you the conditions and the need for relief for our war veterans and their families. You have heard that over and over again; but let me say in closing that if $2,000,000,000 of additional currency were sent out into every nook and corner of America, in my judgment, it would revive business immediately. It is a practical way of increasing or expanding the currency. It would raise commodity prices. It would save the homes of thousands of veterans threatened with foreclosure. Although many of our veterans have received temporary help from the C.W.A. and other relief measures, there are still many of them in pressing and dire need, worried by debts they are unable to pay, their children without proper food and clothing, and their whole outlook on life discouraged because they are the last group to be remembered by this great Government of ours.

Some of you gentlemen who are bitterly opposing the passage of this legislation today have sought to ingratiate yourselves in the eyes of the veterans by saying that you would favor the cancelation of all or a part of the interest charged veterans on their bonus certificates. Let me say for the benefit of those of you who have suddenly decided that you favor cancellation of the interest on these certificates, that for more than 2 years I have had a bill pending in Congress to do that very thing, but up to this good hour it has not received any consideration whatever at the hands of the committee. There has also been pending before another committee what is known as "the Legion's four point bill", introduced by myself and other Members, but to this moment that bill has been entirely ignored by the committee and this House. This is the first opportunity we have had during this session to do anything for our war veterans, and I have a feeling that when the vote is taken here this afternoon that it will be overwhelming in favor of passage of the bill. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Ohio [Mr. TRUAX] such time as he may desire.

Mr. TRUAX. Mr. Chairman, there comes a time in the history of every nation and in the life of every man when individual desires must be subordinated to principle, and it is upon principles that I intend to vote for this bill. Were I a banker, a bond grabber, or a member of the silk-stocking aristocracy, I would vote "no" on this bill, but since I am a plain farmer from Ohio, since I am thinking of the World War veterans who went across the seas, since I am thinking of the widow who is upon charity now and of the orphan son or daughter, since I am thinking of all the common people, I shall vote for the bill. [Applause.]

The term "bonus" is distinctly a misnomer. It has been used by the enemies of veterans to poison the mind of the public, just the same as the equalization fee of the McNary-Haugen bill, which was passed by Congress in 1926 and 1927 and vetoed by Calvin Coolidge, was misrepresented by Andrew Mellon, Herbert Hoover, and the Wall Street bankers as a tax upon the farmer.

The proper title is "adjusted-service certificate." It is merely a Government bond payable in 1945 to veterans of the World War who have been honorably discharged as a slight compensation for services rendered while in the service of their country. Each veteran who possesses a certificate must have served longer than 110 days. Veterans who saw less than 110 days' service had already been given $60 bonus following discharge, with which to buy clothing and other necessaries of life.

The manner in which the total of the certificates was calculated was upon the following basis: Every veteran who saw duty overseas was allowed $1.25 a day, and $1 a day for every day while in service in the United States. His total credits, amounting to $500, were enhanced by the addition of compound interest at 4 percent annually for 20 years, amounting in all to $1,000. These certificates were issued under date of January 1, 1925.

These men were called away from lucrative jobs to fight for their country, while the army of white-collared salary workers, Government employees, laborers, craftsmen, and farmers who remained at home drew wages and incomes many times in excess of that paid the soldier. Employees

in the city left $40-a-week jobs, farm hands left $75-a-month jobs, to fight for their country at $1 per day.

Be it said to the credit of the Congress that it desired to authorize a pay scale for the soldier more in conformity with the prevailing wages of industry. This was not done, however, and a tentative agreement was reached that the small pay received should be adjusted following the signing of the armistice.

OTHER BONUSES THAT HAVE BEEN PAID

Following the signing of the armistice, Congress passed the Esch-Cummings Act, now known as the "Transportation Act", which gave a bonus of $600,000,000 to the railroads of the country, and so authorized the elevation of freight and passenger rates that the railroads might return a dividend of 5½ percent on all their stock and bonds, including millions of watered stock. To this day, railroads have made no general definite reduction in rates, but have had them increased by law during the depression and panic.

Civilian employees, to the extent of 500,000, received a cash bonus. Each one who had received $2,500 a year or less was given upon an average of $1,000 additional pay.

The largest and most infamous bonus was given to the European nations for whom we fought the war. These nations were loaned billions of dollars by our Government. The funds were raised largely from the struggling masses who bought $13,000,000,000 of bloody war bonds. The sad story of refusal to pay, cancelation, and repudiation by these governments whose national existence we saved, is too well known to need repetition here.

Most damnable of all was the fact that these nations used our money in many instances to award bonuses and adjusted compensation to their own veterans in amounts much higher than we seek to give to the World War veteran today.

Thousands of war contractors shared in the generosity of the Government to others following the war.

Mr. Chairman, the second largest bonus, an indefensible as well as an infamous one, was the refund or credit abatement of four and one half billion dollars to wealthy corporations, war profiteers, and rich individuals made by that modern Robespierre, whom reactionary and stand-pat Hoover Republicans are prone to eulogize as "the greatest Secretary of the Treasury since Alexander Hamilton", but whom I choose to characterize as the greatest buccaneer since Captain Kidd, with the possible exception of John "Pirate" Morgan and his swashbuckling band of Wall Street brigands. These bloodthirsty pirates tower over the pigmy racketeers of our day—the Dillingers, Touhys, Machine Gun Kellys—as Ali Baba and his 40 thieves eclipsed the gangsters of his time.

FIAT MONEY

Since 1866, when the bank racketeers of this country were given the privilege to issue and circulate money, whenever there is about to be a curtailment of this vicious and unwarranted practice, when officials who are free from Wall Street domination propose to issue more money for the needs of the common people, these vultures immediately set up the cry of "fiat money." With their captious though illusive themes these modern sophists prate of debasing the currency, unmindful of the fact that American manhood is debased, American womanhood debauched, and American ideals destroyed to uphold their pagan god—the gold standard.

In their ecstasy to wander about into the labyrinth of "sound money" they become foolishly bewildered in an economic maze of their own making. The farmer and wage earner may never be privileged to enter this superabode of the giants of the moneyed intellect, the high-domed professor of the science of money, and the high-browed metallist who says the country is going to hell because we are off the gold standard.

But the farmer knows when he cannot receive in exchange for his farm products, enough currency of the realm to pay his taxes, keep himself and family clothed, there is something rotten in Denmark. The wageworker understands that when he has been out of a job for 3 years and has to depend upon C.W.A. or P.W.A. or charity to provide food and warmth for himself and family, knows that his trouble is due to a money famine, and is willing to accept a dollar, whether it be of paper, boloney, or wood.

An expansion of currency to meet the need of changing times and an ever-increasing populaion may be called by some an "evil", but, on the other hand, a contracting currency in times of universal bankruptcy and distress is a scavenger of hell itself.

Any dollar is not worth a cuss unless it can be redeemed in terms of commodities, in pounds of flour, bread, sugar; in shoes, clothing; in payment of monthly tribute to the natural-gas monopoly, the Electric Power Trust, the telephone octopus, and to the 36-percent loan sharks.

BANKERS' MONEY

The so-called "money experts" do acrobatic tricks with statistics—the per capita circulation of money, increase in the circulating media as compared to increase of population, and such similar gymnastics—until their logical sequences are sprained and can walk only with the aid of crutches.

We are generally told that we have five and one half billion dollars of currency in circulation, when if the truth is known, if consideration of the indisputable fact that bankers hoard currency today to keep their institutions liquid, that millions of dollars of currency have been destroyed, lost, stolen, or burned, then we will know for ourselves that not even half of the amount of currency per capita claimed to be in circulation, is really in circulation.

The bankers obtain money by following exactly the same procedure that we now attempt to gain money, not alone for the veteran, but for all the masses of the people. The banker can deposit $100,000 of Government bonds with the Government, and is permitted to issue $100,000 worth of national-bank notes, which he lends to his customers at rates of interest ranging from 6 to 8 and 10 percent and even higher. In addition, he draws 3½ percent annually from the Government as interest on those bonds. So he is really receiving anywhere from 10 to 14 percent interest upon the bonds that he has purchased from the Government. This is known as "bankers' money."

Yet, when Congress proposes to restore its authority, vested in it by the Constitution, and to issue $2,400,000,000 of non-interest-bearing notes to pay off the obligation to the World War veterans, the bankers at once howl and complain because of their selfish, greedy natures.

These bankers are part of a system that always seeks to pay the lowest price for wages, for farm and industrial products, but to command for their own services and the commodity which they rent and do not sell—money—the highest price that can be squeezed out of the taxpayers.

It is an idle and futile dream for us to suspect that we can become an independent and prosperous Nation as long as we are subservient to the strangling interests, dividends, and rental charges of the money kings and bond grabbers—toll and tribute on dead capital.

The revenue derived from a single dollar lent for 100 years at compound interest is astounding.

Percent per annum:	
3	$19.25
6	340.00
8	2,203.00
10	13,808.00
12	84,075.00
18	15,145,007.00
24	2,551,798,404.00

Certain Members of this House may attempt to tell us that we understand not what we are doing, that following our action of today there will be visited upon this country the worst calamity in history. I rise to challenge this statement, to deny it, to refute it, and to counter with the well-established fact that this or no other currency expansion measure can ruin 95 percent of our people, because this 95 percent has no money or currency of the land to buy the necessaries of life.

It will scale down to some extent the huge and ill-gotten fortunes of the millionaires. It will take away to some extent the illegitimate privilege of the bankers to print money,

circulate it, and collect interest thereon; for all of which I am profoundly grateful.

If you will scan the foregoing table, you will readily understand how the bankers, the silk-stockinged aristocracy, and the money kings have robbed and plundered the struggling masses in our country. You will understand why today 96 percent of the wealth is owned by 4 percent of our people. You will understand why people starve in a land of plenty, why people are homeless because there are too many homes, and why people shiver in their nakedness while we plow under our cotton and store our wool.

You will understand why it is vitally necessary to scale down all fortunes to $1,000,000, to limit incomes to $100,000 a year, to pay off $13,000,000,000 worth of war bonds in new currency, to refinance all farm and home mortgages with new currency, and to pay off the entire national debt with new currency.

Printing-press money they may call it, but the thing that irks them, that maddens them, is our efforts to halt forever their nefarious practices by taking from them the right to issue their printing-press money, and to restore it to all the people, where it belongs.

Did I not believe that this was an expansion or inflationary measure designed and drafted to help all of the people instead of the favored few, I would vote against the bill. Did I not know that the bill as prepared, and as to the method of financing, is the greatest benefit that could be given to World War veterans at this time, I should vote against it.

Certain Members, rambling in their rarified strata of political purity, demagogism, supine servility to gag rules, and abject lack of interest in human rights over property rights, accuse us of angling only for votes when we vote this legislation for World War veterans. They evidently have never extended the helping hand of charity and cooperation to the poor and distressed—never observed the beam of happiness and gratitude that lights the eye and glows in the countenance of the poor unfortunate who has been helped.

Who says this bill is only a gesture? Who says the other body of this Congress will not enact it into law? Who says that each time we vote for the defenders of our country we are looking only for votes? What are these gentlemen doing for veterans who seek to defame the character and impugn the intentions and honest convictions of Members who in their minds have the temerity to disagree with them?

When this payment of the Government's obligation to the veterans shall be made, it will not only be paid to veterans themselves but will go down into the grass roots of distribution among the common people. It will pay off mortgages. It will pay debts to the merchant, the shopkeeper, and, I am sorry to relate, to the 36-percent loan shark. It will be used to buy shoes for the veteran's family, to buy the good wife a new gown, and warm clothing for the kiddies. It will be used not alone to relieve the distress of the veteran but also to alleviate the poverty of a silver-haired mother, a white-haired father, who sit at the window and nervously gaze into a void, a mirage, which to their worried minds visualizes the coming of the sheriff with his hideous foreclosure order of sale—sale and dispossession.

In 1928, in the August primaries, I was nominated for United States Senator on the Democratic ticket, defeating Gov. George White and three other opponents by a large vote. I carried 70 counties of the 88 in Ohio. Mr. White carried only 12.

It would be most unfair to my constituents for me to claim full personal credit for this achievement. A large part of it was due to the platform on which I stood; namely—justice and economic equality for farmers, war veterans, and wage workers.

In the May 1932 Democratic primaries I was nominated Congressman at-large. My platform included a pledge to pay the soldiers' bonus with new currency, and to oppose any attempt to reduce the compensation of disabled war veterans except in case of fraud and willful misconduct.

Speaking at the Democratic State Convention in Columbus, Ohio, on August 20, 1932, on the same day that our great President, Franklin D. Roosevelt, made his first campaign speech, I declared to the convention in unequivocable terms and reiterated my position so that none could be mistaken—I said I would support payment of the soldiers' bonus with new currency.

I like to believe that, through my humble efforts, many farmers, wage workers, and other toilers became converts to the Patman bill. I asserted in unmistakable terms the belief that this infusion of new currency into the flabby veins of the pauperized masses would invigorate them, would resuscitate and recondition these victims of depression and oppression by the money kings.

We were faced with a famine of money then. We are faced with a famine of money today. When a man is starving, his life can be saved only by bread or food; when a man is dying from thirst, he can only live if he is given water; and when a nation is stricken because of the insufficiency of the circulating medium, that nation can only be rehabilitated by an increased supply of this medium in town, city, and country.

The proof of the pudding is in the chewing of the string. So the proof of the meritorious and humanitarian nature of this measure is found not only in the immediate relief to veterans and to their dependents but in the amount of money that will find its way into every town, every county, every city, and every State in the Union.

My own State will benefit to the extent of the following:

Ohio: Adams, $361,355.13; Allen, $1,230,798.87; Ashland, $476,351.91; Ashtabula, $1,212,040.53; Athens, $783,222.75; Auglaize, $497,042.82; Belmont, $1,679,367.87; Brown, $357,224.04; Butler, $2,022,709.32; Carroll, $284,690.61; Champaign, $427,346.19; Clark, $1,612,295.28; Clermont, $528,105.78; Clinton, $382,028.31; Columbiana, $1,533,361.32; Coshocton, $513,744.48; Crawford, $626,666.85; Cuyahoga, $21,301,797.15; Darke, $673,899.57; Defiance, $402,719.22; Delaware, $461,263.68; Erie, $747,018.09; Fairfield, $780,297.30; Fayette, $367,986.15; Franklin, $6,401,505.15; Fulton, $416,247.21; Gallia, $408,676.50; Geauga, $273,290.22; Greene, $589,682.07; Guernsey, $735,546.78; Hamilton, $10,449,281.88; Hancock, $716,362.92; Hardin, $489,968.55; Harrison, $334,104.12; Henry, $399,350.52; Highland, $450,625.68; Hocking, $361,816.11; Holmes, $296,551.98; Huron, $597,501; Jackson, $443,959.20; Jefferson, $1,565,683.11; Knox, $520,162.74; Lake, $738,880.02; Lawrence, $789,711.93; Licking, $1,063,126.26; Logan, $513,833.13; Lorain, $1,936,222.38; Lucas, $6,164,880.57; Madison, $359,085.69; Mahoning, $4,186,797.66; Marion, $805,296.60; Medina, $526,173.21; Meigs, $424,828.53; Mercer, $444,952.08; Miami, $909,566.73; Monroe, $326,692.98; Montgomery, $4,848,818.13; Morgan, $240,826.59; Morrow, $256,889.97; Muskingum, $1,194,966.54; Noble, $265,258.53; Ottawa, $427,452.57; Paulding, $271,286.73; Perry, $557,519.85; Pickaway, $482,929.74; Pike, $246,021.48; Portage, $756,751.86; Preble, $398,127.15; Putnam, $444,552.02; Richland, $1,168,442.46; Ross, $801,059.13; Sandusky, $704,430.63; Sioto, $1,440,048.33; Seneca, $849,993.93; Shelby, $441,902.52; Stark, $3,932,230.32; Summit, $6,101,442.63; Trumbull, $2,181,906.99; Tuscarawas, $1,209,061.89; Union, $340,274.16; Van Wert, $465,820.29; Vinton, $182,388.51; Warren, $484,880.04; Washington, $752,408.01; Wayne, $833,735.52; Williams, $431,122.68; Wood, $892,173.60; Wyandot, $337,508.28; total, $117,845,937.81.

[Applause.]

Mr. FISH. Mr. Chairman, I yield 2 minutes to the gentlewoman from Massachusetts [Mrs. ROGERS].

Mrs. ROGERS of Massachusetts. Mr. Chairman, I am going to speak on only one phase of this bill and give one reason why it should not pass.

We might as well face the facts. We cannot secure everything we should like for our veterans. It seems to be the almost universal feeling that this can never become law. We know past history has shown when a measure of this sort passes it does have an unfortunate effect upon legislation for our disabled veterans. It has been my very great privilege to have been with these men and women since

the beginning of the war. I know how desperate are the veterans who have had their compensation cut unjustly. We know of the gag rule which was brought in here and which prevented our getting an increased appropriation for the veterans in the independent offices bill. I know and I am greatly distressed that no hearings are being held by the World War Veterans' Committee, of which I am a member, to bring out a bill to correct some of these injustices. You know and I know that if this bill should become law it would still further jeopardize the chances of our disabled. If I voted for this measure the faces of thousands and thousands of service men and women I have seen over all the country in our hospitals would haunt me. I can see injustice for this reason in the measure. [Applause.]

Mr. FISH. Mr. Chairman, I yield 3 minutes to the gentleman from Minnesota [Mr. CHRISTIANSON].

Mr. CHRISTIANSON. Mr. Chairman, if the question involved in the measure we are considering today were whether we should pay the ex-service men what we owe them, I do not believe that many Members would vote against this bill. But that is not the question; that is not the specific issue before us. The proponents of the Patman bill are asking us to pay, in addition to what is actually due, 11 years' unearned interest. In other words, they are asking us to increase the bonus voted in 1924 by more than 50 percent.

In order that this may become entirely clear, let us review the history of the Adjusted Compensation Act. Let us see how the face value of the bonus certificates was determined. It was decided in 1924 that each soldier of the World War should receive additional compensation at the rate of $1.25 a day for oversea and $1 a day for home service; in other words, that if a veteran had served 200 days oversea, he should have $250 additional pay; if he had served 200 days at home, he should have $200; if he had served 100 days oversea and 100 days at home, he should have $225. Inasmuch as several years had elapsed since the war ended, it was agreed that there should be a further allowance in lieu of interest. Accordingly 25 percent was added to the sum to which each ex-service man was entitled on a per diem basis.

One of the points at issue was whether the bonus should be paid in cash. Although economic conditions were infinitely better at that time than they are now, they were considered bad by a generation that had become accustomed to war-time prosperity. It was thought that times would improve, and that in 20 years, with the war debt paid off, the Nation would be better able to discharge the obligation which the Government was about to assume. The belief that the country would, by steady strides, emerge from its post-war difficulties was one of the considerations that enabled the proponents of the original bonus bill to pass it over the President's veto.

If the Congress which voted the ex-service men increased compensation had accepted the responsibility of providing the money wherewith to discharge the obligation thus created, we should not today be facing this embarrassing issue. But like every other legislative body, the Congress which sat here in 1924 found it much easier to authorize expenditures than to levy taxes. Accordingly, it decided that the veterans should receive, in lieu of the cash due them, certificates for the amounts which would be due with accumulated interest in 1945.

Let me emphasize this fact: The ex-service man who holds an adjusted-compensation certificate for $1,000 did not have $1,000 coming in 1924 on the basis of the agreed per diem, but approximately $500. He does not have $1,000 coming today, but $500 plus accumulated interest to date. He will not have $1,000 coming until 1945, and those who support this bill today are, in effect, proposing that the Government pay, in addition to its acknowledged debt, 11 years' unearned interest. The proponents of this measure have not said much about this; it is a point they want you to overlook.

At 4 percent, interest earns 54 percent in 11 years, as any savings bank bookkeeper can tell you. Accordingly, those who ask us to vote for the present bill ask us to vote an additional bonus of 54 percent. If you want to do that, do it; but do it with your eyes open. Know what you are doing when you do it.

The ante has been raised twice. It was raised 25 percent in 1924, and it is being raised 54 percent today. I am wondering whether it will not be raised again when a group of politicians who want your jobs, and need the bonus vote, call attention to the fact that you have discharged the debt with dollars devalued to 59 cents—dollars which, in terms of gold, are worth only 59 percent of what dollars were worth when the original bonus bill was passed. During the Civil War the Government issued $600,000,000 in greenbacks, which became depreciated until they were worth only one half of their pretended value. History has a habit of repeating. If $600,000,000 of fiat money depreciated one half in the sixties, what will the printing of four times as many dollars do to the value of the greenbacks of 1934? Granting that the present 59-cent dollar would depreciate no more than 50 percent, it would be worth less than 30 percent of what dollars were worth when the act creating the bonus obligation was created; and you, who today blithely assume that by the hocus-pocus of financial wizardry you escape a troublesome issue, may find yourself outbid by a candidate who is willing to promise to raise the ante 70 percent instead of 54.

In all candor, I will say that I favored the reduction of the gold content of the dollar, believing it would tend to restore the 1926 price level and reestablish the old ratio between debts and equities. The process of readjustment resulting from devaluation will necessarily be slow, and perhaps better so, for a sudden shift in price levels would result in great hardship to those who live on wages or fixed incomes. But while approving of devaluation, I cannot give my support to rag-money inflation. Much as I want to raise the price level, I do not want to raise it by panic—by so shaking the confidence of the people in their currency that they will buy goods, commodities, and property in order to be rid of their money. A price level raised by fear "goeth before a fall." I want prices to rise in response, not to apprehension but to confidence. The least that I can do is to await the orderly development of the consequences of devaluation before sanctioning an experiment that has brought disaster to every nation that has tried it in the past.

We are told that if this bill becomes a law, business will be stimulated. It was a similar inducement that caused Congress a few years ago to authorize loans on adjusted-compensation certificates, but the results were disappointing. A hardly noticeable spurt of business was followed by deeper and blacker depression, and the elusive phantom—prosperity—did not so much as even look furtively around the corner. That prosperity can be restored by the distribution of Government funds is a superstition experience is fast dissipating. England flirted with the delusion for a while, but gave it up. In the end we shall have nothing but debts and disillusionment to show for our experiment in bootstrap-lifting.

It has been said that we shall save $112,000,000 interest annually by paying the bonus now. That would perhaps be true if we paid the present worth of the certificates; it is not true if we pay under the terms of this bill. We shall not only pay the interest but pay it in advance.

While it is not for me to question the motives of those who see fit to support this measure, I cannot be denied the right to say that my efforts to fathom the purposes which have induced Members to bring this bill to a vote at this time leave me puzzled. The proposal to pay the bonus now has already been defeated in another body, and the President has stated in terms that do not admit of misunderstanding that his veto pen is poised for action. Voting for this measure will not put one dollar into the pocket of a single veteran. It will not solve the bonus issue but bedevil it. It will not fool any intelligent ex-service man.

Personally I have supported every well-considered effort to liberalize the rules and regulations promulgated under the Economy Act, for I feel that in many cases the administration of that law has not been in harmony with the promises which were made when we passed it. I shall continue

to insist on fair treatment for those who suffer from wounds and infirmities incurred in service. I am willing to support full payment of what is now due on the adjusted-compensation certificates, but I am not willing to reach down into the pockets of a hard-pressed people to increase the bonus by 54 percent, however helpful it might be to my own political fortunes.

It is a mistake to assume, as some have so glibly done, that the Morgans and Mellons will pay the bill. The proceeds of income and estate taxes have already been allocated, and many times over, for the expenditures of the regular Budget. The funds derived from taxes on tobacco, gasoline, tires, bank checks, and other articles and commodities, have been spoken for long ago. The revenue needed to pay the bonus will come from the ordinary, everyday citizen. Make no mistake about that. It will be subtracted from the buying power of the masses, no matter how adroit have been the efforts to conceal that fact.

In view of the considerations I have set forth, I shall at the proper time offer an amendment to pay the bonus certificates at their accrued rather than their face value. If that amendment is adopted, I shall vote for this bill. Otherwise I shall record myself in the negative, for if I were to do otherwise I should have a guilty conscience. I should consider myself untrue to the interests of my constituents, who have honored me by electing me as their Representative in this House. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from South Carolina [Mr. GASQUE] such time as he may desire.

Mr. GASQUE. Mr. Chairman, I think I was one of the first men that appeared in this House advocating the payment of the soldiers' bonus on a cash basis. I stood here 12 years ago and pleaded that they be paid in cash. The Republican Party which was in power at that time did not see fit to do this. They pleaded and finally succeeded in passing an act providing for a payment of a 20-year paid-up policy in insurance. Hence today we as a Government are under obligation to pay to the ex-soldiers 2¼ percent more than a cash bonus would have amounted to. The Government is under obligation to pay this. They have outstanding bonds or certificates for this amount.

We can no longer take the position that we are unable to pay this. In my opinion the greatest need of the country today is a circulating medium in currency. The validating of these certificates in making them a circulating medium would do more to relieve the present situation of unemployment than any other thing that I can think of. Let us pay this bonus now, in certificates which will circulate and wipe out the debt which we owe to the ex-soldiers, and at the same time inflate the currency to an extent which will be felt by every farmer and laborer in America.

Mr. FISH. Mr. Chairman, I yield 3 minutes to the gentleman from Massachusetts [Mr. GIFFORD].

Mr. GIFFORD. Mr. Chairman, I have been listening intently, hoping we could have a little more discussion of the various sections of the bill relating to its financial features. I think we ought to congratulate the gentleman from Texas [Mr. PATMAN], because he seems to be winning on all fronts. He is going to pay the adjusted-compensation service certificates, and he is going to carry out all those pet financial schemes of his. It seems that by the terms of the bill, when the time arrives that commodity prices reach a certain point, then the circulation privileges and issuance of notes by national banks and by Federal Reserve banks are to be abolished and terminated, and all the gentleman's notions of finance, of which we have heard so much for some time back, are to be put into operation. But to this minute no one seems to talk about this feature of the bill. Little attention is being paid to this more important part of the bill put in under the plea that it might be necessary to curb inflation. Little notice is being taken of these financial features, which ought to be considered by the Banking and Currency Committee. We seem to think that the only purpose of the bill is to pay the soldier's bonus. Cannot gentlemen see by reading this what is happening? The very title of the bill is misleading. It is the beginning of a scheme to simply print money for all Government obligations in the future. There is to be no more bankers' money in Government financing. It will be the United States, Inc., which will issue money, about which we have been hearing so much lately. I for one am extremely interested in those particular sections relating to the abolition and termination of present methods of obtaining money for governmental and private financing in the future.

Mr. FISH. Mr. Chairman, I yield myself 2½ minutes. I do not want to become involved with the Members of the Democratic Party as to how they should vote on this measure; but I think I am within my rights, and I think I am fair, in stating that the Democratic national platform calls for a reduction of 25 percent in the running expenses of the Government. It also calls for a balanced Budget, and furthermore, it calls for preserving sound money at all hazards. All three of those party pledges are violated in this one particular measure.

I do not want to disturb my friend from Texas [Mr. BLANTON] because he made a very impassioned plea for the bill this afternoon; but just a week or so ago, upon the 27th of February, I asked him if he was going to vote for the bonus bill, and this is what he then had to say:

> Since the President has said today that he is going to veto it, I am not going to vote to bring it here, because such action would be futile, and of no avail, and I am with the President, because I believe every Legion post in my district wants me to back the President in all his plans and policies to get this Government out of the bog.

The gentleman comes on the floor today after having heard a direct message from the President, a letter read, in which the President stated not only would he veto the bill, but that he would not permit a pocket veto, and yet, for some reason the gentleman from Texas and other Members of his party have changed their ideas recently and now propose to vote for this bill.

Mr. BLANTON. When I made that statement to my friend from New York, I then understood on good authority that the President was going to send us a statement asserting that this bill would destroy the economic structure of our Government and would disrupt his financial plans and policies. But he has made no such statement. He has not said that this bill would destroy the economic structure of this Government. He has not said that this bill would disrupt his financial plans and policies. All he has said is that he will veto it. That is his prerogative. He is merely exercising his prerogative. We are exercising our prerogative, to legislate, in passing this bill.

On February 20, 1934, I signed the motion to discharge the committee. I am now going to help pass this bill here before we adjourn.

Mr. FISH. For months the Democrats have been protesting their loyalty to the President. Every measure that comes up they claim must be pushed through because the President wants it, even if it violates the Constitution of the United States. But when it comes to such an easy method as fiat money to pay the veterans, the President is thrown overboard and the Democratic platform is scrapped and thrown out of the window.

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Pennsylvania [Mr. DUNN] such time as he may desire.

Mr. DUNN. Mr. Chairman and members of the committee, if I knew that by voting for this bill that it was going to kill me politically for the balance of my life, I would vote for it, and I am damned glad to have the opportunity to vote for such a humane measure. [Applause.]

Mr. PATMAN. Mr. Chairman, I yield half a minute to the gentleman from Pennsylvania [Mr. ELLENBOGEN].

Mr. ELLENBOGEN. Mr. Chairman, I am going to vote for this bill because the amount that is due to the soldiers is due today, and not in 1945. Out of a $1,000 certificate $500 was due in 1918. If you add 6 percent for 16 years, that is 96 percent, which amounts to just about the whole certificate, which is due today, and that is why I shall vote for it.

Mr. PATMAN. Mr. Chairman, I yield 5 minutes to the gentleman from Kentucky [Mr. VINSON].

Mr. VINSON of Kentucky. Mr. Chairman, something like 2 years ago, 10 Democratic colleagues on the Ways and Means Committee did me honor in permitting me to file a minority report upon the adjusted-service certificate bill, at that time advocating its passage. Fourteen members of that committee, 10 of whom were Republicans, were against a favorable report upon the bill. Eleven Democrats supported a favorable report. At that time Mr. Hoover was in the White House. At that time, when they discharged the committee and brought the bill to the House for action, we said that the primary purpose of those advocating the passage of that legislation was to benefit the United States. That if anyone could show that it was not to the economic advantage of all in this country, we would not sponsor it. I stand today exactly where I stood 2 years ago. There are those who say that gentlemen who today sponsor this legislation are not in step with the President of the United States. Let me say to them that some of us formed our opinions after weeks, veritably weeks, of hearings, when the leading financial minds of the country came before our committee. We formed our conclusions then. We took position in the House and voted our sincere convictions. We went to our people in the campaign of 1932, explaining the purposes of the bill, explaining the money mechanics of the bill, and we were returned here with certain recollection of our promises and commitments. Some of us have the courage to keep the faith. [Applause.] In so doing we maintain that we do nothing that an honorable man should not do.

We were told in the Seventy-second Congress, in those hearings, that if we passed this legislation we would be forced off the gold standard. Well, we have gone off the gold standard without this bill being enacted into law. I had the privilege of hearing Mr. James A. Farrell, former president of the United States Steel Corporation, a couple of days ago, say that the only trouble about going off the gold standard was that we did not do it 18 months sooner. [Applause.]

I have no quarrel with any Member of this House with reference to his vote. If I were angry, I should be inclined to characterize as cheap politics the action of those who would impugn the motive of any Member; but in view of the fact I am in a good humor, I will not make such characterization.

Our good friends say they are in favor of entirely eliminating or remitting the interest on loans heretofore made. The gentleman from New York [Mr. FISH] made that statement and other gentlemen have said that they favored the elimination of the interest charge. My friends, I call to your attention to the testimony of General Hines before the Ways and Means Committee, in the Seventy-second Congress, while testifying on the bonus bill, at page 566, and I quote verbatim:

> General HINES. From 1932 up to 1945, if you were to cancel all interest, it would cost the Government $1,016,000,000 plus.

This is 50 percent of the amount called for in this bill. It would not be paid in the same manner. You would have to pay that $1,016,000,000 in taxes or bond issues, that bear interest.

Mr. FISH. Will the gentleman yield?

Mr. VINSON of Kentucky. I am happy to yield to the gentleman from New York.

Mr. FISH. According to the figures I got, it will cost $65,000,000 a year for the next 10 years.

Mr. VINSON of Kentucky. I am not responsible for the figures which the gentleman gets. I am quoting a high authority. Certainly it cannot be said that General Hines is prejudiced in favor of the soldiery of this country. [Applause.] His figures certainly must be accurate.

Our friends today are not quite so loud in their protests in regard to printing-press money, but it does come into their argument.

[Here the gavel fell.]

Mr. PATMAN. Mr. Chairman, I yield the gentleman from Kentucky 5 additional minutes.

Mr. VINSON of Kentucky. The gentleman from New York [Mr. FISH] who opened the debate in opposition to the bill called the United States notes "printing-press money", and the gentleman who closed the debate [Mr. GIFFORD] said "printing-press money." Two years ago it was testified without contradiction that at that time we had more than $1,800,000,000 currency that was not backed by specie, that was backed by governmental obligations only. Today, I say to you that we have more than $2,000,000,000 of such currency that has only that sort of backing. Oh, my friends on the Republican side, talk about money issued against the credit of the United States being "printing-press money." What did you do in the Glass-Borah amendment to the Home Owners' Loan Corporation, passed in the last administration, authorizing the issuing of currency upon bonds and bonds alone, bearing 3⅜ percent interest? Is that printing-press money? If the money authorized hereunder be printing-press money, any paper money can be characterized as printing-press money. Are the national-bank notes which have been a medium of exchange for many years printing-press money? My friends, for years we have issued national-bank notes, backed by the credit of the Nation, in the form of 2 percent Government bonds, called consols, 95 percent of the reserve being Government bonds and 5 percent lawful money. We have $900,000,000 of such money.

Mr. BLANCHARD. Will the gentleman yield?

Mr. VINSON of Kentucky. I yield.

Mr. BLANCHARD. Will the gentleman state the amount that was issued following the enactment of the Glass-Borah amendment?

Mr. VINSON of Kentucky. Something between three and four hundred million dollars currency, as I recall, but, because of the interpretation of the Comptroller General, the bankers came and withdrew quite an amount of the bonds. Between three and four hundred million dollars in currency was issued under that Republican legislation; but because of the interpretation of the Comptroller General on a question of the 3-year limitation in the bill, the bankers came and withdrew the bonds. I am informed there are some one to two hundred millions of currency of this kind yet outstanding. Let me call your attention to some more printing-press money that was started in Mr. Hoover's administration, currency backed only by Government bonds, authorized in the Glass-Steagall bill.

It was only 10 days ago when we saw the administration leaders adjourning the House on Friday to go over until Saturday in order that they could be certain that they would continue the right to have that sort of currency. Federal Reserve notes in amount of $570,000,000 of that kind of currency is in existence. If it was a good thing to continue $570,000,000 of that kind of currency 10 days ago, I say it is with ill grace that men attack the validity, the soundness of the money involved here. I want to state I helped in the move to grant the extension sought at that time because we need that currency just as we need this currency.

Mr. GIFFORD. Will the gentleman yield?

Mr. VINSON of Kentucky. I regret very much that I cannot yield.

My friends, we devalued the gold dollar. We have seven and one half billion dollars of gold. The gold in the Federal Reserve banks and $3,100,000,000 in the Treasury makes 100 percent coverage for all currency, including this. I know it is contemplated to use two billion of the three billion one hundred million of gold for stabilization purposes. That is because they can; but under the law, the parity statute of 1900, all reserves are behind any and all moneys that are issued by the United States Government. A section of this bill so states. A section of this bill applies specifically that statute to this currency. All the strength and effect of the parity statute of 1900 and certain amendments to the Federal Reserve Act are behind this currency. You can take

this money and put 100 percent gold coverage behind it, if desired. You can take $2,000,000,000, use it for stabilization purposes, and still have $1,100,000,000, practically 50-percent gold reserve behind this currency. In addition to that you would have the solemn, direct obligation of the Federal Government in an amount of $2,200,000,000 turned in and satisfied. So I submit that the question of the validity of this money does not admit of serious discussion or argument, despite the fact that it may go to the country that it is printing-press money or that it is fiat money. Printing-press money reminds me of the old argument that was so powerful in days gone by of "the full dinner pail." [Applause.]

[Here the gavel fell.]

Mr. PATMAN. Mr. Chairman, I yield to the gentleman from Kentucky [Mr. VINSON] such time as he may desire.

Mr. VINSON of Kentucky. The attack is made that it will unbalance the Budget. This bill does not unbalance any budget. This bill will not cost the taxpayers one copper cent. This bill does not require the issuance of any bonds or the payment of interest upon any bond issues or the levying of any additional taxes.

Unbalance the Budget! Where has the gentleman from New York been all the whole this debate has been going on? Ah, my friends, this is a piece of legislation that is aimed at a reasonable increase of commodity values; and in this bill you have brakes against any harmful results. The powers in the bill with regard to the withdrawal of currency are simply brakes against uncontrolled expansion. This is a controlled expansion of the currency. We sincerely believe it is for the best interests of our entire people. [Applause.]

Mr. PATMAN. Mr. Chairman, the gentleman from New York and I have agreed to forego using the balance of the time.

The CHAIRMAN. The Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted, etc., That title V of the World War Adjusted Compensation Act, as amended, is amended by adding at the end thereof three new sections, to read as follows:

"PAYMENT OF CERTIFICATES BEFORE MATURITY

"SEC. 509. (a) The Administrator of Veterans' Affairs is authorized and directed to pay to any veteran to whom an adjusted-service certificate has been issued, upon application by him and surrender of the certificate and all rights thereunder (with or without the consent of the beneficiary thereof), the amount of the face value of the certificate as computed in accordance with section 501.

"(b) No payment shall be made under this section until the certificate is in the possession of the Veterans' Administration, nor until all obligations for which the certificate was held as security have been paid or otherwise discharged.

"(c) If at the time of application to the Administrator of Veterans' Affairs for payment under this section, the principal and interest on or in respect of any loan upon the certificate have not been paid in full by the veteran (whether or not the loan has matured), then, on request of the veteran, the administrator shall (1) pay or otherwise discharge such unpaid principal and so much of such unpaid interest (accrued or to accrue) as is necessary to make the certificate available for payment under this section, and (2) deduct from the amount of the face value of the certificate the amount of such principal and so much of such interest, if any, as accrued prior to October 1, 1931.

"(d) Upon payment under this section the certificate and all rights thereunder shall be canceled.

"(e) A veteran may receive the benefits of this section by application therefor, filed with the Administrator of Veterans' Affairs. Such application may be made and filed at any time before the maturity of the certificate, (1) personally by the veteran, or (2) in case physical or mental incapacity prevents the making or filing of a personal application, then by such representative of the veteran and in such manner as may be by regulations prescribed. An application made by a person other than a representative authorized by such regulations, or not filed on or before the maturity of the certificate, shall be held void.

"(f) If the veteran dies after the application is made and before it is filed it may be filed by any person. If the veteran dies after the application is made it shall be valid if the Administrator of Veterans' Affairs finds that it bears the bona fide signature of the applicant, discloses an intention to claim the benefit of this section on behalf of the veteran, and is filed before the maturity of the certificate, whether or not the veteran is alive at the time it is filed. If the death occurs after the application is made, but before the negotiation of the check in payment, payment shall be made to the estate of the veteran irrespective of any beneficiary designation, if the application is filed (1) before the death occurs, or (2) after the death occurs, but before the mailing of the check in payment to the beneficiary under section 501.

"(g) Where the records of the Veterans' Administration show that an application, disclosing an intention to claim the benefits of this section, has been filed before the maturity of the certificate, and the application cannot be found, such application shall be presumed, in the absence of affirmative evidence to the contrary, to have been valid when originally filed.

"SEC. 510. If, at the time this section takes effect, a veteran entitled to receive an adjusted-service certificate has not made application therefor he shall be entitled, upon application made under section 302, to receive at his option either the certificate under section 501 or payment of the amount of the face value thereof under section 509.

"SEC. 511. The Administrator of Veterans' Affairs, in the exercise of his powers to make regulations for payment under section 509 shall to the fullest extent practicable provide a method by which veterans may present their applications and receive payment in close proximity to the places of their residence."

Mr. BYRNS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I regret very much to find myself in opposition to many of my good friends on the floor with reference to this bill. I shall not undertake to debate the merits or demerits of the proposition before the House, for I could not do so in the few minutes at my disposal. I have listened to the debate very carefully, and I think it quite evident that there is much to be said on both sides of the proposition.

I hold no criticism of any Member of this House for whatever action he may take with reference to this bill. [Applause.] That is a matter upon which each individual Member must vote according to the dictates of his conscience and his judgment.

I regret that I cannot vote for the bill under consideration by the House. I had hoped some compromise measure acceptable to the President would be agreed upon, but the President in writing has stated positively and unequivocally that he will veto this bill, and certainly those of us who have confidence in the President must understand that any vote for this bill today is simply an idle political gesture.

The country is looking to the President to lead us out of industrial chaos, and he has mapped out a program which if sustained will succeed. With the obligation resting upon me as I see it, I do not feel that I can consistently vote for the passage of a measure which the President feels strikes at the very heart of his recovery program. This, my friends, in my judgment, is the issue before us today. I may be wrong, and those of you who are in the great majority may be right, or you may be wrong and I may be right; but as I view this proposition the whole question before you and me is whether or not, with the President seeking to bring order out of chaos, we are going to do anything which, in his judgment, as the head of the administration and in the judgment of his financial advisers in the Treasury Department, may have a tendency to interfere with his recovery program.

Since the last Congress much legislation has been passed. Gold has been devalued in an effort to bring down the price of the gold dollar in the interest of higher prices for the commodities of the farm and factory; and other pieces of legislation have to an extent, at least, increased our currency.

I do not know whether the issuance of $2,400,000,000 in Treasury notes will serve to deflate the dollar to an extent that it will wreak havoc to the administration and its policies, and not knowing, I am not going to take any stand save with the President and his advisers. [Applause.]

Mr. PARKER. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I do not have the responsibility of leadership upon my shoulders as does our beloved leader, the distinguished gentleman from Tennessee. I am not obligated to vote with any man, nor to vote "aye" or "nay" at the behest of any man. I am interested only in voting right on these measures and as my conscience tells me I should vote.

I believe in a controlled expansion of the currency. I believe in the President's program for the relief of distress in America. I believe the United States Government should pay its every obligation. I am going to vote for the passage

of this bill today because I believe its provisions, if enacted into law, will bring about all three of these things. I also believe this can be done without placing any additional burden upon the Treasury of the United States. The frozen assets in our closed banks amount to more than $2,400,000,000. If that much new money is put in circulation, the people of America will still have less money with which to do business than they have in normal times.

Mr. CONNERY. Mr. Chairman, will the gentleman yield?

Mr. PARKER. I yield.

Mr. CONNERY. The reply to the statement that the President will veto this bill is that the same argument was made against the original bill in President Harding's administration; the same argument was made during President Coolidge's administration, and they passed the bill over President Coolidge's veto. [Applause.]

Mr. PARKER. I was not a Member of the House at that time, but whether the President vetoes the bill does not concern me. [Applause.] Whether the Senate of the United States will pass the bill does not concern me. It is my responsibility as a Member of this House to vote here and now on this measure. I am going to meet the responsibility and shall vote for the bill regardless of whether any Senator votes for it, and regardless of whether the President of the United States may see fit to veto it. [Applause.]

The bill, if it is enacted into law, will place money in the hands of deserving creditors of the Government who live in every hamlet, village, and community in the United States. It carries with it no new obligation on the part of the Government. Its provisions merely change the time and the manner in which the Government's existing obligation may be discharged.

I know of no better way to relieve the distress of the American people. I know of no method of distributing relief that would be so universal. I know of no other manner in which relief can be administered and at the same time a Government debt be paid.

And I want to state right here and now that I do not consider the passing of this bill an idle gesture. I do not know any Member of this House who will vote for this bill today and then refuse to vote to override the veto of the Chief Executive if he should see fit to veto it after it has passed both Houses of Congress.

I assure the gentleman from Illinois [Mr. BRITTEN] that when I vote for the passage of the bill today, that means I will vote to override the disapproval of the Chief Executive if he vetoes the bill. [Applause.]

Mr. BRITTEN. Mr. Chairman, will the gentleman yield?

Mr. PARKER. I yield.

Mr. BRITTEN. I am glad to hear the candor of the gentleman from Georgia and his intent on the proposition; but the gentleman knows as well as I that there are many Members on that side who are prepared to vote in favor of the bill today but are also prepared to vote to sustain the President in his veto message.

Mr. PARKER. I can speak for myself only. I assure the gentleman from Illinois that I have no such intention.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. PARKER. I yield.

Mr. PATMAN. I can assure the gentleman from Illinois that I do not know of any Member who maintains that view or is expecting to do what the gentleman from Illinois suggests.

Mr. PARKER. I want to state also, while I am on my feet, that 2 years ago I voted against the bonus bill and made a speech against it. I did it because the leadership of our party told me that if we passed the bill at that time it would wreck the Treasury and destroy the Nation's credit.

At that time the slogan of both parties in the House was "Balance the Budget", and I was loyal enough to come here and vote against payment of the bonus and to make a speech against the bill because I believed it was necessary in order that we might balance the Budget. Those same leaders who told us in 1932 that the enactment of this law would wreck the Treasury and destroy our credit now tell us that the appropriating of ten or twelve billions of dollars by this Congress is nothing to be alarmed at. They now say this huge amount of money, which is 10 times the amount that will be required to pay the bonus, is only a small percentage of our annual income.

Who has heard anything about balancing the Budget for the last 12 months? [Applause.]

Mr. Chairman, I have had more military service than any other Member of Congress, with the exception of one retired major general of the Regular Army who was a professional soldier. As a soldier and as a loyal American citizen, I was perfectly willing to vote against a similar bill in 1932, but under the changed conditions and since the words "We must balance the Budget" are no longer the slogan of my party, I shall, in a few moments from now, by my affirmative vote on the final passage of this bill, do justice to those with whom I served my country, at home and abroad, at a time when many of those to whom relief has already been extended were content, for various reasons, to remain at home and with their loved ones. [Applause.]

[Here the gavel fell.]

By unanimous consent the pro-forma amendment was withdrawn.

Mr. CHRISTIANSON. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. CHRISTIANSON: Page 2, line 2, strike out the words "amount of the face" and insert in lieu thereof the word "accrued."

Mr. BLANTON. Mr. Chairman, I make the point of order that the amendment is not germane. This is lugging in an entirely different proposition, wholly dissimilar from the purpose of the bill. The purpose and intent of the bill is to pay these certificates in cash according to their face. This is an attempt to change that program and pay only an undetermined part, and require a lot of auditing, a lot of figuring, and a lot of other red tape administering, expensive and wasteful, that are wholly impertinent to the original program.

The CHAIRMAN. Does the gentleman from Minnesota desire to be heard on the point of order?

Mr. CHRISTIANSON. Mr. Chairman, I cannot believe that the gentleman makes the point of order very seriously, because all that this amendment does it to place a limitation upon the subject matter of the bill. This simply provides that instead of paying these bonus certificates with interest until 1945 we shall pay the amount actually due with interest up to the time of payment. Further, Mr. Chairman, this amendment is germane.

The CHAIRMAN. The point of order is overruled. The question is on the amendment.

The question was taken; and on a division (demanded by Mr. CHRISTIANSON) there were—ayes 54, noes 105.

So the amendment was rejected.

Mr. GREEN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, it is my intention to vote for this bill if it reaches a vote before my train leaves. Unfortunately I have to go home very shortly on account of serious illness of my mother. However, I want to go on record as favoring this bill and also the bill to be voted on a little later for the liberalization of compensation and pensions for veterans.

I have voted each time heretofore for the bonus and will do so today.

Mr. MARTIN of Colorado. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. MARTIN of Colorado: After line 3, page 4, add the following: "Payment of adjusted compensation under this act shall be made to all veterans in monthly installments at the rate of $50 per month until the full amount shall have been paid."

Mr. BLANTON. Mr. Chairman, I make the point of order that the amendment is not germane to the purposes of the bill and that it changes the entire complexion of the bill.

This is a bill to pay these adjusted-service certificates in cash. It is to pay them at once. The amendment seeks to make partial payments strung out over a period of many months.

The CHAIRMAN. Does the gentleman from Colorado desire to be heard on the point of order?

Mr. MARTIN of Colorado. Mr. Chairman, if the very able and distinguished parliamentarian now in the chair, who compiled the precedents of Congress, could not decide the point of order of his own knowledge, it would be a gross assumption on my part to make any contributions here, and therefore I will submit the question to the Chairman.

The CHAIRMAN. This identical question arose under similar circumstances in the course of the consideration of a bill providing for the payment of the bonus in the Committee of the Whole in the Seventy-second Congress.

After extended debate on a similar point of order, the amendment was admitted by the gentleman from Alabama [Mr. BANKHEAD], presiding as Chairman at that time, and in conformity with that decision the point of order is overruled. The gentleman from Colorado may proceed.

Mr. MARTIN of Colorado. Mr. Chairman, I appreciate the desire of the authors and sponsors of the bill to expedite it to a vote as is, and I disclaim any intention whatever of an attempt to frustrate or delay the program. No question can be raised as to the good faith of those gentlemen when they state that their feeling is that this bill is now perfect and is not capable of beneficial amendment. I am sorry to say that I cannot make the same unreserved admission with respect to their judgment. It is my opinion that the mechanics of this bill are capable of improvement and that these improvements will make it more beneficial to the veterans and the country and more acceptable to the administration.

My amendment simply provides that the adjusted compensation shall be paid at the rate of $50 a month. This amendment, in my opinion, will effect three very desirable results. In the first place, it will provide for a gradual expansion of the currency, instead of dumping this vast sum into circulation all at once.

The title of the bill is to provide a "controlled expansion", and in my opinion a gradual expansion is just as important as a controlled expansion.

Secondly, it will protect many veterans from an improvident loss of their compensation if it is paid in a lump sum, as was the case in numerous instances when the first payment was made.

In this connection I want to call the attention of the House to the fact that in the Adjusted Compensation Act—and it is written on the face of every certificate—every legal safeguard is thrown around the veteran, that he cannot assign it, and it is made a felony to attempt to thus take it away from him. I have made assignees return these certificates to veterans under threat of criminal prosecution. He can only get a loan on it through a member bank of the Federal Reserve System. Having taken that course to protect him from an improvident loss of his certificate, why should you throw him out now with a lump-sum cash payment to the swarms of vultures who are waiting for him with their beak open? [Laughter and applause.]

Third. It will furnish a steady and even flow of money to business, for a period of a year to 15 months, instead of a brief heavy spending orgy. The amendment would be like a continuation of showers, as compared with the kind of rainstorm that we have out in our western country, where we have a cloudburst for 15 minutes, washing many things away, and then everything goes dry for 3 months.

The only objection I have heard is that it entails more clerical work. My answer is that for several months past we have been paying 4,000,000 C.W.A. workers weekly, and if they can do that we can pay 3,000,000 veterans monthly.

Mr. Chairman, I have another amendment which I shall present, which I consider beneficial to this bill, and which I will mention briefly at this time, and that is an amendment providing that no payment shall be made under this act prior to maturity, while the holder of the certificate is in receipt of a taxable income. The limitation is identical with a similar provision in pension legislation passed by this Congress.

At bottom this legislation at this time is based on need, on the desperate financial straits—the unemployment—of many hundreds of thousands of veterans. I do not believe that if it were not for the unprecedented economic conditions prevailing in this country there would be any general demand upon the part of veterans for the payment of the adjusted-service compensation. There has never been in the history of this country any such need as there is now for legislation of this character, and it is my earnest hope that there will never again be in its history a time when relief of this character will be so opportune as now.

But no one can claim that a man enjoying an income taxable under the Federal income-tax law, an income exceeding $1,000 for a single person and $2,500 for a married person, or with dependents, will suffer any great hardship if deprived of the benefit of this act during the time he shall be enjoying such income.

As has been pointed out in this debate today, there are some 80 Members of Congress who would be entitled to cash their compensation certificates under this act. Under this act, J. P. Morgan, if he were a veteran, could cash his certificate. There are thousands of veterans on the Federal pay roll who are enjoying sufficient incomes, and I trust there are many thousands not on the Federal pay rolls who are in the same fortunate position. They should, and I believe the overwhelming majority of them would, if given the opportunity to express themselves, gladly stand aside to lighten the burden which must be borne in order that we may help the great unfortunate majority.

The only argument I have heard against the amendment is that it would not be constitutional. Well, it is a far guess nowadays as to what is unconstitutional. I leave that question to the courts. I believe the country generally, and those who are opposed to this bill, would approve this amendment, and that its adoption would tend to modify criticism.

There are other material respects in which I feel confident this bill could be made more acceptable to the administration and improve its chances in the other body, where, if it is considered at all, it will be thoroughly debated and beneficially amended.

I have an amendment designed to reach these objections to the bill, but realize, under the existing conditions, that there is no opportunity for its consideration and adoption here. I desire, however, that this amendment may be preserved in the RECORD, and I am therefore inserting it in my remarks.

Briefly speaking, this amendment would strike out section 3 of the pending bill, which takes away the currency issuing powers of national and Federal Reserve banks, except in specified cases, and inserts in lieu thereof a section which sets up a sinking fund, which is practically a continuation of the present adjusted certificate sinking fund so far as the amount appropriated annually is concerned, for the gradual retirement of the twenty-two hundred million dollars in United States notes to be issued under it, at the discretion of the President, and without any new taxation or increase in congressional appropriations.

I may say in passing that I am in favor of taking all money issuing powers from all private institutions and vesting said powers exclusively in a Government bank of issue. I may say further, that I am in favor of issuing the quantity of noninterest bearing United States notes called for in this bill, and of their permanent addition to the circulating medium of the country. But I recognize the fact that the administration is not yet ready to take either of these steps. I recognize further that many who favor the payment of the adjusted-service certificates may be alienated by the claim that we are seeking to materially modify the banking system of the country and to bring about uncontrolled inflation, and that neither of these propositions are material parts of the bill or necessary to a bill to pay the veterans.

The President may limit the note issuing powers of the banks under existing law and he may issue $3,000,000,000

in United States notes under existing law. He has not exercised either power, and I am not questioning the wisdom of his action. I am merely pointing out that he will not want to be compelled by Congress to act in a case where he has seen fit not to act, although vested with discretion. I consider that these provisions of the pending bill overload it and lessen the chances of the attainment of its real goal, the payment to the veterans of what is in fact a modest compensation for their economic losses, and to pay it to them now when they need it, and not in a dozen years from now, when much of it will go to their executors, administrators, and assigns. The provision which I would insert in lieu of section 3 of the pending bill is as follows:

There is hereby authorized to be appropriated for each calendar year (beginning with the calendar year 1935 and ending with the calendar year 1946) an amount sufficient to provide for the retirement of the United States notes to be issued under this act, to be known as the "compensation obligations fund." The amount to be appropriated shall be determined by the method provided in section 505 of the Adjusted Compensation Act, 1924, as amended, creating the adjusted-service certificate fund, and the amount so appropriated shall be set aside in the compensation obligations fund on the first day of the calendar year for which appropriated.

The Secretary of the Treasury is hereby authorized to apply said fund to the retirement of the United States notes authorized by this act as the annual appropriations for said fund become available, excepting such portion thereof as it may be necessary to reserve for the liquidation of deferred certificate payments under section 3. The Secretary of the Treasury is authorized to invest said fund or any part thereof as provided in section 506 of the Adjusted Compensation Act, 1924, as amended.

The President, at his discretion, may suspend the retirement of said United States notes for any calendar year or years when in his judgment the volume of outstanding currency would be unnecessarily reduced by such retirement, but the annual appropriations for the retirement fund shall not be affected by the exercise of such Executive discretion.

Mr. Chairman, I received a letter this morning from a past department commander of the American Legion stating that he had seen this amendment in a newspaper and that it sounded like the most sensible plan advanced to date. He stated that it would have the effect of providing a living for a lot of men and their families during a period which we hope will see the ultimate end of the depression.

I will venture the assertion that if the amendment could be submitted to the 10,000 little business communities in this country they would approve of it, and I am satisfied that the great majority of the veterans would approve of it.

[Here the gavel fell.]

PAY IT IN LUMP SUM

Mr. PATMAN. Mr. Chairman, the amendment provides that the amount due the veterans will be paid monthly. If you owe a debt, why not pay it in one lump sum, something that when a man receives it he can do something with it. If he gets it in dribs, it will be spent without substantial and lasting benefits. If you want to give something, give it all; do not divide it up and give it in the form of relief.

Mr. MARTIN of Colorado. You pay it in a lump sum and you will put them on the relief roll.

Mr. PATMAN. This amendment, if adopted, would destroy the expansion theory in the bill. This is not too much money to pay at once, and there is no danger of there being an undue inflation.

I move, Mr. Chairman, that all debate on this amendment and all amendments thereto and on this section be now closed.

The motion was agreed to.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Colorado.

The question was taken; and on a division (demanded by Mr. MARTIN of Colorado) there were—74 ayes and 110 noes.

So the amendment was rejected.

Mr. GRIFFIN. Mr. Chairman, I offer the following amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. GRIFFIN: Strike out section 1 and insert in lieu thereof the following: "That title V of the World War Adjusted Compensation Act, as amended, is amended by adding a new section to follow section 501 and to be known as section 501a, as follows:

"SEC. 501a. Any veteran, not desiring to hold his adjusted-service certificate until maturity, may upon surrender thereof to the Veterans' Administration, receive in cash, or in United States Treasury certificates, an amount equal to his or her adjusted-service credit, as computed and allowed under sections 201, 202, and 501 of title II of said World War Adjusted Compensation Act (less any sum or sums borrowed thereon) with compound interest from November 11, 1918, computed at the rate of 4 percent per annum."

Mr. BLANTON. Mr. Chairman, I make the point of order that the amendment is not germane. It is a different proposition from the one under consideration and provides for bonds instead of paying these certificates off in money.

Mr. GRIFFIN. Mr. Chairman, this amendment provides for the payment of the adjusted-service credit; in other words, the bonus, precisely the same subject matter as the bill before the House. The Patman bill proposes to pay now the face value of the certificate—the value which it will not have until 1945, while my amendment proposes to pay its present value. In other words, I propose that the basic service credit as agreed upon by the Congress, namely, a dollar a day for home service and a dollar and twenty-five cents a day for foreign service, shall be paid now with interest up to the date of the surrender of the certificate.

Mr. BLANTON. Mr. Chairman, to save time and expedite matters, I withdraw the point of order. We will then get a vote, and vote down the amendment.

The CHAIRMAN. The gentleman from Texas withdraws the point of order. The question is upon the amendment offered by the gentleman from New York.

Mr. GRIFFIN. Mr. Chairman, I ask unanimous consent that I have 3 minutes in which to explain the amendment.

The CHAIRMAN. The gentleman from New York asks unanimous consent to proceed for 3 minutes. Is there objection?

Mr. BLANTON. Mr. Chairman, I object.

Mr. GRIFFIN. Mr. Chairman, being denied the opportunity of explaining my amendment to the House I want to take advantage of the unanimous consent privilege to put into the RECORD at this point a brief summary of my argument.

The arbitrary closing of debate on the first section of the bill—the one to which my amendment refers—is intolerant, intolerable, and unfair and wholly out of place in a bill of this character. Surely it could do no harm to allow those who are genuinely in sympathy with the veterans to present an alternative proposal for their relief, particularly when it is universally conceded on all sides that the proposal in the Patman bill can never become a law. Why this solicitude to jam through Congress a mode of relief which will most probably fail in the Senate and which will never receive the approval of the President? It does not seem to me that the proponents of this bill are acting in good faith and that they are more anxious to make a voting record for the fall campaign than to actually serve the interests of the veterans.

My amendment is based upon the fact that Congress agreed to pay the veterans additional, or adjusted-service pay, at the rate of $1 a day for home service, and $1.25 a day for foreign service. To this was added 25 percent, thus constituting what has been designated as the "adjusted-service credit." But, after agreeing upon the amount due, instead of paying it over to those who were entitled to it, some stupendous intellect devised the ingenious plan of calculating what the adjusted-service credit would amount to at compound interest in 1945, and writing in this very generous-looking sum on an official paper, called it an "adjusted-service certificate", and handed it over to the victims with a great flourish of benevolence.

But what the veterans wanted was, not a promise, but ready cash; not a tontine insurance policy on which they would have to die to collect, but real money to meet their most pressing needs.

The whole transaction was a miserable mistake. That mistake I want to remedy. I want to remedy it now. I want to pay them now the amount of the original adjusted-service credit, with compound interest from November 11, 1918, right down to date. This is all they are entitled to

and no self-respecting veteran wants more. I have talked with them and they have said to me: "GRIFFIN, if you are able to put over that proposition you will be doing the World War veterans a real service. There is no bunk in your proposal, and the veterans know it."

Here is how it will work out, and these figures are from the Veterans' Bureau:

CASE I (MINIMUM)

In the case of a veteran with a minimum face-value certificate of $125 he would receive	$81.50
If he had borrowed 50 percent, under the 1931 law he would receive	52.80

CASE II (AVERAGE)

In the case of a veteran with an average certificate of $1,000 he would receive	648.98
If he had borrowed 50 percent he would get	415.82

CASE III (MAXIMUM)

In the case of a veteran with the maximum certificate of $1,592 he would receive	1,023.00
If he had borrowed 50 percent he would get	645.17

Under my amendment it is proposed to pay these claims either in cash or in United States Treasury certificates drawing 4-percent interest. These certificates would be negotiable and would be equivalent to cash. The transaction would not require the issue of bonds or involve bookkeeping difficulties.

If you really want to help the veterans this is the way to do it and not humbug them with a promise to pay their claims coupled with a complicated scheme for the expansion of the currency. The veterans are not interested in the greenback question. Coupling the bonus payment with that issue is bound to kill the veterans' cause. I shall vote against the bill in its present shape. I shall go back to my constituency with a clear conscience and say I did not vote against the bonus payment but against an outlandish scheme of currency expansion.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York.

The amendment was rejected.

Mr. BLANTON. Mr. Chairman, I am a good friend of the gentleman from New York [Mr. GRIFFIN]. I have deep affection for him. We agreed yesterday not to permit this bill to be amended. That is why I am pushing its passage.

Mr. McKEOWN. Mr. Chairman, I offer the following amendment, which I send to the desk. I have no hope that the amendment will be adopted, but I ask unanimous consent to print it in the RECORD at this point.

Mr. BLANTON. Mr. Chairman, if the Chair will read the proposed amendment of the gentleman from Oklahoma, he will see that it is a separate bill and offers a distinct program in its entirety from the one that is before the House, and is not germane. I make that point of order. It is subject to the point of order. It will take 15 minutes to read it.

Mr. McKEOWN. I do not ask to have it read. I ask unanimous consent that it be printed in the RECORD at this point without reading.

The CHAIRMAN. Is there objection?

Mr. GOSS. Mr. Chairman, I object.

Mr. McKEOWN. Then, Mr. Chairman, I offer the amendment, and send it to the desk and ask to have it read.

The CHAIRMAN. The gentleman from Oklahoma offers an amendment, which the Clerk will read.

The Clerk read as follows:

Amendment offered by Mr. MCKEOWN: Strike out section 1 and insert the following: "That any member bank of the Federal Deposit Insurance Corporation desiring to issue circulating notes may redeem any adjusted-service certificate of a veteran of the World War upon which the Administrator of Veterans' Affairs has loaned by paying to the Administrator of Veterans' Affairs the amount of the loan and accrued interest whereupon the said Administrator of Veterans' Affairs shall assign said certificate to such member bank and said adjusted-service certificate may be deposited with the Treasurer of the United States for circulating note issue purpose, and such certificate shall be vested with all the privileges as registered United States bonds, consols of 1930, or United States registered Panama Canal bonds for circulating note issue.

"SEC. 2. Upon the deposit with the Treasurer of the United States of any such adjusted-service certificate the same shall be received by the Treasurer upon deposit and shall by him be safely kept in his office until otherwise disposed of under the provisions of this act and existing law governing deposit of bonds or consols for circulating-note issue purpose. When any such adjusted certificate is deposited with the Treasurer of the United States for circulating note issue purpose by any member bank of the Federal Deposit Insurance Corporation, such member bank shall be entitled to receive from the Comptroller of the Currency circulating notes in blank registered and countersigned as provided by law in an amount equal to the amount of the adjusted certificate, provided the amount of the certificate added to the amount of outstanding circulating notes of such member bank does not exceed its paid-in capital stock and surplus.

"SEC. 3. The Comptroller of the Currency shall forward to the officers of such member bank circulating notes in the amount of the balance due the soldier on said adjusted certificate, and the proper official of such member bank shall register and countersign, as provided by law, and deliver the circulating notes to soldier holder upon his executing and delivering to said member bank an assignment of all his interest in and to said adjusted certificate. Upon the receipt by the Treasurer of the United States of such assignment the Comptroller of the Currency shall deliver the balance of the circulating notes to such member bank. The Administrator of Veterans' Affairs shall deposit in the general fund in the Treasury for redemption purposes 5 percent of the circulating notes, said redemption fund to be kept, used, and disbursed as provided by law for redemption funds under existing laws.

SEC. 4. That upon the application of any member bank to redeem any adjusted-service certificates the Administrator of Veterans' Affairs shall furnish adjusted-service certificates whose holders reside in the vicinity of the principal place for doing business by said association or bank, or branch banks or corresponding banks if so requested. Any soldier holder of an adjusted-service certificate desiring to receive the face value of his certificate due in 1945, less the amount of the present loan and the accrued interest, may make application to any member bank that will receive his application and the Administrator of Veterans' Affairs shall permit any such member bank to redeem the certificate designated in such application.

SEC. 5. The Administrator of Veterans' Affairs shall pay all sums received by him to redeem adjusted-service certificates into the Treasury of the United States to the credit of the adjusted-service-certificate fund. There is authorized to be appropriated for each calendar year ending with the year 1946 an amount sufficient as annual premium to provide for the face value of each certificate in 20 years from its date (as provided in U.S.C., title 38, sec. 645; act of May 19, 1924, ch. 157, secs. 505, 703, 43 Stat. 128, 131).

SEC. 6. That the laws governing the obtaining and the issuing of circulating notes, redemption and replacement of circulating notes, and proceedings of failure of banks to redeem circulating notes shall be effective as to note issues under this act.

SEC. 7. That the circulating notes issued in accordance with this act shall not be subject to the provisions of sections 541, 542, 543, 544, 545, 546, 547, 561, 562, 563, 564, 565, and 567 of title 12, Code of Laws of the United States, and all laws in conflict with this act shall be declared inapplicable to the same.

Mr. BLANTON. Mr. Chairman, I make the point of order that the amendment is not germane.

The CHAIRMAN. The Chair sustains the point of order.

Mr. AYRES of Kansas. Mr. Chairman, I offer the following amendment which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment offered by Mr. AYRES of Kansas: Strike out all of section 1 and insert in lieu thereof the following: "That title V of the World War Adjusted Compensation Act, as amended is amended by adding at the end thereof two new sections to read as follows:

"'PAYMENT OF PRESENT VALUE OF CERTIFICATES

"'SEC. 509. The Administrator of Veterans' Affairs is authorized and directed to pay to any veteran to whom an adjusted-service certificate has been issued, upon application by him and surrender of the certificate and all rights thereunder, the amount of the net single premium determined as of the last anniversary of the certificate necessary to purchase a paid-up endowment insurance for the face amount of the certificate at the then attained age of the certificate holder for the unexpired portion of the original 20-year period, on the basis of the American Experience Table of Mortality and interest at 4 percent per annum, compounded annually: *Provided*, That no payment shall be made under this section until the certificate is in the possession of the Veterans' Administration, or until all obligations for which the certificate was held for security have been paid or otherwise discharged: *Provided further*, That up on payment under this section the certificate and all rights thereunder shall be canceled.

"'SEC. 510. There is authorized to be appropriated such amounts as may be necessary to carry out the provisions of section 509. Amounts now or hereafter in the adjusted-service-certificate fund created by section 505 of the World War Adjusted Compensation Act, as amended, are authorized to be made available for the payment of the net single premiums as provided in section 509 of the amendatory act.'"

Mr. BLANTON. Mr. Chairman, I make the point of order that the amendment is not germane. This is an entirely different proposition, it is one of insurance, not at all

similar to the bill that is before the House. It is an attempt to bring in here something which the committee has not brought in at all and is an entirely different proposition. It is on a subject entirely different from that under consideration.

Mr. AYRES of Kansas. Mr. Chairman, that is about the slimmest excuse I have ever heard why a point of order should be sustained, and I do not think the gentleman from Texas is sincere in it at all. This is clearly germane to the bill, and it is not subject to the point of order.

Mr. BLANTON. Mr. Chairman, I again respectfully submit that the amendment is on a subject entirely different from that under consideration, and is not germane to this bill, and I make the point of order against it.

The CHAIRMAN. The amendment discloses that it is on a subject different from that under consideration and, therefore, is subject to the point of order. The Chair sustains the point of order.

Mr. ELLENBOGEN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ELLENBOGEN: Page 2, lines 18 and 19, after the word "principal", strike out the words "and so much of such interest, if any, as accrued prior to October 1, 1931", and insert in lieu thereof, "*Provided*, That any such interest which has accrued on any loan made by any veteran on his adjusted-service certificate under section 502 of the World War Adjusted Compensation Act, as amended, shall be canceled and annulled, and shall not be deducted from the face value of the certificate when paid under this act."

Mr. WOLCOTT. Mr. Chairman, I offer a substitute amendment for the amendment just offered by the gentleman from Pennsylvania.

The Clerk read as follows:

Substitute offered by Mr. WOLCOTT for the amendment offered by Mr. ELLENBOGEN: Page 2, line 10, after the word "principal", strike out the words "and interest on or", and in line 14, after the word principal", strike out the balance of line 14 and all of line 15; and in line 18, after the word "principal", strike out the balance of the line and all of line 19.

The CHAIRMAN. The question is on the substitute offered by the gentleman from Michigan [Mr. WOLCOTT] for the amendment offered by the gentleman from Pennsylvania Mr. [ELLENBOGEN].

The question was taken; and on a division (demanded by Mr. WOLCOTT) there were ayes 28 and noes 112.

So the substitute amendment was rejected.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. ELLENBOGEN].

The amendment was rejected.

Mr. MARTIN of Colorado. Mr. Chairman, I offer an amendment, which I have sent to the desk.

The Clerk read as follows:

Amendment offered by Mr. MARTIN of Colorado: After line 3, on page 4, add the following: "(g) No payment shall be made under this act prior to maturity while the income of a person, if unmarried, exceeds $1,000 per annum, computed monthly, or, if married, or with minor children, exceeds $2,500 per annum, computed monthly."

The CHAIRMAN. The question is on the amendment offered by the gentleman from Colorado [Mr. MARTIN].

The question was taken; and on a division (demanded by Mr. MARTIN of Colorado) there were ayes 40 and noes 111.

So the amendment was rejected.

Mr. COLLINS of Mississippi. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. COLLINS of Mississippi: Page 4, line 15, add a new section, as follows:

"SEC. 512. If at the time this section takes effect, a veteran entitled to receive an adjusted-service certificate is unable to produce same, through loss from any cause, the Administrator of Veterans' Affairs, under proper regulations, is authorized and directed to issue a duplicate thereof to such veteran or his beneficiary."

The amendment was rejected.

The Clerk read as follows:

SEC. 2. (a) Payment of the face value of adjusted-service certificates under section 509 or 510 of the World War Adjusted Compensation Act, as amended, shall be made in United States notes not bearing interest. The Secretary of the Treasury is hereby authorized and directed to issue such notes in such amount as may be required to make such payment, and of the same wording, form, size, and denominations as United States notes issued under existing law, except that the wording thereon shall conform to the provisions of this act. The Administrator of Veterans' Affairs and the Secretary of the Treasury are hereby authorized and directed jointly to prescribe rules and regulations for the delivery of such notes in payment under section 509 or 510 of the World War Adjusted Compensation Act, as amended.

(b) United States notes issued pursuant to the provisions of this act shall be lawful money of the United States and shall be maintained at a parity of value with the standard unit of value fixed by law. Such notes shall be legal tender in payment of all debts and dues, public and private, and shall be receivable for customs, taxes, and all public dues, and when so received shall be reissued. Such notes, when held by any national banking association or Federal Reserve bank, may be counted as a part of its lawful reserve. The provisions of sections 1 and 2 of the act of March 14, 1900, as amended (U.S.C., title 31, secs. 314 and 408), and section 26 of the Federal Reserve Act, as amended (U.S.C., title 31, sec. 409), are hereby made applicable to such notes in the same manner and to the same extent as such provisions apply to United States notes.

Mr. McFADDEN. Mr. Chairman, I offer an amendment.

Mr. TABER. Mr. Chairman, I make a point of order against the section.

The CHAIRMAN. The gentleman will state his point of order.

Mr. TABER. The section is a violation of that provision of the rules which prohibits appropriations being brought in from any other committee except the Committee on Appropriations. This section provides, in effect, for the direct payment of these certificates without an appropriation.

The CHAIRMAN. Does the gentleman from Texas [Mr. PATMAN] desire to be heard?

Mr. PATMAN. Mr. Chairman, this bill has been as carefully drawn as one could be. It has been drawn by the legislative drafting service, after consulting with the Members of this House who are in sympathy with the legislation, representatives of the Treasury Department, and the Veterans' Administration, and I do not believe the gentleman's point of order is well taken. This bill does not come before the House under normal and regular procedure; consideration was forced.

Mr. Chairman, I move that the debate on this amendment——

Mr. FISH. Mr. Chairman, a parliamentary inquiry.

Mr. PATMAN. I move that the debate on this amendment and this section and all amendments thereto do now close.

The CHAIRMAN. That motion is not in order at this time.

Mr. FISH. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. FISH. As I understand, the gentleman from New York [Mr. TABER] has the floor.

The CHAIRMAN. He has.

Mr. FISH. And he therefore still has the floor; is that correct?

The CHAIRMAN. The Chair understood the gentleman from New York to yield the floor after he had made his point of order. If the gentleman desires to discuss his point of order further, the Chair will hear him.

Mr. TABER. Mr. Chairman, this section provides out and out for the payment of these adjusted-service certificates without any appropriation. A bill is not in order which makes provision for such payment unless it comes from the Committee on Appropriations to the floor of this House. It seems to me there is absolutely no question but that it violates the rule.

The CHAIRMAN. Does the gentleman from Texas desire to be heard on the point of order?

Mr. PATMAN. Mr. Chairman, this is not an appropriation; this is a direct payment to veterans of their adjusted-service certificates. It requires no appropriation, and there

is no reason why any language in regard to an appropriation should be inserted in this bill. The gentleman's point of order is not well taken.

Mr. BLANTON. Mr. Chairman, I desire to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. BLANTON. Mr. Chairman, this bill is being considered under different rules than those governing ordinary bills reaching the floor. It is being considered under a special discharge rule, which is the greatest privilege this House has accorded itself and its Membership. The discharge rule provides that any measure—I do not care what kind of a measure it be—any measure that is pending before a committee may be taken from the committee and the committee discharged from its consideration, when 145 Members sign a petition to take it away from the committee and a majority of the Members here vote for its consideration, which has been done by this House. Let it be an appropriation bill, for instance; the rule provides that 145 Members, by signing a petition to discharge, can discharge even that committee and bring the bill up on the floor of the House, when the majority of the House votes to take it up for consideration; and we have done all those things, and the House has brought this bill here for consideration. No committee has reported it.

In my opinion the point of order of the gentleman from New York is not well taken, and same should be overruled by the Chair.

Mr. TABER. If the Chair will permit, I desire to make a brief observation in reply. When a bill is brought up in the House under the discharge rule it goes onto the calendar and must be considered under the rules of the House. The rules of the House provide that no appropriation shall be in order in any bill unless it shall have come from the Appropriations Committee, and this bill did not.

Mr. BLANTON. Why, we have certain bills from the Ways and Means Committee and the Claims Committee and various other committees that carry appropriations. It all depends upon the bill and the situation and the particular rule we are operating under. The House has made this in order.

Mr. KVALE. Does not the gentleman understand that this is not an appropriation bill?

The CHAIRMAN. The Chair would like to inquire of the gentleman from Texas [Mr. PATMAN], who is in charge of this bill, if this is a payment of lawful money of the United States.

Mr. PATMAN. It is a payment of lawful money of the United States.

The CHAIRMAN. Then what has the gentleman to say as to the contention that no committee of the House except the Committee on Appropriations is authorized to report it?

Mr. PATMAN. Various committees bring in bills to appropriate money. A special order has been provided for this bill, for 145 Members signed the petition.

Mr. BLANTON. Mr. Chairman, I wish to be heard further on the point of order. This is not to take money out of the Treasury. This is not to appropriate money from the general fund. This is to provide a special kind of bank note not coming out of the Treasury. Not one dollar will come out of the Treasury; not one dollar will come out of the general fund. The bill provides a special kind of bank note for the payment of these certificates.

This will not require a single bond to be issued. It will not require any interest whatever to be paid by the Government. It will not require any taxes to be levied or collected.

This is not a bill that has been reported by a committee. It comes from no committee of this House. The House itself brought this bill before it, under a special discharge rule, which is different from any other rule regarding consideration of bills. The discharge rule provides special consideration, regardless of all committees. If this bill had been reported by some committee, other than the Committee on Appropriations, the point of order might merit serious consideration. But that rule in no way applies to the situation now before the House.

Surely, this House is its own master. By a two-thirds vote it can set aside any rule. It specially provided this particular method for considering legislation which its committees refused to report favorably. Every step has been tracked to make this bill now in order. It is in order. We do have the right to consider and pass it. I submit that the point of order is not well taken, and should be overruled.

Mr. PATMAN. Mr. Chairman, it is true that this is a payment of money; but it is not a payment of money out of the Treasury of the United States. We are not taking one dollar from the Treasury of the United States. It cannot, therefore, be construed as an appropriation, although it is a payment of lawful money; and, besides, the Ways and Means Committee have been given jurisdiction over adjusted-service-certificate legislation and this bill was referred to the Ways and Means Committee.

Mr. SHOEMAKER. Mr. Chairman, I desire to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman.

Mr. SHOEMAKER. As I understand it, the appropriations to take care of this matter have already been made in the original adjusted-service certificate bill. This bill uses only money that has been appropriated to this specific purpose in a bill which was passed upon by the Appropriations Committee and by the Ways and Means Committee, the original adjusted-service certificate bill.

Mr. TABER. Mr. Chairman, I desire to draw the Chair's attention to the following language on page 4 of the bill, line 20:

> The Secretary of the Treasury is authorized and directed to issue notes.

Now, where can this money come from except the Treasury of the United States? That is the only place from which it can come.

Mr. SABATH. Mr. Chairman, I desire to be heard on the point of order.

The CHAIRMAN. The Chair will hear the gentleman from Illinois.

Mr. SABATH. Mr. Chairman, the House by a vote of nearly 3 to 1 took the bill away from the Committee on Ways and Means and placed it in the hands of the Committee of the Whole House on the state of the Union by the discharge rule. Consequently that proposition would not apply because the House has assumed jurisdiction notwithstanding the fact that the Ways and Means Committee had jurisdiction and would have jurisdiction if it had not been discharged from further consideration of the bill by the resolution which was adopted.

The CHAIRMAN. The Chair is ready to rule.

The section of the rule to which the gentleman from New York refers, and on which he relies to support his point of order, provides as follows:

> No bill or joint resolution carrying appropriations shall be reported by any committee not having jurisdiction to report appropriations.

Now, this bill has not been reported by the Committee on Ways and Means, as the gentleman from New York suggests. It has not been reported by any committee. The committee having jurisdiction has been discharged from its further consideration and it has been brought before the House under the provisions of the discharge rule specifically authorizing its consideration. The question as to whether it carries an appropriation or does not carry an appropriation is wholly immaterial. The rule cited by the gentleman from New York does not apply, and the point of order is overruled. [General applause.]

Mr. McFADDEN. Mr. Chairman, I offer an amendment, which I send to the desk.

The Clerk read as follows:

> Amendment offered by Mr. McFADDEN: On page 4, line 15, after the word "residence", strike out section 2 and all remaining sections.

Mr. McFADDEN. Mr. Chairman, I have offered this amendment to strike out the remaining sections, including

section 2 of this bill, for the purpose of eliminating from this bill the provision providing for the issuance of Treasury notes in payment of this bonus and leaving the matter entirely in the hands of the Secretary of the Treasury to pay this bonus by whatever instrumentality the Secretary of the Treasury sees fit.

These adjusted-compensation certificates are Government bonds. I propose that the Secretary of the Treasury shall treat these the same as all refunding operations are carried on, if, in his judgment he sees fit to do so. There is a great uncertainty here as to what an issuance of greenbacks will do.

I am in favor of settling the payment of the adjusted-compensation certificates now. I was not in favor of the unfair plan that was worked out a few years ago—I think in 1925—when this plan of settlement was made, nor was I in favor of the ill-advised proposition of loaning the ex-soldiers in an emergency part of their money, because the unfair part of that is indicated by the fact that if the loan runs until 1945 the interest will eat up the balance. I am decidedly in favor of paying the soldiers now, and I should like to have the gentlemen who are proposing to stand by the President of the United States give careful consideration to this amendment, because, if you do not, much uncertainty in the financial structure of the Government will prevail.

Mr. PATMAN. Mr. Chairman, I rise in opposition to the amendment.

This provides for payment in United States notes, and in section 408, title 31 of the United States Code, it is provided that all the gold in the Treasury is behind all notes that are issued, including those we propose to issue here. The gentleman proposes to change our method of payment and use Treasury notes instead. I do not think such an amendment should be adopted. I think it should be defeated.

Mr. FISH. Will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from New York.

Mr. FISH. May I ask the gentleman this question in all fairness so we will know where we are. The gentleman from Texas asked me before the debate began this afternoon if we on this side were going to filibuster, and speaking for as many as I could, I said that we were not. In all fairness, most of these amendments have come from his side of the House. There has been no attempt or indication that we on our side of the House would filibuster. We would be glad to get through with this bill tonight if there is that possibility.

There is another section coming up, I may say to the gentleman from Texas, which changes many of the regulations and provisions in reference to the Treasury of the United States that has not even been discussed. I know that the gentleman from Massachusetts [Mr. LUCE] desires to be heard, and I am sure other Members of Congress want to know just what section 3 deals with. May I further say to the gentleman that we should like to finish tonight. If the gentleman thinks we can finish in an hour, I am sure we should be glad to help him finish, because the country wants the Democratic caucus to act and expedite the consideration of the restoration of all the compensation for the veterans with service-connected disabilities and the restoration in full of the pay of the Federal employees.

Mr. BLANTON. We will forgive the gentleman, if he does not take up any more time. There has been some filibusters on his side of the aisle, reading long amendments, and making futile discussions, accomplishing nothing.

Mr. FISH. I trust the gentleman will permit ample time for a proper consideration of the next section?

Mr. PATMAN. Mr. Chairman, I move all debate on this section and all amendments thereto do now close.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania [Mr. MCFADDEN].

The amendment was rejected.

Mr. KENNEY. Mr. Chairman, I offer an amendment which I send to the desk.

The Clerk read as follows:

Amendment offered by Mr. KENNEY: In line 19 on page 4, strike out the words "not bearing interest." In line 24, beginning with the word "except" strike out the remainder of the paragraph, strike out all of subsection (b) and insert in lieu thereof the following:

"(b) For the purpose of providing revenue to retire said notes and for other public purposes authorized by law, the Administrator of Veterans' Affairs is hereby authorized and directed to conduct a lottery or lotteries to raise funds not exceeding $1,000,000,000 in any one year, which shall be covered into the Treasury of the United States from time to time as miscellaneous receipt."

"(c) The Administrator of Veterans' Affairs, subject to the approval of the Secretary of the Treasury, is hereby authorized to prepare and issue rules and regulations under which said lottery or lotteries shall be conducted and managed; and the said Administrator shall have the power and authority to appoint, employ, and fix the compensation of such officers, employees, attorneys, and agents as may be necessary to carry out the purposes of this act: *Provided*, however, That no salary or compensation in excess of the sum of $8,000 per annum shall be paid to any person employed under the provisions of this section.

"(d) The Postmaster General is hereby authorized, upon request of the Administrator of Veterans' Affairs, to make available to him the services and facilities of the Post Office Department and of the Postal Service to aid in administering the provisions of this act. The employees of the Post Office Department and of the Postal Service shall perform all services under this act without compensation.

"(e) All funds received by the Administrator of Veterans' Affairs and all accounts, vouchers, and records in connection with such lottery or lotteries shall be subject to audit by the Comptroller General.

"(f) If any person, partnership, association, or corporation shall forge or counterfeit any ticket or tickets to be made for the purposes of said lottery or lotteries under the provisions of this act or alter any of the numbers thereof or offer for sale or sell any forged or counterfeited ticket or tickets or any ticket or tickets whereof the number is altered, knowing them to be such, or bring the same to any of the persons engaged in administering this act with intent to defraud the United States of America or any adventurer in the said lottery or lotteries, every such person, partnership, association, or corporation shall, upon conviction thereof, be fined not more than $10,000 or imprisoned not more than 5 years, or both.

"(g) Section 213 of the Criminal Code (U.S.C., title 18, sec. 336) is hereby amended by adding at the end thereof the following paragraph:

"'Nothing in this section or in any other act of Congress shall be construed to prohibit the use of the mails in any manner for the purpose of carrying into effect any lottery or lotteries authorized by any act of Congress.'

"(h) All acts or parts of acts inconsistent with the provisions of this act are hereby repealed.

"(i) If any part of this act shall for any reason be adjudged by any court of competent jurisdiction to be invalid as to any person, locality, or circumstance, such judgment shall not affect, impair, or invalidate the remainder of this act or the application of any part thereof to other persons, localities, or circumstances.

"(j) The right to amend, alter, or repeal this act is hereby expressly reserved."

Mr. BLANTON. Mr. Chairman, I make the point of order that this amendment proposes an entire change of this measure, and is not germane. This amendment proposes a lottery, and changes the real purpose of this bill. I make the point of order that it is not germane.

The CHAIRMAN. Does the gentleman from New Jersey desire to be heard on the point of order?

Mr. KENNEY. Mr. Chairman, my amendment, which has been sent to the desk, provides for the striking out of certain language in section 2. It adds no new method of payment, and there is nothing in the amendment that substitutes a change of provisions of the section. The amendment, in the first instance, simply strikes out certain language of the bill; and I submit that so far as that is concerned, the amendment is germane.

Now, in addition, this amendment is merely supplemental. It does not change or alter the manner of payment. It merely provides a way to raise the necessary money to retire the notes to be issued under the bill to pay the bonus to the veterans. The provision that the money be raised by lottery to retire the notes does not set up a new method of payment. It simply authorizes the raising of money by lottery to pay off or redeem the notes. It simply goes to a readily available source of money; it is only awaiting approval to flow into the coffers of the Treasury. There is

sufficient to be had by this means not only to pay the bonus, but there will be enough to provide adequate benefits for veterans and their dependents. The author of this bill stated in the course of the debate that he wanted "to give it all" to the veterans. Well, let us give it all to them by raising money in present use rather than rely upon an unknown quantity. The President has said he will veto this bill. Let us present one that he may not veto. "During the past 2 years no less than a billion dollars have been kept from going out of this country in support of foreign lotteries." That was the startling statement made August 23, 1932, by Horace J. Donnelly, Solicitor of the Post Office Department. Did this much again actually go out of the country? The figures ought to convince us that the country will respond to a man to contribute in this way to the cause of the veterans. The veterans will be provided for. The taxpayers will be relieved. Confidence and contentment will result.

Mr. BLANTON. Mr. Chairman, I make the point of order that the gentleman is not discussing the point of order, but clearly is discussing the merits of his proposed amendment.

Mr. KENNEY. I am dwelling on the point of order. The amendment does not change the method of payment. It merely calls for the raising of money now in use to retire the notes which the section provides shall be employed to pay the adjusted-service certificates. I submit that it is germane.

Mr. O'CONNOR. Mr. Chairman, I rise to be heard on the point of order. I respectfully submit that the portion of the gentleman's amendment which merely seeks to strike out words in the bill cannot be held out of order. At the most it can be held that certain portions of the amendment might be out of order as not germane.

Mr. BLANTON. The whole amendment, Mr. Chairman, is to be construed together. It proposes an entirely different plan than that submitted in this bill by the committee. Certainly, it is not germane. It has an entirely different complexion. It is another proposition entirely. By no stretch of the imagination could it be considered germane to this bill. I ask that the Chair, under the rules and precedents, sustain the point of order I have made against this amendment.

The CHAIRMAN. The Chair is ready to rule. The amendment proposes a method different from that incorporated in the bill, and the Chair sustains the point of order. The Clerk will read.

The Clerk read as follows:

SEC. 3. (a) Whenever the index number of the wholesale all-commodity prices rise above the index number of such prices for the years 1921 to 1929, as computed by the Bureau of Labor Statistics of the Department of Labor, notwithstanding any provisions of law to the contrary, the following methods for contracting the issues of currency in the United States shall be in force and effect, in the manner and to the extent prescribed in subsection (b) of this section:

(1) Abolishment of the circulation privilege extended to certain bonds of the United States under the provisions of section 29 of the Federal Home Loan Bank Act, and retirement of such bonds as security for circulating notes as rapidly as practicable.

(2) Termination of the issuance and reissuance of national-bank circulating notes, and the retirement of such notes from circulation as rapidly as practicable.

(3) Termination of the issuance and reissuance of Federal Reserve notes secured by direct obligations of the United States.

(4) Termination of the issuance and reissuance of Federal Reserve notes secured only by gold or gold certificates.

(5) Termination of the issuance and reissuance of Federal Reserve notes secured by notes, drafts, bills of exchange, acceptances, or bankers' acceptances which are not issued in direct benefit of commerce, industry, or agriculture.

(b) Any such method of contracting currency issues shall be applicable when the Secretary of the Treasury finds that its application is necessary in order to maintain the index number of wholesale all-commodity prices at the approximate level of the index number of such prices for the years 1921 to 1929 and issues an order setting forth such finding. Each such order shall prescribe such rules and regulation as are necessary and appropriate to carry out the provisions of this section with respect to the method of contraction made applicable in the order. The Secretary shall make such methods applicable only in the order in which they are set forth in subsection (a) of this section, but he shall make such methods applicable as rapidly as may be necessary to carry out the purposes of this section. When any such order is issued with respect to Federal Reserve notes, the Federal Reserve Board shall take such action as may be necessary to facilitate the enforcement of the order.

Mr. LUCE. I move to strike out the section. Mr. Chairman, this section brings before the House a revolution in the financial processes of this Government. Here is introduced a question that has been under consideration by one of your committees, that of the Committee on Banking and Currency, for years. It has reached the point this year where at the present moment a subcommittee of that committee is listening to men of high authority to get advice as to whether the particular thing here contemplated is wise or not.

The enactment of this measure will reverse much action that this House has taken in the last 12 months, part of it within a few days. It will upset the program of the Treasury for financing current expenditures and servicing the debt. Gentlemen have given the country to understand that this is a measure to relieve the veterans; but here comes the wolf in sheep's clothing with a question vastly more important to the welfare of the country, a measure that threatens the safety of its business and enterprise, a measure that upsets entirely the program of the administration.

From my long experience here I well know the temper, in such a juncture, of a large and impatient majority that at this excited moment is determined to pass the bill without considering so much as the elimination of a comma or a period. No protest will avail, yet I would warn you of the majority that you are marching the road to your own party destruction; that by disclosing the probability of inflation through the use of printing-press money you are threatening the country with the greatest financial panic ever known.

Whom the gods would destroy they first make mad.

There never was a greater exhibition of insanity in this body than is now about to be perpetrated by those who are pretending to legislate for the soldier, but are devoting nine tenths of the scanty time to a money program that means inflation. [Applause.]

Mr. HOEPPEL. Mr. Chairman, will the gentleman yield?

Mr. LUCE. You will realize, as you come to the days when this subject will be discussed from one end of the land to the other, what you tried to do in the face of the wishes of your President, in the face of your Democratic platform promising a sound currency, in the face of the pledges you gave the people and in part on the strength of which you secure the control of the Government.

Mr. HOEPPEL. Mr. Chairman, will the gentleman yield?

Mr. LUCE. Mr. Chairman, my friend from California [Mr. HOEPPEL] each time I take the floor attempts to spoil whatever strength there may be in my remarks by interrupting them with a request that I yield to him. I respectfully decline to have the gentleman accomplish his purpose.

Mr. PETTENGILL. Mr. Chairman, can we not have the Sergeant at Arms maintain order in this House?

The CHAIRMAN. The gentleman declines to yield, and the committee will be in order.

Mr. LUCE. Mr. Chairman, one of the great scourges of mankind has been printing-press money. Again and again it has worked disaster. History teems with instances of the destruction it has wrought, and here, without a moment's adequate consideration, without even knowing what you are doing, you seek to provide for just such a thing. There is not a man here who can confidently explain a single paragraph of this bill in point of probable results—not a man here in favor of the bill who really knows for what he is voting. Many a man is doing it blindly, without information, study, or reflection, lured on by the wish to accomplish an ulterior purpose on the false pretense of doing something for the veterans of the United States—violating all orderly course of parliamentary procedure, depriving such committees as those on Banking and Currency, and on Coinage, Weights, and Measures of the opportunity to advise the House, rejecting the value of all studies that have been given to the question, refusing to weigh the opinions of the

experts, declining to listen to argument, stifling debate, but going ahead in mad rush to commit political suicide. [Applause.]

MILLS-MELLON-INSULL SCHOOL OF THOUGHT

Mr. PATMAN. Mr. Chairman, during the last 4 years preceding this administration, the school of thought represented by the gentleman from Massachusetts [Mr. LUCE], who has just addressed the House, was well represented. Mr. Hoover took the advice of men such as our distinguished friend, and the Mills-Mellon-Insull school of thought was adopted and used. The country did not prosper by reason of what these gentlemen persuaded the Congress to do and the President to approve. We want to change that. We believe that if a veteran has a certificate that is due in 1945, or rather, payable then, though due now, he is just as much entitled to use the credit of this Nation as the large bankers are. The National City Bank can get $124,000,000 in return for Government bonds, the Chase National Bank can get $148,000,000 in return for Government bonds, and at the same time get interest on the bonds. The gentleman who has just addressed the House has helped to write such legislation as that into our statute books. In other words, if the bankers get a bonus it is perfectly all right, he does not object to that, it is sound money, not fiat money nor printing-press money nor rag money. It is perfectly all right if you are giving it to the big bankers, but if you attempt to give the veterans the same rights and privileges under the same conditions to use the credit of this Nation, the gentleman says that it is all wrong, that it will destroy our country, that it is printing-press money. I hope the amendment is defeated.

Mr. Chairman, I move that all debate upon this section and all amendments thereto do now close.

The motion was agreed to.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Massachusetts to strike out the section.

The question was taken; and on a division (demanded by Mr. LUCE) there were—ayes 91, noes 131.

So the amendment was rejected.

The Clerk read as follows:

SEC. 5. This act may be cited as the "Controlled Expansion Act, 1933."

Mr. GIFFORD. Mr. Chairman, I move to strike out the last word. I called attention in the early part of the afternoon to the financial sections of this bill. It is not only strange that it is advocated the way it is, but it is passing strange that so few Members seem to have read the bill, as far as those sections are concerned. Let us consider the last speech made by the gentleman from Texas [Mr. PATMAN]. We now more fully understand that this is the more important part of the bill, so far as he is concerned. We have in mind the many speeches that he has made in the past in criticism of the circulating privilege of the national banks and the issuance of money to the Federal Reserve banks on the securities of the Government. He has made many, many speeches against these so-called "privileges." I think it is wise to call attention to these most important sections of the bill. It states that when commodity prices reach a certain point, issues of currency shall be contracted in the five ways enumerated in the bill. It uses the words "abolish" and "terminate"—that is, to do away entirely—and new legislation would have to be adopted to return to those methods of obtaining currency. A week ago Saturday we heard on the floor of this House statements made by the leaders telling us that we must pass that bill in order to refinance the obligations of the Government necessary in the very near future.

These same gentlemen had to change their votes, after speaking against it, because of that necessity. Now they will "abolish", and "terminate", and could not return to those most necessary methods of financing or refinancing of Government indebtedness or expenses. Now they say "print money without interest." When we issue notes with even very little interest, our people would demand that we retire that kind of obligation. When would they demand that we retire actual money issued without interest? That is the great difference between printed money and money issued even with the slight payment of interest. Therefore, I repeat, it is perfectly plain now that this great financial measure, changing the whole financial system, must appear to be more important to the gentleman from Texas than the one matter of payment of the bonus. Many of us on this side, and I presume it is so on the other side, have stated they thought this was simply soldiers' bonus measure. However, the gentleman from Massachusetts [Mr. LUCE] has made it very plain that this is indeed a most revolutionary measure. Again let us carefully read page 6 of the bill. "Abolish, terminate"; consider the importance of such strong terms! It does not reduce or even limit, but destroys. I must congratulate the gentleman from Texas [Mr. PATMAN] on bringing about in this bill this revolutionary financial situation and the incorporation of his cherished notions of finance, under the guise of a "bonus" measure.

[Here the gavel fell.]

BANKERS' BONUS

Mr. PATMAN. Mr. Chairman, I rise in opposition to the pro forma amendment.

Any legislation for veterans is always revolutionary to the gentleman from Massachusetts [Mr. GIFFORD]; but if it is for the big bankers, if it is to give the bankers a bonus, I think his record will disclose that he is ever faithful always to the bankers, and to vote for their bonus. [Applause.] The big bankers have been running the country. The small banks have been helpless. Banks are very necessary institutions, but we must not allow them to run or ruin the country.

The gentleman said that very few people had read this bill. The gentleman probably does not know that we met in caucus yesterday, more than 100 Members of this House, and we went over this bill. We read every word of it, and we discussed every paragraph of it. We not only know all about it, but we have known all about it for years. We did not consult the gentleman from Massachusetts, because we know he is for the big bankers, and he wants to keep them their privilege, their subsidy, and their bonus, and he does not want to do anything that will deprive them of it.

Let me tell you something about this great privilege that the gentleman says we are taking away from the bankers. We are issuing this money upon the credit of this Nation. The bankers have used that same credit for 60 or 70 years, but it is a great crime, says the gentleman, for veterans to use it for only a few years. If there is too much money at any time, we have the brakes put on. We have controlled deflation if necessary. This bill is not an inflationary bill. It is a controlled-expansion bill. If there should be too much money at any time, what great crime will be committed? This great crime will be committed: If any money is to be taken out of circulation, the National City Bank and the Chase National Bank and the other big banks of the country will have to bring their money back to the Treasury and get their bonds, and that money will be taken out of circulation and deprive them of their bonus. That is evidently the reason the gentleman objects to it.

STEERING COMMITTEE

The Members of the House interested in this bill H.R. 1 had a meeting about 10 days ago and authorized me, as chairman, to appoint a steering committee to assist in the passage of this legislation. This committee has met regularly and worked very hard. I am indebted to them for their valuable assistance. I do not believe any committee of this House has performed more efficiently and effectively than this committee has. Their names are as follows: LUNDEEN, of Minnesota, secretary; VINSON, of Kentucky; MCCLINTIC, of Oklahoma; HANCOCK, of North Carolina; JEFFERS, of Alabama; BOILEAU, of Wisconsin; CONNERY, of Massachusetts; COLMER, of Mississippi; BROWNING, of Tennessee; SINCLAIR, of North Dakota; KVALE, of Minnesota; WEIDEMAN, of Michigan; SCRUGHAM, of Nevada; WOLCOTT, of Michigan.

Mr. Chairman, I move that all debate on this section and all amendments thereto do now close.

The motion was agreed to.

Mr. PATMAN. Mr. Chairman, I move that the committee do now rise and report the bill back to the House with the recommendation that the bill do pass.

Mr. KVALE. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. KVALE. Is there not one more section to be read?

The CHAIRMAN. The Clerk has concluded the reading of the bill.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. CANNON of Missouri, Chairman of the Committee of the Whole House on the state of the Union, reported that that Committee having had under consideration the bill H.R. 1, providing for payment of veterans' adjusted-service certificates, had directed him to report the same back to the House without amendment with the recommendation that the bill do pass.

Mr. PATMAN. Mr. Speaker, I move the previous question on the bill to final passage.

The previous question was ordered.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

Mr. FISH. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. FISH. Yes; I am opposed to the bill, somewhat.

Mr. CONNERY. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CONNERY. The gentleman from New York replied that he was opposed to the bill somewhat. Is that sufficient?

The SPEAKER. In the opinion of the Chair it is.

The Clerk read as follows:

Mr. FISH moves to recommit the bill to the Committee on Ways and Means with instructions to strike out section 3 and report the same back forthwith.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and on a division (demanded by Mr. FISH) there were—ayes 41, noes 160.

So the motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

Mr. FISH. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The Clerk called the roll; and there were—yeas 295, nays 125, not voting 11, as follows:

[Roll No. 102]

NOT VOTING—11

Bacharach	Deen	Norton	Wadsworth
Carley, N.Y.	Dingell	Pou	Williams
Crowther	Moynihan, Ill.	Reid, Ill.	

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Moynihan of Illinois (for) with Mr. Wadsworth (against).
Mr. Pou (for) with Mr. Bacharach (against).

Until further notice:

Mrs. Norton with Mr. Crowther.
Mr. Deen with Mr. Reid of Illinois.
Mr. Williams with Mr. Dingell.

Mr. CULLEN. Mr. Speaker, my colleague the gentleman from New York, Mr. CARLEY, is absent on account of illness. If he were here, he would vote "yea."

Mr. BULWINKLE. Mr. Speaker, the gentleman from North Carolina, Mr. POU, is unable to be present. If he were here, he would vote "yea."

The result of the vote was announced as above recorded.

On motion of Mr. PATMAN, a motion to reconsider the vote by which the bill was passed was laid on the table.

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that all Members have 5 legislative days in which to extend their own remarks on the bill. We asked it on the discharge petition but not on the bill.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

EXTENSION OF REMARKS—H.R. 1—SOLDIER'S BONUS

Mr. LEHR. Mr. Speaker, I shall support H.R. 1 for four reasons which to me appear controlling.

First. This bill if enacted into law will provide a valid, legal, safe, and absolutely controlled expansion of the currency, which is something that most of us on the majority side have been wishing for ever since we have been in Congress.

Second. It will furnish direct and immediate relief to those who are most in need of and deserving of such help, and will distribute it equitably into every part of the country.

Third. It will save the Federal Government within the next 11 years many hundreds of millions of dollars.

Fourth. It will end all controversy in connection with the matter of the payment of adjusted-service certificates, and once and for all time remove this question from the political arena.

Before considering these reasons, I desire to state that during the campaign of 1932, when this matter was urged strongly before the people, I took the position publicly and in a signed statement, that I was not in favor of the immediate payment in cash of the adjusted-compensation certificates of the veterans if the doing of that would result in increasing in any manner the burden of taxation which already was oppressing the people of this country, but that on the other hand I did favor the payment in cash of these certificates to the holders thereof just as soon as the Government was in a position to pay them without adding to the tax burden and later on, in the course of the campaign, Governor Roosevelt, then our candidate for the Presidency, took a similar position. I felt that there were two sides to this question.

In the first place, there were the veterans who had by an official enactment of the Congress been promised this money, not as a bonus as a great many people erroneously call this law, but for the purpose of adjusting the compensation which they would have received had they not been in the war and had they remained at home in gainful occupation. This compensation was based on the difference between what the lower paid laborer in America received and what the average private received, the difference being $1 a day for home service extra and $1.25 a day extra for service overseas. Certainly that law cannot be justly construed by any person as placing a price upon patriotism. It is not in any sense a pension law. It is purely what it is called, an adjusted compensation law, and in my opinion the veterans who were conscripted into the service were certainly entitled to this recognition on the part of the National Government. Of course the payment of this required a very large sum of money and so we must come to the consideration of the other side of the question, and that is the taxpayer, upon whose already overburdened shoulders this additional obligation was placed by the Congress by following the policy which our National Government has been following for these many years. The only manner in which the amount of money represented by these adjusted-compensation certificates would be paid would be through our plan of public taxation. I felt, therefore, that if to pay these certificates in full at the present time would impose any additional taxes on the American taxpayer, that then in that event it would not be fair to the taxpayer to do so, but if some method could be devised or if the condition of the United States Treasury so improved that payment could be made without increasing taxes, that then I favored the payment in cash just as soon as it could possibly be done.

In the Democratic national platform of 1932 we declared for a sound monetary policy. In his inaugural address on March 4, 1933, President Roosevelt broadened this statement by saying that he favored not only a sound currency but an adequate currency. Adequate, as I understand the word, means sufficient money to meet the needs of the people. This Congress, at the special session a year ago, enacted certain legislation having for its object the expansion of the currency in various alternative ways, which it authorized the President to follow in his discretion. That legislation was approved by the President and is now a law of the Nation.

We have gone off the gold standard formally and literally, and since we have gone off the gold standard the condition of our country has improved, thus proving that proponents of the so-called "gold standard" and "sound money" and the Republican Party over the last many years have been pulling the wool over the eyes of a gullible people. Grass has not grown in the streets of our American municipalities, our condition has not become one of chaos, but on the contrary, our situation today compared with what it was a year ago, has resulted in restoring confidence in the American people in our form of government. We have devaluated the gold content of the American dollar. This has all been done with the idea of giving to the American people an honest dollar, rather than a dishonest one, and for the purpose of increasing commodity prices and bringing back prosperity.

But the people must have felt, and I am positive that the majority of the Representatives on this side of the aisle in Congress have felt, that while we have made tremendous progress on the road toward recovery, that there were still other things which we could do, and there were still things which were necessary to be done, and among these was a safe expansion of the currency in order to put more money into actual circulation among the people for the purpose of increasing the consuming power of the public.

I know from my contact with the people of my congressional district, and from the hundreds of letters which I have received from them, that the people back home want safe expansion of the currency, and this bill affords us the first opportunity to so comply with the wishes of the people and the needs and conditions of the present time.

The enactment of this bill will not in any way result in any increase of taxes. It provides for the payment to the veterans of the face value of their adjusted-service certificates in new currency, that is, United States notes, and these notes will not bear any interest but will be lawful money of the United States, and the bill further provides that they shall be maintained at the parity value with the standard unit of value fixed by law. There is no new principle of issuing money involved in this bill. These notes are to be legal tender in payment of all debts, public or private, and are to be received for customs, taxes, and all public dues, and when so received shall be reissued. When held by any national bank association or by the Federal Reserve bank the bill provides that they shall be counted as a part of the bank's lawful reserve. In other words, the notes, the issuance of which is to be authorized by this bill, are to become a permanent part of our outstanding currency and on which the people are not paying any interest to the great banking system of this country.

With the amount of unencumbered gold which is held by the United States Treasury at the present time, there is sufficient gold on hand to authorize the issuance of better than $7,000,000,000 in new currency, without reducing the gold reserve less than 40 percent, which is the present legal requirement, and yet it will only be necessary under this legislation to issue $2,400,000,000 for that purpose, so that the issuance of this money is not the running wild of the printing presses of the Government neither is it the issuance of fiat money. But the bill goes further than this, not because it is necessary, but for the purpose of meeting the arguments of the international and national bankers who still are in control of our fiscal set-up, and very definitely provides that if (and to this eventuality I do not subscribe) and when the index numbers of the wholesale all-commodity prices rises above the index number of such prices for the years 1921–29, then and in that event the Secretary of the Treasury shall be privileged to contract the currency by

either one or all of the five methods provided in the bill, and which it is not necessary to repeat here, except to say that the manner in which the currency will be controlled is by the retirement of bonds or by the termination of the issuance of notes on all of which the taxpayers of America are paying taxes.

This means that this method gives us an expansion of the currency which is so much needed at the present time, but at the same time makes it a safe expansion and one which is absolutely under the control of the United States Treasury at all times. This one reason alone is sufficient justification for the enactment of this very important piece of legislation.

But when this money is issued, where does it go? Will it go into the banks, there to be hoarded? It will go to the veterans in every part of the United States, so that every community in the country is going to be benefited by the expansion of the currency, both rural and urban and the large metropolitan centers. There is no nook or corner in the entire United States where this money shall not go and when it does it will be used by the veterans in the regular course of business channels, and will give the greatest impetus to the restoration of prosperity in this country than any single piece of legislation, that can be enacted by Congress, can do. In my own district I am reliably informed that this legislation will put into circulation in Jackson County the sum of $1,628,242.56, in Lenawee County the sum of $879,336.36, in Monroe County the sum of $925,835.40, and in Washtenaw County the sum of $1,155,949.20, making a total of $4,589,363.52; and that money will remain permanently in circulation, for there is no provision in the bill for its redemption.

Another motivating reason for the enactment of this legislation is that it has been estimated that it will save the Federal Government more than a billion dollars within the next 11 years, and the estimate has run as high as $1,500,000,000.

All this will be accomplished without any bond issue, without any increase in taxes, and without any additional interest payment on the part of the Federal Government.

I respectfully submit therefore that this bill should pass. I feel it is one of the most important pieces of legislation that has come before this Congress. If we are to realize the full value and benefit of the wonderful advance which we have made within the past 12 months in the improvement of our National monetary system, then we should pass this bill and put into the hands of the American people this additional money and at the same time we will have discharged not only the legal debt but the moral debt which this Government owes to the veterans, and we shall have forever removed this question from the field of political controversy.

All this is accomplished by this bill without in any manner increasing the tax burden of the American people or affecting the Budget, and yet, at the same time, every possible safeguard, through the cooperation of the Treasury Department and the Veterans' Administration and the legislative counsel, has been incorporated in this bill to make this expansion valid, legal, safe, and absolutely under the control of the Treasury Department.

Mr. GRAY. Mr. Speaker, while the soldiers entering the war were drilling and maneuvering in the camps, waiting delayed orders to move, held in reserve to march to the front, and fighting in the trenches and advancing, going over the top, and charging further on the firing line, other men remained in security at home taking advantage of the prosperous times, the greater business opportunities afforded, or the higher-pay employment prevailing, all to acquire wealth and fortune or to lay up a competence for life. But even more than this loss of employment and business advantage, the soldiers not only sacrificed opportunity for business, profit, gain, and employment, they served with only a mere pittance of pay, while other men were profiteering and gaining great advantage, basking in security of peace and civil life, acquiring great wealth and riches, or establishing for themselves fabulous fortunes.

The soldiers are not paid for their services rendered during the time of duty performed. The mere pittance of pay received, the pay of $30 per month or $1 per day, is for partial and temporary sustenance. This bill is not a liberal measure to soldiers. This bill is only a recognition for partial payment, a partial recognition for services rendered, services for which no adequate compensation can be made. This bill is not for disabilities incurred. This bill is not payment for impairment in the service, but for deferred payment for services performed, partial payment for services rendered in advance. The payment provided for in this bill is for training in the disease-breeding miasma camps, is for the hazards of submarine seas, is for facing shot, shrapnel, and shell in the trenches and on the battlefields, or waiting in reserve to meet all these. The payments provided for in this bill are for leaving home, family, and friends and for leaving business and personal interests, for leaving without assurance of return, to gamble with disease, wounds, and death. The payment is a mere pittance, and only partial, for all of these.

This is not a question of paying or not paying the soldiers adjusted compensation. The debt incurred has been recognized by majority of vote of a former Congress and the signature of a former President. The obligation has been signed and sealed. It is binding upon the country legally and by a far greater moral obligation regardless of what we do here today. The only question remaining before this Congress is the question, when it will be paid, the question how it will be paid, and in what form of money it will be paid, regardless of how and when it will be paid. It will cost no more to pay it now than to wait and pay it later. No borrowed money will be required. No bonds will be called for to be sold. No interest will be necessary to pay. It can be paid now without any of these. And it will cost less to pay today, and cost more to pay tomorrow. It will cost over a million more to pay next year, and will cost over a billion more in 1945. The Government can save billions by paying now.

I can see the manipulating bankers and financiers already organizing their propaganda against the issue of new money under this bill the same as against the issue of the same money under the farm relief measure. I can hear the war profiteers raising the hue and cry of "fiat money", of "printing-press money", and of so-called "inflation", assuming great concern for the people and to safe guard the public Treasury, all while rebating their income taxes, and while defaulting the payment of their taxes for 3 years, 1930, 1931, 1932, and resisting and defending all suits against them, to prosecute and compel them to pay. The dollar provided for in this bill will pay 100 cents of taxes, will pay 100 cents of interest, will pay 100 cents of debts, will pay 100 cents on mortgages, and will pay for 100 cents worth of food, clothing, medicine, and shelter.

We can pay the soldiers' adjusted compensation in money based upon and redeemable in gold, can make payment on the gold-standard basis of 40 percent of gold for redemption. This is all that is now claimed as needed and all that has ever been claimed as needed upon which to issue so-called "sound money." We now have, speaking in round numbers, over $7,000,000,000 of gold. We have only five billions of currency outstanding, and with the payment of these certificates we would have only two billions more, in all, $7,000,000,000 outstanding, and all based upon 100 percent of gold, or 60 percent more than has ever been required or called for by any so-called "sound money" men. With our present gold reserve on the 40 percent basis for the issue of money, the full limit claimed necessary and required by the most conservative and reactionary financiers, we can issue $17,000,000,000 in currency, or ten billion more than we need, to support our currency of five billion outstanding and the two billion additional required to pay the soldiers their adjusted-service compensation. This money to pay the soldiers will be based upon gold in reserve, 60 percent more than is necessary and required today or 60 percent more gold than we have ever used during all the years up to this time.

The soldiers' adjusted-compensation certificates, for service, time, and the hazards of war, is a just and sacred debt and must be paid. The soldiers need this payment now more than at any other time, now when they are without employment, and without opportunity otherwise to live. And the payment of this compensation now will be of greater use and service to the people than at any other time probably coming in the future. This bill should be passed now and the payment made both in fairness and justice to the soldiers and as necessary and required for economic relief to the people of the country generally.

The soldiers' adjusted compensation offers a great and signal opportunity to avail ourselves of an efficient relief measure. It is fortunate for the people of the country that there is a soldiers' adjusted compensation to be paid, and that the means and facilities for the payment are available, ready, and at hand.

Congress found that the cause of the panic was a failure of consumption, a failure of the buying and consuming power of the many, the masses of the people. And Congress further found that the failure of the buying and consuming power had resulted from a fall of values, the price level and the wage scale, decreasing, forcing down, and destroying the earnings and income of the people. And Congress also found that to remedy the panic or depression there must be a rise of values, the price level, and the wage scale to restore earnings and income and the power of the people to buy and consume.

And Congress further found that the fall of values, prices, and wages had resulted from a contraction, from a withdrawal of money from circulation, and that a remedy required first, a restoration of the volume and supply of money in sufficient amount back in circulation. And as a part of the recovery program to raise values, prices, and wages, the currency provisions of the Farm Relief Act were enacted to provide for the restoration of the money supply. But there has been no administration of the relief currency measure to restore the volume and supply of money, and thereby to raise values and the price level, and without which there can be and will be no restoration of the buying and consuming power.

This measure for the payment of the soldiers' compensation provides for the issue of United States currency notes the same as provided for in the Farm Relief Act, to restore the volume and supply of money. When these provisions are carried into force under the provisions of this bill they will be given the same effect as the issue of United States currency notes under the provisions of the Farm Relief Act, and will bring the same rise of values, the price level, and the wage scale, and the same restoration of the buying and consuming power as contemplated and provided for under the Farm Relief Act.

But the most difficult and vital part of such a relief measure and necessary for immediate and prompt relief was not provided for under the Farm Relief Act. The issue of the new money, making it available to go into circulation, is only a part of the program for economic relief. The new money must be made to reach the masses, whose buying and consuming power is to be restored, and not to banks and the certain special few to be hoarded and held from circulation.

There are many means and channels by and through which the new currency can be distributed and carried into circulation, but not all of them can make the distribution to the masses where it is most needed nor promptly and without delay to restore the buying and consuming power, and start the wheels of industry.

The payment of the governmental expenses with the new currency would bring a distribution of new money, but the distribution would not be broad enough to restore the buying and consuming power of the people generally.

The costs and payment of new construction and public works authorized and to be authorized as new relief measures would give the distribution of the money among certain industrial classes, but would require a large expenditure of public money for buildings and works that we do not now need and may never need, the money largely going into the pockets of contractors and material men, and then would not go to the masses promptly as the emergency will require and, lastly, would leave a huge debt to be paid by taxation in the future.

While the payment and retirement of United States bonds due and coming due would distribute the money to a smaller class, and largely to a class not suffering from the want of buying and consuming power, yet it would stop interest and save the people multiplied millions of dollars annually and without adding to and increasing the obligations of the Government to be paid from taxes hereafter. The retirement of the bonds would cancel the bond obligations and transfer that obligation of the money used and paid out, leaving the obligation upon the Government the same and unchanged with the huge interest sum saved to the people.

The payment of the soldiers' adjusted compensation would put the money into circulation and spread or make distribution of the buying and consuming power among the masses as no other measure could provide. It would go directly and immediately into millions of homes suffering from a want of buying and consuming power and into every community of every State of the Union. It would be spent at once for necessaries and it would find its way promptly to every retail store in the country. It would start on its journey from retail merchant to wholesale and commission house, carrying new orders to every factory, mill, and workshop in the land. It would start the wheels of production and bring an almost, immediate, and full-time employment and thereby directly restoring the buying and consuming power of 30,000,000 industrial workers through the restored and increased pay rolls; and the magic circle of production and consumption would be complete and normal prosperity restored without waiting.

The payment of the soldiers' adjusted compensation with the new money would not be the creation of any new debt to be at some time repaid by taxation. Congress has already, years ago, passed a law recognizing, obligating, and binding the Government to pay the soldiers' adjusted compensation. It is a binding existing debt which must be paid now or some time in the future. If paid now in the distribution of this new money, the debt is canceled and the Government is free from the obligation for all time.

Under the present conditions of the country, the widespread suffering and want among the people; with millions being spent annually to support a vast army of unemployed in enforced idleness; and in justice and fairness to the soldiers now in distress and in greater need of relief than at any other time probable in the future, this new money should be distributed and put into circulation by the payment of the bonus at least to those soldiers now in want and who are asking for the payment at this time.

And after the payment of the bonus the further increase of money required in circulation to raise values and prices to the level necessary to restore the buying and consuming power should be paid out in the retirement of United States bonds to save the millions of interest we are now paying annually from taxes collected from the people.

With this distribution of the new money by first making payment of the soldiers' adjusted compensation, restoring the buying and consuming power of the masses, values and prices for the farmers' crops and stock will be raised to a fair and higher level by next market time, and normal prosperity will be far on the way.

Mr. HOEPPEL. Mr. Speaker and Members of the House, this bill, which would pay the adjusted-service certificates of our World War veterans now, is an unusually progressive, forward step and will be highly beneficial in our national recovery. Aside from recognizing the valued and underpaid service of our veterans during the World War, the principle of this bill is outstandingly American and will do more to free the American people from the banking hierarchy than any other measure yet advanced in the Congress of the United States. This bill is the Magna Carta of human rights, of rights of the individual over the special monopolistic financial group which has dominated our country for

the past three quarters of a century. The Democratic platform is outstanding in several respects, but no plank in that platform is so important as the simple sentence: "Equal rights to all and special privileges to none."

This bill restores to the American Government the right to coin its own money and to receive the benefits of such coinage and the credit which follow therefrom. The method of paying the adjusted-service certificates, under this bill will save the taxpayers over $1,500,000,000. Every village and hamlet in America will immediately experience the benefits of this payment. My own county of Los Angeles will receive $52,091,000, which will be a godsend to the merchants and small-business men as the veterans discharge their just obligations to these public-spirited individuals who have so graciously and patriotically extended credit to the unemployed during the past years of depression.

The efforts heretofore expended under the new deal, except in one instance, have been more or less favorable to capital, partially favorable to organized labor, but only remotely beneficial to the consumer. From the standpoint of military strategy, the efforts heretofore made under the new deal may be likened to a series of skirmishes or inconsequential attacks; and, while we have succeeded in a measure in pushing back the depression, much of our success has been attained through the inordinate expenditure of public funds and the further whittling away of the assets of the great middle class.

Only in one instance has the new deal made a direct, frontal, cohesive attack on entrenched wealth. This was when we passed the gold devaluation bill, which I was more than pleased to support. While I have supported in this session all the measures of the new deal except the increase of taxation on liquor, I feel that the results of our efforts thus far are infinitesimal compared with the benefits which would accrue to us if the Members of Congress had the courage to face facts (which they know exist), and surmount these difficulties in the interest of the common people rather than pussyfoot along, deceiving the people all the while they are furthering the interests of the financial internationalists who have wrecked our country.

This so-called "bonus bill", the bill we are at present considering, puts in motion the constitutional machinery of the Congress for the issuance of currency by the United States. While it does not prevent the printing of Federal Reserve notes—by private bankers—which notes circulate as legal tender for all purposes, it should carry a proviso to this effect, since it is self-evident to anyone that the credit of the United States should not be farmed out to any group of individuals and, more especially, not to the group whose past history, as exposed in the Senate investigations, would indicate its corruption. If we are to have "equal rights to all and special privileges to none", as is so clearly enunciated in the Democratic platform of 1932, why should Morgan, Mellon, Baruch, and others in that favored group, be permitted to turn in Government tax-exempt interest-bearing securities and secure full 100 cents on the dollar of the Federal Reserve notes for such securities, while we deny equal rights to other citizens who are not allied with the Federal Reserve group of buccaneers?

The new deal has demonstrated that there is courage and sincerity in the administration, but it has not developed the fact that there is courage and candor in the Congress, the Membership of which should be effaced in the approaching elections unless the Members awaken to their responsibility in this session and reaffirm to the United States the right to issue currency as is provided in this bill we are now discussing. Devaluation of gold was indeed a progressive step and proves absolutely that it is not necessary for the circulating currency of the United States to be redeemable in gold. If we are to have currency predicated upon, or in any way allied with a metallic base, it should be bimetallic.

I favor the free, unlimited coinage of silver, which would do even more than the gold devaluation to bring prosperity to the American people and solve the unemployment problem. It is believed that the President is receptive to this viewpoint and the Congress should not adjourn until this objective is attained.

In furtherance of the democratic declaration of "equal rights to all, and special privileges to none", Congress should provide for the extension of credit directly to the people upon proper security or collateral under the same terms and conditions as credit is extended to the Federal Reserve banks. If this were done, there would be no necessity for the C.W.A., P.W.A., and other anagram organizations of the new deal. With credit extended to the individual at less than 1 percent to pay off his mortgage indebtedness on farm or home, to construct new dwellings, to purchase subsistence land sites, for the rehabilitation of churches, schools, and private businesses, we would enter an era of prosperity as yet never experienced in America.

The wealth created by labor would be, in great measure, returned to labor, and unlike the present system with its inordinate interest burdens, the profits of labor and of the toil of the common man would not be diverted, as has been so unjustly and inhumanly done, to the Wall Street wolves who have sheared the American people and who will continue to shear them until the Congress of the United States has the courage to enact legislation restoring to the American people adequate and proper control of currency as is provided for in the Constitution.

Washington warned against entangling alliances with foreign nations. As a people we should free ourselves from the entangling alliances with which the international bankers and the Federal Reserve System have encompassed the American people and which choke from them the sustenance of life to which they are justly entitled but which they are denied under the archaic system of private control of Government credit.

I reiterate in conclusion that a vote for this bill to pay the adjusted-service certificates is a vote for the financial freedom of all the people, and it is on this principle that I freely vote "yea", rather than from the viewpoint of paying to our World War veterans a debt justly due them.

Mr. LLOYD. Mr. Speaker, permit me to briefly explain the reasons which persuade me to vote for this bill. I am not unmindful of the fact that this is a valid and subsisting obligation of the United States Government which many maintain should have been paid in 1931. There are valid and cogent reasons which persuade one to that view. The fact, however, may not be disputed that it must be paid in 1945, that the United States, by its solemn and written obligations, has irrevocably bound itself to make full payment at that time. It is not a debt that can be honorably escaped; it is not a contingency that may be left to chance or future judgment; it is as determined, as definite, and as fixed as anything within the purview of human agencies can be.

That being true, I would be constrained to do something in advance of the due date for the benefit of the veterans, whose personal fortunes reflect the fortunes of every class of Americans from the highest to the lowest and from east to west and north to south. I should be disposed to do something to alleviate the sufferings that the Economy Act has brought home to them, and in that connection may I digress for just a moment to discuss briefly the subject of the Economy Act in its effect upon our veterans of all wars and all classes. I am not at all sure that much of the legislation on behalf of the veterans, much of which was forced on them without their request and against the better judgment of their leaders, reflects the course of wisdom. I am not at all sure that I should have voted for much of that legislation, but the Congress of the United States did vote for it, and the then President of the United States signed the bills which made those gratuities, if you care to call them such, the law of this Nation.

The veterans had a right to expect that the pledges thus solemnly made by the Government would be kept; and, relying upon those expectations, they made their commitments, they signed their land contracts, they bought homes and farms, and, having made their initial payments out of their

own earned funds, they were justified in a feeling of security when they committed themselves to future payments equal to the amount the Government had pledged to them. And then at a time when their ability to earn was at the lowest ebb, when there was no opportunity to recoup their fortunes from other sources, this Government, without warning, repudiated its obligations and left those veterans without the ability to carry out their own contracts leaving them impoverished and bankrupt with foreclosures from lack of payment being commenced over this Nation by the hundreds of thousands against them, and leaving a trail of untold suffering and misery far worse than it would have ever been if the Government, by its own assurance, had not led them into budgeting and ordering their lives in conformity with this repudiated obligation. And, so I say that in this hour of need, as a slight compensation for a repudiated obligation, this Government owes every consideration it is possible to give to the veterans without imperiling our national well-being.

By the passage of this bill you will pay off an obligation that must be paid in 1945, and you will not only do it without cost to the United States Government, but at the same time the Government will save exactly $112,000,000 a year for 11 years to say nothing of the compound interest upon that sum. Good business and plain common sense dictate the payment of this obligation now and the saving of that immense amount of money, if it can be done without otherwise imperiling our national credit.

But, I am persuaded that even if the veterans were not to be considered, at all, it would be wise to make this payment now. In the last analysis the problems of the veterans are the common problems of all the American people, and there is just one thing that the American people require from one end of this country to the other today, and that thing is a medium of exchange; in other words, money. A few years ago we had a rapidly moving medium of exchange, and we had what amounted to the same thing—a liquid system of bank credits that enabled the people to finance industrial enterprises and, in general, to transact their business. Within the past 2 years those bank credits have been shrunk by upward of $40,000,000,000, and there is no prospect so far as I am aware of any immediate increase in bank credits that may serve business in the future.

On the 4th day of March 1934 you passed the Federal Reserve Act extending for a period of 3 additional years the right of national banks to issue Federal Reserve notes against all direct Government obligations, while, at the same time, they are permitted to draw the interest upon those obligations and, in turn, of course, to take the Federal Reserve notes and buy upon the open market further Government bonds to bear interest while they, in turn, issue further Federal Reserve notes against them, and so on ad infinitum. Certainly, in the face of that act and under the present economic conditions of this country, you cannot expect an expansion of bank credits that will benefit the business man of this Nation or make it possible to employ labor.

You are at the parting of the ways; you will either have the Government take over all business, or you will increase the medium of exchange to enable business to live and function. In my humble judgment the immediate payment of this Government obligation will not only relieve the veterans and their families, and their relatives who are burdened with their support today, but it will go down into the grass roots of business and commerce, it will be a living stream of new life that will do more to bring back our national prosperity than all the legislation that has been passed by this Congress.

Mr. LANHAM. Mr. Chairman, in spite of the very large vote by which this bill has come before us, I think that even its most enthusiastic proponents must agree that its consideration at this time is a futile gesture. There seems little likelihood that it will pass both Houses of the Congress. If it should pass, we have the very definite assurance of the President of the United States that it will be vetoed, and in my opinion no man here believes that the bill would be passed over the veto of the Chief Executive. The discussion of the measure, therefore, necessarily becomes largely academic.

Something has been said during this debate with reference to the monetary policy of the country. The title of this bill states that one of its primary purposes is "to provide for controlled expansion of the currency." It was introduced a little more than a year ago. Since then many steps have been taken in the matter of expanding the currency, and we have been told that this additional one at this time would interfere seriously with the program of recovery undertaken by the present administration. Many ideas have been expressed in this Chamber as to just what policy this Government should pursue in a monetary way, but, regardless of the merit of our individual proposals, it must be realized that concerning this question and many others there is but one man in this country today who is in a position to carry his plans into execution, and that man is the President of the United States. In this period so closely akin in its essence to war times, he is of necessity the Commander in Chief of our forces.

I have my own philosophy with reference to payments to veterans, and I have tried to make my legislative actions comport with it. I think it is the correct philosophy. It is to the effect that there is an obligation upon the Government of the United States to make proper payments to veterans of all wars for compensable disabilities actually incurred in the performance of their war-time duties, either by wounds or accident or disease, and to make suitable provision for their widows and dependents. There the obligation of the Government ceases. In the administration of this policy, the veterans in presumptive and border-line cases should be given the benefit of any reasonable doubt. And I would bring it to your attention that when we seek to go beyond the point of paying and caring for the sick and injured suffering from service-connected disabilities, to that extent we jeopardize the rights and interests of the very veterans most entitled to our sympathetic legislative consideration.

However, the Congress of the United States voted to award to the veterans of the World War a bonus in the form of adjusted-service certificates, which in effect are policies of insurance payable in 1945. In good conscience, therefore, no reasonable man could wish to repudiate this obligation when due.

A few years ago there came before us the proposal to permit the veterans to borrow one half of the amount of these certificates. I voted for that measure. Inasmuch as old-line insurance companies accorded that privilege to holders who had kept their policies in force for a similar length of time, I thought it but just that the Government should do likewise. Shortly after those loans were made the country entered an unprecedented period of depression. Business generally languished and millions were thrown out of employment. Consequently it became impossible for these veterans to repay the loans and in many, probably in most, instances to pay the interest which was accumulating. The necessity for such default in payment came through no fault of their own. The effect of a continuance of this condition would be practically to deprive the veterans of the remaining one half of their adjusted-service compensation through the accruing interest.

Accordingly, in 1932, I introduced in the Seventy-second Congress, and reintroduced at the beginning of the Seventy-third Congress, a bill to remit the interest on these loans made to veterans. By its terms the sums heretofore received by veterans as loans would be regarded as part payments on the final amounts due them at maturity in 1945, and the interest would be canceled.

Mr. PATMAN. Will the gentleman yield for a question?

Mr. LANHAM. If I have time, but I should like to finish my discussion.

Mr. PATMAN. The gentleman is in favor of remitting the interest?

Mr. LANHAM. I am.

Mr. PATMAN. If you admit that, why not pay it? Why hold it back from them if it is due now?

Mr. LANHAM. I have stated that the reason I favored the remission of the interest was that after these loans were made this country found itself in a terrible state of depression, and thereby the veterans were placed in a position which made it impossible for them to repay the loans or pay the interest.

Now, much has been said about relief that has been extended by the Government to home owners and farm owners and that action has been presented as an argument which makes a rational predicate for the legislation here proposed. But does it? That relief was granted in a way and for the purpose of making the obligations of owners of homes and farms less burdensome; to enable them to carry on and not lose their holdings. Now, clearly, the corresponding and analogous relief for veterans is that proposed in the bill I have introduced, to take away the oppressive burden of their obligations and prevent their losing the benefits intended for them when the adjusted-service certificates were authorized and issued. The relief intended in each is a provision against the loss of property. These certificates, by their terms, are due in 1945, and the bill to which I refer is designed to give them their proper value when they mature.

In the Seventy-second Congress I spoke on the floor of the House in support of the measure I had introduced. I offered it as a basis for meditation upon this subject by the members of the Committee on Ways and Means, realizing that some modifications of its verbiage might be necessary. Also I appeared before the Committee on Ways and Means and sought its approval of the idea and recommended legislation in this regard. In my judgment, it is the appropriate legislation in keeping with other relief measures enacted by this Congress and in principle is in accord wih recent laws of a somewhat similar character. I realize that at this late date, in order to do justice, some changes should be made in some of the provisions of the bill I have introduced, but I should like to submit it again for your careful study as a basis for our meditation and action. We all realize that the bonus bill now before us has no chance of final enactment at present. Why not undertake to do what we might be able to do and afford to the veterans a form of relief that to them will be very substantial and also in keeping with the spirit and purpose of many laws recently enacted?

Mr. MILLER. Mr. Speaker, much has been said pro and con during the last few years on the question of the advisability of paying in cash the balance due on the adjusted-service certificates.

My position on this question has been well known since 1930 when I was elected as a Representative in Congress from the Second District of Arkansas. At that time we were entering the depression and since that time the Congress has enacted much legislation which can only be justified on the ground that it was necessary because of the depression. The depression has created conditions that have called for the enactment of extraordinary legislation. It is not my intention to discuss the efficacy of the various measures that have been enacted by the Congress in its effort to combat the depression and to alleviate the suffering of our people that has been occasioned thereby. Volumes could be written as to the cause of the depression and many plans have been advocated by various persons to obtain relief from the depression. Some of these plans have been enacted into law and many of the laws enacted by the Congress have contributed to the general welfare of the people, but, notwithstanding all that has been done by the Congress, the depression still remains, and in my opinion will continue with us until some positive action is taken which will place in the hands of the people the means with which to overcome the depression. I know of only one way to restore our economic body and to bring it out of the paralysis with which it is suffering. This can be done by forcing into circulation a sufficient sum of money to start again commerce, industry, agriculture, and restore the buying power of the people.

The present administration and the Congress said by the enactment of section 43 (b) (1) of title 3 of the Agricultural Adjustment Act that the currency of our Nation should be expanded. The President was given authority by that enactment to expand the currency to the extent of $3,000,000,000. At the time that provision was enacted the contents of the gold dollar had not been reduced, and it was found then that the monetary stock of gold in the hands of the Government would justify the issuance of this $3,000,000,000 in currency. Since then, and because of the devaluation of the gold dollar, the monetary gold stock of the Government has greatly increased, so that today an expansion of the currency based upon the actual gold in the possession of the Government is not only justified in the sum of $3,000,000,000 but by many times that sum under the present law, which requires only a 40-percent reserve or base.

The question, therefore, is whether from an economic standpoint the Congress is justified in paying this obligation by the expansion of the currency. Our great President has said that this is not the time for such action. He does not indicate when that time may arrive.

No one has more consistently followed and supported the President than I, but I cannot subscribe to the position that the administration takes on this question, because I am convinced that it is essential to recovery that the Government exercise its right and power for the purpose of placing more money in circulation. No better way can be found to do this than to provide for the payment of the balance on the adjusted-service certificates.

If this were done, the counties comprising the district which I have the honor to represent would receive approximately the following amounts of money: Cleburne $155,582.64; Fulton, $148,209.12; Independence, $331,398; Izard, $176,088.96; Jackson, $382,260.24; Lawrence, $296,349.84; Monroe, $282,505.68; Prairie, $207,758.16; Randolph, $230,795.28; Sharp, $146,581.20; Stone, $109,344.24; White, $523,519.92.

This money would go directly into the hands of the people and would pass into the business channels in such a way that everyone would be benefited thereby.

No one can successfully deny that the gold in the possession of the Treasury of the United States is ample to support the issuance of money to pay this debt. There is now approximately $3,500,000,000 in gold that is unallocated, to say nothing of the fact that we have behind the currency of this country today 100 cents in gold for every dollar of outstanding currency and still have the three billion five hundred million unallocated and free. If these are the facts—and everyone admits that they are—then I submit that there is no excuse or reason for not paying this debt at this time.

I do not care to deal with the question as to whether this obligation is now due or whether it was rightfully incurred in the beginning. The fact is that the Government has outstanding this obligation and if there was ever a time in our history that the immediate payment of a debt was justified, this is the time.

Some people argue that expansion once started cannot be controlled. A sufficient answer to that contention is found in the terms of the bill. There is no danger of an overexpansion under this bill, and I submit that the administration should pay this obligation now and thus put in effect the policy which it endorsed by the enactment of the legislation heretofore referred to. It should be borne in mind that the administration does not object to the payment of this debt on the theory that the currency cannot be expanded sufficiently for that purpose, but the only reason assigned is that the time is not opportune for such payment. This is not a valid or sufficient reason.

I shall continue to support the administration and our great President whenever possible, but, as a representative of a free people, I shall reserve for myself the consideration and determination of questions that vitally affect their welfare.

Mr. AYRES of Kansas. Mr. Speaker, I offer the following amendment, which I send to the desk and ask to have read:

That title V of the World War Adjusted Compensation Act, as amended, is amended by adding at the end thereof two new sections to read as follows:

PAYMENT OF PRESENT VALUE OF CERTIFICATES

"SEC. 509. The Administrator of Veterans' Affairs is authorized and directed to pay to any veteran to whom an Adjusted-Service Certificate has been issued, upon application by him and surrender of the certificate and all rights thereunder, the amount of the net single premium, determined as of the last anniversary of the certificate, necessary to purchase a paid-up endowment insurance for the face amount of the certificate at the then attained age of the certificate holder for the unexpired portion of the original 20-year period, on the basis of the American Experience Table of Mortality, and interest at 4 per centum per annum, compounded annually: *Provided*, That no payment shall be made under this section until the certificate is in the possession of the Veterans' Administration, or until all obligations for which the certificate was held for security have been paid or otherwise discharged: *Provided further*, That upon payment under this section the certificate and all rights hereunder shall be canceled.

"SEC. 510. There is authorized to be appropriated such amounts as may be necessary to carry out the provisions of section 509. Amounts now or hereafter in the adjusted-service-certificate fund created by section 505 of the World War Adjusted Compensation Act, as amended, are authorized to be made available for the payment of the net single premiums as provided in section 509 of the amendatory act."

My reasons for offering this amendment are as follows: First, I am in favor of the Government of the United States paying all that it owes the veterans on these adjusted-service certificates at any time a holder of such certificate may present the same and demand payment. Second, I am not in favor of making a futile or political gesture to the veterans by merely voting for a measure which we all know has no chance of becoming law. The President has said, positively and emphatically, that he would veto the Patman bill if it should pass. Therefore, passage of that bill will mean, just as it did before, that there will be no legislation along this line.

Now, most of these certificates have run 9 years. There is today 9 years' accrued interest in favor of the holder of this certificate. There are still 11 years of unaccrued interest to pay the veteran from this time until the maturity of the certificate as a compensation to him for the delay in the payment.

The amendment I offer proposes to pay the prematurity or present-payment value of the adjusted-service certificates at any time they are presented for payment.

Bear in mind there is nothing in my proposal compelling the holder of a certificate to cash it, but he can and may do so at any time he sees fit for the amount of its prematurity value at the time presented. For illustration, suppose we take three different cases which will represent, in amount, the minimum, the average, and the maximum certificates. The minimum certificate which has a face value of $125 payable in 1945, would have a present-payment value, as of January 1, 1934, of $83.40; the average certificate, having a face value of $1,000 payable in 1945, would have a present-payment value, as of January 1, 1934, of $667.19; and the maximum certificate, having a face value of $1,592, payable in 1945, would have a present-payment value, as of January 1, 1934, of $1,067.14.

Mr. Speaker, I cannot conceive of a more just and equitable proposal than this. It is fair to both the veteran and the Government, and I have every reason to believe that, should such legislation be passed, it would become law.

That there may be no misunderstanding, I want to make it plain that in this proposal full credit is given the veteran for the 25 percent added to his adjusted-service credit at the time of compiling the face value of his adjusted-service certificate.

When this so-called "bonus bill" passed Congress, I voted for it. I remember that it was requested by the veterans' organizations at that time that a veteran should receive $1 a day bonus for service in the United States and $1.25 a day bonus for foreign service; but owing to the time that had elapsed between the close of the war and the passing of the so-called "bonus measure", Congress increased the amount of each certificate by 25 percent; that is to say, if the veteran had 400 days' service at home for which he was to receive $1 a day, there was added an additional 25 percent, making it $500; if a veteran had 320 days' foreign service, his amount would be $400, to which was added 25 percent, making a total also of $500. This amount was then converted into a form of 20-year paid-up life-insurance policy, payable in 1945. However, the face value of the certificate does not show $500, but instead it shows what this certificate would amount to as paid-up insurance due in 1945.

What I am seeking to do is to take not the original sum, we will say, of $500, nor the face value of the matured certificate, we will say of $1,000, but the present payment value when the certificate is presented for payment. Anyone who wants to be fair to the veteran cannot say that this is not a fair and equitable proposal. However, if it is his desire to play politics with such a serious question, then the thing to do is to make a futile or political gesture and demand the full payment which is due 11 years hence, and do this, knowing full well that such a measure will not become law. The question is, would the veteran rather have a continuance of these political gestures, which mean nothing, or would he rather have cash to the amount of the present-payment value of his adjusted-service certificate at this time or whenever he desires it.

Mr. CROWE. Mr. Speaker, some of my reasons for supporting H.R. 1, known as the "veterans' bonus bill", are, in part, as follows:

During the World War, as in all wars, the best, the most physically fit, and otherwise, were called into the service. Young men in the formative years were principally taken in; young men, for the most part, on the verge of starting their life careers. Even though they get no further than the training camps, they are entirely disjointed and given a different philosophy of life to anything they ever had in their homes. They are trained to hate and to kill their fellow men in the opposing army, and even though they go no further than the training camp, and for only a few months, they come back with a sordid picture, which more or less stays with them for life. To those who went across and endured the mud, vermin, and filth of the trenches, who endured poison gas, shot and shell, and the continuous torture and menace of the enemy, those boys, for the most part, are never themselves again.

The remuneration received, while not intended to be called pay, yet, after all, was their pay. While they were performing this service—protecting the old, the women and children, and the wealth of our citizens—others of their fellows during those same days, months, and years were at home enjoying the fruits of high salaries and profits in plants, mills, factories, on the farms, in stores, and offices. Manufacturers were enjoying immense profits. It is said that United States Steel enjoyed a profit of a million dollars a day during the period of the war and for some time thereafter, most of which profits were caused by the war. While the veterans on this side were receiving $1 a day and those across $1.25, wages received by their fellows at home ranged from several dollars a day to eight, twelve, eighteen, and twenty dollars per day and even more than that.

Immediately or shortly after the close of the war the railroads, the manufacturers, and others told our Government that they had been put to some losses because of the abrupt closing of the war. They were settled with and given their bonus, and it was given to them then. The nations of Europe to whom we had loaned immense sums were very reluctant with their settlements. To get a settlement we had to give them several billions of dollars. They, each one in turn, gave their soldiers a bonus. Our Government, very tardily in 1925, decided that our soldiers were entitled to a bonus. The bonus, while in the aggregate amounts to a considerable sum, yet when you consider it individually is a very nominal sum, and instead of its being dated at the time the agreement was made, it should have dated back to

the time the service was rendered, as all other settlements were made. For that reason I consider it very unjust to set the due date at 1945.

The theory that these veterans may need this money worse in 1945 may sound nice. That might possibly be true of the boys who will be living in 1945. However, we find many thousands of them passing away each year. We have our shell-shocked, our crippled, and our gassed victims going to the Great Beyond—many each day, week, and month. To those a bonus paid in 1945 would be of no help except as it might help their dependents.

The bonus certificates can be safely used and soundly used as the I O U's of the Government backing up the currency, which would be used in settlement of these claims. They are duly issued bonds of the Government. This, of course, does not conform to the views of the big bankers of our country, because they want to loan the money, and get their interest on every greenback or piece of currency that is issued, but beyond that and beyond their selfishness in the matter, there is no sound reason which they can give. There is nothing except the smoke screen which they have thrown up. This money if put into circulation, would give us an additional amount of inflation that is badly needed at this time. With shorter hours for the manufacturer, with fewer days work in the week, with higher prices, more currency in circulation is badly needed to furnish a sufficient medium of exchange with which to handle the business of the Nation.

With the increase of the value of our stock of gold, there is sufficient gold in the Treasury to cover all currency in circulation, which is approximately $5,000,000,000, and would also be sufficient if necessary or desired to further cover this issue of currency to pay the soldiers' bonus, and it would be a great forward step, and give relief to the veterans, and pay them an already tardy sum due them for services rendered back in the years 1917 and 1918.

I submit, a nation is as strong as the respect and care it gives its veterans. I have studied their problems. I have observed them in action. I have elected to be their friend and supported them consistently. I have never promised in advance to support every piece of legislation in their interest, but I have given each and every piece of legislation introduced in their interest my careful consideration, and when I see it is meritorious and fair, I support it, and at all times if there is a doubt, give those who defend the defenseless and who defend the flag, and who defend the wealth and nationals of this Nation the advantage of the doubt.

Mr. EDMONDS. Mr. Speaker and Members of the House, under the permission given to the Membership to revise and extend their remarks, it is my desire to place in the RECORD my reason for voting for H.R. 1, the soldiers' bonus.

I have given much study and careful consideration to this measure. There are sections in it which to me are extremely objectionable. The sections providing for the method of payment would have no appeal to me in a separate bill as being the right and proper way to finance this proposal, so when all attempts were futile to secure modification of these sections there was left only the question of what would be the better solution, Should I vote for the bill as agreed to by the majority of the House, and thereby bring much-needed relief to about 10 percent of the population of our country, or should I vote against it on account of the financial set-up?

This again brought to memory many of the measures which we have placed into action during the past year in order to combat the depression, and also the present-day situation as to their being successful. All of these measures have been administration policies, and each and every one has been lauded to the skies by their proponents, saying that with this or that measure passed and in operation, prosperity is just around the corner.

Let us look at the results of this wild expenditure of billions upon billions of money, and the weakness of our present position. We appropriated $3,300,000,000 to the Public Works Administration to be used for both Federal and non-Federal projects, much as this work has been lauded in the public press and by its proponents; but upon investigation I found January 20—9 months after the activities were started—that out of about $1,000,000,000 set aside for non-Federal projects only slightly over 18,000 men were at work, and at the best that the projects would give 250,000 men work for 1 year, and it is probable the balance of the money would show no better results.

In the meantime we find up to $1,000,000,000 set aside to pay men in made-up jobs, which practically established a dole for these people, probably needed badly, and a much better way to spend it than handing it out without any service rendered for it.

Then we find an appropriation handed to the Secretary of the Treasury of $2,000,000,000 without any accounting for 3 years. This was for the purpose of manipulating the money market—you will note the sum of money alone is sufficient to pay the bonus—although anyone else manipulating the money or any other market is now charged with being an enemy of his country, and the demand is made that there shall be no more secrecy or underhand manipulations.

Then we find the subsidies hidden in our purchases which will pay a bonus to the farmers growing cotton, grains, corn, tobacco, and many other commodities, amounting to about $1,000,000,000 and to continue during the next year crops; again we find $200,000,000 of $300,000,000 given to the cattle and pork farmers, and so on through so many lines it is hard to enumerate them, but the result is that the vast consuming public has to pay the bill through advanced prices.

In order to relieve the distress the Government has donated 10,000,000 tons of coal, vast quantities of flour, pork, butter, eggs, and other surplus commodities, to be distributed to these needy families all over the country.

It will be noted how little of these benefits reach the city dweller, there has nothing been done like raising the tariff in order to have the manufacturer protected from cheap labor abroad. He is told to join the N.R.A., to work 30 hours per week, and raise the wage, rendering it practically impossible for him to compete with imported goods, and leaving large bodies of our people out of work.

I am reciting the above to bring out plainly the unfortunate position that many of our worthy people in the cities who desire to work and find themselves in a hopeless situation unless some of the activities of the Government are turned in their direction to relieve their distress. This brings me back to the bonus. To my mind we would have been far better off had we started out by paying the bonus, rather than to have proceeded in the orgy of spending money for calculated results which are not developing.

We owe the soldiers the bonus, and would eventually have to pay it, why not now when it is so badly needed. We know the bonus will immediately circulate through 10 percent of our population, we know that most of it will be used for immediate necessities, we know it will stimulate trade in every line, the results are positive, not problematical like the Public Works, or manipulating the money market, and we know the people in the whole country will have to pay advanced prices on account of professional theories. Why not give these men who during the war received but subsistence money, when the farmer who received over $2 for wheat and like high prices for all his products, and while workers were pulling down as much wages in industrial establishments at home in one day as the army men received in a month, it now appears that these people who enjoy the war prosperity are now receiving all or most of the benefits of the new deal, and the soldier a raw deal. Even those receiving a pension or subsistence sums are cut off from any welfare assistance, and in many places coal and fuel allowances.

Let us be fair and first of all place this money where, under every argument that can be made, it should be placed, and that is to the men who made the world safe for democracy, and our first duty is to them and not to the men who made unusual profits during the war.

Mr. YOUNG. Mr. Speaker, passage in the House of H.R. 1, providing cash payment of adjusted-compensation certificates, is merely a futile gesture. The bonus, as it is commonly called, will not be paid in cash to our veterans

this year. The President has said this is not the time. He has said he will veto the bonus if it passes the House and Senate. Cash payment of the bonus is not a part of his recovery program. In fact, he, in no uncertain terms, has indicated to the country and to the Congress that he considers cash payment of the adjusted-compensation certificates at this time an interference with his recovery program. I cannot, therefore, in good conscience join any mutiny against the President, who is our Commander in Chief in the war for industrial and economic recovery.

On January 8 I introduced in the House H.R. 6567 to release veterans from the liability to pay interest on loans secured on adjusted-service certificates and to provide for the refund of interest already paid on such loans.

My bill provides that the Administrator of Veterans' Affairs shall not deduct any money from the face value of adjusted-service certificates securing the loan nor collect from the veteran any interest on the loan. If the veteran has paid any interest upon the loan he has previously made, the Administrator, under the provisions of my bill, shall refund the amount of interest paid. In case the veteran has died subsequent to making the loan, the Administrator, upon the written request of his beneficiary, must make this refund to the beneficiary entitled to be paid the face value of the certificate.

As Congressman at large representing the State of Ohio, I am faithfully serving nearly 7,000,000 people of a sovereign State who selected me as their agent and employee in this House. As Representative of this constituency, I have consistently supported President Roosevelt all along the line. I expect to continue to uphold his leadership.

Voting this bonus in the House amounts to nothing whatever except, perhaps, to raise false hopes in the hearts of some veterans in this country who, unfortunately, are in need. I will not be party to making a futile gesture, falsely and fraudulently raising their spirit and hope, when there is no foundation for such hope.

It was in a most prosperous era that the adjusted-service compensation measure was enacted over President Coolidge's veto. Had the ex-service man at that time been paid in cash, instead of being handed a 20-year insurance policy payable in 1945, it would have been far better. The country was able at that time to pay them off in cash. The adjusted-service certificate payable in 1945 was all they could get. Then later the right was given them to borrow 50 percent of the face value of these certificates. That interest charge should certainly be remitted altogether or cut in half. Passage of the bonus bill in the House accomplishes nothing. It is simply the old army game of passing the buck.

If this House would pass my bill, H.R. 6567, and release veterans from obligation to pay interest on loans secured by adjusted-service certificates and to provide for the refund of interest paid on such loans, we would be accomplishing something real and tangible for our constituents and for World War veterans of this Nation and their dependents. In fact, in my measure, an opportunity is afforded Congressmen to vote for a bill which, by inference at least, has the approval of the President, instead of voting for a measure which he violently disapproves and denounces. President Roosevelt, some months ago, said he was in favor of reducing interest rates whenever possible.

Many veterans holding adjusted-service certificates payable in full in 1945, have been compelled to borrow money on these certificates to the extent of 50 percent of the face value thereof. These veterans must pay 3½ percent interest on the loan and at this rate, the remaining 50 percent will be tremendously reduced, in fact, nearly wiped out. Two million seven hundred and ninety-two thousand veterans have borrowed the full 50 percent of the face value of their adjusted-service certificates. More than 528,000 holders of certificates are evidently not in need. They have not borrowed any money whatever on their certificates.

I would gladly vote for cash payment of adjusted compensation certificates for all veterans unemployed and in need. Let those veterans who are employed—who are not in need—who are able to pay income taxes, wait. Cash payment to unemployed and needy veterans would accelerate the recovery program of the administration and serve as a stimulus to business in every part of our country. This bill provides for immediate payment regardless of need. It is my belief that the President would approve of a measure providing for immediate payment to unemployed veterans as such a measure would merit his and our support.

Passage of the bonus would forthwith cause the Government to offer to these 528,000 veterans who are obviously not in need, many of whom are men of wealth occupying lucrative positions, many millions of dollars at a time when millions of other worthy and industrious but more unfortunate Americans are unemployed and in need. This is an obvious weakness and injustice of the bonus, as the bill for cash payment of adjusted compensation certificates is commonly called.

Elimination of interest charge would cost the Government some money, it is true, but it would result in a great benefit to those veterans who are in need of help. Their need has been indicated by the fact that they have heretofore borrowed upon the adjusted-service certificates. Surely, if there are those of you who reject my proposition to remit altogether the interest charge upon loans on adjusted-service certificates, all will readily agree that this interest charge should be greatly reduced and the veteran given real help by this method. Elimination of all interest charges would cost around $65,000,000 annually until 1945. Reduction of the interest charge to 1¾ percent would cost about $37,000,000 annually.

Payment of adjusted-compensation certificates is, of course, an obligation upon the Public Treasury. It does not mature, however, until 1945. Cashing these certificates before maturity should depend upon the condition of the Public Treasury and the Nation. If the Treasury may, without disaster or imperiling the national credit, cash these certificates before they fall due, I would favor such legislation. Certainly at a time when the Chief Executive of this Nation, in no uncertain terms, denounces and condemns the contemplated cash payment and indicates that such a payment might bring collapse of the Nation's credit, I feel I would be derelict in my duty were I to fail to support him.

To keep the national credit unimpaired was the first and essential obligation of this administration. Had its credit failed, our Government would have been powerless to aid veterans or any other class of citizens. Without national credit, nothing would have been possible. The President took the necessary action and the credit of the Nation was saved. Veterans were called upon to make sacrifices of benefits they had been led to expect to continue. Last March was no easy time for anyone—certainly not for any of those whose pensions and allowances were cut. Under the leadership of President Roosevelt, the sacrifice was made. At the same time a new and more just policy of compensation for veterans was established. It was unfair to place in the same class veterans who were disabled in battle and those who enlisted after the armistice and whose troubles or disabilities were in no way connected with war service. I stand firmly on the principle that our Government show special consideration and give most generous treatment to those who have been disabled in war. Indiscriminate payment of adjusted-compensation certificates in cash now to veterans, without regard to need, is a selfish proposal insisted upon without regard to the financial condition of the country or the welfare of its citizens.

It is not proper, and it is contrary to the rules to make reference to the other body in the course of debate on the floor of the House. Nevertheless, thinking people generally know, because it has appeared in the public press, certainly all of you, my colleagues, know that the bonus has already been rejected in another body by more than a 2- to 1-vote—64 to 24.

It is my judgment that were I to vote in favor of the bonus I would be guilty of making a gesture for the purpose of securing veterans' support, knowing in my heart that there was no chance whatever—not a Chinaman's chance—that the bill would pass both Houses of the Con-

gress, be signed and approved by the President, and become a law.

Cash payment of adjusted-compensation certificates is not a part of the American Legion four-point program. I am a member of the American Legion. Some of my closest personal and political friends are legionnaires. I know that members of the American Legion of Ohio want me to back President Roosevelt and support his program for economic recovery.

Men, who in an hour of national peril, left their homes and loved ones in response to a grave national duty are willing, I am sure, after a lapse of years, to continue to make sacrifices for the welfare of their country whenever that may be necessary.

The President has said that passage of this bill strikes at the very heart of his recovery program. Under such circumstances and in view of his statement I will not vote for it.

I would rather be returned to private life by people I am faithfully serving than make an insincere gesture to pay an immature obligation in opposition to the wishes of my President in the midst of this conflict against the forces of depression.

Mr. HANCOCK of New York. Mr. Speaker, under leave to extend my remarks in the RECORD I include the following letter written by me to advocates of H.R. 1 in my district:

DEAR FRIEND: Every Member of the House has received hundreds of letters these last few days appealing to him to vote for the bonus bill. Many of these letters reveal poverty and distress in the homes of World War veterans that cannot fail to stir deep compassion and a desire to render immediate and effectual relief. It is not easy to say "No" to such entreaties. It is especially difficult for the Member who has served with these men, knows their fine spirit of unselfish devotion to patriotic ideals 16 years ago, and realizes their present needs.

But it is not a relief bill; it is not designed to take care of the veteran in distress. Neither is it a bill to provide for the payment of a debt the Government owes World War veterans. If passed, this bill will permit every veteran to collect the maturity value of his adjusted-service certificate, the rich, the well-to-do, and the poor, the employed and unemployed, the able-bodied and disabled alike.

Men occupying positions of trust in public life and in veterans' organizations have taught the uninformed to believe that a wicked and ungrateful Government is withholding payment of compensation that is due the soldiers of the World War. They have rendered the United States a great disservice by creating a feeling of bitterness toward their country among thousands of ex-service men who do not know what the bonus is.

I therefore feel justified in attempting to explain the bill by quotations from the World War Veterans' Adjusted Compensation Act and official figures:

Section 601, title 39, United States Code, reads as follows:

"The amount of adjusted-service credit shall be computed by allowing the following sums for each day of active service, in excess of 60 days, in the military or naval forces of the United States after April 5, 1917, and before July 1, 1919, as shown by the service or other record of the veteran: $1.25 for each day of oversea service and $1 for each day of home service; but the amount of the credit of a veteran who performed no oversea service shall not exceed $500, and the amount of the credit of a veteran who performed any oversea service shall not exceed $625."

The foregoing language defines the bonus. Any ex-soldier can easily figure the amount of the additional pay that was awarded him by the act of May 19, 1924.

A furious debate raged at that time on the question of paying the bonus in cash. We now know that if it had been done, the perennial controversy on the bonus question would have been avoided and the resentment that rankles in the hearts of many veterans would have been averted. It was determined, however, to be in the interest of the Government and the veteran himself to make payment in the form of a 20-year endowment insurance policy in the amount the veteran's bonus would purchase.

Section 641, title 38, United States Code, contains this provision, and the essential language reads as follows:

"The Director of the Veterans' Bureau is directed to issue without cost to the veteran designated therein a nonparticipating adjusted-service certificate of a face value equal to the amount in dollars of 20-year endowment insurance that the amount of his adjusted-service credit increased by 25 percent would purchase, at his age on his birthday nearest the date of the certificate, if applied as a net single premium, calculated in accordance with accepted actuarial principles and based upon the American Experience Table of Mortality and interest at 4 percent per annum, compounded annually."

The adjusted-service certificates provided for in the foregoing section are, in fact, 20-year endowment policies, with loan privileges and provision for payment of the maturity value to designated beneficiaries in case of the death of the insured during the life of the policies.

Of course, the Government did not actually set aside the amount of the adjusted-service credits. The money was not available—the reason why the bonus was not paid in 1925. Instead Congress appropriated annually $112,000,000 to the adjusted-service certificate fund which, with accretions, was deemed adequate to pay death claims and the matured certificates in 1945. Loaning value was figured accordingly, until the passage of the act of July 21, 1932, which permitted the holders of certificates to borrow up to 50 percent of their face amount at 3½-percent interest.

Assume that the Government actually had had the cash to pay the bonus immediately after the war, and that, instead of paying it, the money had been deposited in savings banks at 4-percent compound interest to the account of veterans. The following table shows what the soldier with a little over a year's service, half in France and half in this country, would be entitled to, year by year:

Year	Interest	Principal
January 1920		$400.00
First	$16.00	416.00
Second	16.64	432.64
Third	17.30	449.94
Fourth	17.99	467.93
Fifth	18.71	486.64
Sixth	19.46	506.10
Seventh	20.24	526.34
Eighth	21.05	547.39
Ninth	21.89	569.27
Tenth	22.77	592.05
Eleventh	23.68	615.73
Twelfth	24.62	640.35
Thirteenth	25.61	665.96
Fourteenth	26.63	692.59
Fifteenth	27.70	720.29
Sixteenth	28.81	749.10
Seventeenth	29.96	779.06
Eighteenth	31.16	810.22
Nineteenth	32.40	842.62
Twentieth	33.70	876.32
Twenty-first	35.05	911.37
Twenty-second	36.45	947.82
Twenty-third	37.91	985.73
Twenty-fourth	39.42	1,025.15
Twenty-fifth	41.00	1,066.15
Total	666.15	

I have quoted the foregoing extracts from the law and the above table in the hope that ex-soldiers may understand exactly what adjustment was made with them in 1925, and the most liberal credit that can be claimed for them on Uncle Sam's books.

The World War veterans want what the Government has agreed to give them and those who are now in dire straits want it now. It ought to be given to them and I will vote for such a measure. It is only the veterans who do not understand the bonus who are demanding the maturity value—the 1945 value—of the adjusted-service certificates. They are not demanding an additional bonus representing 11 years' unaccrued compound interest.

One of my colleagues recently used an apt simile on the floor of the House. He compared himself to a trustee of an insurance company and asked what right he would have to vote for the payment of 20-year endowment policies at face values 11 years before maturity, simply for the purpose of acquiring popularity with the policyholders who would be benefited. It is a temptation to appease an aggressive minority when the majority is complacent and indifferent, but such a trustee deserves to be defeated for reelection and will bring ruin to his constituency if he and those of like mind are in control.

I do not mean to impugn the motives of the Members of the House who favor payment of the 1945 value of the adjusted-service certificates. Many have been convinced by what I regard as specious arguments. I am the keeper of no one's conscience except my own, and feeling as I do it is my duty to vote against H.R. 1.

Sincerely yours,

C. E. HANCOCK.

Mr. MULDOWNEY. Mr. Speaker, the World War veterans served us in 1917 and 1918. Let us dispose of the debt we have owed them. We acknowledged this debt by the act of 1924. We admitted it to be a just debt. The whole purpose of providing these adjusted-service certificates was simply to compensate the soldiers more adequately for their services, by bringing their pay somewhere near that which workers who served in industries at home, during the war, received. It is, of course, absurd to claim that even with the adjusted compensation the payment for the services rendered by the soldiers is adequate. But be that as it may, the Congress recognized the debt, and provided that there should be an additional payment of $1 a day for home service and an additional $1.25 a day for oversea service.

The veterans preferred, and I, along with many other Members, favor the cash payment of the adjusted compensation. However, the Congress decided instead to give the veterans a certificate equivalent to the amount of insur-

ance that money would buy on a 20-year endowment plan. All certificates applied for before 1925 were dated January 1, 1925, and those applied for subsequently were given the date of application and were made payable 20 years after date. These certificates range in value from $126 to $1,590 each, the average being $1,000.

If interest at the rate of 6 percent, compounded semi-annually, were paid on this sum from the war period to date, it would be found to be equal to the face value of the policy due in 1945. Therefore, this debt is due now, unless we wish to apply to those who served us in the World War a principle different from the one that we applied to the munition manufacturers, who were paid in cash, and who have drawn interest on what they have received ever since. The veteran earned this money at the same time that the munition manufacturer earned his. He should have gotten it at the same time.

Much of the opposition to this measure has been artificially stimulated and rests on grounds that have no justification in fact.

I am in favor of paying the bonus, not only because it is a just debt (we pride ourselves on paying our debts) and was not intended as a reward for patriotism, not only because it will help the veterans, most of whom are in distress, but because it will help the Nation and every group of the population in economic recovery.

After the war Congress adjusted the pay of the railroads to the amount of $1,600,000,000; we adjusted the pay of the war contractors to the amount of $2,000,000,000. We did not ask them to take adjusted-service certificates. Under the foreign-debt settlement we canceled approximately $11,000,000,000 owed to us by foreign countries. I believe the ex-service men have the same right to the payment of their adjusted-service certificates in cash as the railroads and war contractors, who made enormous profits out of the war. Our soldiers hold the Government's duebill; the obligation is sacred; they need the money. Those who do not want their certificates paid in cash can keep them in the present form. They would not be compelled to cash their certificates.

I am supporting this legislation today upon the theory that it is due and owing to our ex-service men for their loyalty in the hour of need. I am supporting this measure upon the broader basis that it is a relief measure which would help to take care of serious economic conditions; that it will help relieve distress and suffering in all corners of our land. I am supporting this measure in the firm belief that beneficial results will flow from it in restoring prosperity to the distressed of our Nation.

The cry goes up, "Where are we going to get the money to pay?" The facts and figures disclose the story. Experts tell us that there is enough idle gold in the Treasury to authorize issuance of Treasury notes to pay this debt in full. In this way the debt can be paid without a bond issue, without increasing taxes, and without additional interest. The debt must be paid sometime—everyone will be helped by payment now. The question becomes this: Which will help more and promote the general welfare of all our people of this great Nation more, the payment of this money now or permitting the banks to consume it by compound interest? It is estimated that payment at this time will distribute $18 per capita over the entire Nation.

What the country in general needs is not money in hundreds of millions put away in bank vaults, but money scattered all over the country to start again the circulation of trade. The country needs money that will be spent, not accumulated. Would not the spending of this money by 3,600,000 men start everything moving?

LET ME REMIND YOU

Those who would now look upon the jobless veteran as a needless burden were among the first to cheer them on their way across the seas. Then they were well fed, well clothed, well disciplined. Today many of these same boys are poorly dressed, hungry, and without jobs, but still patriotic, well-behaved, law-abiding, fine boys. We were proud of our boys in 1917—why not, why not express it to them now?

It should not be necessary at this late date to dilate on the service rendered to their country by the soldiers. Heaven knows Presidents, governors, editors, and clergymen have talked enough about it. What these men did for the United States, the sacrifices that they were forced to make, are well known. The question now is, What is the United States going to do for the men that it sent to Europe with promises of never-dying gratitude?

DEMONSTRATION REAL PROOF

We must meet the issue squarely, and in dealing with the ex-service men today we should act in the same standard of patriotism and the same fidelity to principle which we exacted of them when they were called to the defense of their country.

Realizing that these brave men willingly made every sacrifice, even of life itself, I believe that the Nation now should not hesitate to make some sacrifice in a material way in order to provide for the greater comfort of the surviving veterans and the welfare of their dependents. This should be regarded as a sacred duty by every citizen in the Republic.

I am unqualifiedly in favor of all legislation for the best interests of the ex-service men and their families. Such has always been my stand, and to you I reiterate this statement with all the emphasis I can command. The boys who heard the ringing cheers when they marched off to war and were hailed as heroes when they returned are now mature men, and in these drab days when the cheering has ceased they deserve more and more our gratitude and encouragement. Those noble mothers who have lost their sons and those households bereft of loved ones as a result of the war must not be overlooked. Thousands of veterans, maimed or afflicted by disease, still bear the shock of battle. With them the war is not yet over, and sympathetic ministrations to these gallant sufferers call for our first thought and gentle care.

The expense of providing for the veterans is a righteous debt. It is an obligation which the Government must hold sacred. To the veteran and his comrades I give assurance of my cordial support of the patriotic principles they so faithfully espouse.

Mr. GUYER. Mr. Speaker, two years ago when the injustices of the regulations under the Economy Act were not in force and when we were making a serious, though futile, attempt to balance the Budget, I voted against the payment of the adjusted-service certificates. Today I am going to vote in favor of it as an apology to the veteran for the injustices inflicted on him by a vote that authorized the President, figuratively, to take the shirt off of his back.

For the past year I have been confronted daily by veterans who were the victims of those regulations giving pathetic stories of privation and humiliation, veterans who had to appeal for charity to save their families from hunger and exposure. No veteran who has faithfully served his country in time of war, particularly when disabled by reason of that service, should ever be permitted by that country to become the object of charity. Such a spectacle should shame a powerful nation whose triumph in war and welfare in peace were the fruits of the veteran's sacrifice.

No one will contend now that we are even pretending to balance the Budget. I am not criticizing the lavish expenditure of money to end the depression. I have cheerfully aided the President with my vote to promote his program of recovery wherever I could without violating my conscientious convictions respecting the grant of power within the provisions of the Constitution. In fact, I have at times in the past year stretched my conscience in order to adjourn politics to lend aid and sympathy to him in his efforts to aid business and to create employment, and so long as I am in Congress and he is President, I shall follow that policy. I believe the welfare of the country demands that of me. Accordingly, at this time with this vote I believe I am pursuing that policy.

We have found money for everything and everybody else; and remembering this orgy of spending, I cannot turn a deaf ear to the veterans' cry for help. We are spending monumental sums for all sorts of reasons, so why not at least do

justice to the ex-service men? We are spending $1,000,000 a day for the Civilian Conservation camps. Five billions have gone to the Reconstruction Finance Corporation; two billions to the Secretary of the Treasury with which to rig the market; three billion three hundred million for Public Works; two billions for Federal relief; two billions for farm mortgages; and two billions for home mortgages. Thirty-odd new bureaus have been created and 40,000 new Federal employees added to the rolls. These are probably all necessary. At least we should not be too critical in times of such stress, even if some crimes are committed in the name of recovery. But with all this new deal why not a square deal for the veteran? It is hoped that the amendments to the independent offices appropriation bill will help the Spanish-American veterans and some of the World War veterans.

An analysis of the effect of the payment of these certificates in the Second District of Kansas, by counties, shows that it would bring to the people and to business in these counties the following sums:

Allen County	$397,230.87
Anderson County	348,002.35
Bourbon County	415,708.02
Douglas County	466,905.51
Franklin County	408,985.68
Johnson County	504,714.03
Linn County	251,326.38
Miami County	394,482.51
Wyandotte County	2,709,288.27
Total	5,709,643.62

This is the payment of an acknowledged debt to be paid eventually; and if there ever was justification for such an advance, it is at this time when the distribution of this money would percolate to every part of the business body. That is the purpose of these other and vast expenditures. We are paying out great sums where there is no suggestion of a debt but just the impulse to revive business and employment by financing projects where labor will be employed. In the end there would also be a saving of many millions in the cost of administering the adjusted-service certificate fund to meet this debt in 1945. But, above all these economic reasons, there remains the paramount one of extending aid to hundreds of thousands of veterans in dire need at this time.

Mr. FADDIS. Mr. Speaker, for several reasons I am in favor of the payment of the adjusted-service certificates in the manner provided in this bill. One reason is that they represent a debt which this Government has confessed that it owes the ex-soldiers of the World War. It is an attempt, feeble enough it must be said, to compensate the veterans for financial losses incurred, when in time of need this Nation said to one: "You are to be used for cannon fodder for $30 per month", and to another, "You are free to work among the industries occasioned by this war at the highest wages you can command." It is justified because it is discharging an obligation, which must eventually be discharged, at a time when a large majority of the recipients are in need of it. I hope it impresses upon this Nation the justice and necessity of drafting all the resources of the Nation in time of war upon a basis of equality. Is it fair and just that industry should be allowed to wax fat on the profits which are caused by wars? If the opportunity to profit by wars was eliminated, there would be fewer wars.

I am for this legislation because I am for a controlled expansion of the currency. Restoring prosperity to this Nation is only a matter of restoring the buying power of the people. To do this we must provide the medium of exchange necessary and get it into the hands of the people. Opinions differ as to how to accomplish this. In my mind, this is a feasible method, and no better agent of distribution could be found. This is money which will be spent, money which will go into every community throughout the Nation and to every branch of industry. Of course, under our present system the big banker will eventually get it all, and he will purchase with it more tax-free securities. Why, then, should he begrudge the needy the chance to touch it as it goes by? They will not contaminate it, and it will bring joy to thousands upon thousands of homes.

The desires of the people are as great or even greater than ever. If they could obtain the money to buy, they would buy. Buying will start the wheels of industry humming and create a demand for labor. This labor will buy and create still more industry. I believe the only way to bring about this desirable condition is by controlled inflation.

I realize, of course, that there is a limit beyond which we cannot go with inflation just as there is a limit to the stimulant a doctor can administer to stimulate a weakened heart. Too much would be poison. I do not think this would be an overdose. Therefore, I am in favor of this measure. I believe in it, and I am always willing to back my belief with my vote.

Mr. CRAVENS. Mr. Speaker, the payment of the balance of adjusted-service certificates of World War veterans has been a controversial question before the people of the United States and the Congress for many years; but, to my mind, since 1930, and especially now, a condition exists which warrants immediate payment not only from the standpoint of doing justice to the veterans but from an economic standpoint as well, and in voting for and supporting this bill I am not only voicing my honest conviction on the question but I am fulfilling a promise made the veterans of the Fourth Congressional District of Arkansas in the Democratic primary campaign of 1932.

The adjusted-service certificates of the veterans are just as much an indebtedness of the United States as any other obligation, and the only question raised by this bill is whether or not the debt shall be paid now or wait until 1945, and, from purely an economic standpoint, I think no time more propitious for the payment than the present.

It is generally admitted there is need for more money to carry on the business and commerce of the Nation, and the only question is the safe manner of putting that necessary additional currency into circulation to relieve the present depression without subjecting ourselves to criticism for unwarranted and dangerous expansion of the currency.

As I see the needs of the country, a safe and sane expansion of the currency is necessary to the restoration of this country to normalcy and prosperity, and I can conceive of no safer method than the one proposed by this bill.

From published statements of the banks of this country, both national and State, it will be discovered a large part of the currency in circulation, which should be working in the ordinary channels of trade, is locked up in the vaults of these banks. This is not a willful act of depression on the part of the banks, for no doubt they would prefer the money should be earning interest and in business, but rather it is for the safety of themselves and their depositors, at least from the bankers' standpoint, but regardless of the cause, the fact remains that the ordinary citizen cannot go to the banks with any reasonable hope of financial aid.

There are many causes for this vast accumulation of idle money in the banks of the country. One is fear that the money, if loaned, will not be repaid, but, in my judgment, the underlying factor in this deplorable condition is the vast issue of tax-exempt securities of the United States, of the States and municipalities; and I, for one, favor an amendment to the Constitution of the United States, which shall forever, hereafter, prohibit the issuance in any form by Nation, State, or municipality of a single tax-exempt security.

The man of small means, whether he lives on his farm or in his own home in the city, pays the taxes on that farm or home, and it may be he owns no other property; yet, under present conditions, his neighbors may own no farm or no home, but bonds of the United States or some particular State or municipality worth 10 times the little farm or home, or more, yet he pays no taxes to anyone and in no way helps pay the expenses of any government, which, in my judgment, is unfair and inequitable. These bonds, whether State or national, should bear their fair and proportionate share of the tax burden.

If such an amendment to the Constitution was adopted, many people, who had invested their money in these tax-exempt securities, would seek other investments and thus place back into the channels of trade many millions, perhaps billions, of dollars of money.

Since my election to Congress I have cheerfully and willingly supported the President, and the Democratic administration in every legislative proposal, which suggested relief for the vast army of unemployed and for the improvement of economic and business conditions in this country, and I shall continue to support the President, where my conscience will permit, and by doing so I do not violate any pledges made the people who elected me.

The President, we are informed, is opposed to the payment of the adjusted-service certificates of the World War veterans at this time, and I should like to go along with the President, but neither my pledges nor my honest convictions will permit in this instance, for, to my mind, no sound reason has yet been advanced why they should not be paid now.

It cannot be said it would require fiat or printing-press money to redeem these certificates, because the Treasury of the United States is in better position to pay now than at any time since the close of the war and to make payment in sound, honest dollars.

The law only contemplates or requires, in the Treasury, or in the hands of the United States, a 40-percent gold reserve for the issuance of lawful money; and if the Government issued Treasury certificates for the full amount of the adjusted-service certificates—around $2,400,000,000—it would still have behind that issue and all other issues of money, not a 40-percent gold reserve behind every dollar, but a 100-percent gold reserve. Still the opponents of this measure cry "fiat money" and "printing-press money" and hold up before us the picture of Germany and that country's uncontrolled issuance of paper money. If Germany had had the same gold reserve or one half the gold reserve behind the issue of its obligations as the United States has today back of its issue, including the amount required to pay the adjusted-service certificates, that German paper money would be worth par today.

The special session of this Congress authorized the President of the United States to expand the currency by $3,000,000,000, but that authority has not so far been exercised, and these adjusted-service certificates can be paid now without expanding the currency beyond the limit already authorized.

I know what the payment at this time means to the veterans of my State and district, and I can visualize what the payment will mean for the citizenship generally.

The amount which would be distributed in Arkansas is more than $25,000,000, and in the counties of the Fourth Congressional District, which I have the honor of representing, would be distributed the following amounts, respectively:

Crawford County	$303,470.32
Howard County	239,249.52
Little River County	212,245.20
Logan County	329,824.80
Miller County	418,416.48
Montgomery County	147,306.24
Pike County	161,314.56
Polk County	203,243.76
Scott County	161,465.04
Sebastian County	744,547.68
Sevier County	223,859.52

I know of nothing which would go further or do more to relieve the depression in the Fourth Congressional District in the State of Arkansas, and in the Nation, than the payment immediately of the balance due on these adjusted certificates; and in paying them as provided in this bill, safety and stability of our monetary system is in no way threatened or endangered.

The administration, through the N.R.A. and other governmental agencies, is striving to relieve the unemployment situation and restore to the people of the country a purchasing power; and how better can this be accomplished than through the payment of this just debt and placing in the hands of the deserving veterans to the extent of $2,400,000,000 a real purchasing power?

In my candid judgment, the effect of this payment will be more effective than everything else combined which has been so far undertaken by the Government for the relief of the depression and unemployment.

Mr. COCHRAN of Missouri. Mr. Speaker, rather than deceive the veteran, I propose to be honest with him. I cannot conceive how one Member of the House can honestly be of the opinion that the adjusted-compensation certificates can be paid at this time. We all know of the action in the Senate when the amendment to the gold revaluation bill was defeated by 40 votes. True, there were some Members of the Senate who stated they would vote for the payment of the certificates if a bill dealing solely with that subject was presented, but the few who would so vote are not sufficient to change the ultimate result.

We all know the President has written the Speaker he will veto the bill if it reaches him. Why, then, should we by passing this bill extend false hope to the veterans? Is it not better to be honest with those whom we want to be our friends rather than to make them feel they are going to be able to cash their certificates now?

Do not overlook the fact that when the veteran fails to receive the money he will demand an explanation from those who led him to believe he was going to get it. His resentment is liable to turn to hate.

No one realizes more than I do that the payment of the certificates would benefit hundreds of thousands in distress; that the spending of $2,500,000,000 would go a long way in assisting business to get back on its feet. However, when the President says the financial condition of the country will not permit the payment of the certificates, it is useless to argue what benefits might result.

I have frankly advised everyone who has written me on this subject that there is no way that I could justify my vote for the proposition at this time other than on the ground of political expediency.

Many letters have reached me threatening my defeat at the next election unless I complied with their demand that I support the bill. The writers of those letters will not be so severe in their criticism of me when Congress adjourns, for then they will realize I did not deceive them when I wrote that the certificates would not be paid at this time.

I dislike very much to say that Congress is again using the bonus question for a political football, but that is the only conclusion one can reach. This move is merely a gesture. The veterans will find that out when this Congress adjourns.

I cherish the friendship of the veterans too much to even extend any false hopes when I know that in the end the bill will not be enacted into law.

When the day arrives that the financial condition of the country will enable the payment of the certificates no one will be more happy than I. Under the circumstances, Mr. Speaker, I cannot at this time vote to pay the adjusted-compensation certificates.

Mr. POWERS. Mr. Speaker, as a new Member of Congress I have patiently and attentively attended all meetings of both the special and the present session of Congress.

I have listened to the able Democratic leaders plead with and force the Democratic majority go along with the President. I, too, have gone along with the President in legislation which I thought was constructive. I never thought I would see the Democratic majority during this session desert their President the way they are deserting him today. Where, now, are their exhortations to stand by the President? What has become of their assertions that to vote against the President is to vote against the best interests of the country?

I am wondering if, in the future, any Democratic leader will dare to stand before this House and give us the old story that this or that piece of legislation is needed by the President to complete his program, and that all patriotic legislators will stand by the President.

The President has definitely stated in a letter to the Speaker that he would veto the bonus measure if it is passed by the House and the Senate. This letter was read to the House by the ranking minority member of the Ways and Means Committee, the gentleman from Massachusetts [Mr. TREADWAY]. Yet, in face of this absolute, positive disapproval by the President, in the face of his definite threat to veto the bill if passed by Congress, the Democratic majority is deserting the President and supporting the bill.

Is it true that there is an understanding that if this bill should pass the Senate, as it seems destined to pass the House, and when the President has vetoed it, the administration majority in Congress will sustain the veto? Is this the true state of affairs? In other words, as in every campaign year, professional politicians are merely taking the veterans for a legislative ride.

As a veteran who enlisted in 1917 and as one who has vivid recollections of what service in France meant, I resent these recurrent attempts to bait the veteran vote. I happen to hold one of the largest adjusted-compensation certificates, larger than 95 percent of the others that would be paid were this measure to become a law. To vote for this bill would benefit me financially, and I could use the money now. However, during my campaign for Congress I made only two definite commitments. One was that I would vote for repeal of the eighteenth amendment and the other that I would vote against immediate cash payment of the bonus. I have kept the first promise and I am keeping the second today. Let me add also that the method this Patman bill advocates for payment of the bonus through issuance of greenbacks is particularly unsatisfactory. Such uncontrolled inflation now would, in all likelihood, destroy credit and wreck whatever recovery the President's program may have produced.

In closing, let me impress again upon you my sincere resentment of these abortive attempts to make veterans' legislation a political football. This recurrent agitation harms instead of helps the veterans. When stirring up my former comrades on the bonus question, why do not these politicians tell them frankly that it has not a chance, that the Senate has several times turned down this proposal as riders to other bills during this session, and that as the President will veto it, even the House would not pass it over his veto? Why kid the troops? Why not tell them the truth instead of painting pretty pictures which are nothing more than mirages designed to catch the veteran's fancy—and his vote?

I realize the course I am taking is not the popular one, and is certainly not the one that is politically expedient. However, I feel that the veterans will, when this session has ended, more truly evaluate the supposed support given by those who voted for the bonus, and will realize, as I do now, that a much more imperative and more worthy matter which should have been stressed is that of caring for the service-connected wounded, maimed, and injured. Since I have been in office I have handled more than 500 compensation and pension cases for veterans and their survivors. I believe true friends of the veterans would prefer that, instead of taking all this time to make a futile political gesture for payment of the bonus, this Congress should devote its efforts to the question of how to compensate adequately those men who were injured in discharge of their duties during the World War, and how to reimburse those Spanish and other war veterans who are prevented by lack of Government records from proving service connection for their disabilities.

These changes are contemplated in the amendments to the independent offices bill which are now before the Appropriations Committee. I will vote for them on the floor of the House.

Mr. ABERNETHY. Mr. Speaker, joining with more than two thirds of the Membership of the House of Representatives, I voted for the immediate cash payment of the bonus.

During my service in the Congress I have been the consistent friend, as my record will show, of the veterans; and I shall continue to be sympathetic with their needs as long as I have the privilege of being a Member of this legislative body.

When I was first elected to Congress many veterans of my district loyally supported me and I promised them then that I would always be their friend.

I was a loyal supporter of President Roosevelt for his nomination and election, and I actively supported him in his great recovery program in the special session of Congress called shortly after his inauguration one year ago. I have supported his administration at all times, both on the Appropriations Committee and in the House, with the exception of the bonus vote, which carries out a pledge to the veterans.

Many millions of dollars have been spent in the Public Works, Civil Works, and in general Federal relief programs. I agreed with the administration that nothing should be left undone that would help in the fight on the depression. I am convinced that the payment of the bonus at this time will do as much to bring back prosperity as any single program advanced by the administration.

If in the progress toward recovery it is helpful to spend many millions for Public Works, Civil Works, and the Civilian Conservation Corps, and the like, that have put many thousands to work, then by the same token it would seem that it cannot be successfully argued that the payment of the bonus will not also be a step in the right direction.

In 1924 we acknowledged our indebtedness to the veterans. We have expended millions in the administration's recovery program for the benefit of groups to whom the Government owes nothing except the duty it owes generally to all citizens.

Our national indebtedness has been increased by billions in order to pay for this relentless battle we are waging against depression. We have gone so far in the direction of expending huge sums in an effort to create increased purchasing power in the masses that we cannot stop now. I believe in going the whole way and spending what is necessary. If, as our President hopes, these millions we spend will be returned to us out of the earnings of prosperity, then this additional amount needed to pay the veterans a debt legally due them will also be returned out of the earnings of prosperity.

As of January 1, 1934, there are 3,545,284 of these adjusted-service certificates, with a balance due of approximately $2,200,000,000. The payment of this money will go into every part of the Nation. It will be distributed impartially, without favoritism or possible graft. It will increase the purchasing power of the veterans and will benefit all classes. Many millions will be paid in my district alone.

The approximate number of veterans living in the Third Congressional District which I represent are as follows:

World War:	
Carteret County	427
Craven County	733
Duplin County	850
Jones County	265
Onslow County	378
Pamlico County	226
Pender County	373
Sampson County	978
Wayne County	1,268
Total	5,497
Spanish-American War:	
Carteret County	19
Craven County	21
Duplin County	29
Jones County	8
Onslow County	15
Pamlico County	8
Pender County	11
Sampson County	35
Wayne County	40
Total	186

The following figures quoted show the approximate amount of money that will be put in circulation in my Congressional District in the event the adjusted-service certificate is paid:

Carteret County	$206,856.00
Craven County	375,339.60
Duplin County	429,660.72
Jones County	127,638.72
Onslow County	187,137.36
Pamlico County	113,819.76
Pender County	191,996.64
Sampson County	490,603.68
Wayne County	648,879.12
Total	$2,771,931.60

Unlike the other huge sums spent in the recovery program, this is a bona fide debt and will be duly credited as a debt paid. The payment of this debt to our veterans should not be made a political issue. The boys who answered the call were not chosen according to politics. This is a human issue.

Although I was ill some months ago I am again actively in attendance upon the sessions of the House and the Appropriations Committee. I want the veterans in my district to write me their views on this pending legislation, in which they are so vitally concerned, in order that I may have the benefit of their suggestions.

Mr. PEAVEY. Mr. Speaker, there were 3,545,284 adjusted-service certificates outstanding on January 1, 1934. Of this number 3,019,582 have borrowed money on their certificates. They have borrowed almost a billion and a half, leaving the balance due these World War soldiers approximately $2,400,000,000.

Mr. Speaker, by the passage today of H.R. 1, known as the "Patman bill", Congress will not only provide payment of a just debt for which the Government is both legally and morally obligated but Congress in passing this bill will in my opinion do more in relieving the acute economic distress of more individual people in the United States than has been accomplished by the passage of any single bill at any time since I have been in Congress. This means, Mr. Speaker, that $4,364,948.48 will be paid in cash to the holders of these certificates in the Tenth Wisconsin District which I represent.

It means that everyone of the 14 counties in my district will receive from $130,000 to $831,000 in cash with which to pay existing debts, redeem their past-due taxes, pay their overdue-interest obligations, and maybe have enough left to insure food for the family for the next month or two and buy the baby a new dress.

It means that $4,364,948.48 new cash will be made available immediately for the purchase of all the necessities of life.

The amount that will be paid into each county of the Tenth Wisconsin District under the Patman bill is as follows:

Douglas	$831,040.72
Burnett	182,556.72
Polk	473,955.28
Washburn	198,077.52
Sawyer	158,383.52
Bayfield	267,707.04
Ashland	375,603.36
Price	308,346.56
Rusk	286,885.04
Taylor	315,500.40
Lincoln	375,924.48
Oneida	283,638.16
Iron	177,204.72
Vilas	130,124.96

The committee that passed on the original law said we should at least compensate the soldiers to the extent of that difference between what the lowest-paid laborer received and what the average private received. Congress allowed them the $1 a day for home service and $1.25 a day extra for service overseas. If this money is paid as of the time they rendered service, the full amount was due October 1, 1931. The reason it is not due now on its face is because there were 7 years from the time the services were rendered to January 1, 1925, the date of the certificates, the veterans were not allowed interest. So if you will go back and date the certificates as of the time they rendered the service and give the veterans the customary rate of interest paid to everyone else connected with the war, the full face value of each certificate was due October 1, 1931, and this bill provides that no interest shall be charged the veterans subsequent to that time. I believe it is the best means that has ever been proposed to put purchasing power into the hands of the people in every town, village, and city in northern Wisconsin.

The Patman bill provides for controlling expansion of the currency and the immediate payment to veterans of the face value of their adjusted-service certificates in new currency—United States notes. These notes will not bear interest and will be lawful money of the United States and shall be maintained at a parity with the standard unit of value fixed by law. No new principle of issuing money is involved. Such notes shall be legal tender in payment of all debts and dues, public and private, and shall be receivable for customs, taxes, and all public dues, and when so received shall be reissued. Such notes, when held by any national banking association or Federal Reserve bank, may be counted as a part of its lawful reserve.

The bill further provides that when the index number of the wholesale commodity price level rises about the level of 1926 the Secretary of the Treasury will be privileged to contract the currency in the following manner:

First. Abolishment of the circulation privileges extended to certain bonds of the United States under the provisions of section 29 of the Federal Home Loan Bank Act and retirement of such bonds as security for circulating notes as rapidly as practicable.

Second. Termination of the issuance and reissuance of national-bank circulating notes and the retirement of such notes from circulation as rapidly as practicable.

Third. Termination of the issuance and reissuance of Federal Reserve notes secured by direct obligations of the United States and in other ways.

The amount paid to the veterans will be permanent circulating medium and of the same wording, form, size, and denominations as United States notes issued under existing law and now in circulation.

If this bill is enacted, a veteran who has not negotiated a loan on his adjusted-service certificate will be permitted to receive the full amount now in cash. A veteran who has borrowed on his certificate will receive the amount of the certificate in cash less the amount of his loan with interest to October 1, 1931. Under this bill no interest is charged, since the full amount of the certificates was due at that time, if the veterans are paid as of the time they rendered their services, together with the customary rate of interest received by others on war contracts, tax refunds, and the like.

The passage of this bill will put cash money into the hands of nearly 4,000,000 World War veterans, who will use it to purchase comforts and necessities of life, pay debts, taxes, and otherwise place it into the channels of trade and production. This money will find its way into the banks all over the Nation and will be used as a reserve for the issuance of additional credit, thereby helping everybody in every community.

WHAT THE BILL DOES

First. It will save the Government more than a billion dollars, or $112,000,000 a year for 11 years.

Second. It will save the Government more than $10,000,000 in administration expenses of the Adjusted Compensation Act between now and 1945.

Third. It will pay a debt heretofore confessed to the veterans by the Government for services rendered. It is no bonus. The term "bonus" is a misnomer.

Fourth. It will be granting to the veterans the right to deposit a Government obligation and receive in return therefor new currency, the same right as is now enjoyed by Federal Reserve banks and all national banks.

Fifth. It will prevent the veterans from losing a valuable equity by releasing them from the payment of compound interest on their loans. Veterans who have borrowed 50 percent under the present law will have very little remaining in 1945. It is not right for the Government and the banks to consume these valuable equities by requiring the veterans to pay compound interest on their own money.

Sixth. It will require no bond issue, no increase in taxes, no additional interest payments by the Government. The debt must be paid sometime. Everybody will be helped if it is paid now.

Seventh. The Treasury holds in the general fund over three billion one hundred millions in gold and there is in the Federal Reserve more than four billions additional gold; enough to warrant the Government in issuing eighteen and one-half billion dollars of currency under the 40-percent gold base provided under the gold standard.

There is in actual circulation today less than $5,000,000,000 of currency. The Government can pay the two billion four hundred million necessary to retire the adjusted-service certificates in new currency and have a dollar in gold to back every dollar of currency then outstanding. No nation in the world ever issued better money than this new money would be.

Purchasing power must be placed in the hands of the people. In this way it can be distributed quickly without the possibility of graft or favoritism. It is the best plan that has been proposed to be used as a vehicle to convey additional money into the hands of those who will buy the goods.

The national banks of the United States are capitalized for about $1,590,000,000. Under the present law these banks may deposit with the United States Treasury bonds bearing interest at a rate not in excess of 3⅜ percent and receive in return therefor $1,590,000,000 in new currency, the same kind of money we propose to issue in this bill. The only obligation is that the bank will keep on deposit at the Treasury 5 percent of the amount of such money for redemption purposes. This places the Government in this idiotic position: The Government sells to the bank a thousand-dollar bond drawing 3⅜-percent interest, or $33.75 interest for a year. The bank immediately redeposits the bond with the same United States Treasury that sold it to the bank and receives in return therefor $1,000 in new money. Fifty dollars of the money is left on deposit with the Treasury. The bank gets the use of the money and also gets interest on bonds deposited. There is a small charge of one half of 1 percent against the bank for expenses in connection with the issuance and reissuance of the money. Therefore banks can take Government obligations due in 1945 and receive new money in return for them and at the same time get interest on the obligations. Why is it not fair to let the veteran take his obligation, made payable in 1945, and receive money in a similar manner? There is no difference in the two obligations. They are both made payable in 1945; they are both backed by the credit of this Nation; they are both obligations of the Nation. Money purchased one, service in time of war purchased the other. If it is fair to let the banks put up their Government bonds and get cash, why not give the soldiers the same right? In doing so the Government would not only aid the soldiers but would assist the banks themselves.

Many banks are afraid to loan out their money due to depressed values and conditions, but every soldier will be compelled by necessity to put most of the money he receives under this bill into immediate circulation to pay existing debts and live.

Mr. FULLER. Mr. Speaker, I have always advocated the payment of the adjusted-service certificates due the World War veterans and have so voted on each and every occasion when the opportunity presented itself. I am supporting H.R. 1 for the full payment of these certificates not on the ground, as some advocate, that the certificates are due but for the reason that it will put more money into circulation and do more to relieve the financial panicky condition than any other measure.

To pay these certificates, which are sometimes referred to as the "bonus", does not mean the printing of fiat or greenback currency, but such currency will be backed by gold reserve and of just as much value as any circulating medium guaranteed by the Federal Government.

It will probably require $2,200,000,000 to pay these certificates. It will mean that 3,545,284 holders of these certificates will receive the full payment. This money will go to every nook and corner of the country, be placed in immediate circulation, and will change hands at least 10 times in each community and in each county. The trouble with the country today is a lack of circulation of money, there being less in circulation today than a year ago. Contraction of currency is injurious to this country.

These certificates are an obligation that the Government now owes, although they are not due until 1945. The amount of these certificates is included in the national public debt. To pay these certificates, under the terms and provisions of this bill, causes no taxation and no burden upon the people of the Nation. The placing of this much more money in circulation, in my opinion, will not injure nor retard the national recovery or the financial program of the administration. If these certificates are not paid, it means when they become due in 1945 that there will be practically nothing coming to the veterans who have borrowed money upon their certificates, as the interest will practically eat up the principal. We are now collecting and setting aside $112,000,000 annually for the retirement of these certificates at maturity. There will be no bond issue, no increased taxes, no unbalanced Budget, but simply the retirement of a public obligation, for a worthy cause, to deserving veterans, and placing more money in circulation.

In the Third Congressional District of Arkansas, which I have the honor to represent, the following amounts will go into each county: Baxter County, $120,233; Benton County, $482,261; Boone County, $205,200; Carroll County, $218,880; Madison County, $174,680; Marion County, $110,672; Newton County, $144,597; Searcy County, $151,848; Van Buren County, $164,160; Washington County, $537,000.

Most of the relief granted by Congress has been a paper credit, an addition to the public debt, but adding nothing to currency circulation. The immediate payment of this just and long delayed obligation will not only relieve the veterans and their families but it will go down to the grass roots of industry and agriculture.

Mr. ELLENBOGEN. Mr. Speaker, H.R. 1, on which we are voting today, provides for the immediate payment in full of the adjusted-service certificates, popularly known as the "bonus." If we examine the previous legislation on this subject, we find that the term "bonus" is not justified, because the adjusted-service certificates were given to the veterans of the World War, not as a bonus or gratuity, but as a payment for services rendered. We also find that, properly calculated, the adjusted-service certificates—or bonus—are not due in 1945, as provided in the World War Adjusted Compensation Act of 1924, but were due in October 1931, about 2½ years ago.

THE PAY OF THE SOLDIER DURING THE WAR

During the World War, every enlisted private received a dollar a day for home service and $1.10 for oversea's service. From these $30 to $33 per month, the soldier had to pay for lost clothing and shoes, for laundry, and other incidental expenses. An average of $6.66 was deducted from his pay for insurance. He often contributed a definite sum each month for his dependents. When pay day came around, the enlisted man found that there was very little left in his pay envelope.

CALCULATION OF THE AMOUNT OF THE ADJUSTED-SERVICE CERTIFICATE

The pay given to the soldiers during the war was admittedly inadequate and too low. So Congress calculated the wages paid to a civilian laborer during the wartime, and then deducted the pay which the soldier had received and the value of his clothing and his board. It found that there was due and should be paid to each soldier who had been in active service in excess of 60 days, in the military or naval forces of the United States after April 5, 1917, and before July 1, 1919, $1.25 for each day of oversea service, and $1 for each day of home service, with certain limitations as to the total amount allowed. These provisions are contained in the act of May 19, 1924, known as the World War Adjusted Compensation Act, popularly mistermed the "Bonus Act."

According to that act, let us take an average case, the case of a veteran who served 210 days at home and 200 days overseas. For the 210 days at home he was entitled to $210

and for the 200 days overseas he was entitled to $1.25 per day, or a total of $250. For his entire period of service that veteran would thus be entitled to $460. Since he was paid $60 at the time of his discharge from the Army or Navy, the $60 must be deducted from the total of $460, leaving a net balance due the veteran of $400.

THE MONEY WAS DUE THE VETERAN AT THE TIME OF HIS DISCHARGE

This amout of $400 was actually due the veteran at the time of his discharge and should have been paid to him at that time and not years later. But not even in 1924 was Congress ready to pay this amount, clearly due the veteran, and decided to give him instead of cash payment a so-called "adjusted-service certificate." The amount of the certificate was arrived at in the following way:

To the $400 due, according to the calculation just made, was added, under the act of Congress in 1924, 25 percent as some compensation to the veteran for compelling him to wait, instead of paying him what was due him. As a matter of fact, the veteran had already waited 6 years, to wit, from 1918 to 1924, and therefore should have been paid the $400 plus interest at the rate of 6 percent for 6 years, or a total rate of interest of 36 percent. Thirty-six percent on $400 is $144, so that at the time of the passage of that act of Congress there was due in the average case, not $400 but $400 plus $144, or a total of $544. So, you see, that at the very time that the act of Congress was passed in May 1924 the additional 25 percent was insufficient. Instead 36 percent should have been added, making a total of $544, as against $500 contemplated by the act.

At the end of 1918, or the early part of 1919, whenever he was discharged, the veteran was entitled to an average of $400, as I have just shown, but this sum was not paid to him at his discharge. It took prolonged agitation until in 1924 Congress passed the World War Adjusted Compensation Act, which I have just discussed, in which this debt to the veteran was acknowledged. By that time the debt had grown from an amount of $400, due to the average veteran, to $544. Congress, however, determined that the amount should be fixed at only $500.

But again this money was not paid to the veteran in cash, although it was admitted that he was entitled to it. Instead of receiving cash, the veteran was given a so-called "adjusted-service certificate", payable in 20 years from its date, but in no case before January 1, 1945. The average amount of that certificate was $1,000, and it was arrived at in this way:

It was calculated that the $500, admittedly due the veteran, would purchase a paid-up endowment insurance policy, payable in 20 years of $1,000, assuming that the money was being invested at an interest rate of 4 percent.

THE CERTIFICATE NOT A BONUS BUT OVERDUE PAY

It is, therefore, clear to everyone that has taken the trouble to look up the facts, that the adjusted-service certificate was not a bonus given to the veteran but was pay which was due him—indeed, pay which was overdue. The term "bonus" should never have been applied to the certificate. There was no gratuity or bonus about it. It was regular pay, figured according to the wages generally paid common labor during war time.

This money should have been paid at the time of the discharge of the veteran from active service. It should have been paid to him in 1924, when the act was passed by Congress. In 1919, when discharging the soldiers, and again in 1924, when passing the act, the Government postponed the payment of a clear obligation. Instead of giving the veteran what was due him in cash, it gave him an insurance certificate.

THE TOTAL AMOUNT OF THE CERTIFICATE IS DUE TODAY AND NOT IN 1945

Mr. Speaker, if we take paper and pencil and figure this out, we will find that the total amount of $1,000 of the average certificate is due today and not in 1945.

I have just shown that on a $1,000 certificate the sum of $400 was due at the time of the discharge from active military service at the end of 1918. If you add to that sum 6 percent interest, compounded annually, you will find that that amounts to about $1,000 in October 1931. So that the total amount of the certificate was actually due about 2½ years ago.

SIX PERCENT IS A PROPER RATE OF INTEREST FOR THIS CALCULATION

Mr. Speaker, it is not improper to use a rate of interest of 6 percent in making this calculation. It is not improper to do so because the Government has used this rate of interest. For instance, in case it is found by the Government that a taxpayer has underpaid his taxes, he is assessed the additional taxes plus 6-percent interest. On the other hand, our Government has paid several billion dollars in tax refunds to large income taxpayers, allowing in each case the amount of the refund plus 6-percent interest. It is also true that when the veteran borrowed money on the security of his certificate, he was charged not only 6 percent but as high as 7 percent. It is, therefore, just to calculate the total amount due the veteran by using a rate of interest of 6 percent a year.

THE INTEREST DUE ON LOANS AGAINST THE CERTIFICATES SHOULD BE CANCELED

Indeed, Mr. Speaker, not only should the face value of the certificates, less loans already made, be paid to the veteran, but there should be no deduction of any interest which has been charged to the veteran on loans which he obtained on his certificate. I have just shown, Mr. Speaker, that on the average certificate of $1,000 there was actually due the veteran at the end of 1918 the sum of $400. This indebtedness was admitted and confessed by Congress in the act of May 19, 1924, about 6 years later. That act provided that no loan should be made to any veteran on his certificate until 2 years had expired after the date of the issuance of the certificate. Therefore, no veteran could obtain any loan during the years 1925 or 1926. The first year which a veteran could borrow on his certificate was in 1927. The loan value for the first few years on a $1,000 certificate was as follows:

1927	$87.99
1928	120.06
1929	153.59
1930	188.67
1931	225.38

As I have already shown, the amount actually due the veteran in 1925 was about $544, if we take straight interest at 6 percent. If this amount is calculated on the basis of compound interest at the rate of 6 percent per annum, it is much higher. In 1927 that amount, of course, should be increased by a further addition of 12 percent.

I want to make it clear, Mr. Speaker, clear beyond the peradventure of a doubt, that when a veteran was permitted to borrow $87.99 against his certificate in 1927 he was not in reality receiving a loan but only a payment on account, because in 1927 the amount due the veteran was not only $87.99—the amount of the so-called "loan"—but was actually $592, if computed on a basis of straight interest.

For the years from 1927 to 1931, inclusive, the loan value of the certificate was, therefore, much less than the amount actually due the veteran. This is equally true of the years 1932 and the following years.

In 1932 the loan value of the adjusted-service certificates was increased by the act of Congress of July 21, 1932, to 50 percent of the face value. On the average certificate of $1,000 the loan value was thus fixed at $500.

I have just shown, Mr. Speaker, that if the indebtedness due the veteran is figured with compound interest, the entire certificate of $1,000 became due in October 1931. Therefore, when a veteran was permited to borrow $500 under the act of 1932, he did not actually borrow any money on his certificate, but since the certificate was overdue, the veteran was in reality receiving a payment on account of the money due him and not a loan.

THE ELLENBOGEN BILL PROVIDES FOR THE CANCELATION OF THE INTEREST ACCRUED ON LOANS

Mr. Speaker, I cannot see how any person can overlook the logic of this situation. If we are going to vote for the payment of these certificates in full now, and not in 1945—and I sincerely hope we are going to do so today—we can do

so only on the basis that the certificates are in reality due now and not in 1945. If the certificates are due now—and I believe that they are, as I have proven in this speech—then each so-called "loan" made to a veteran on the security of his certificate was not in reality a loan but a payment on account of the money due, and, in fact, overdue, the veteran. Realizing this situation, I have introduced H.R. 8579.

This bill provides that the interest which has heretofore accrued on loans made to veterans on their certificates shall be canceled and annulled and shall not be deducted from the amount due them under their certificates. This is a very important matter, since these loans were in reality payments on account. We should now admit that they were such and, therefore, should stipulate in the law that the interest should be canceled and should not be deducted. The amount involved is considerable and is of great importance to each veteran who holds an adjusted-service certificate.

ELLENBOGEN AMENDMENT TO H.R. 1 PROVIDES FOR CANCELATION OF INTEREST DUE ON LOANS

For this reason, Mr. Speaker, I shall offer an amendment to H.R. 1 to cancel the interest due on loans made on the security of certificates, so that each veteran will receive the face amount of his certificate less any loans actually made. And no veteran will have deducted from the money due him any interest charges. (This amendment appears on p. 4332 of the CONGRESSIONAL RECORD of Mar. 12, 1934. It was not adopted by the House of Representatives.)

THE PAYMENT OF THIS MONEY WILL REVIVE TRADE AND INDUSTRY IN EVERY PART OF THE UNITED STATES

Mr. Speaker, the payment of the so-called "bonus" at this time will mean the distribution of approximately $2,200,000,000 throughout the length and breadth of the United States. This money will go into every State, into every county, and into every city, village, or hamlet where a veteran resides. My own State, Pennsylvania, it is calculated, will receive a total of about $172,882,732.50. My home county of Allegheny will receive about $24,670,659.50.

Most veterans who will receive this money will spend a large part of it. They will spend it for the payment of food, clothing, and shelter. They will spend it for the necessities of life and in many cases for the payment of debts which they owe and which they are anxious to pay. The entire country will benefit by the payment of these $2,000,000,000. This money, Mr. Speaker, will not go into the coffers of giant banks or huge corporations which would hoard it. The money will be paid to the common people who will not retain it. No, Mr. Speaker; these people will immediately pay it to the butcher, to the groceryman, to the department store, or spend it in a hundred different ways. This money will circulate at once. It will stimulate trade and commerce. It will improve the business of every merchant in the United States. It will empty the shelves of many a store. The retail merchants will then have to reorder from the manufacturer in order to replenish their stock of goods. Thus, the manufacturer will have to resume or enlarge his operations.

It is no exaggeration to say that the expenditure of these $2,200,000,000 will give a tremendous impetus to trade and commerce, and will start moving the wheels of many industries. As a result, not only will the veterans be benefited but there will be a tremendous revival of business throughout the United States.

THE PAYMENT OF THE BONUS WILL NOT AFFECT THE BUDGET

Mr. Speaker, under the Constitution, Congress has the exclusive power to coin money and to regulate the value thereof. The bill which we are now discussing provides that the so-called "bonus" shall be paid in United States notes. The Secretary of the Treasury is directed to issue such notes in such amount as is necessary to pay the adjusted-service certificates.

The currency or notes which will thus be printed by the United States will take the place of adjusted-service certificates, which are direct obligations of the United States. Under the present law a Federal Reserve bank or a national bank can take the Government bonds which it owns to the Treasury of the United States, deposit them as security, and obtain such amount of Federal Reserve or national-bank notes—legal United States currency—as is equal to the face value of the United States bonds deposited. It is, therefore, the present fixed policy of the United States to permit the issuance of currency on the security of Government obligations. There can, therefore, be no legitimate objection against the issuance of currency against the security of these Government obligations, to wit, the adjusted-service certificates. The bill, therefore, provides that the Treasury shall issue the necessary currency and shall deliver the currency to the veteran in exchange for the certificate.

Thus the Government is not required to borrow the money which is necessary to pay off the bonus. The Government is not required to levy even a cent of taxes to pay off these certificates, and, what is even more important, the Government will never be required to borrow the necessary money or to levy the necessary taxes, because the issuance of this currency of over $2,000,000,000 is necessary to provide sufficient circulating currency in the United States. This currency is not only necessary today, when we are suffering from a lack of an adequate amount of currency, it will also be necessary in the future, since the United States is expanding and will, if anything, need more currency in the future, and not less.

THE MONEY ISSUED TO PAY THESE CERTIFICATES IS ADEQUATELY SECURED BY GOLD

Mr. Speaker, I hold in my hand a statement issued by the Secretary of the Treasury of the United States which shows that the United States Treasury today has total gold funds of about seven and one half billion dollars. About three and one half billion dollars of gold are charged as reserve against outstanding gold certificates or currency. There are over $3,000,000,000 in gold in the Treasury that are free and that can be used as a gold backing for the issuance of this currency.

The total amount of currency outstanding today in the United States is about four and one half billion dollars, whereas the total gold in the Treasury is seven and one half billion dollars. The issuance of $2,200,000,000 in currency or circulating notes, which is required to pay off these bonus certificates, will therefore be covered dollar for dollar by the gold now held in the Treasury of the United States.

Mr. Speaker, I will sum up my arguments. I shall vote for the payment of the adjusted-service certificates—improperly called "bonus"—in full, because this money is due the veterans now, and not in 1945. I shall vote for it because the vast majority of the veterans are unemployed and in dire need and distress. They need money now, and not in 1945.

These men went forth in the service of their country at the risk of their lives and limbs. They served this country in the trenches, in slime, and filth, and dirt. They suffered injury and disease. They saw many a comrade fall dead at their side, and did not know whether they would not be next. These men, Mr. Speaker, the best manhood of America, the heroes of the World War, are entitled to fair and just consideration at our hands. They have served their country well. The small pay which is due them was due in 1918, and not in 1945. The manufacturers of war materials were paid when they presented their bills, and not 27 years later. Why should we treat our soldiers differently?

These men went into war without quibble and quarrel. They went forth cheerfully. When their country called they were ready to serve. Today these veterans are calling on us, and I, for one, will heed the call.

Mr. Speaker, I shall vote for this bill, and I hope that my colleagues will do likewise.

Mr. KNUTSON. Mr. Speaker, heretofore I have at all times taken the position that the bonus should be paid at maturity and not before. As a matter of cold business that position was unassailable, but conditions have greatly changed since the bonus question was before the House more than a year ago. Within the past year we have embarked upon a relief program, the cost of which will run into many billions of dollars. The purpose of these measures is to extend relief and to get more money into circulation. I know

of no way whereby we can get the necessary increase in circulation so quickly and completely as through the payment of the bonus, and in considering the question it should be borne in mind that this is the only relief measure, suggested or tried, that will liquidate itself by the cancelation of an obligation that must ultimately be paid by the Federal Government.

Mr. Speaker, I assume that conditions are somewhat similar over the country. Money is very scarce, and all local credit is completely frozen. The payment of the bonus is an obligation that must be met. If its payment at this time will give relief by placing a vast sum of money into immediate circulation, why not pay it now? Conceded that it is not due. Let us also concede that the face value of the certificates includes interest to 1945, date of maturity, but the cold fact remains that payment at this time is far preferable to some of the very questionable relief projects into which we are pouring the people's money as into bottomless pits, because it will not alone give relief but will pay a debt which must ultimately be paid. Let us pay the bonus now while we yet have the money with which to make payment, for to do so at this time would greatly increase our active circulation of money which, to my mind, is the first requisite to recovery.

Let us remember that it has ever been the policy of the American people to deal generously with their defenders, their widows, and their orphans.

Mr. CHASE. Mr. Speaker, 1 year ago I voted against the misnamed "economy" bill because of the horrible injustice it was sure to do disabled veterans' and soldiers' widows.

Today I shall vote for the immediate payment of the adjusted-service certificates.

During the World War, like many others in public life, I spoke throughout my home State in hundreds of cities and villages, and from thousands of platforms, pledging the boys who were fighting our battles that they could depend upon us for unselfish and consistent support, and that if they died in the service they could count upon the protection of a grateful Nation for their widows and orphan children.

Those statements were promises, made to be kept.

A turn of fate has put me in Congress when those boys, now veterans, need help. Since taking the oath of office, I have voted for every proper measure designed to protect the interest of disabled and needy war veterans and veterans' dependents, and have opposed every measure prejudicial to their interests.

The question this afternoon is not the payment of a bonus. That word is a misnomer. The proposition looks to equalizing somewhat the compensation paid to the soldiers during the war with that paid to civilians, and there is no longer any question about payment. That was settled by Congress 10 years ago. The only question is when payment shall be made. Shall it be made now when they need is desperately or be delayed to a time when we fondly hope that economic conditions will be greatly improved and their need be less, but when, at the rate upon which loans have been made on certificates, the interest will have eaten almost their entire equity?

Every sound argument that I have heard advanced in opposition to this measure applies as well to payment in 1945 as to payment in 1934. For example, if the veterans will waste their money now, they will do so then.

Fiat currency or printing-press money. Passage of the President's monetary bill a few weeks ago completely refutes that possibility, because it puts back of all United States notes an adequate dollar-for-dollar gold-bullion reserve.

But to be brief, 10 years ago, payment of these certificates was guaranteed to service men. They need the money now. Payment to them will relieve their distress, constitute no additional burden upon the Federal Treasury, involve no issuance of bonds, entail no payment of interest, but, on the contrary, will save the Government of the United States $112,000,000 a year for the next 12 years.

Mr. ANDREWS of New York. Mr. Speaker, I voted against the gag rule in January in the hope of being able to vote on liberalization of veterans' benefits and pensions as affected by the Economy Act, and I favor and will vote for such liberalization for Spanish War veterans' pensions and, generally speaking, along the lines suggested by the American Legion four-point program for the benefit of World War veterans.

As the bonus proposal now stands here I will not vote for it. It may not be out of place for me to outline to you just what the bonus is. The actual bonus was figured by the Government in 1924 based upon $1 per day additional pay to all veterans who served in this country and $1.25 a day to all veterans for each day's service abroad. In 1924 veterans were given credit for approximately 25-percent interest on the bonus figured actually due them in 1919 and adjusted-compensation certificates were issued, stating the face value of that bonus in 1945 at compound interest from 1924.

I favored the payment of 50 percent of the bonus through payment of which any veteran receives his bonus and accumulated interest up to and including the year 1934. Personally I would wipe out the interest on veterans loans. The total figure on adjusted-compensation certificates today represents the value of the bonus today with interest compounded for 10 years more to 1945 and I do not look upon the added amount as owed by the Government now. I would willingly vote for an amendment which I had hoped might be offered which would make payable to the veterans once a year an amount equivalent to 1 year's accumulation toward the 1945 value as it will have to be set up in surplus in the Treasury. This, Mr. PATMAN says, will be set up in the Treasury.

I regard myself here as the representative of all of the people in my district and not necessarily as the representative solely of the veterans.

We are engaged in a tremendous effort to bring the country out of the depression; and I shall vote to oppose the bonus in its present form, and I will not be one of those who vote for it simply to curry favor with my comrades, the veterans, with whom I have the greatest sympathy. The proposal has already been badly defeated in the Senate and has little chance of going through, and in addition it would be vetoed by the President. There are some Representatives here in Congress and, I regret to say many Republicans, who will vote for the bonus knowing full well that it will not pass and then justify that vote by passing the buck to the President. I will not be one of them.

Mr. SMITH of Washington. Mr. Speaker, I was the thirty-sixth Member of the House to sign the petition of 145 Members required to discharge the Committee on Ways and Means from further consideration of the bill to pay the adjusted-service certificates to the veterans of the World War and bring it before the House today. I wish to compliment the gentleman from Minnesota [Mr. LUNDEEN], who filed the petition, the gentleman from Texas [Mr. PATMAN], who drew the bill and introduced it, and the members of the Ways and Means Committee who have again showed their fairness by not rendering an unfavorable report and thereby defeating the purpose of the petition but instead permitted the bill to follow the regular course intended by the rule, and come before the House at this time.

In the pre-election campaigns in 1932, I pledged myself in favor of this legislation, and that pledge, as well as every other pledge I made to the citizens of my district, I have faithfully kept.

Mr. Speaker, there are many reasons why I favor this measure.

First. This bill is in conformity with the letter and spirit of the national recovery program as it will increase purchasing power.

Second. It will expand the currency in a sound and rational manner and distribute the expanded currency throughout the length and breadth of the country, which will be expended with merchants, storekeepers, business firms, landlords, and professional men and circulate freely among the citizens of every community.

Third. It will discharge an obligation admitted to be just, for services rendered and which should have and could

have been paid in 1922 by the Harding administration (see minority report, rendered by Congressman Claude Kitchin Mar. 20, 1922, H.Rept. 804, pt. 3, 67th Cong., 2d sess.), but instead, the income taxes and surtaxes in the higher brackets were reduced, a policy which was followed all through the Harding, Coolidge, and Hoover administrations by Secretary of the Treasury Andrew W. Mellon.

Fourth. It will result in a saving to the Federal Government of $112,000,000 per year until 1945, or over $1,000,000,000, and at least $10,000,000 in administration costs.

Fifth. It enables the veteran to deposit an obligation of the Federal Government and receive for it new currency, the same as the Federal Reserve banks and national banks are able to do, instead of that obligation being absorbed by interest charged between now and 1945, which will otherwise happen in most cases.

Sixth. The gold in the general fund of the Treasury amounts to over $3,000,000,000, against which no currency has been issued, according to the latest official statement of the Treasury Department, which is exclusive of the gold owned by the Federal Reserve banks. Consequently, upon the 40-percent gold base prescribed by the Federal Reserve Act, the Government can issue at the present time $7,500,000,000 new additional currency, while the currency necessary to retire the adjusted-service certificates is only $2,200,000,000. In other words, the new currency would be backed by the same gold reserve as all our other currency, and there is no justification whatsoever for the false propaganda being published that this new currency would be fiat or printing-press money, which is absolutely and wholly untrue.

Mr. Speaker, there is not a single sound, valid objection to this legislation, and I welcome this opportunity to support it.

The amount which would be distributed to veterans in the nine counties of my district is as follows: Clark, $976,453.52; Cowlitz, $772,763.32; Grays Harbor, $1,452,764.04; Lewis, $969,623.48; Mason, $243,653.20; Pacific, $362,573.40; Skamania, $70,020.02; Thurston, $759,321.22; Wahkiakum, $93,537.64; a total of $5,700,709.84.

Mr. BAILEY. Mr. Speaker, under the privilege given me to extend my remarks, I desire to make the following statement:

I have felt that because the Democratic Convention at Chicago refused to adopt a plank calling for payment of the bonus, and, further, because the great leader of our party, Mr. Roosevelt, in the campaign prior to election, took an attitude contrary to its passage, that I was bound not to vote for that bill. That seems to me to have been the promise which the Democratic Party made to the people, and as I heartily endorsed that platform and that leadership, that promise binds me.

Since that time, however, the administration has undertaken an enormous program of expenditures to restore prosperity; $5,000,000,000 to the Reconstruction Finance Corporation; $3,300,000,000 to the Public Works Administration; $2,000,000,000 to the Federal Relief; $2,000,000,000 to the Home Owners; $2,000,000,000 for farm mortgages. Additional demands are continually being made, and all of this has been done in accordance with the theory that such expenditures contribute to the general prosperity of all.

If we are going to be just, how can we deny to do for everyone what we have done for anyone? How can we give to anyone, and not give to everyone? We must stop all aid, or we must aid all our people.

I have, therefore, after mature study, reached the conclusion that the payment of the adjusted-service certificates would not only be just to the soldiers, but would do more than all else to restore prosperity. Many soldiers are in need; many would be removed from the relief rolls; and, in addition, many debts would be paid, many necessities bought, and much needed currency would be put in circulation for the benefit of storekeepers, merchants, and all other lines of business.

In my campaign, however, I repeatedly endorsed the Democratic platform and its economies, and nothing but a new election can release me from that promise. That election comes this summer. I am now a candidate before the people of my State for the nomination of Senator representing that great State; and in the campaign for that office I shall advocate this payment, discuss that question fully, and the people can choose between the arguments presented.

For these reasons I shall vote to permit consideration of this measure on the floor today, and then shall vote against the proposal; but I shall vote "yea" on any proper bill to pay these certificates after the coming election. The same reason which impels me to keep my promise this time will make it certain that I will keep it in the future.

Mr. DOBBINS. Mr. Speaker, I have voted today to take up the immediate consideration of H.R. 1, the so-called "Patman bonus bill", and to discharge the Committee on Ways and Means from the further consideration of that measure. My vote was thus cast for the reason that it was quite apparent that a majority of the Members desire that this measure should come up for immediate consideration. Although I do not expect to vote for the bill itself, I believe that an opportunity should be given to every Member to record himself either for or against the highly controversial question that this bill presents, namely, the proposal for the immediate payment of the adjusted-service compensation certificates by means of new currency, of a character and amount such as the Government has never before issued for any purpose.

At the outset, let me say that it has always been my conviction that the compensatory payment which the Congress deliberately determined that the Nation owes our surviving soldiers of the World War when this act was passed many years ago ought to have been paid at that time in cash. The country was then well able to pay it. Excessive war profits out of which it should have been paid could then have been reached by means of an appropriate tax measure. In fact, the illustrious Member from my own State who is now the Speaker of this House then proposed a method of immediate cash payment of the bonus in a rational and logical way that would put the cost of it where it belonged, without burdening the average, ordinary taxpayer in any way. That plan, which was turned down by the majority control of the Congress, then in Republican hands, was both ingenious and just. It would have taken the average income-tax returns of all citizens and corporations during the war period of 3 years, compared them with their average income during the 3 years preceding the war, and reckoned the increase during the war period as war profits. To each individual and corporation it proposed that there be allowed an exemption of $100,000, and that 25 percent of the balance be collected as an excess-profits tax for distribution as compensation among the men who, by their service, bore the brunt of the war that made great profits possible. This would have raised approximately $4,000,000,000 in revenue for immediate distribution. It is a pity the plan was not adopted, but the war profiteers had too many friends in high places.

Now the situation is vastly changed. The war profits have mostly been paid out in dividends or dissipated in other ways, so that now at this late date they cannot be reached. The agitation for the payment now of that which should have been paid 10 years ago comes at a time when the country is barely beginning to recover from a depression that has rocked the very foundations of our financial structure.

It is claimed that by the means now proposed this debt owing to the soldiers can be paid in advance of the time fixed for its payment and without costing the Government anything because Treasury notes in the form of currency are to be issued as payment. It would be just as sensible to say that one who goes to a bank and borrows $500 to buy an automobile is getting his automobile without cost because he is not purchasing it with money that he has in his pocket. The fact remains that the note must be paid at some time, just as these Treasury notes must eventually be paid.

Because of my belief that this issue should have been squarely met when it first arose, and that provision should

have been made then for payment of the Nation's debt to its soldiers in cash, and not in the form of time certificates, I have always favored some acceptable method for the retirement of this debt without waiting for a time many years hence for its payment. It is still my belief that these certificates will be paid in some such manner before their time for maturity arrives, and I am in favor of their payment at this very moment according to any reasonable and practicable plan which will meet with the approval of the Chief Executive. We know, however, that if the bill upon which we are voting today is passed, it will be vetoed by the President. Of that we have his definite and positive assurance. It is also apparent that if it should be passed and vetoed, it cannot be passed over that veto. Knowing that, it is easy indeed for any Member to vote in favor of this measure and thus make a meaningless gesture of generosity to needy veterans, with the certainty that the country at large will not suffer from his vote because the Chief Executive, or perhaps the other House of Congress, will prevent the bill from becoming a law.

I made very few pledges to the electorate during the campaign of 1932, and none respecting legislation of this character. But I did make a definite pledge that I would never shirk my responsibilities as a Representative in Congress by casting an affirmative vote for any measure in the hope and expectation that such a vote would be nullified by a Presidential veto, and I shall respect that pledge whether the President from whom the veto is to be expected belongs to my own party or not.

I candidly admit that the vote which I shall cast today is influenced by the announcement of President Roosevelt's position respecting this legislation. Under ordinary circumstances and in normal times I should probably attach less importance to the views of our Chief Executive, but these are not ordinary nor normal times. We are in combat with the hosts of depression, an enemy as formidable as any against which American soldiers have battled in the past. In the present conflict we have an outstanding leader, one in whom the people of the country have a confidence that is magnificent and inspiring in its scope and fidelity. It is so because that confidence is deserved; and it is my profound conviction that in consistently upholding the leadership of Franklin Roosevelt I contribute more to the return of the Nation's prosperity than I can in any other way. That prosperity, I fervently pray, will very soon be restored. Its restoration will bring to every one of our citizens, including the veterans, blessings far greater than this bill contemplates.

Mr. STUDLEY. Mr. Speaker, representing the State of New York at large in this House, I shall vote for this bill. I am moved to this course by the force of the enlightened conscience of the people of my State. The intelligent public opinion of the State demands it; my own conscience demands it.

I am not unmindful of that element of the opulent of my State who oppose this measure. Their opposition is powerful. The National Economy League is arrayed against it, among whose membership are those officers and directors of the ship-subsidy companies who perpetrated the ship-subsidy scandals. I shall speak of them next fall. It was this same group who in 1917, when there was a threat of a potential invasion, cried out vociferously for security and safety. Then our unarmed ships were being sunk on the high seas. Our citizens traveling on lawful and peaceful errands were being murdered. Then it was that they appealed to our young men entering the American Army: "Give us security for our wealth and our possessions. Save us, or we perish!"

Responding to these appeals and to the call to duty, our young manhood took up arms and joined the colors, like heroes, and supplied that safety and security demanded. Our fighting men, the veterans, made the sacrifices.

Now our opulent are willing to pay for their safety and security only in the lives and broken bodies of other men.

Now for the veteran it is:

"Chuck him out, the brute!"
But it's "Saviour of 'is country"
When the guns begin to shoot.

Let the opulent ask themselves:

What would their wealth and property now be worth if Germany had won the war? The Crown Prince of the Hohenzollerns would now be sitting in the White House.

The status of the veteran will not be fixed by any proclamation or decree. It will not be fixed ultimately by any act of the Congress. The status of the veteran, like that of the Father of His Country, will be fixed in the minds and hearts of his countrymen, and like our immortal Washington, the veteran, too, will stand:

First in war, first in peace, and first in the hearts of his countrymen.

The fighting man has always been a popular hero since David slew Goliath. He will remain so to the end of time in spite of all the slander and vituperation of his detractors.

Mr. McGRATH. Mr. Speaker, during my campaign I made the most definite commitments for an immediate cash payment of the adjusted-service certificates. I see no reason for reversing my position. As a matter of fact, I am more convinced than ever not only that the payment is the wiping out of a long-overdue obligation but also that the distribution of approximately $2,200,000,000 would do more to restore purchasing power than any other single act during this emergency.

If it be argued that this is the payment of a debt not yet due, the answer is that the adjusted-service certificate, commonly known among ex-service men as the "graveyard bonus", was accepted in its present form only after definite assurances that the then President would veto any other measure—he vetoed this measure. It constituted a long and brutally unnecessary delay of a debt then overdue.

A vast majority of the service men, in their distress, have already borrowed to the limit upon these certificates. If we are Shylocks, all that we need to do is to sit tight, and scarcely a man will receive 5 percent of the face value of his certificate in 1945, unless he is so fortunate as to die before that date.

I intend to vote for this measure introduced by Representative PATMAN for the following reasons:

First. It pays a just debt.

Second. It puts money into circulation where it is most needed—in the hands of the ordinary citizen in every rural area, hamlet, village, and city in the land.

Third. It will not overstrain national credit. The money used in payment is already sufficiently backed by the reserve now in the Treasury.

Fourth. It meets the obligation without further increasing the interest charges upon our national debt. No one would dream that the issuance of a similar amount of interest-bearing bonds would wreck the Nation. On what theory would the retirement of Government obligations by non-interest-bearing money injure anyone?

We lend—and rightfully lend—national credit to distressed industry, banking, and commerce. Why not for once make an advance to John Citizen and wife? This is our opportunity.

ORDER OF BUSINESS

Mr. SNELL. Mr. Speaker, will the majority leader tell us what business will be taken up tomorrow?

Mr. BYRNS. We will resume consideration of the cotton-control bill tomorrow.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows:

To Mr. GREEN, indefinitely, on account of the illness of his mother.

To Mr. DEEN, for 4 days, on account of illness.

ELECTION CONTEST—JOHN J. CASEY *v.* C. MURRAY TURPIN

Mr. KERR, from the Committee on Elections No. 3, presented a report (No. 930) on the election contest of *John J. Casey* v. *C. Murray Turpin*, which was referred to the House Calendar and ordered printed.

SERMON BY BISHOP FREEMAN

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to insert in the RECORD, under an extension of remarks, a sermon delivered at Washington Cathedral, Sunday, March 4, 1934, by the Right Reverend James E. Freeman, D.D., LL.D., D.C.L., Bishop of Washington, upon the occasion of the anniversary of the inauguration of the present administration a year ago. This sermon is a challenge to everyone who holds office at this time.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, under the leave to extend my remarks in the RECORD, I include the following:

"Let me go, for the day breaketh. And he said, I will not let thee go, except thou bless me."

This is a portion of the dramatic story that concerns one of the great Hebrew leaders in a time of crisis. He had come to a pass in his life where a great decision had to be made and in the situation he had paused for reflection and a survey of impending conditions. Detaching himself from his company, he had sought in loneliness for a confirmation of his judgment. We read that "Jacob was left alone; and there wrestled a man with him until the breaking of the day." As the struggle increased the wrestling angel cried out against him, "Let me go, for the day breaketh", to which the sorely distressed Jacob responded, "I will not let thee go, except thou bless me." As the narrative proceeds we read that the angel blessed him, saying unto him: "Thy name shall be called no more Jacob, but Israel: for as a prince hast thou power with God and with men, and has prevailed."

Emerging from his struggle, he went forth strengthened and empowered for the mighty tasks that awaited him. So deep was the impression made upon this ancient patriarch that he "called the name of the place Peniel; for I have seen God face to face, and my life is preserved." Whether the experience that befell this leader was actual or whether it was but a vision of the night, it constituted the epochal event in his life and he went forth from it a changed man.

Repeatedly in the course of our lives experiences come to us that have a transforming effect upon our thought and our action. These experiences, rightly appraised, may mark the turning point in our careers. We move along our course undisturbed by the commonplace and passing events of life; our days are serene and the circumstances that attend our way make little, if any, impression upon us. Our thoughts are largely concentrated upon those things that concern our self-interests, interests that play no important part in the more comprehensive scheme of things. We are simply one of the crowd, and with the crowd we move, and the sense of purpose and objective is foreign to us. The need of divine direction and the inspiration that proceeds from a larger consideration of our utter dependence upon God is alien to us. It is only when some critical situation arises that vitally affects the cherished concerns of our life that we have recourse to those more secret sources of power without which life is vague, misty, and uncertain. Few of us come to any place of efficient living or to a service that contemplates real sacrifice and the employment of the better elements of our nature unless under the compulsion of some mighty and moving experience.

As we survey the record of the great epochal movements that have stirred individuals and peoples to some fine action, we inevitably discover that it was force of circumstance, a crisis, a seemingly insoluble problem that provoked the qualities and resources of their better selves. The world's great heroisms have not been disclosed in days when men were complacent, smug, and self-satisfied. Cardinal Mercier and the late King Albert of Belgium did not challenge the attention and admiration of an applauding world until a dark shadow fell across the land of their devotion, imperiling its people and implying wide-spread disaster.

Leadership of one kind and another inevitably has its genesis in situations that try the hearts and souls of men. We do not disclose our best until the days of testing are upon us. Our latent powers are not exercised or brought into action until some crisis calls them forth. Self-dependence gives place to God-dependence only when our own impotence is made evident to us. It took a cross with a lonely Saviour hanging thereon to focus the devotion of a reverent world. Well did a modern analyst of history affirm that, the uplifted Son of God upon the cross is the most appealing and inspiring fact in the long history of the race. While we do not seek them and are appalled when they come, the stern disciplines of life that try men's souls prove ultimately to be the means to the highest expression of their moral and spiritual worth. It may be that our best thoughts as well as our highest resolves come from our night thoughts. Adversity may be a hard taskmaster, but through adversity we come to a right self-appraisal and to a finer understanding of the meaning of the issues of life. Individuals as well as peoples do not grow strong through pursuing the line of least resistance. Both observation and experience confirm this.

We would not lose from the record of our life as individuals or as a people those evidences of awakened zeal and virtue that have followed upon days when shadows hung low on our horizons. The periods that bring the blush to our cheeks are those where every wind was favorable, seas calm, and we pursued our insular and selfish course. It is true that we have shown impatience and rebelled at our misfortunes. We have too often regarded ourselves as immune to the ills that befall other peoples, but when our day of better and calmer judgment has come and we have rightly appraised our fortunes and our misfortunes, we have stiffened ourselves to meet our ills, and from them we have emerged a stronger, stabler, and better people.

Had Jacob sought some gift, some enduement of physical strength from the wrestler of the midnight hours, he would have emerged from his struggle with nothing of advantage other than the satisfaction of his selfish desires. He knew he was entering upon an experience, an experience that he could not avoid, that would test his strength to the utmost, hence what he sought above all else was a blessing, a blessing that should inspire him with courage and fortitude to resist and overcome in the day of his supreme need.

The whole incident is finely illustrative of experiences that repeatedly befall us in the course of our life's pilgrimage. Whether we seek to avoid it or not, we cannot escape the night when shadows gather about our paths and the way of our course is obscured to our vision. These experiences are necessarily lonely ones when we wrestle single-handed with the forces that conspire to hinder, embarrass, and defeat us. The very loneliness of our testing hours makes the strain of the experience the greater and proves either the efficiency or the inefficiency, the value or the valuelessness of the philosophy of life we hold. When we are stripped of all the artificial and superficial means and conceits by which in fairer days we have maintained our course and are driven back upon our reserves, our strength of will, our fortitude, and our moral worth we are compelled, whether we will or not, to call forth the best that is in us (and that at any cost), that we may win again our place of security and peace.

It is a lamentable and tragic thing when we regard the mishaps and misfortunes of life as accidents, or as the decrees of some blind fate. It is still more tragic where we cannot glean from these stern experiences that which they are designed to teach of those deeper, finer, more lasting values that constitute the supreme ends of life. There is not one among us but traces what he has of mental, moral, and spiritual worth to some hour, some period in his life in which all that he had and was was tried to the utmost, when from the baser ores was extracted the priceless metal that represented the finer qualities of mind and heart.

"We rise by things that are under our feet,
By what we have mastered of good and gain;
By the pride deposed and the passion slain,
And the vanquished ills that we hourly meet."

As we study the changing moods and manners of our modern world, as we observe the swiftly changing trends and tendencies of the passing days, we are compelled to wonder what is to accrue to us of value, as the result of the days of deep anxiety and strain. Is there that in our developed life that has lacked certain elements of strength and power; have we grown so strong in our own conceits and in our self-esteemed capacities to carry on that we have lost that consciousness of God-dependence, that moral worth, that strength of soul that, in other days, has been the sustaining source of our security, our happiness and our peace? Have we as a people been so bent upon those things that concern material wealth and the satisfaction of our capricious desires that we have come to believe that within ourselves resided a kind of genius that would never fail us, come what might? Have we in our domestic, social, and industrial life regarded ourselves as impeccable, above reproach, so clean, respectable, and wholesome that we could dispense with those moral and spiritual values, those elements that refine and ennoble life, that in other days and under less favoring conditions have been our stay and strength? Are we not compelled, even against our stubborn wills, to reappraise ourselves, our institutions, our systems, and our designs, that out of these days of trial and misfortune we may come to the new morning of our larger and fuller life?

We dare not believe, as individuals or as a people, that through the exercise of our own genius we are to attain that consummation that we normally seek. If we would set our feet in the way of recovery, true penitence and deep humility must mark our course. In returning and rest shall we be saved; in quietness and confidence shall be our strength.

Something has happened in this old world of ours, something has happened that is designed to focus our vision upon those mighty and eternal truths that were given to mankind by Jesus Christ. We have failed, and failed miserably in the past because of our exaggerated sense of self-sufficiency, our boasted skill, our cunning craftsmanship, and our vaunted genius. Great as these are they prove inadequate in a storm; something has been lacking. It is something that has to do with our moral and spiritual well-being. Our professed religion has played a small and inconspicuous part in determining our action and shaping our course. Like the king in Hamlet, we may well say:

"My prayers fly up, my thoughts remain below,
Words without thoughts never to heaven go."

The inconsistencies and inequities that are conspicuous in our life have grown apace. We had thought to build our modern Babylon strong, stable, and secure by our unexampled cleverness, our extraordinary astuteness, and our unparalleled ingenuity. We have gone through a period of stern wrestling with our nocturnal enemy; have we reached the stage where our sense of impotence and incapacity to carry on forces us to cry out: "I will not let thee go, except thou bless me."

No consistent appraisal of the events of recent years, whether here or in other lands, can ignore the fact that, moral laxity and supineness have been conspicuous in our life. We shall pass through every strain that is laid upon us—of this we feel sure; we shall meet and survive every crisis as it arises—of this we are certain. The large and compelling question is, What shall we garner from these experiences? What shall be the evidence in our individual and corporate life that we are made the better and the stronger for that which we have suffered and endured? Of Jesus Christ it was written that, He was made "perfect through suffering." The hardships that He endured, the pain and grief that He experienced, have brought Him within the range of our thinking and made Him kin with us. The sublimity of His example as He hung upon the cross has provoked the wonder, the admiration, and the worship of men the world over. By His incomparable example He has shown to those of us who would in humility accept His teachings and follow in His way of life, that if we would enjoy the blessings which He alone can bestow, we must with readiness of will and definiteness of purpose take up our cross daily and come after Him.

The world may not have learned the lessons which the tragic happenings of 4 long years of strife were designed to teach. It may have failed to learn that the millions who died made the supreme sacrifice that this might become a peace-loving and warless world. It is unthinkable—let us believe, impossible—that from the events of these later years that have been marked by world-wide suffering, we are to secure no lasting benefits, no strengthening of our character, no enrichment of our lives, no permanent blessings. The oncoming generation of youths will hardly with courage face the future, unless they witness in these days of trial and testing the evidences of an awakened conscience, a strengthened will, and the promise of a revival of those splendid qualities of mind and heart that alone are designed to make this old world a more fit place in which to live.

Let us seek through consistent endeavor to set our house in order; let us with self-sacrificing zeal consolidate our forces to hasten forward the day of better things. Let us learn out of our common sufferings and trials the value of a united endeavor, but let us not lay the flattering unction to our souls that prowess, skill, and cleverness are the hallmarks of secured success and restored prosperity. Ours is a new fullness of time. A mighty and persistent cry is heard in this distracted, confused, and disillusioned world; it is the cry of the human soul, the wrestling, struggling soul as it sees the light of a new day breaking. From vast multitudes it issues forth like some stupendous chorus, we hear the voices of those who out of the long-continued struggle with a mighty and seemingly all-powerful energy cry out: "I will not let thee go, except thou bless me."

In his dying hours, a war President seemed to evision in the on-coming years the gleam of a new and better day of promise. With diming eyes he confidently affirmed: "The light is shining on the road ahead, and it shines nowhere else." Behind were the shadows, behind were the days of selfish striving and un-Christian conflict. There were better things ahead. For this he hoped and for this he prayed. Are we prepared to set forward the coming of this day? Have we the strength of will, the generosity of spirit, the renewed moral courage to hasten it on?

Standing on a silent battlefield where men had courageously and according to their loyalties sacrificed their all, another war President eloquently affirmed that, from the honored dead we, as a people, should highly resolve to take increased devotion, that what these brave men had struggled and died for should not be in vain.

This is a momentous and holy hour, an hour that challenges the very soul of America; it may be an hour that is to mark the greatest advance our Nation has ever made. It calls for the best we have to give; for decision, for consecration, for a pledge of fealty to those Christian standards of living that alone can guarantee our future happiness and peace, and, by the grace and power of the living God, make and preserve us a nation.

"If, drunk with sight of power, we loose
Wild tongues that have not Thee in awe,
Such boastings as the Gentiles use,
Or lesser breeds without the law—
Lord God of Hosts, be with us yet,
Lest we forget—lest we forget!

"For heathen heart that puts her trust
In reeking tube and iron shard,
All valiant dust that builds on dust,
And guarding calls not Thee to guard,
For frantic boast and foolish word—
Thy mercy on Thy people, Lord!

—Amen."

ADJOURNMENT

Mr. BYRNS. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 14 minutes p.m.) the House adjourned until tomorrow, Tuesday, March 13, 1934, at 12 o'clock noon.

COMMITTEE HEARINGS

COMMITTEE ON INTERSTATE AND FOREIGN COMMERCE

(Tuesday Mar. 13, 10 a.m.)

Continuation of hearings on stock-exchange regulation.

COMMITTEE ON THE PUBLIC LANDS

(Tuesday, Mar. 13, 10:30 a.m.)

Room 328, House Office Building.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

380. A letter from the Chairman of the Interstate Commerce Commission, transmitting recommendations and a report thereon from the Federal Coordinator of Transportation (S.Doc. No. 152); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

381. A letter from the Secretary of War, transmitting a letter from the Chief of Engineers, United States Army, dated March 9, 1934, submitting a report, together with accompanying papers, on a preliminary examination and survey of Cape Charles Harbor, Northampton County, Va., authorized by the River and Harbor Act approved July 3, 1930; to the Committee on Rivers and Harbors.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. RAYBURN: Committee on Interstate and Foreign Commerce. Senate Joint Resolution 74. Joint resolution authorizing necessary funds to conduct investigation regarding rates charged for electrical energy and to prepare report thereon; without amendment (Rept. No. 925). Referred to the Committee of the Whole House on the state of the Union.

Mr. AYERS of Montana: Committee on Indian Affairs. H.R. 7600. A bill repealing certain sections of the Revised Code of Laws of the United States relating to the Indians; without amendment (Rept. No. 927). Referred to the Committee of the Whole House on the state of the Union.

Mr. JEFFERS: Committee on Immigration and Naturalization. H.R. 8309. A bill to extend the period during which certain aliens may remain in the United States; without amendment (Rept. No. 929). Referred to the House Calendar.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII,

Mr. PEAVEY: Committee on Indian Affairs. H.R. 7560. A bill for the relief of Charles E. Dagenett; without amendment (Rept. No. 926). Referred to the Committee of the Whole House.

Mr. KNUTE HILL: Committee on Indian Affairs. H.R. 8074. A bill for the relief of certain Indians of the Fort Peck Reservation, Mont.; without amendment (Rept. No. 928). Referred to the Committee of the Whole House.

Mr. KERR: Committee on Elections No. 3. Report to accompany contested-election case of *John J. Casey* v. *C. Murray Turpin* (Rept. No. 930). Referred to the House Calendar and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. HILL of Alabama: A bill (H.R. 8598) authorizing the National Forest Reservation Commission to proceed in its discretion with the acquisition of lands for national

forests in States east of the Mississippi River; to the Committee on Agriculture.

By Mr. BUCKBEE: A bill (H.R. 8599) to provide for loans to manufacturing, industrial, commercial, and mercantile establishments; to the Committee on Banking and Currency.

By Mr. SMITH of Washington: A bill (H.R. 8600) to provide for the construction of a post-office and Federal building at Vancouver, Wash.; to the Committee on Public Buildings and Grounds.

By Mr. CONDON: A bill (H.R. 8601) authorizing the establishment of a national cemetery in the State of Rhode Island; to the Committee on Military Affairs.

By Mr. DARDEN: A bill (H.R. 8602) to authorize alterations and repairs to certain naval vessels; to the Committee on Naval Affairs.

By Mr. GREENWOOD: A bill (H.R. 8603) authorizing Sullivan County, Ind., to construct, maintain, and operate a public toll bridge across the Wabash River at a point in said county to a point opposite on the Illinois shore; to the Committee on Interstate and Foreign Commerce.

By Mr. BEITER: A bill (H.R. 8604) to provide for the establishment of a system of unemployment insurance, and for other purposes; to the Committee on Labor.

By Mr. ARENS: Joint Resolution (H.J.Res. 294) to instruct the Federal Trade Commission to investigate the manufacture, sale, and distribution of agricultural implements and machinery and report its findings to Congress; to the Committee on Interstate and Foreign Commerce.

MEMORIALS

Under clause 3 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of New York, memorializing Congress to provide funds of the Federal Government to supplement the appropriations of the State of New York for the proper river regulation and flood control of the Mohawk River and its various tributaries; to the Committee on Flood Control.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. CONNERY: A bill (H.R. 8605) for the relief of William John Joseph Sullivan; to the Committee on Naval Affairs.

Also, a bill (H.R. 8606) for the relief of Frederick Edward Reynolds (deceased); to the Committee on Naval Affairs.

By Mr. DARDEN: A bill (H.R. 8607) for the relief of Hudson Bros., of Norfolk, Va.; to the Committee on Claims.

By Mr. DISNEY: A bill (H.R. 8608) for the relief of Jim German; to the Committee on Military Affairs.

Also, a bill (H.R. 8609) for the relief of Thomas F. Harvey; to the Committee on Military Affairs.

By Mr. ELLENBOGEN: A bill (H.R. 8610) granting a pension to Nellie Kunkel; to the Committee on Pensions.

By Mr. LAMNECK: A bill (H.R. 8611) for the relief of Frederick Glad Corcoran; to the Committee on Naval Affairs.

By Mr. McLEOD: A bill (H.R. 8612) to refund to the estate of Clinton G. Edgar income tax erroneously or illegally collected; to the Committee on Claims.

By Mr. MARTIN of Oregon: A bill (H.R. 8613) granting a pension to Myrtle J. Buzan; to the Committee on Pensions.

By Mr. PEYSER: A bill (H.R. 8614) for the relief of Alice F. Martin, widow, and two minor children; to the Committee on Military Affairs.

By Mr. REID of Illinois: A bill (H.R. 8615) granting a pension to Marie Orlomowski; to the Committee on Pensions.

By Mr. SMITH of Virginia: A bill (H.R. 8616) for the relief of Lawrence A. Jett; to the Committee on Claims.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

2922. By Mr. AYRES of Kansas: Petitions of citizens of Wichita and Belle Plaine, Kans., protesting against the passage of Senate bill 2000; to the Committee on Interstate and Foreign Commerce.

2923. By Mr. BEITER: Petition of the Buffalo Chamber of Commerce, Buffalo, N.Y., opposing certain provisions of Senate bill 2693 providing for the regulation of national securities; to the Committee on Interstate and Foreign Commerce.

2924. Also, petition of the Assembly and Senate of the State of New York, urging that the Congress of the United States provide funds to supplement appropriations of the State of New York for the proper river regulation and flood control of waterways; to the Committee on Flood Control.

2925. By Mr. BOYLAN: Resolution adopted by the Senate of the State of New York, petitioning Congress to provide funds of the Federal Government to supplement the appropriations of the State of New York for the proper river regulation and flood control of the waterways of the Mohawk River and its various tributaries in the area of the Hudson River Valley, etc.; to the Committee on Rivers and Harbors.

2926. By Mr. COLLINS of California: Petition of David E. Gobar, Jess L. Huff, and 29 other residents of San Bernardino County, Calif., urging restoration of pension benefits to veterans of the Spanish-American War and their dependents; to the Committee on Pensions.

2927. By Mr. CONDON: Resolution of the General Assembly of the State of Rhode Island, requesting the establishment of a national cemetery in Rhode Island; to the Committee on Military Affairs.

2928. By Mr. CONNERY: Resolutions of the City Council, Revere, Mass., endorsing pending legislation before Congress, having for its purpose the furtherance of legislation amplifying the powers of the Home Owners' Loan Board, so as to permit the loaning of money to home owners for the modernization and repair of present existing dwelling houses in need of the same; to the Committee on Banking and Currency.

2929. Also, resolutions of the General Court of Massachusetts, memorializing the President and the Congress of the United States relative to increasing the existing immigration quotas so as to enable persecuted Jewish people in Germany to enter the United States; to the Committee on Immigration and Naturalization.

2930. By Mr. CULKIN: Petition of George E. Mount and sundry other citizens of Central Square, N.Y., protesting against the enactment of the Vinson-Trammell naval bill; to the Committee on Naval Affairs.

2931. Also, memorial of the Legislature of the State of New York, asking that Congress provide funds to supplement the appropriations of the State of New York for the proper river regulation and flood control of waterways within that State; to the Committee on Rivers and Harbors.

2932. By Mr. CULLEN: Petition of the Senate and Assembly of the State of New York, urging Congress to provide funds of the Federal Government to supplement the appropriations of the State of New York for the proper river regulation and flood control in the region of the Mohawk River and its various tributaries and in the area of the Hudson River Valley north of the Federal lock at Troy, N.Y.; to the Committee on Flood Control.

2933. By Mr. FORD: Resolution by City Council of Los Angeles, petitioning the Federal Government to transfer its official designation of an air-mail aviation field for the city of Los Angeles to the Los Angeles Municipal Airport, together with other Federal aviation services pertaining thereto, for permanent location; to the Committee on the Post Office and Post Roads.

2934. Also, resolution of Los Angeles section, American Society of Civil Engineers, protesting against the elimination from the Budget of the Department of Agriculture of provisions for the research work carried on by the Division of Irrigation of the Bureau of Agricultural Engineering of the Department of Agriculture; to the Committee on Agriculture.

2935. Also, resolution of Grand Parlor Native Sons of the Golden West, urging adoption of bill to provide free transportation of Filipinos from the United States to the Philippine Islands in United States Government transports, with a stipulation therein to provide that those so returned shall not be permitted to return to the United States; to the Committee on Insular Affairs.

2936. Also, resolution of Los Angeles section, American Society of Civil Engineers, protesting against the insufficient amount provided for Federal-State cooperation under the Geological Survey for stream gaging and topographic mapping; to the Committee on Mines and Mining.

2937. Also, resolution by City Counsel of Los Angeles, petitioning Secretary of the Navy Swanson to retain all present and contemplated Coast Guard facilities at Los Angeles Harbor; to the Committee on Naval Affairs.

2938. By Mr. GOODWIN: Resolution in the nature of a memorial of the New York State Senate, Albany, N.Y. (if the Assembly concur), that the Congress of the United States be, and it is hereby, respectfully memorialized to provide funds of the Federal Government to supplement the appropriation of the State of New York for the proper river regulation and flood control of the waterways as aforesaid and enact the necessary legislation in carrying into effect such work; to the Committee on Flood Control.

2939. By Mr. HAINES: Resolution from Upton-Welsh Run Woman's Christian Temperance Union, Franklin County, Pa., endorsing House bill 6097 for the Federal supervision of motion pictures; to the Committee on Interstate and Foreign Commerce.

2940. By Mr. JAMES: Petition of Hon. J. E. Clements, county clerk, and Harvey W. Raymond, deputy county clerk, of Baraga County, Mich., for board of supervisors, favoring House bill 7598; to the Committee on Labor.

2941. By Mr. KVALE: Petition of citizens of Marshall, Minn., urging passage of the Frazier bill and bill for payment of soldiers' bonus; to the Committee on Ways and Means.

2942. Also, petition of members of the Unemployed Veterans' Home, Minneapolis, Minn., urging enactment of the bonus bill; to the Committee on Ways and Means.

2943. By Mr. LAMBERTSON: Resolution of Local No. 304, I.B.E.W., of Topeka, Kans., urging passage of House bill 7986; to the Committee on Merchant Marine, Radio, and Fisheries.

2944. By Mr. LINDSAY: Petition of the Senate of the State of New York, Albany, for funds to supplement the appropriations of the State of New York for proper river regulation and flood control; to the Committee on Flood Control.

2945. Also, petition of the New York Post Office Clerks' Association, Inc., New York City, opposing payless furloughs; to the Committee on the Post Office and Post Roads.

2946. Also, petition of the E. W. Rose Co., Cleveland, Ohio, opposing the Sirovich and Copeland bills; to the Committee on Interstate and Foreign Commerce.

2947. By Mr. MILLARD (by request): Petition signed by members of the James Daley Post, Veterans of Foreign Wars, Hastings-on-Hudson, N.Y., urging immediate payment of the bonus; to the Committee on Ways and Means.

2948. Also (by request), petition signed by residents of the town of Rye, N.Y., opposing the passage of House bill 5812; to the Committee on the District of Columbia.

2949. By Mr. RICH: Petition of ministers of denominational churches and other religious organizations of Williamsport, Pa., favoring peace; to the Committee on Foreign Affairs.

2950. Also, petition of the Women's Foreign Missionary Society of the Methodist Episcopal Church, the Woman's Christian Temperance Union, and the Free Methodist Church, all of Duke Center, Pa., favoring House bill 6097; to the Committee on Interstate and Foreign Commerce.

2951. By Mr. RUDD: Petition of the E. W. Rose Co., Cleveland, Ohio, opposing the passage of the Sirovich-Copeland bills; to the Committee on Interstate and Foreign Commerce.

2952. Also, memorial of the Legislature of the State of New York, favoring additional appropriation to supplement the appropriations of the State of New York for the proper river regulation and flood control of the waterways; to the Committee on Flood Control.

2953. By Mr. SNELL: Memorial of the Senate and Assembly of New York State, memorializing Congress to provide funds of the Federal Government to supplement the appropriations of the State of New York for the proper river regulation and flood control of the waterways as aforesaid, and enact the necessary legislation in carrying into effect such work; to the Committee on Flood Control.

2954. By Mr. SWICK: Petition of Beaver County, Pa., Woman's Christian Temperance Union, Mrs. M. J. Patterson, 439 College Avenue, president, and Mrs. Fisher Addis, 715 Eleventh Street, Beaver Falls, Pa., secretary, urging early hearings and favorable action on House bill 6097 providing higher moral standards for films entering interstate and international commerce; to the Committee on Interstate and Foreign Commerce.

2955. By Mr. WOODRUFF: Petitions from Disabled American Veterans of World War, urging restoration of all pre-Economy Act pension benefits to veterans with service-connected disabilities; to the Committee on World War Veterans' Legislation.

2956. Also, petitions from the Watch Tower Bible and Tract Society, regarding freedom of broadcasting; to the Committee on Merchant Marine, Radio, and Fisheries.

2957. By the SPEAKER: Petition of the city of Cleveland, Ohio, proposing a plan for paying off depositors in closed banks; to the Committee on Banking and Currency.

SENATE

TUESDAY, MARCH 13, 1934

(Legislative day of Wednesday, Feb. 28, 1934)

The Senate met at 11 o'clock a.m., on the expiration of the recess.

DISPOSITION OF USELESS PAPERS

The VICE PRESIDENT laid before the Senate a letter from the Assistant to the Secretary of Labor, transmitting, pursuant to law, a list of papers on the files of the Department which are not needed in the conduct of business and have no historical interest, and asking for action looking toward their disposition, which was referred to a Joint Select Committee on the Disposition of Useless Papers in the Executive Departments.

The VICE PRESIDENT appointed Mr. WALSH and Mr. BORAH the committee on the part of the Senate.

PETITIONS AND MEMORIALS

The VICE PRESIDENT laid before the Senate a petition of sundry citizens of Roxbury, Mass., praying that the United States be kept free from foreign entanglements, which was referred to the Committee on Foreign Relations.

Mr. ROBINSON of Arkansas presented a letter from Walter Parker, of New Orleans, La., relative to stock-exchange regulation legislation, which was referred to the Committee on Banking and Currency.

REPORTS OF COMMITTEES

Mr. GOLDSBOROUGH, from the Committee on Banking and Currency, to which was referred the bill (S. 2966) to authorize the coinage of 50-cent pieces in commemoration of the three hundredth anniversary of the founding of the Province of Maryland, reported it without amendment and submitted a report (No. 467) thereon.

Mr. COPELAND, from the Committee on Appropriations, to which was referred the bill (H.R. 8471) making appropriations for the military and nonmilitary activities of the War Department for the fiscal year ending June 30, 1935, and for other purposes, reported it with amendments and submitted a report (No. 469) thereon.

SALE AND DISTRIBUTION OF DAIRY PRODUCTS IN THE DISTRICT

Mr. KING, from the Committee on the District of Columbia, submitted a report, pursuant to Senate Resolution 76, providing for an investigation of conditions respecting the sale and distribution of dairy products in the District of Columbia, which was ordered to be printed as Report No. 468.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

Mr. McKELLAR, from the Committee on Post Offices and Post Roads, reported favorably the nominations of sundry postmasters, which were ordered to be placed on the calendar.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. ROBINSON of Arkansas:

A bill (S. 3044) granting a pension to Eleanora Emma Bliss; to the Committee on Pensions.

By Mr. DAVIS:

A bill (S. 3045) to provide for needy blind persons of the District of Columbia; to the Committee on the District of Columbia.

By Mr. NEELY:

A bill (S. 3046) creating the Sistersville Bridge Commission and authorizing said commission and its successors and assigns to construct, maintain, hold, and operate a highway bridge across the Ohio River at or near Sistersville, W.Va.; to the Committee on Commerce.

By Mr. COOLIDGE:

A bill (S. 3047) to carry out the findings of the Court of Claims in the case of George Lawley & Son Corporation, of Boston, Mass.; to the Committee on Claims.

By Mr. BORAH:

A bill (S. 3048) granting a pension to James N. Davis (with accompanying papers); to the Committee on Pensions.

ENACTMENT OF A LAW

Mr. HAYDEN. Mr. President, I present and ask to have referred to the Committee on Printing, with a view to having it printed as a document, a pamphlet prepared in the office of the Secretary of the Senate entitled "Enactment of a Law—Legislative Procedure on a Senate Bill."

The VICE PRESIDENT. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Latta, one of his secretaries, who also announced that the President had approved and signed the following acts:

On March 10, 1934:

S. 1115. An act to authorize the Department of Agriculture to issue a duplicate check in favor of Department of Forests and Waters, Commonwealth of Pennsylvania, the original check having been lost;

S. 2277. An act to establish fish and game sanctuaries in the national forests; and

S. 2529. An act to promote the conservation of wild life, fish, and game, and for other purposes.

On March 12, 1934:

S. 1083. An act authorizing adjustment of the claim of the Potomac Electric Power Co. of Washington, D.C.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Chaffee, one of its clerks, announced that the House has passed a bill (H.R. 1) to provide for controlled expansion of the currency and the immediate payment to veterans of the face value of their adjusted-service certificates, in which it requested the concurrence of the Senate.

ENROLLED BILL SIGNED

The message also announced that the Speaker had affixed his signature to the enrolled bill (H.R. 7199) making appropriations for the Navy Department and the naval service for the fiscal year ending June 30, 1935, and for other purposes, and it was signed by the Vice President.

GREAT LAKES-ST. LAWRENCE WATERWAY TREATY

Mr. ROBINSON of Arkansas. I move that, as in open executive session, the Senate proceed to the consideration of the Great Lakes-St. Lawrence Deep Waterway Treaty.

The VICE PRESIDENT. The question is on the motion of the Senator from Arkansas.

The motion was agreed to; and the Senate, as in Committee of the Whole and in open executive session, resumed the consideration of Executive C (72d Cong., 2d sess.), a treaty between the United States and the Dominion of Canada for the completion of the Great Lakes-St. Lawrence deep waterway, signed on July 18, 1932.

Mr. ROBINSON of Arkansas. I suggest the absence of a quorum.

The VICE PRESIDENT. The clerk will call the roll.

The legislative clerk called the roll, and the following Senators answered to their names:

Adams	Davis	King	Robinson, Ind.
Ashurst	Dickinson	La Follette	Russell
Austin	Dieterich	Lewis	Schall
Bailey	Dill	Logan	Sheppard
Bankhead	Duffy	Lonergan	Shipstead
Barbour	Erickson	Long	Smith
Barkley	Fess	McAdoo	Stelwer
Black	Fletcher	McCarran	Stephens
Bone	Frazier	McGill	Thomas, Okla.
Borah	George	McKellar	Thomas, Utah
Bulkley	Gibson	McNary	Thompson
Byrd	Glass	Metcalf	Townsend
Byrnes	Goldsborough	Neely	Trammell
Capper	Gore	Norris	Tydings
Caraway	Hale	Nye	Vandenberg
Carey	Harrison	O'Mahoney	Van Nuys
Clark	Hastings	Overton	Wagner
Connally	Hatch	Patterson	Walcott
Coolidge	Hatfield	Pittman	Walsh
Copeland	Hayden	Pope	Wheeler
Costigan	Johnson	Reed	White
Couzens	Kean	Reynolds	
Cutting	Keyes	Robinson, Ark.	

Mr. ROBINSON of Arkansas. I desire to announce that the Senator from Tennessee [Mr. BACHMAN], the Senator from New Hampshire [Mr. BROWN], and the Senator from South Dakota [Mr. BULOW] are necessarily detained from the Senate, and that the Senator from Iowa [Mr. MURPHY] is absent because of a severe cold.

Mr. FESS. I wish to announce that the Senator from Rhode Island [Mr. HEBERT] and the Senator from South Dakota [Mr. NORBECK] are necessarily absent from the Senate.

The VICE PRESIDENT. Ninety Senators have answered to their names. A quorum is present.

Mr. CLARK. Mr. President, I have talked so much inside of this Chamber and outside, in my own time and in that of other Senators on the subject of the St. Lawrence Treaty that I have some hesitation in detaining the Senate at this late hour in the debate. Nevertheless, I shall hope, in my brief remarks on the St. Lawrence Treaty today, to lay some of the ghosts which have been evolved from the inner consciousness of the proponents of the treaty as explanations or charges as to the course pursued by those of us who oppose that pact. These bugaboos, I cannot assert too strongly, are mere straw men set up for the purpose of being knocked down. On one hand we are assured that all opposition must have its origin in the most narrow-minded nationalism, in inveterate Anglophobia, in the blindest hatred for Canada. By others it is announced that the opponents of this surrender of American rights must wear the livery of the House of Morgan and be under the domination of that big bad wolf of Wall Street, the Power Trust. The distinguished Senator from Nevada [Mr. PITTMAN] solemnly assured the Senate that the opposition takes its source from the nefarious railroads.

It is difficult to determine, Mr. President, which of these assertions is the most preposterous and the most calculated to mislead. Their employment and the presistent resort to the artifice of continual discussion of a general St. Lawrence seaway project rather than a frank exposition of

the specific details of this particular treaty fully reveal the desperation of the proponents of this treaty and the weakness of their position.

Certainly, Mr. President, opposition to this treaty involves no animosity whatever toward our Canadian neighbors. They are our best customers and we are theirs. They speak our language and we speak theirs. But for the courage and heroism of the unknown British gunner who, at the storming of Quebec during the Revolutionary War, fired the fatal gun which killed General Montgomery, wounded Col. Benedict Arnold, and routed the victorious American column, Canada would almost certainly have been a part of the United States at the close of the Revolution. Many years later Canada would in all probability have drifted into the Union had not our own stupid and selfish policy in enacting high tariff barriers between the two countries forced Canada to develop her own resources, her own industrial system, and fostered her national pride until she now looms as our greatest commercial rival for the future.

For 12 decades we have dwelt in entire peace and amity with our neighbor to the north. Our treaty for disarming the international boundary is the only permanently successful arrangement for disarmament in the history of the world. In the World War Canadian boys and American boys fought shoulder to shoulder, bled in the same cause, and died side by side in the greatest carnage in history, and they came out of the struggle with the greatest possible respect and admiration for each other.

So there is absolutely no reason why those of us who are opposing the ratification of the treaty should feel anything of prejudice or rancor toward the stalwart people of the North. Indeed, Mr. President, for myself I must confess an honest, even if very mournful and somewhat envious, admiration for the mastery of diplomacy and dominance in negotiation which enabled their representatives to achieve so complete and amazing victory over our own. I can well understand the acclaim of press and public in Canada which has greeted their triumph. Would that the United States had been represented by negotiators of equal ability and pertinacity.

Mr. President, I stated to the Senator from Nevada during the course of his very able speech opening this debate that multitudes of the American people have favored the general principle of the development of the St. Lawrence seaway who are nevertheless bitterly opposed to the pending treaty. The distinguished Chairman of the Committee on Foreign Relations cannot make the American people believe that men who have spent years of service in devotion to the cause of the development of a great national system of waterways for cheap water transportation are actuated by a desire to serve the railroads when they oppose this treaty.

Mr. LONG. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Louisiana?

Mr. CLARK. I yield.

Mr. LONG. I think, in fairness to the Chairman of the Committee on Foreign Relations, it ought to be stated that he was not in a position to have anything to do with the negotiation of this treaty, but that it was thrown in his lap and he had to make the best of it.

Mr. PITTMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Missouri yield to the Senator from Nevada?

Mr. CLARK. I yield.

Mr. PITTMAN. Apologizing for the interruption of the Senator from Louisiana and my necessary response to his suggestion, I wish to say that it is very kind and generous of the distinguished Senator from Louisiana to undertake to defend the Senator from Nevada. I hope at some time I may be moved to defend the Senator from Louisiana.

Mr. LONG. I thank the Senator.

Mr. CLARK. Mr. President, even the eloquence and prestige of the Senator from Nevada, Chairman of the Foreign Relations Committee, cannot give verisimilitude to the proposition that organizations like the Mississippi Valley Association and the Atlantic Deeper Waterway Association are seeking to hamstring the cause of water transportation in the interest of the railroads.

Similarly, Mr. President, even the Senator from Wisconsin, for whom I entertain the deepest affection and respect, cannot impart plausibility to the inference that men who throughout their political careers have vigorously and devotedly opposed Wall Street and its influences, who have struggled to prevent the exploitation of great natural resources by selfish interests, who in the present Congress have voted for the Securities Act and the Muscle Shoals bill, have been suddenly seduced to oppose a great waterway project because its incidental and subordinate purpose is to produce some 5,000,000 horsepower of electrical energy, of which Canada gets 4,000,000 and the United States 1,000,000.

Nor could anything be further from the truth than the suggestion that opposition to the pending treaty implies lack of respect for the views and opinions of the President of the United States, or lack of appreciation of his broad grasp of great national projects and his noble conception of the utilization of the great natural resources of the Nation in the interest of the whole people.

It has been my privilege in the last year to confer with the President as to various waterway projects in which the Mississippi Valley is interested. I have been deeply impressed on each occasion with his deep sympathy, his wide knowledge, and his power of decision in forwarding these matters. As a representative of a great State, of which the Mississippi River forms the entire eastern boundary and of which the Missouri River forms a third of the western boundary and which is traversed across its entire width by the Missouri River, I gratefully acknowledge the sympathetic consideration and the essential actual aid which the President has given to our problems since his entrance into the White House.

In approaching the present treaty it is perfectly obvious that the President has given primary consideration to the development of power in the International Rapids section, and has been actuated largely in his support of the treaty by his humanitarian desire to afford cheap electrical energy to the people of New York and adjacent States in accordance with the great plans which resulted in the organization of the New York Power Authority during his incumbency of the office of Governor of New York. We of the Mississippi Valley who oppose the treaty see in the absolute limitation put upon the diversion of water from Lake Michigan for all time a curtailment on the future development of the Lakes-to-the-Gulf project, and the making of the inland empire of the Mississippi Valley a landlocked and commercially impotent domain.

To some of the advocates of this treaty the advantages of the development of electrical power outweigh the disadvantages of the tremendous concessions made by the United States in the treaty. To us nothing can compensate for the calamity of shutting off the vast resources of our great valley in perpetuity from deep water. We see in the proposed treaty a menace to the necessary development of the system of Mississippi Valley waterways. In such a situation, Mr. President, there need not be, and should not be, any impugning of motives in a consideration of the issues to be determined. For my part, Mr. President, I may say that if I were in the President's position, and believed as he believes, I would do as he is doing in this matter. On the other hand, I have such confidence in his tolerance of view and his devotion to duty that I have every confidence that if he were in my position, and believed as I believe, he would do precisely what I and the other Senators who share my views propose doing in regard to the pending treaty.

Nothing could be more distasteful to me as a United States Senator than to be placed in the position of seeming to take a narrow or sectional view of any great proposed public improvement. These projects should be viewed from the broadest national standpoint and in the light of the principle that it is to the advantage of the whole United States to have benefit come to any section of it. In conformity with this principle we of the Mississippi Valley have cheer-

fully supported with our votes and with our taxes projects of every kind. We have supported the spending of millions by the score for the reclamation of arid lands in the West. We supported the colossal expenditures for the greatest engineering undertaking in all history—the Panama Canal. We have cheerfully seen our money poured out like water for the improvement of the harbors of the Atlantic and Pacific seaboards. We have acquiesced in the expenditure of more than a hundred and fifty millions of dollars for the improvement of the channels and harbors of the Great Lakes system. We supported the Muscle Shoals and Boulder Dam projects, and we have expected and demanded that the development of the great system of the Mississippi and its tributaries to give access to deep water to the immense agricultural and industrial empire of the Mississippi Valley should likewise be treated as a great national project.

But when we are asked, as we are now being requested in the matter of the St. Lawrence Treaty, to vote not only for the supposed benefit of another section and another nation but are also asked in the ratification of the same document to bind ourselves irrevocably and forever to the permanent isolation and penning in of most of the Mississippi Valley, then it is time that the Representatives and Senators from these States, and in a much larger sense the people of these States themselves, should awake and gird for defense.

The senior Senator from New York [Mr. COPELAND] has said that the pending St. Lawrence Treaty should be entitled "a treaty for the purpose of making Montreal the greatest port on the North American Continent." I am inclined to agree with that characterization. But the treaty should have additional titles if its true purposes were to be disclosed. It should also be entitled "a treaty to relieve the depression in Canada by the granting of an American subsidy of many millions of dollars, possibly running well into the hundreds of millions, of American taxpayers' money for the employment of Canadian labor and the purchase of Canadian material." More important still, and more calamitous in its import than either of these, it should be entitled, "a treaty for the permanent isolation and economic strangulation of the Mississippi Valley by the surrender of American rights in the internationalization of Lake Michigan, a lake lying wholly within the boundaries of the United States, and complete ownership and title to which has been asserted and maintained by the United States from time immemorial."

The construction of the Panama Canal, romantic and staggering engineering project that it was, has been a tremendous economic hardship to the Mississippi Valley. It has given so great a transportation advantage to the States of the Atlantic and Pacific coasts as against the inland States as almost to place an absolute bar in the path of our industrial development. For example, my father-in-law in his lifetime manufactured cream separators and gasoline engines at Waterloo, Iowa. Well located in the central West, with the highest type of intelligent labor constantly coming in from the farm, this town had been built from a village to a city by a few plants employing local labor from the surrounding territory. But with the construction of the Panama Canal, my father-in-law discovered that when he sold a bill of goods upon the Pacific coast, he could ship by rail to Baltimore, there place them upon a ship for transportation through the Panama Canal, and thereby save nearly a third of the freight. The mere statement of this fact is sufficient to disclose the terrific burden and handicap which has thus been imposed upon the Mississippi Valley States in their competition with the States of the seaboard; and figures and events have proved the truth of this conclusion.

The new congressional reapportionment act graphically shows the situation with all its tragic importance for the great valley. Through the decision of the Congress to maintain the House of Representatives at its present membership a larger ratio was necessarily adopted, making necessary a redistribution of Congressmen to take care of the increase of population since the last previous reapportionment. The valley States lost 17 Members of the House through this process, while a similar increase went to the coast, Lake and Gulf States with access to adequate water transportation. Industry after industry has left the Central West to move to locations affording better opportunities for water transportation. Industrial population has followed the movement of industry. Factories can move, and factory employees can follow the factories; but farms remain where God has placed them, and our farms of the Mississippi Valley must still compete in the markets of the world with the agricultural products of other sections and other nations. Whatever may be the movement of industry, our great inland empire must still have desperate need for adequate transportation facilities in our competition with the world. It is obvious and inescapable that unless the inland-waterway system of the Mississippi Valley is adequately developed the construction of the Panama Canal will prove to have been to the Mississippi Valley the greatest calamity that ever befell any large section of the habitable globe.

Mr. LONG. Mr. President, will the Senator yield right there?

The PRESIDING OFFICER (Mr. MCCARRAN in the chair). Does the Senator from Missouri yield to the Senator from Louisiana?

Mr. CLARK. I yield to the Senator.

Mr. LONG. In line with what the Senator is saying, we have gone down to the South, and developed one waterway which has practically ruined the Mississippi Valley. We have now gone up to the North to develop another waterway. The first thing we ought to have done, before we ever thought about developing these others, was to have taken care of the Missouri River, the Ohio River, the Mississippi River, and to have provided those waterways for the internal development of this country.

If the present treaty, which is calculated to do more harm to the Mississippi Valley than the Panama Canal did, shall go through, it will almost make a desert of commerce, as I see it, in the Mississippi Valley territory, and these States will defeat the very thing they have been trying to do. They will accentuate the disparity and the impossibility of carrying on business on the southern border and up the valley of the Ohio and of the Missouri clear up to Montana and all down the valley of the Mississippi.

Mr. PITTMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Missouri yield to the Senator from Nevada?

Mr. CLARK. I do.

Mr. PITTMAN. I shall take only a second.

There is so much I agree with in what the Senator from Missouri is saying that I feel like endorsing it. There is not any doubt that his statement is correct that the building of the Panama Canal, by improving and shortening the water route from the Atlantic to the Pacific Oceans, worked a disadvantage to the interior sections of the country, by reason of the fact that water rates are so much cheaper than rail rates that those who are isolated from water rates must suffer.
